INSTRUCTIONS (for information)

Public reporting burden for this collection of information is estimated to average 120 minutes per response, including time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding the burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to the Office of Management and Budget, Paperwork Reduction Project (0348-0003), Washington, DC 20503.

PLEASE DO NOT RETURN YOUR COMPLETED FORM TO THE OFFICE OF MANAGEMENT AND BUDGET. SEND IT TO THE ADDRESS PROVIDED BY THE SPONSORING AGENCY.

Please type or print legibly. Items 1, 2, 8, 9, 10, 11d, 11e, 11h, and 15 are self explanatory, specific instructions for other items are as follows:

Item	Entry
3	Enter Employer Identification Number (EIN) assigned by the U.S. Internal Revenue Service or the FICE (institution) code.
4	If this report covers more than one grant or other agreement, leave items 4 and 5 blank and provide the information on Standard Form 272A, Report of Federal Cash Transactions - Continued. Enter Federal grant number, agreement number, or other identifying numbers if requested by sponsoring agency.
5	This space reserved for an account number or other identifying number that may be assigned by the recipient.
6	Enter the letter of credit number that applies to this report. If all advances were made by Treasury check, enter "NA" for not applicable and leave items 7 and 8 blank.
7	Enter the voucher number of the last letter-of-credit payment voucher (Form TUS 5401) that was credited to your account.
11a	Enter the total amount of Federal cash on hand at the beginning of the reporting period including all of the Federal funds on deposit, imprest funds, and undeposited Treasury checks.
11b	Enter total amount of Federal funds received through payment vouchers (Form TUS 5401) that were credited to your account during the reporting period.
11c	Enter the total amount of all Federal funds received during the reporting period through Treasury checks, whether or not deposited.
11f	Enter the total Federal cash disbursements, made during the reporting period, including cash received as program income. Disbursements as used here also include the amount of advances and payments less refunds to subgrantees or contractors; the gross amount of direct salaries and wages, including the employee's share of benefits if treated as a direct cost, interdepartmental charges for supplies and services, and the amount to which the recipient is entitled for indirect costs.
11g	Enter the Federal share of program income that was required to be used on the project or program by the terms of the grant or agreement.
11i	Enter the amount of all adjustments pertaining to prior periods affecting the ending balance that have not been included in any lines above. Identify each grant or agreement for which adjustment was made, and enter an explanation for each adjustment under "Remarks." Use plain sheets of paper if additional space is required.
11j	Enter the total amount of Federal cash on hand at the end of the reporting period. This amount should include all funds on deposit, imprest funds, and undeposited funds (line e, less line h, plus or minus line i).
12	Enter the estimated number of days until the cash on hand, shown on line 11j, will be expended. If more than three days cash requirements are on hand, provide an explanation under "Remarks" as to why the drawdown was made prematurely, or other reasons for the excess cash. The requirement for the explanation does not apply to prescheduled or automatic advances.
13a	Enter the amount of interest earned on advances of Federal funds but not remitted to the Federal agency. If this includes any amount earned and not remitted to the Federal sponsoring agency for over 60 days, explain under "Remarks." Do not report interest earned on advances to States.
13b	Enter the amount of advance to secondary recipients included in item 11h.
14	In addition to providing explanations as required above, give additional explanation deemed necessary by the recipient and for information required by the Federal sponsoring agency in compliance with governing legislation. Use plain sheets of paper if additional space is required.

This space for agency use

Public reporting burden for this collection of information is estimated to average 60 minutes per response, including time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding the burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to the Office of Management and Budget, Paperwork Reduction Project (0348-0004), Washington, DC 20503.

PLEASE DO NOT RETURN YOUR COMPLETED FORM TO THE OFFICE OF MANAGEMENT AND BUDGET, SEND IT TO THE ADDRESS PROVIDED BY THE SPONSORING AGENCY.

INSTRUCTIONS

Please type or print legibly. Items 1, 3, 5, 9, 10, 11c, 11e, 11f, 11g, 11i, 12 and 13 are self-explanatory; specific instructions for other items are as follows:

Item	*Entry*
2	Indicate whether request is prepared on cash or accrued expenditure basis. All requests for advances shall be prepared on a cash basis.
4	Enter the Federal grant number, or other identifying number assigned by the Federal sponsoring agency. If the advance or reimbursement is for more than one grant or other agreement, insert N/A; then, show the aggregate amounts. On a separate sheet, list each grant or agreement number and the Federal share of outlays made against the grant or agreement.
6	Enter the employer identification number assigned by the U.S. Internal Revenue Service, or the FICE (institution) code if requested by the Federal agency.
7	This space is reserved for an account number or other identifying number that may be assigned by the recipient.
8	Enter the month, day, and year for the beginning and ending of the period covered in this request. If the request is for an advance or for both an advance and reimbursement, show the period that the advance will cover. If the request is for reimbursement, show the period for which the reimbursement is requested.
Note:	The Federal sponsoring agencies have the option of requiring recipients to complete items 11 or 12, but not both. Item 12 should be used when only a minimum amount of information is needed to make an advance and outlay information contained in item 11 can be obtained in a timely manner from other reports.
11	The purpose of the vertical columns (a), (b), and (c), is to provide space for separate cost breakdowns when a project has been planned and budgeted by program, function, or activity.

Item	*Entry*
	If additional columns are needed, use as many additional forms as needed and indicate page number in space provided in upper right; however, the summary totals of all programs, functions, or activities should be shown in the "total" column on the first page.
11a	Enter in "as of date," the month, day, and year of the ending of the accounting period to which this amount applies. Enter program outlays to date (net of refunds, rebates, and discounts). In the appropriate columns. For requests prepared on a cash basis, outlays are the sum of actual cash disbursements for goods and services, the amount of indirect expenses charged, the value of in-kind contributions applied, and the amount of cash advances and payments made to subcontractors and subrecipients. For requests prepared on an accrued expenditure basis, outlays are the sum of the actual cash disbursements, the amount of indirect expenses incurred, and the net increase (or decrease) in the amounts owed by the recipient for goods and other property received and for services performed by employees, contracts, subgrantees and other payees.
11b	Enter the cumulative cash income received to date, if requests are prepared on a cash basis. For requests prepared on an accrued expenditure basis, enter the cumulative income earned to date. Under either basis, enter only the amount applicable to program income that was required to be used for the project or program by the terms of the grant or other agreement.
11d	Only when making requests for advance payments, enter the total estimated amount of cash outlays that will be made during the period covered by the advance.
13	Complete the certification before submitting this request.

Note:	The Federal sponsoring agencies have the option of requiring recipients to complete items 11 or 12, but not both. Item 12 should be used when only a minimum amount of information is needed to make an advance and outlay information contained in item 11 can be obtained in a timely manner from other reports.
11	The purpose of the vertical columns (a), (b), and (c), is to provide space for separate cost breakdowns when a project has been planned and budgeted by program, function, or activity.

Item	*Entry*
	If additional columns are needed, use as many additional forms as needed and indicate page number in space provided in upper right; however, the summary totals of all programs, functions, or activities should be shown in the "total" column on the first page.
11a	Enter in "as of date," the month, day, and year of the ending of the accounting period to which this amount applies. Enter program outlays to date (net of refunds, rebates, and discounts), in the appropriate columns. For requests prepared on a cash basis, outlays are the sum of actual cash disbursements for goods and services, the amount of indirect expenses charged, the value of in-kind contributions applied, and the amount of cash advances and payments made to subcontractors and subrecipients. For requests prepared on an accrued expenditure basis, outlays are the sum of the actual cash disbursements, the amount of indirect expenses incurred, and the net increase (or decrease) in the amounts owed by the recipient for goods and other property received and for services performed by employees, contracts, subgrantees and other payees.
11b	Enter the cumulative cash income received to date, if requests are prepared on a cash basis. For requests prepared on an accrued expenditure basis, enter the cumulative income earned to date. Under either basis, enter only the amount applicable to program income that was required to be used for the project or program by the terms of the grant or other agreement.
11d	Only when making requests for advance payments, enter the total estimated amount of cash outlays that will be made during the period covered by the advance.
13	Complete the certification before submitting this request.

Public reporting burden for this collection of information is estimated to average 60 minutes per response, including time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding the burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to the Office of Management and Budget, Paperwork Reduction Project (0348-0004), Washington, DC 20503.

PLEASE DO NOT RETURN YOUR COMPLETED FORM TO THE OFFICE OF MANAGEMENT AND BUDGET. SEND IT TO THE ADDRESS PROVIDED BY THE SPONSORING AGENCY.

INSTRUCTIONS

Please type or print legibly. Items 1, 3, 5, 9, 10, 11e, 11f, 11g, 11i, 12 and 13 are self-explanatory; specific instructions for other items are as follows:

Item — *Entry*

2 Indicate whether request is prepared on cash or accrued expenditure basis. All requests for advances shall be prepared on a cash basis.

4 Enter the Federal grant number, or other identifying number assigned by the Federal sponsoring agency. If the advance or reimbursement is for more than one grant or other agreement, insert N/A; then, show the aggregate amounts. On a separate sheet, list each grant or agreement number and the Federal share of outlays made against the grant or agreement.

6 Enter the employer identification number assigned by the U.S. Internal Revenue Service, or the FICE (institution) code if requested by the Federal agency.

7 This space is reserved for an account number or other identifying number that may be assigned by the recipient.

8 Enter the month, day, and year for the beginning and ending of the period covered in this request. If the request is for an advance or for both an advance and reimbursement, show the period that the advance will cover. If the request is for reimbursement, show the period for which the reimbursement is requested.

Note: The Federal sponsoring agencies have the option of requiring recipients to complete items 11 or 12, but not both. Item 12 should be used when only a minimum amount of information is needed to make an advance and outlay information contained in item 11 can be obtained in a timely manner from other reports.

11 The purpose of the vertical columns (a), (b), and (c) is to provide space for separate cost breakdowns when a project has been planned and budgeted by program, function, or activity. If additional columns are needed, use as many additional forms as needed and indicate page number in space provided in upper right; however, the summary totals of all programs, functions, or activities should be shown in the "total" column on the first page.

11a Enter in "as of date," the month, day, and year of the ending of the accounting period to which this amount applies. Enter program outlays to date (net of refunds, rebates, and discounts), in the appropriate columns. For requests prepared on a cash basis, outlays are the sum of actual cash disbursements for goods and services, the amount of indirect expenses charged, the value of in-kind contributions applied, and the amount of cash advances and payments made to subcontractors and subrecipients. For requests prepared on an accrued expenditure basis, outlays are the sum of the actual cash disbursements, the amount of indirect expenses incurred, and the net increase (or decrease) in the amounts owed by the recipient for goods and other property received and for services performed by employees, contracts, subgrantees and other payees.

11b Enter the cumulative cash income received to date, if requests are prepared on a cash basis. For requests prepared on an accrued expenditure basis, enter the cumulative income earned to date. Under either basis, enter only the amount applicable to program income that was required to be used for the project or program by the terms of the grant or other agreement.

11d Only when making requests for advance payments, enter the total estimated amount of cash outlays that will be made during the period covered by the advance.

13 Complete the certification before submitting this request.

This space for agency use

Public reporting burden for this collection of information is estimated to average 60 minutes per response, including time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding the burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to the Office of Management and Budget, Paperwork Reduction Project (0348-0004), Washington, DC 20503.

PLEASE DO NOT RETURN YOUR COMPLETED FORM TO THE OFFICE OF MANAGEMENT AND BUDGET. SEND IT TO THE ADDRESS PROVIDED BY THE SPONSORING AGENCY.

INSTRUCTIONS

Please type or print legibly. Items 1, 3, 5, 9, 10, 11e, 11f, 11g, 11i, 12 and 13 are self-explanatory; specific instructions for other items are as follows:

Item	*Entry*
2	Indicate whether request is prepared on cash or accrued expenditure basis. All requests for advances shall be prepared on a cash basis.
4	Enter the Federal grant number, or other identifying number assigned by the Federal sponsoring agency. If the advance or reimbursement is for more than one grant or other agreement, insert N/A; then, show the aggregate amounts. On a separate sheet, list each grant or agreement number and the Federal share of outlays made against the grant or agreement.
6	Enter the employer identification number assigned by the U.S. Internal Revenue Service, or the FICE (institution) code if requested by the Federal agency.
7	This space is reserved for an account number or other identifying number that may be assigned by the recipient.
8	Enter the month, day, and year for the beginning and ending of the period covered in this request. If the request is for an advance or for both an advance and reimbursement, show the period that the advance will cover. If the request is for reimbursement, show the period for which the reimbursement is requested.
Note:	The Federal sponsoring agencies have the option of requiring recipients to complete items 11 or 12, but not both. Item 12 should be used when only a minimum amount of information is needed to make an advance and outlay information contained in item 11 can be obtained in a timely manner from other reports.
11	The purpose of the vertical columns (a), (b), and (c) is to provide space for separate cost breakdowns when a project has been planned and budgeted by program, function, or activity. If additional columns are needed, use as many additional forms as needed and indicate page number in space provided in upper right; however, the summary totals of all programs, functions, or activities should be shown in the "total" column on the first page.
11a	Enter in "as of date," the month, day, and year of the ending of the accounting period to which this amount applies. Enter program outlays to date (net of refunds, rebates, and discounts), in the appropriate columns. For requests prepared on a cash basis, outlays are the sum of actual cash disbursements for goods and services, the amount of indirect expenses charged, the value of in-kind contributions applied, and the amount of cash advances and payments made to subcontractors and subrecipients. For requests prepared on an accrued expenditure basis, outlays are the sum of the actual cash disbursements, the amount of indirect expenses incurred, and the net increase (or decrease) in the amounts owed by the recipient for goods and other property received and for services performed by employees, contracts, subgrantees and other payees.
11b	Enter the cumulative cash income received to date, if requests are prepared on a cash basis. For requests prepared on an accrued expenditure basis, enter the cumulative income earned to date. Under either basis, enter only the amount applicable to program income that was required to be used for the project or program by the terms of the grant or other agreement.
11d	Only when making requests for advance payments, enter the total estimated amount of cash outlays that will be made during the period covered by the advance.
13	Complete the certification before submitting this request.

Public reporting burden for this collection of information is estimated to average 60 minutes per response, including time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding the burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to the Office of Management and Budget, Paperwork Reduction Project (0348-0004), Washington, DC 20503.

PLEASE DO NOT RETURN YOUR COMPLETED FORM TO THE OFFICE OF MANAGEMENT AND BUDGET. SEND IT TO THE ADDRESS PROVIDED BY THE SPONSORING AGENCY.

INSTRUCTIONS

Please type or print legibly. Items 1, 3, 5, 9, 10, 11e, 11f, 11g, 11i, 12 and 13 are self-explanatory; specific instructions for other items are as follows:

Item	*Entry*
2	Indicate whether request is prepared on cash or accrued expenditure basis. All requests for advances shall be prepared on a cash basis.
4	Enter the Federal grant number, or other identifying number assigned by the Federal sponsoring agency. If the advance or reimbursement is for more than one grant or other agreement, insert N/A; then, show the aggregate amounts. On a separate sheet, list each grant or agreement number and the Federal share of outlays made against the grant or agreement.
6	Enter the employer identification number assigned by the U.S. Internal Revenue Service, or the FICE (institution) code if requested by the Federal agency.
7	This space is reserved for an account number or other identifying number that may be assigned by the recipient.
8	Enter the month, day, and year for the beginning and ending of the period covered in this request. If the request is for an advance or for both an advance and reimbursement, show the period that the advance will cover. If the request is for reimbursement, show the period for which the reimbursement is requested.
Note:	The Federal sponsoring agencies have the option of requiring recipients to complete items 11 or 12, but not both. Item 12 should be used when only a minimum amount of information is needed to make an advance and outlay information contained in item 11 can be obtained in a timely manner from other reports.
11	The purpose of the vertical columns (a), (b), and (c) is to provide space for separate cost breakdowns when a project has been planned and budgeted by program, function, or activity. If additional columns are needed, use as many additional forms as needed and indicate page number in space provided in upper right; however, the summary totals of all programs, functions, or activities should be shown in the "total" column on the first page.
11a	Enter in "as of date," the month, day, and year of the ending of the accounting period to which this amount applies. Enter program outlays to date (net of refunds, rebates, and discounts). In the appropriate columns. For requests prepared on a cash basis, outlays are the sum of actual cash disbursements for goods and services, the amount of indirect expenses charged, the value of in-kind contributions applied, and the amount of cash advances and payments made to subcontractors and subrecipients. For requests prepared on an accrued expenditure basis, outlays are the sum of the actual cash disbursements, the amount of indirect expenses incurred, and the net increase (or decrease) in the amounts owed by the recipient for goods and other property received and for services performed by employees, contracts, subgrantees and other payees.
11b	Enter the cumulative cash income received to date, if requests are prepared on a cash basis. For requests prepared on an accrued expenditure basis, enter the cumulative income earned to date. Under either basis, enter only the amount applicable to program income that was required to be used for the project or program by the terms of the grant or other agreement.
11d	Only when making requests for advance payments, enter the total estimated amount of cash outlays that will be made during the period covered by the advance.
13	Complete the certification before submitting this request.

5. PROJECT DESCRIPTION

All research shall be conducted in accordance with the Recipient's proposal dated 07/06/01 (Gate 1), and 08/06/01 (Gate 2), and all revisions/late documentation dated 08/21/01, 08/27/01, 09/06/01, 09/12/01, 09/14/01, and 09/--/01, including revised budget dated 09/--/01.

6. FUNDING LIMITATIONS

The scope of work and budget incorporated into this award cover a three-year period (referred to as the "project period") for a total amount of $2,000,000.00 in Federal funds. However, Federal funding available at this time is limited to $800,000.00 for the first year period from October 1, 2001 through September 30, 2002 (referred to as the "budget period"). The Grants Officer may require additional clarification to support the budget. If that results in changes to the budget or budget narrative, the Recipient shall submit, in writing, a revised budget and/or budget narrative to the Grants Officer for approval. Receipt of any funding beyond the first year up to the level projected under this award is contingent upon the availability of funds from Congress, satisfactory performance, and will be at the sole discretion of the National Institute of Standards and Technology (NIST). The Recipient may not obligate, incur any expenditure, nor engage in any activity that involves a commitment of Federal funds under this Agreement in excess of the Federal amount presently available. No legal liability exists or will result on the part of the Federal Government for payment of any portion of the remaining funds, which have not been made available under the award. If additional funds are not made available, any expenses incurred related to closeout activities must be funded from the amount already made available under this award. The notice of availability or non-availability of additional funding for the second and third year(s) will be made in writing by the Grants Officer. Only the Grants Officer is authorized to obligate funds. No other verbal or written notice should be relied upon by the Recipient. In the absence of a written notice of additional funding, no assumption should be made by the Recipient that the funds will be forthcoming.

Public reporting burden for this collection of information is estimated to average 60 minutes per response, including time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding the burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to the Office of Management and Budget, Paperwork Reduction Project (0348-0004), Washington, DC 20503.

PLEASE DO NOT RETURN YOUR COMPLETED FORM TO THE OFFICE OF MANAGEMENT AND BUDGET. SEND IT TO THE ADDRESS PROVIDED BY THE SPONSORING AGENCY.

INSTRUCTIONS

Please type or print legibly. Items 1, 3, 5, 9, 10, 11e, 11f, 11g, 11i, 12 and 13 are self-explanatory; specific instructions for other items are as follows:

Item	*Entry*
2	Indicate whether request is prepared on cash or accrued expenditure basis. All requests for advances shall be prepared on a cash basis.
4	Enter the Federal grant number, or other identifying number assigned by the Federal sponsoring agency. If the advance or reimbursement is for more than one grant or other agreement, insert N/A; then, show the aggregate amounts. On a separate sheet, list each grant or agreement number and the Federal share of outlays made against the grant or agreement.
6	Enter the employer identification number assigned by the U.S. Internal Revenue Service, or the FICE (institution) code if requested by the Federal agency.
7	This space is reserved for an account number or other identifying number that may be assigned by the recipient.
8	Enter the month, day, and year for the beginning and ending of the period covered in this request. If the request is for an advance or for both an advance and reimbursement, show the period that the advance will cover. If the request is for reimbursement, show the period for which the reimbursement is requested.
Note:	The Federal sponsoring agencies have the option of requiring recipients to complete items 11 or 12, but not both. Item 12 should be used when only a minimum amount of information is needed to make an advance and outlay information contained in item 11 can be obtained in a timely manner from other reports.
11	The purpose of the vertical columns (a), (b), and (c) is to provide space for separate cost breakdowns when a project has been planned and budgeted by program, function, or activity. If additional columns are needed, use as many additional forms as needed and indicate page number in space provided in upper right; however, the summary totals of all programs, functions, or activities should be shown in the "total" column on the first page.
11a	Enter in "as of date," the month, day, and year of the ending of the accounting period to which this amount applies. Enter program outlays to date (net of refunds, rebates, and discounts), in the appropriate columns. For requests prepared on a cash basis, outlays are the sum of actual cash disbursements for goods and services, the amount of indirect expenses charged, the value of in-kind contributions applied, and the amount of cash advances and payments made to subcontractors and subrecipients. For requests prepared on an accrued expenditure basis, outlays are the sum of the actual cash disbursements, the amount of indirect expenses incurred, and the net increase (or decrease) in the amounts owed by the recipient for goods and other property received and for services performed by employees, contracts, subgrantees and other payees.
11b	Enter the cumulative cash income received to date, if requests are prepared on a cash basis. For requests prepared on an accrued expenditure basis, enter the cumulative income earned to date. Under either basis, enter only the amount applicable to program income that was required to be used for the project or program by the terms of the grant or other agreement.
11d	Only when making requests for advance payments, enter the total estimated amount of cash outlays that will be made during the period covered by the advance.
13	Complete the certification before submitting this request.

AMENDEMENT TO AUDIT ENGAGEMENT LETTER DATED SEPTEMBER 6, 2002

September 19, 2003

Dr. D. B. Karron
CASI LLC
300 East 33rd Street
New York, NY 10016

Dear Dr. Karron:

The purpose of this letter is to confirm our understanding of the amended terms and unanticipated events of our engagement as the independent accountant of CASI LLC, formerly Computer Aided Surgery, Inc.

Entity Change

We were advised during February 2003 that CASI LLC was established in New York State effective August 30, 2002, and effective the same date, Computer Aided Surgery, Inc. merged into CASI LLC.

Timing

The audit reports, which were originally due by December 31, 2002, were postponed to allow additional time to submit a revised budget and receive its approval from NIST. The purpose of this submission was to obtain an approved budget that would allow the cost of equipment in access of that which would be allowed under the existing budget. The audit submission due date was extended for 90 days by NIST, but the new budget was not approved by that time.

The completion of the audit was postponed because the rejection of an additional extension was not received until the individual tax season during which work on the audit was not possible.

The completion of the audit was again postponed to allow CASI to develop and implement procedures, so as to mitigate anticipated negative findings.

Field work was completed on June 27, 2003, however, additional information that we requested prior to the completion of field work was not provided in a timely manner.

Fees

not billed

Additional fees were required as result of the audit postponement and additional time that was required to perform the audit due to the condition of your records and filing system. Your Business Manager approved and you paid $2,500 for such additional fees.

Excess costs for long distance phone calls and travel from your office at late hours will be billed.

Please sign this letter, as indicated below, to confirm our amended agreement and understanding of events. A copy will be provided for your records. Please do not hesitate to contact us if you have any questions or need additional information.

Very truly yours,

Joan M. Hayes, CPA, LLC

The amended terms and occurrence of events as set forth in this letter is agreed to.

September 6, 2002

Dr. D. B. Karron, President
Computer Aided Surgery, Inc.
300 East 33rd Street
New York, NY 10016

Dear Dr. Karron:

The purpose of this letter is to confirm our understanding of the terms of our engagement as the independent accountant of Computer Aided Surgery, Inc. (CASI).

Services and Related Reports

We will audit the following program-specific financial statement of CASI and deliver the following services at September 30, 2002 and for the year then ending:

- Audit the *Schedule of Fund Sources and Project Costs* for Advanced Technology Program (ATP) Cooperative Agreement Award Number 70NANB1H3050.

- Conduct an examination-level attestation engagement of management's assertions regarding compliance with specified requirements applicable to the ATP Cooperative Agreement referred to above.

We will perform our audit and examination of the management assertions in accordance with the *Program-Specific Audit Guidelines for Advanced Technology Program (ATP) Cooperative Agreements with Single Companies*, issued by the U. S. Department of Commerce, Office of Inspector General, National Institute of Standards and Technology, September 1999.

Upon completion of our audit and compliance examination, we will provide you with the following audit reports and other required documents:

- Our audit report on the *Schedule of Fund Sources and Project Costs* of the ATP award.

- Our report on management's assertions regarding CASI's compliance with specified requirements applicable to the ATP award.

- A management letter documenting the reportable conditions or material weaknesses, if any are noted in the audit of the *Schedule of Fund Sources and Project Costs* or during the examination of the management assertions.

- A Schedule of Findings and Questioned Costs if applicable. This schedule, if applicable, will include all material noncompliance with provisions of laws, regulations, or the cooperative agreement. It will also include, if applicable, all known questioned costs which are greater than $10,000 identified through the audit of the *Schedule of Fund Sources and Project Costs* or the examination of the management assertions.

If, for any reasons caused by you or relating to the affairs of CASI, we are unable to complete the audit and compliance examination, we may decline to issue our reports as a result of this engagement.

Our Responsibilities and Limitations

The objective of the audit is the expression of an opinion on the ATP program-specific financial statement. We will be responsible for performing the audit in accordance with generally accepted auditing standards and the standards for financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. These standards require that we plan and perform the audit to obtain reasonable assurance about whether the program-specific financial statement is free of material misstatement. The audit will include examining, on a test basis, evidence supporting the amounts and disclosures in the program-specific financial statement, assessing accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation.

The objective of the compliance examination is the expression of an opinion on management's assertions regarding compliance with laws and regulations applicable to the ATP award. We will be responsible for performing the attestation engagement in accordance with *Government Auditing Standards* and the standards contained in the *Statement of Standards for Attestation Engagements (SSAE) No. 3, Compliance Attestations*, as amended by *SSAE No. 9, Statement of Standards for Attestation Engagements Nos. 1, 2, and 3*, issued by the American Institute of Certified Public Accountants (AICPA). Accordingly, the attestation engagement will include examining, on a test basis, evidence regarding CASI's compliance with those requirements and performing such other procedures as we consider necessary under the circumstances. Our compliance examination will not provide a legal determination on CASI's compliance with specified requirements.

We will design our audit and compliance examination to obtain reasonable, but not absolute, assurance of detecting errors or fraud that would have a material effect on the program-specific financial statement as well as other illegal acts having a direct and material effect on financial statement amounts. Our audit and compliance examination will not include a detailed audit of transactions, such as would be necessary to disclose errors or fraud that did not cause a material misstatement of the financial statement. It is important to recognize that there are inherent limitations in the auditing process. Audits and compliance examinations are based on the concept of selective testing of the data underlying the financial statements, which involves judgment regarding the areas to be tested and the nature, timing, extent and results of the tests to be performed. Audits and compliance examinations are, therefore, subject to the limitation that material errors or fraud or other illegal acts having a direct and material financial statement impact, if they exist, may not be detected. Because of the characteristics of fraud, particularly those involving concealment through collusion and falsified documentation (including forgery), an audit or compliance examination designed and executed in accordance with generally accepted auditing standards may not detect a material fraud. Further, while effective internal control reduces the likelihood that errors, fraud or other illegal acts will occur and remain undetected, it does not eliminate that possibility. For these reasons we cannot ensure that errors, fraud or other illegal acts, if present, will be detected. However, we will communicate to you, as appropriate, any illegal act, material errors, or evidence that fraud may exist identified during our audit and compliance examination.

The audit and compliance examination will not be planned or conducted in contemplation of reliance by any third party or with respect to any specific transaction. Therefore, items of a possible interest to a third party will not be specifically addressed, and matters may exist that would be assessed differently by a third party, possibly in connection with a specific transaction.

Management's Assertions

The assertions of management, noncompliance of which could adversely affect CASI's ability to report financial data or comply with the specified requirements related to the *Schedule of Fund Sources and Project Costs* for the ATP Cooperative Agreement referred to above, include the following:

- The cost-share established by the budget in the ATP award has been met. The funds claimed as cost-share are not from a subcontractor or other federal sources and were not used as matching or cost-sharing funds on other federally supported activities. The funds claimed as cost-share meet the definition provided in 15 CFR Part 14, Section 23 and conform to the limitations in 15 CFR Part 295.2(1).

- Equipment acquired with the ATP funds has been accounted for in accordance with federal property management standards found in 15 CFR Part 14 Sections 30-37.

- Federal procurement standards described in 15 CFR Part 14 Sections 40-48 have been incorporated into the purchasing policies and adhered to for ATP award expenditures. Contracts and sub awards have not been made to any organizations or its principles listed in the *List of Parties Excluded from Federal Procurement or Nonprocurement Programs*, issued by General Service Administration.

- The amounts in the quarterly financial status reports and the requests for advance or reimbursement agree with the underlying accounting records and summary records.

- The agreements entered into with subcontractors/subrecipients require that the subcontractors/subrecipients adhere to federal laws and regulations as specified by the ATP award, and sanctions are specified for the subcontractor's/subrecipient's noncompliance.

Management's Responsibilities

The program-specific financial statement referred to above is the responsibility of the management of CASI. In this regard, management is responsible for properly recording transactions in the accounting records and for establishing and maintaining internal control sufficient to permit the preparation of financial statements in conformity with the ATP award requirements. Management is responsible for adjusting the program-specific financial statement to correct material misstatements, if any, and for affirming to us that the effects of any uncorrected misstatements brought to its attention by us are immaterial, both individually and in the aggregate, to the program-specific financial statement taken as a whole. Compliance with laws, regulations, contracts, and cooperative agreements applicable to CASI also is the responsibility of CASI's management.

Management is responsible for making available to us, on a timely basis, all of CASI's original accounting records and related information, documentation of compliance matters and organization personnel to whom we may direct inquiries. As required by generally accepted auditing standards and *Government Auditing Standards*, we will make specific inquiries of management and others about the representations embodied in the program-specific financial statement and the effectiveness of internal control over financial reporting. Generally accepted auditing standards also require that we obtain written representations covering audited financial statements from certain members of management. The results of our audit and compliance examination tests, the responses to our inquiries, and the written representations comprise the evidential matter we intend to rely upon in forming our opinion on the program-specific financial statement and the management assertions.

Release and Indemnification

Because of the importance of oral and written representations to an effective audit, CASI releases Joan M. Hayes, CPA, LLC and its personnel from any and all claims, liabilities, costs and expenses attributable to any knowing misrepresentation by management. Further, in no event shall Joan M. Hayes, CPA, LLC be liable to CASI, whether a claim be in tort, contract or otherwise (a) for any amount in excess of the total professional fees paid by CASI under this engagement letter, or (b) for any consequential, indirect, lost profit, or similar damages relating to Joan M. Hayes, CPA, LLC's services provided under this engagement letter, except to the extent finally determined to have resulted from the willful misconduct or fraudulent behavior of Joan M. Hayes, CPA, LLC relating to such services.

In addition, CASI agrees to indemnify and hold harmless Joan M. Hayes, CPA, LLC and its personnel from any and all claims, liabilities, costs, and expenses relating to Joan M. Hayes, CPA, LLC's services under this engagement letter, except to the extent finally determined to have resulted from the willful misconduct or fraudulent behavior of Joan M. Hayes, CPA, LLC relating to such services.

In the unlikely event that differences concerning our services or fees should arise that are not resolved by mutual agreement, to facilitate judicial resolution and save time and expense of both parties, CASI and Joan M. Hayes, CPA, LLC agree not to demand a trial by jury in any action, proceeding, or counterclaim arising out of or relating to our services and fees for this engagement.

Timing and Fees

Completion of our work is subject to, among other things, (a) appropriate cooperation from CASI's personnel including timely preparation of necessary schedules, (b) timely responses to our inquiries, and (c) timely communication of all significant accounting and financial reporting matters. When and if for any reason CASI is unable to provide such schedules, information, and assistance, Joan M. Hayes, CPA, LLC and CASI will mutually revise the fee to reflect additional services, if any, required of us to complete the engagement.

Our fee estimates are based on the levels of service provided and the time required to perform the services. Hourly rates vary according to the degree of responsibility and experience involved. We estimate our fees for this audit engagement will be $10,000, exclusive of out-of-pocket expenses, subject to the terms and conditions above. We also will bill you for our reasonable out-of-pocket expenses related to this engagement. We will advise management should any other circumstances arise which may cause actual time to exceed that estimate.

Our fees will be billed as follows:

Date	Amount
September 10, 2002	$2,500
October 10, 2002	$2,500
November 10, 2002	$2,500
December 10, 2002	$2,500

Expenses will be billed on a monthly basis as incurred. Invoices rendered are due and payable upon receipt.

Other Matters

Any additional service(s) that you may request and we agree to provide will be the subject of separate written agreement(s).

As your independent accountant, it is expressly understood that we cannot perform services to maintain or prepare your basic accounting records, post transactions to financial records or other records that subsequently provide data to the financial records, process and post your payroll transactions, supervise your accounting and/or system personnel, design your system(s), make management decisions, or any other function that could result in the audit of our own work or provision of services that are significantly material to the subject matter of our audits.

We may be requested to make certain working papers or related documents available to the Secretary of Commerce, the Office of Inspector General, the U. S. General Accounting Office, or their representatives pursuant to authority given to them by law or regulation. If requested, access to such working papers and documents will be provided under the supervision of Joan M. Hayes, CPA, LLC personnel. Furthermore, upon request, we may provide copies of selected working papers to the above regulators. These parties may intend, or decide, to distribute the copies or information contained therein to others, including other governmental agencies.

In the event we are requested or authorized by you or required by government regulation, subpoena, or other legal process to produce our working papers or our personnel as witnesses with respect to our engagement for you, you will, so long as we are not a party to the proceeding in which the information is sought, reimburse us for our professional time and expenses, as well as the fees and expenses of our counsel, incurred in responding to such a request.

CASI agrees that it will not, directly or indirectly, agree to assign or transfer any claim against Joan M. Hayes, CPA, LLC arising out of this engagement to anyone.

This engagement letter reflects the entire agreement between us relating to the services covered by this letter. It replaces and supersedes any previous proposals, correspondence, and understandings, whether written or oral. The agreements of CASI and Joan M. Hayes, CPA, LLC contained in this engagement letter shall survive the completion or termination of this engagement.

Please sign this letter, as indicated below, to confirm our agreement. A copy will be provided for your records. Please do not hesitate to contact us if you have any questions or need additional information.

Very truly yours,

Joan M. Hayes, CPA, LLC

April 25, 2002

Dr. D. B. Karron, President
Computer Aided Surgery, Inc.
300 East 33rd Street
New York, NY 10016

Dear Dr. Karron:

We appreciate the opportunity to work with you and prepare the following federal, state, and city income tax returns and employment tax returns for your Subchapter S Corporation. This letter confirms the scope and related terms of our engagement.

Tax Compliance Services

We will perform the following services:

- We will prepare the federal, state, and city tax returns and supporting schedules for a Subchapter S Corporation, from data you provide, for your corporate tax years ended May 31, 1999, May 31, 2000, May 31, 2001, and May 31 2002.

- We will prepare the quarterly and annual federal and state employment tax returns, from data you provide, for the 2002 calendar year.

- We will not audit or independently verify the data you provide. However, we may ask for clarification of some of the information.

We will prepare the income tax returns, as referenced above, upon receipt of the required information from you. We strongly recommend that you provide this information to us, in the order of due dates from the oldest periods forward, as soon as possible to minimize any interest and penalties that may accrue.

Information for the quarterly and annual employment tax returns is to be provided to us at least 15 business days prior to the due date for each return.

Our engagement cannot be relied on to uncover errors in the underlying information incorporated in the tax returns, or irregularities, should any exist. However, we will inform you of any such matters that may come to our attention.

All returns are subject to examination by the taxing authorities. In the event of an examination, you may be requested to produce documents, records, or other evidence to substantiate the items of income and deductions shown on the income tax returns or compensation and related payroll taxes shown on the employment tax returns. In preparing your returns, we rely on your representations that you understand and have complied with the documentation requirements for your expenses and deductions and for your payroll reporting. If an examination occurs, we will be available, upon request, to assist or represent you. Such additional services are not included in our fee for preparation of your tax returns.

Since you are responsible for your income and employment tax returns, you should review them carefully before you sign and mail them. We should be contacted immediately if you have any questions or need additional information.

Tax Consulting Services

This engagement letter also covers tax consulting matters that may arise for which you seek our advice and consultation, and that are not the subject of a separate engagement letter. To be of greatest assistance to you, we should be advised in advance of proposed transactions. If such matters exceed the scope of this engagement letter, we will issue a separate engagement letter to confirm the scope and related terms of any additional engagement.

Fees

Our fees for this engagement will be based on the complexity of the issues, the level of services provided, and the time required to perform the services. Tax return preparation and other accounting services will be billed at $150 per hour. Fees for other related services will be calculated at rates between $50 and $100 per hour.

A retainer of $1,000 is due upon approval of this engagement letter and should be maintained throughout the engagement. Invoices will be rendered for individual services as completed and will be payable upon receipt.

Please sign this letter to confirm our agreement and return it to us. A copy will be provided for your records. Please do not hesitate to contact us if you have any questions or need additional information.

Very truly yours,

Joan M. Hayes

Joan M. Hayes, CPA

Dr. D. B. Karron, President
Computer Aided Surgery, Inc.
300 East 33rd Street
New York, NY 10016

Dear Dr. Karron:

The purpose of this letter is to confirm our understanding of the terms of our engagement regarding certain prior year employment tax reporting requirements of Computer Aided Surgery, Inc. (CASI).

Tax Compliance Services

We will perform the following services:

- We will contact the Internal Revenue Service, New York State Department of Taxation, New York State Department of Labor, State of New Jersey Department of Taxation, and State of New Jersey Department of Labor to determine the status of compliance with their employment related reporting requirements from 1998 through 2001.

- We will prepare the quarterly and annual federal and state employment tax returns, from data you provide, for any periods that are applicable based on the results of our communications with the regulatory agencies referred to above.

- We will not audit or independently verify the data you provide. However, we may ask for clarification of some of the information.

Our engagement cannot be relied on to uncover errors in the underlying information incorporated in the tax returns, or irregularities, should any exist. However, we will inform you of any such matters that may come to our attention.

All returns are subject to examination by the taxing authorities. In the event of an examination, you may be requested to produce documents, records, or other evidence to substantiate the items of compensation and related payroll taxes shown on the tax returns. In preparing your returns, we rely on your representations that you understand and have complied with the documentation requirements for your payroll reporting. If an examination occurs, we will be available, upon

request, to assist or represent you. Such additional services are not included in our fee for preparation of your returns.

Since you are responsible for your employment tax returns, you should review them carefully before you sign and mail them. We should be contacted immediately if you have any questions or need additional information.

Fees

Our fees for this engagement will be based on the complexity of the issues, the level of services provided, and the time required to perform the services. Tax return preparation and other accounting services will be billed at $150 per hour. Fees for other related services will be calculated at rates between $50 and $100 per hour.

A retainer of $1,000 is due upon approval of this engagement letter. Our invoice will rendered upon completion of the engagement and will be payable upon receipt.

Please sign this letter to confirm our agreement and return it to us. A copy will be provided for your records. Please do not hesitate to contact us if you have any questions or need additional information.

Very truly yours,

Joan M. Hayes

Re: Audit of the Schedule of Fund Sources and Project Costs for the year ended September 30, 2002
Attestation Examination of Management Assertions for the year ended September 30, 2002

Schedule of Fund Sources and Project Costs

We are providing this letter in connection with your audit of the program-specific financial statement of CASI LLC, formerly Computer Aided Surgery, Inc. ("CASI") for the year ended September 30, 2002 for the purpose of expressing an opinion as to whether such program-specific financial statement presents fairly, in all material respects, the results of operations of our ATP Program in conformity with the award requirements which is a comprehensive basis of accounting other than generally accepted accounting principles. We confirm that we are responsible for the fair presentation in the program-specific financial statement in conformity with the program-specific accounting principles referred to above.

Certain representations in this letter are described as being limited to those matters that are material. Items are considered material, regardless of size, if they involve an omission or misstatement of accounting information that, in the light of surrounding circumstances, makes it probable that the judgment of a reasonable person relying on the information would have been changed or influenced by the omission or misstatement.

We confirm, to the best of our knowledge and belief, as of June 27, 2003, the date of your report, the following representations made to you during your audit:

1. The program-specific financial statements referred to above is fairly presented in conformity with the program-specific accounting principles referred to, and includes all disclosures necessary for such fair presentation and disclosures otherwise required to be included therein by the laws and regulations to which CASI is subject.

2. We have made available to you all financial records and related data.

3. The financial records, including the electronic copy of our general ledger submitted for audit, are the only official copies of these documents.

4. Documents provided to you from our electronic filing system, Scansoft Visioneer PaperPort, are exact copies of the originals. It is the policy of CASI to scan all source documents and destroy originals which we consider non-archival. Documents are scanned at a high resolution to protect their integrity.

5. There have been no communications from regulatory agencies concerning noncompliance with or deficiencies in financial reporting practices, except for findings that resulted from the recent OIG audit, of which you are aware from the preliminary report that we provided.

6. There are no material transactions, agreements or accounts that have not been properly recorded in the accounting records underlying the program-specific financial statement.

7. There has been no:

   a. Fraud involving management or employees who have significant roles in CASI's internal control.

   b. Fraud involving others that could have a material effect on the program-specific financial statement.

      (We understand the term "fraud" to mean those matters described in Statement on Auditing Standards No.82.)

   c. Violations or possible violations of laws or regulations whose effects should be considered for disclosure in the program-specific financial statement.

8. The following, if material, have been properly recorded or disclosed in the program-specific financial statement or notes thereto:

   a. Related-party transactions, including sales, purchases, loans, transfers, leasing arrangements, and guarantees, and amounts receivable from or payable to related parties. (We understand the term "related party" to include those entities described in Statement on Auditing Standards No. 45, footnote 1.)

   b. Significant estimates and material concentrations known to management that are required to be disclosed in accordance with the AICPA's Statement of Position 94-6, *Disclosure of Certain Significant Risks and Uncertainties*. (Significant estimates are estimates at the financial statement date that could change materially within the next year. Concentrations refer to volumes of business, revenues, available sources of supply, or markets or geographic areas for which events could occur that would significantly disrupt normal finances within the next year.)

9. CASI has satisfactory title to all owned equipment, and there are no liens or encumbrances on such equipment. The only possible exceptions consist of equipment which has been received but only partially paid for.

10. CASI acknowledges limited areas of noncompliance with certain aspects of the cooperative agreement. However, these areas of noncompliance would not have a material effect on the program-specific financial statements. We have taken action to remedy any areas of non-compliance, that may exist, are effectively as possible. Furthermore, we have restructured our accounting policies to bring them into compliance with accounting standards and requirements of the NIST.

11. To the best of our knowledge, there is no pending litigation against CASI. A letter from our attorney to verify this statement cannot be provided because the two attorneys who formerly represented CASI have resigned, and at this time, CASI does not have legal representation.

To the best of our knowledge and belief, no events have occurred subsequent to the financial statement date and through the date of this letter that would require adjustment to or disclosure in the aforementioned program-specific financial statement.

Management Assertions

This letter is also being provided to acknowledge the following assumptions of management, for the year ended September 30, 2002, which were stated in your engagement letter and were examined by you for the purpose of expressing an opinion as to whether such management assertions are fairly stated in all material respects:

1. The cost-share established by the budget in the ATP award has been met. The funds claimed as cost-share are not from a subcontractor or other federal sources and were not used as matching or cost-sharing funds on other federally supported activities. The funds claimed as cost-share meet the definition provided in 15 CFR Part 14, Section 23 and conform to the limitations in 15 CFR Part 295.2(1).

2. Equipment acquired with the ATP funds has been accounted for in accordance with federal property management standards found in 15 CFR Part 14 Sections 30-37.

3. Federal procurement standards described in 15 CFR Part 14 Sections 40-48 have been incorporated into the purchasing policies and adhered to for ATP award expenditures. Contracts and sub awards have not been made to any organizations or its principles listed in the *List of Parties Excluded from Federal Procurement or Nonprocurement Programs*, issued by General Service Administration.

4. The amounts in the quarterly financial status reports and the requests for advance or reimbursement agree with the underlying accounting records and summary records.

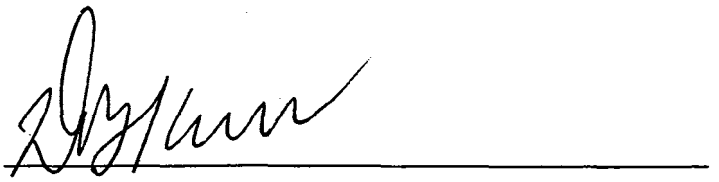
5. The agreements entered into with subcontractors/subrecipients require that the subcontractors/subrecipients adhere to federal laws and regulations as specified by the ATP award, and sanctions are specified for the subcontractor's/subrecipient's noncompliance.

We are aware of areas of non-compliance with the above stated assertions, and we have taken corrective action to come into effective substantiantial compliance.

Audit Reports

We have requested that you submit copies of our audited reports, on our behalf, directly to Ms. Marilyn Goldlstein at NIST and Ms. Belinda Riley at the U. S. Department of Commerce Office of Inspector General.

Very truly yours,



Dr. D. B. Karron, Managing Member

12. PROPOSAL TITLE
Anatomic Computer Modeling for Precise and Accurate Therapies

13. NON-PROPRIETARY PROPOSAL ABSTRACT

Computer Aided Surgery, Inc. will develop a new computer application server that will take calibrated, encrypted raw images from a clients' medical imaging instrumentation (MRI, CT, Ultrasound, etc.), over the Internet.
Our system will rapidly generate encrypted, precise, accurate, and variable resolution three dimensional tiled models applicable for diverse applications as radiation therapy, surgical planning, intraoperative guidance, rapid manufacturing of prosthesis, verification of surgical results, robotic surgery trajectory planning, patient communication, education and other customer specific applications
The novel idea, that enables the technological leap forward is Digital Morse Theory.
The essential insight of Digital Morse Theory is that it describes the behaviour of three dimensional SpiderWeb surfaces surfaces in terms of Morse Critical features.
These surfaces are the computational building tiles of the biologically and medically important objects we wish to parse from an opaque brick of bytes that compromise a volume data set.
We can build an index of all of the objects in a volume to utilize these elements in terms of their generator critical points. Our novel geometric construction algorithms will be embodied in a network based application service provider model. The server will upload from the radiological diagnostic image producer, and download to the therapeutic consumer model. We will function as a unique, super specialty medical imaging Internet Service Provider.

14. CERTIFICATION: BY SIGNING THIS PROPOSAL COVER SHEET, I CERTIFY, TO THE BEST OF MY KNOWLEDGE AND BELIEF, THAT ALL INFORMATION IN THIS PROPOSAL IS TRUE AND CORRECT AND THAT:

A. THIS PROPOSAL IS NOT REQUESTING FUNDING FOR EXISTING OR PLANNED RESEARCH PROGRAMS THAT WOULD BE CONDUCTED IN THE SAME TIME PERIOD IN THE ABSENCE OF FINANCIAL ASSISTANCE UNDER THE ATP.

B. ALL INDIRECT COSTS PROPOSED IN THIS PROPOSAL ARE INCLUDED UNDER THE PROPOSER'S COST SHARE AND NO INDIRECT COSTS ARE INCLUDED IN THE ATP SHARE OF COSTS REQUESTED.

C. IF A LARGE BUSINESS, COST SHARING PROPOSED BY THE LARGE BUSINESS IS AT LEAST 60 PERCENT OF EACH YEAR'S TOTAL COSTS.

D. THE TOTAL VALUE OF ANY IN-KIND CONTRIBUTIONS DOES NOT EXCEED 30 PERCENT OF THE COMPANY'S TOTAL COST SHARE.

E. THE FOLLOWING QUESTIONS HAVE BEEN TRUTHFULLY ANSWERED:

		YES	NO
i.	IS THE COMPANY DELINQUENT ON ANY FEDERAL DEBT? (IF YES, EXPLAIN IN ITEM 15, REMARKS.)	☐	☒
ii.	WAS PROPOSAL OR VERY SIMILAR PROPOSAL SUBMITTED TO ANOTHER FEDERAL AGENCY? (IF YES, EXPLAIN IN ITEM 15, REMARKS.)	☐	☒
iii.	DOES THE COMPANY HAVE A PARENT COMPANY OUTSIDE THE UNITED STATES? (IF YES, IDENTIFY THE PARENT COMPANY AND ITS PLACE OF INCORPORATION IN ITEM 15, REMARKS.)	☐	☒
iv.	IS THE COMPANY MAJORITY OWNED BY INDIVIDUALS WHO ARE NOT CITIZENS OF THE UNITED STATES? (IF YES, EXPLAIN IN ITEM 15, REMARKS.)	☐	☒
v.	IS THE COMPANY SUBJECT TO CONTROL BY INDIVIDUALS WHO ARE NOT CITIZENS OF THE UNITED STATES? (IF YES, EXPLAIN IN ITEM 15, REMARKS.)	☐	☒
vi.	DOES THE PROPOSED R&D INVOLVE THE USE OF HUMAN SUBJECTS AND/OR HUMAN TISSUE, AND/OR HUMAN CELL LINES? (IF YES, EXPLAIN IN ITEM 15, REMARKS, AND INDICATE WHETHER OR NOT THE RESEARCH PLAN HAS BEEN REVIEWED AND APPROVED BY AN INSTITUTIONAL REVIEW BOARD (IRB).)	☐	☒
vii.	DOES THE PROPOSED R&D INVOLVE THE USE OF VERTEBRATE ANIMALS? (IF YES, EXPLAIN IN ITEM 15, REMARKS, AND INDICATE WHETHER OR NOT THE RESEARCH PLAN HAS BEEN REVIEWED AND APPROVED BY AN ANIMAL CARE AND USE COMMITTEE.)	☐	☒

15. REMARKS (CONTINUE ON A SEPARATE SHEET IF NECESSARY)

16. DESCRIBE WHAT EFFORTS WERE MADE, PRIOR TO APPLYING FOR ATP FUNDING, TO SECURE PRIVATE CAPITAL TO SUPPORT THIS PROJECT WHOLLY.

CASI's reputation as a basic research company has made our efforts to raise private capital for this high risk project difficult Traditional paths to commercalization financing would require many years of academic research, which private equity will not fund.

Our goal is to use ATP funding to go directly from preliminary results with a novel proven theory to market dominance intellectual property available to all medical and scientific customers over the internet.

SUBCONTRACTS

1. NAME AND ADDRESS OF SUBCONTRACTOR

CUNY Institute for Software Design and Development
City University Of New York Graduate Center
365 5th Avenue
Room 4319
New York, New York 10016

NAME OF CONTACT: Professsor and Exec Officer Theodore Brown
TELEPHONE NUMBER: +1 (212) 817-8191
FAX NUMBER: +1 (212) 817-1510
E-MAIL ADDRESS: TBrown@gc.cuny.edu

2. TYPE OF ORGANIZATION (CHECK ALL THAT APPLY)

- [ ] PROFIT - SMALL BUSINESS
- [ ] PROFIT - LARGE BUSINESS
- [ ] PROFIT - MEDIUM BUSINESS
- [ ] FOREIGN-OWNED U.S. SUBSIDIARY
- [ ] NON-PROFIT INDEPENDENT RESEARCH ORGANIZATION
- [X] UNIVERSITY
- [ ] GOVERNMENTAL LABORATORY

3. ESTIMATED AMOUNT OF SUBCONTRACT

$ 420,000.00

4. DESCRIBE SCOPE OF WORK

Subcontractor will provide mathematical consult, software engineering and codeing services
algorithm design, implementation, and optimization to prime

Subcontractor will provide point of access to CUNY faculty, pay CUNY faculty visiting scientists, PhD students

Providing all fringes, overhead and ancilary costs for pass through by primt to ATP

5. IS THIS A SOLE SOURCE CONTRACT?

- [X] YES (IF YES, EXPLAIN)
- [ ] NO

Justification for Sole Source Contract is based on the expected unique contribution
of the faculty, visiting scientists, and PhD graduate students.

ADMINISTRATION/IPSG ELECTRONIC FORM

2 Executive Summary

2.1 Scientific and Technological Merit

CASI (Computer Aided Surgery, Inc.) will develop an application to upload calibrated, encrypted raw images from medical imaging instrumentation (MRI, CT, Ultrasound, etc.), over the Internet. The system will generate precise and accurate, encrypted 3D tiled models with variable Level of Detail (LOD, variable resolution) for applications including: Radiation Therapy (RT), robotic minimally invasive surgery, patient communication, education and other customer applications via the Internet.

Current technology is deficient because it is time consuming, labor intensive, not automatic, and difficult to use. Expert operators produce results for each study that vary, even with the same data reprocessed by the same operator. It is not dimensionally stable or suitably precise for critical radiation or surgical therapy. Extensive hand retouching of the images and smoothing is needed to finish the models. Current segmentation and modeling technology is currently only practiced in research medical centers, and for expensive medical illustration for advertisements.

Competing methods reformat and reorient image planes using *ad hoc* inaccurate methods. CASI's improvement will use 3D surface modeling to rapidly obtain stable measurements delivered via web browser.

2.1.1.1 Technological Innovation

The novel idea that enables this technological leap forward is Digital Morse Theory (DMT). It describes the behavior of SpiderWeb surfaces by Morse critical features. These surfaces are the computational building tiles of bio-medically important objects. The algorithm indexes all the objects in a volume and segmentation is accomplished by object selection from the index (DMT graph). These novel geometric algorithms will be embodied as a network based application service provider. CASI will function as an Application Service Provider (ASP). This enterprise will function as a computer based geometric foundry for the casting of anatomical structures for biological, surgical, and educational purposes.

CASI will deliver the product models via Virtual Reality Modeling Language (VRML). Customers will manipulate models by mouse, and other virtual reality methods. The click stream behavior of the client will be learned by neural net content personalization technology.

DMT insight enables users to select entire assemblages of components to build desired features without introducing artifacts (segmentation 'tool marks'). With novel mathematical theory, computer graphics programming experience, and clinical research experience, CASI is 4 years to market dominance in high tech medical modeling. We will offer a rapidly delivered, internet based solution for practical patient-specific, tailored requirements, resulting in better diagnosis and better therapeutic quality assurance at mass production costs.

2.1.1.2 High Technical Risk and Feasibility

The technical risk is that the medical user may have difficulty finding desired objects. For most situations, the object is selected from the DMT graph. In difficult or weak images, additional processing may be required for adjusting contrast and surfaces to suit the user requirements and retain dimensional fidelity. DMT is an innovative algorithm with an unproven ability to solve real modeling problems in a production setting. Common wisdom in the field teaches that volume imaging is the technology of choice for many applications because tiling algorithms make too many tiles, behave poorly with noisy data, and connect extraneous objects therefore confusing the resulting model. Iso-contours and surfaces are used in topographic mapping, meteorology, and other fields, so that there are spillover benefits.

The feasibility of the project is based on preliminary research sponsored by DARPA and results through subcontract with the NIH Visible Human Project (VHP).

2.2 Potential for Broad-Based Economic Benefits

CASI will leverage the large national investment in medical imaging industry by improving image understanding and the quality of decisions based on 3D image stacks. CASI will create new

markets for computer biomedical modeling, and propel diffusion of this information to physicians and their patients.

There is an established industry of medical illustration by commercial medical illustrators for medical communication, education, and advertising. The market for patient specific, cheap and rapid anatomic models for critical application will be clearly much larger than diagnostic imaging and medical illustration. CASI modeling technology, both physical and computer, real and virtual, will benefit the nation by better patient diagnosis, treatment, communication, and teaching. The technology will improve the realization of treatment plans, reduce hospital stays, and enable surgical robot motion planning for minimally invasive surgery, better radiation therapy planning, etc. Patient workups will have the artistic equivalent of an oil portrait by a master painter in the hyperrealism school drawn with the dimensional fidelity of an architectural template. The technology will draw with the accuracy of a micrometer caliper, the precision of an industrial robot, with a reasonable cost, with a market value to the patient/customer in thousands of dollars, with the speed of a Polaroid – Land instant snapshot

2.2.1 National Economic Benefits

The nation will benefit by improved health care that will prolong the quality of life. Reduced employee sick leave will decrease disability related payouts and reduce costs to insurers. The efficient use of medical information will produce better yield on capital in imaging technology. Better patient and physician communication, treatment results, and patient satisfaction will result in less litigation and insurance costs. CASI will create new markets for model-based information as the core competency is established that will go beyond our initial Radiation Treatment project. As the medical imaging industry matures into the medical modeling industry, CASI will seek new markets for services, only dreamed of at present.

2.2.2 Need for ATP Funding

ATP Funding is required because CASI's goal is to make a technical forward leap with the DMT based modeling and develop a business to bring it to market. CASI needs the funding to focus on the production of anatomic models for radiation treatment planning, neurosurgery and medical computer graphics and animations. Building on the NIH Visible Human Project (VHP) preliminary results, CASI will creates new markets that will be profitable within 5-years time. The CASI vision time frame, along with no near term profit projections, is too long for conventional commercial funding.

2.2.3 Pathway to Economic Benefits

This Internet solution will grow explosively, as it is accepted in the state of the art. Internet payment systems provide the infrastructure for direct revenue recovery and interaction with customers. Insurance carriers reimburse costs of 3D reconstruction studies at the two to three hundred dollar levels. The high cost of preparing 3D renderings, and difficulty making critical decisions based on them, had made this unprofitable until CASI.

CASI's intends to become the clinical modeling resource firm. CASI will go beyond medical illustration, becoming a reference standard for dimensionally precise and accurate anatomic models. These will be used for critical treatment applications. The goal is to reduce the cost of generating these models from tens of thousands of dollars and hundreds of man-hours to pennies and the labor time to seconds - literally.

Compared to the established market for high-resolution graphical representations in the medical illustration and advertising industry, there is a much larger market for cheap patient specific diagnostic 3D models.

CASI's first market entry is Radiation Therapy. CASI will leverage many other market sectors by licensing and technical support including direct competitors, forensic image processing companies, histopathology image processing companies, surgical robotics companies, medical imaging equipment manufacturing companies, and picture archiving companies. The state of the art will benefit, in area as diverse as semiconductor process engineering to weather prediction. Any field that uses isosurfaces to understand an underlying physical process will benefit.

3 Project Narrative

3.1 Scientific and Technical Merit

CASI will build a clinical geometry "foundry" casting clinical models in simplicial complexes of triangular tiles that define intricate, real surfaces in three dimensions. Instead of plaster, palladium, or plastic we use surface modeling technology. These models will be used for solving problems as calculating trajectories for radiation beams.

CASI will do this by using a new mathematical theory Digital Morse Theory (DMT) that describes the behavior of isosurfaces. Digital Morse Criticalities are special patterns in the data values where isosurface objects appear, merge, separate, or disappear as the threshold value is varied. These criticalities are, in general, local maxima (Peaks), local minima (Pits), and various kinds of saddles (Passes) in the dataset. By building a list of the locations and values of the Criticalities, CASI software can index (tree graph) all of the objects in a volume data relative to each, in terms of objects that surround other objects (parents), peers (connected by saddles), or are enclosed by other objects (progeny). This index graph is used to enable extremely rapid segmentation and interactively build biologically salient composite surface models from the component isosurface objects.

Further, we will accomplish important image processing and model fusion operations based on matching (registration) images containing common features between models from different imaging modalities of the same anatomic region. We can track and quantify model changes during growth, pathology, and therapy. We can measure several difficult to precisely measure metrics such as surface area, volume, and various moments (center of area, center of mass, standard variability, kurtosis and so on). We can also construct various minimal space curves of trajectories for optimal surgical approaches in terms of Critical Lines (minima and maxima paths between objects), and other applications of computational geometry properties from DMT derived models.

When: We expect to have working alpha prototype systems operating on the web within two years, and beta site clients functioning in four years

We do this because many applications in medicine and the biosciences require a geometric understanding to solve problems at a fundamental level, from which to make critical therapeutic and tactical decisions. These decisions are based on critical dimensions, clearances, access trajectories, and to minimize trauma to no-go regions that must be zealously protected during invasive surgical procedures. The biomedical industry needs patient specific maps, inexpensively produced, with high fidelity for a wide range of therapies. These include radiation therapy, image guided therapy, keyhole brain surgery, minimally invasive robotic surgery, functional modeling of the brain, protein and enzyme kinetics, to cite a few. Engineering solutions to these, apparently simple binary decisions are based on biological morphology from DMT based models are an important problems. The PI's experience in the computational geometry, morphometrics, computer graphics skills, and the insight that DMT provides, propel the PI to make the fruits of DMT widely Internet accessible to physicians and patients.

This project will integrate a range of computer and engineering technologies to connect medical image generators to medical model consumers via web browser based technology. The key to the success is not in the existing technology. Success will be due to the implementation of Digital Morse Theory into a new technology, supported by these ancillary data collection and delivery technologies.

Innovation in computer anatomic modeling technology is by innovation in applied mathematical theory.

Our project is feasible because of preliminary promising results with in the NIH Visible Human Project (VHP) female "Eve" data set[1]. The PI has powerful theoretical results[2] that are just being published in the field. Our business prospects are feasible because of the CASI patent position[3]. CASI

[1] Karron 2001
[2] Cox and Karron 2001
[3] Karron, Cox, and Mishra US Patent #5,898,793

has been in business since 1995 as an advanced research and technology research firm, and benefits from the PI's long background in the surgical/medical computer graphics field with publications in the field from 1985

A promising opportunity: The explosion of interest in digital anatomy, virtual humans, visible humans, visible embryos, and even the visible frog project has popularized the concept of computer representations of internal biological and medical anatomy. Two recent Hollywood movies were based on anatomic computer graphics special effects. Multimillion-dollar contracts are being negotiated with computer animation and medical illustration firms for major media outlets (National Geographic and the Discovery Channel). However, the state of the art has not kept up with the demand for much more than pretty pictures and stunning animations. These firms hire a large numbers of technicians to hand segment and retouch manually segmented contour rings from a very large number of slices. Various power assist algorithms are used to reduce the labor intensity of this work, but the size of the raw data sets outpaces the ability of animation staffs to segment, retouch, and render imagery. Computer graphics researchers are developing animation techniques based on this primitive and painstakingly produced geometry. Anatomists spend years developing hand tiled geometric models and animating them. US contractors are failing to meet their milestones and contract deadlines with the VHP data. Firms are leaving the field of medical based animation derived from real data because of the very high costs and long lead times for segmenting desired objects out of pixel anatomic data. Clinical researchers and biological scientists are calling for more data sets of a representative samples of the American population while others are calling for increased resolution imaging of each digitized human. With the potential for a large population of male, female, pediatric, pubescent, adult, and geriatric representatives of each ethnic group, we can expect a very large national sample terabyte scale digital humans. That is one terabyte per sample person so digitized. Clearly, new Level of Detail Management (LOD) technology is required and is a benefit of DMT technology.

This project will advance the state of the art in computer-aided design for biomedical applications, 3D computer graphics, applied computational geometry, rapid prototyping and manufacturing, and robotic surgery. When the PI started this research, the motivation was to produce "correct" isosurfaces for neuromagnetic modeling. Nagging problems with isosurfaces produced by the popular Marching Cubes algorithm of Lorensen and Cline prompted our formalization of a Digital Morse Theory from classical Morse Theory to establish a correct connectivity while moving through all values of iso-threshold. The marching cubes approach is based on a fixed look up table to build triangular tiles in a voxel (defined as boxes with data values at the box vertices). Various fixes to the apparently minor problems in the algorithm are in the computer graphics literature. The flaws were rare, and the frequently invisible in an object with hundreds of thousands of triangular tiles. The fixes solved the problems with small holes in the data in noise by tiling ambiguous cases with a consistent fixed tile orientation. However, for critical measurements and establishing topological, connectivity between objects, in noisy data, isosurface shell models are generally not considered the approach of choice.

The PI's basic research finding was that there are interstitial critical saddle points. The transition in connectivity occurs precisely at that point and threshold value. This saddle depends only on the boxel (2D box element, and voxel face) vertex corners, even for voxels (3D volume element, a 3D cube with volume with data values at the corners). A corollary of this finding is that any fixed lookup table approach to isosurface tiling in the immediate vicinity of a saddle critical point (The so-called "ambiguous" or "4 threshold crossing " tiling cases) results in connectivity errors in general with a probability of ½. Saddle critical points are recognized by their characteristic pattern of high/low/high/low vertex values as we circulate around the boxel perimeter. DMT resolves these saddles by subdividing the boxel on the saddle point, effectively changing it into a vertex saddle point. This is different from tetrahedral (or other simplicial decomposition) composition of an ambiguous voxel, because there are still multiple apparently equivalent tetrahedral decompositions. Tetrahedral

decomposition moves the ambiguity from the tiling to the tetrahedralization. There is no ambiguity in the DMT subdivided voxel/boxel, as it can never have hits (threshold crossings) on the added subdivision edges. Thus, the orientation of the connections changes relative to the critical value. In this way, as we sweep the iso-value through the saddle critical value, there is only one connection change, precisely at the critical value, and no other value [4]Any other change in connectivity is spurious and causes multiple connectivity jumps as we smoothly sweep through the volume element. Further, the wonderful hierarchical nesting property that Jordan Manifold surfaces exhibit is those we expect in continuous Morse Theory. This important property is destroyed under any other rule set.

The PI believe that other graph based analysis of images in terms of isosurfaces or edge extraction algorithm was not successful because of the faulty nature of the surfaces. Graph based image analysis produced complex graphs that were difficult to understand. DMT graphs are by their very nature hierarchical and rooted in the image/volume.

Spillover Benefits are that isosurfaces are widely used in a number of disparate data analysis situations, *i.e.*, petrology, meteorology, forensic image analysis, hyperspectral imaging, image compression, and understanding. Scientists in other application areas will use our server to build market and problem specific application services. SpiderWeb model scan represent turbulent fluid flow shear surfaces, separation surfaces, cavitation phenomena, and other highly intricate surfaces. SpiderWeb models are noise proof, in that they properly model noise instead of breaking apart or connecting incorrectly. We can represent the relationship between intricate fluid flow structures by the DMT graph representation where computer graphics does not reveal internal structures. We expect that research into many important biophysical phenomena, such as cell membrane porosity, receptor mechanics, and enzyme mechanics will benefit from our tool and analysis. From the preceding list of spillover benefits one can see the contribution to the United States scientific and technical knowledge base, as any application that makes use of surface analysis will benefit by using our technology and ASP.

Project team qualifications; The PI formed the prime contractor company, CASI in 1995. The PI has combined expertise in plastic surgery and neuromagnetic functional imaging dating back to the 1980s (Cutting et al 1986) and advanced mathematical theory in the 1990's (Karron 1992). Our original motivation for geometric modeling was derived from research on neuromagnetic brain anatomy structural and functional modeling. The research evolved into work with cinematic cardiac modeling. The company was founded with a Phase I SBIR Grant from DARPA Advanced Biomedical Technology Grant and went on to do a Phase II grant, and a Phase III add on grant. We also obtained DARPA funding for Digital Morse Theory in the Advanced Computational and Applied Math program at the DARPA Defense Sciences Office. Dr. Karron has run the company web site and ISP since 1995. CASI was founded to be a superspeciality medical surgical ISP. Our web site has been on the air for 6 years, and is well indexed by all of the leading indexing services. This is the basis for our inspiration to run a 'computer anatomic foundry' as an ASP. Dr. J. Cox has been working on the mathematical underpinnings of DMT with Dr. Karron since its inception. Dr. Cox has extensive theoretical and practical experience in new algorithm mathematical description, proof, efficiency evaluation, optimization, and coding in C++ and derived languages. Dr. G Wolberg has many years experience in digital image warping, registration, and is an expert imaging scientist.

3.1.1 Technical Rationale

3.1.1.1 Technical rationale introduction and perspective

The goal is to build surfaces that can be used for object modeling and trajectory analysis. Users will make vital decisions based on the distances between objects, surfaces, and points. Lives will depend on these measurements. Many algorithms and technologies from computer graphics are not of high enough quality for these critical applications. Good enough for graphics display, is not good enough; too time consuming, not repeatable, or too expensive for many important medical

[4] Karron and Cox 1995

applications. CASI requires topological surface tiling make correct connections. Geometric calibrations from the source images must be preserved, and segmentation artifacts (i.e., tool marks) must be eliminated or minimized. Where the image is manipulated, the 'cut' surfaces must be clearly marked so that the user knows what is artifact surface. Hand retouching of objects is expensive, time consuming and introduces additional warpage issues, which reduces confidence on these objects for critical measurements. By preserving calibration at the imaging equipment level, we can precisely and accurately manage warpage and coordinate system disparities between multiple data sources.

Technical challenges that display significant recognized uncertainty of success by experts in the field: Computer graphics and computer modeling are distinct fields. Good enough for computer graphics will not be good enough for our surgical and treatment applications. Measurements of biological shapes are made difficult by the lack of best practices and standards in the field. This project will help establish best practices for this emerging field. The field biomorphometrics is contentious. Biological shapes require new technology to understand, measure, and manipulate. There are no straight reference edges, circular arcs, or fixed points on which to base a Cartesian coordinate system. Living things are constantly in motion, over time scales of seconds to years. There are a large number of parameters required to describe geometric regions, and no generally accepted theory for a complete description of an organisms shape, much less for diagnostic and therapeutic manipulations of this shape. Industrial metrology is ill suited for such complexities. We intend to extend the limits of the field

Isosurface methods are be used to provide object geometry. However, isosurface methods are not generally considered a preferred segmentation method. This is because previously we have not been able to calculate or visualize clearly exactly, where a particular isosurface object connects to other objects that we do not wish to include in our intended object (the Segmentation Problem). Indeed, the very surface from an object we wish to extract generally obscures the attachment saddle points where our desired object connects to undesired objects. This has been the major difficulty in three-dimensional isosurface based rendering. Other methods, such as volume rendering, are aesthetically pleasing but do not provide geometric rigor and insight required for future analysis and use. Refinements in volume geometry based on volume imaging do not consider topological issues. An algorithm that fit a surface around a cloud of points, or shrink-wraps a minimal area surface around a volume object, forces the topology to that of a single object. It is possible to iteratively build volume image objects into multiple objects, but it is tedious, expensive, and fraught with geometric problems. Unguided isosurface marching geometry runs amuck, covering adjacent objects and obscuring the scene. For critical applications, such as surgical anatomic modeling, we need properly connected surface geometry. Hand segmented objects contain segmentation artifacts, and do not nest properly inside superior and surround inferior objects. New thinking is required to overcome these difficulties without resorting to brute force segmentation by hand drawing slice wise rings, no matter how quickly a professional segmentor can draw rings. There are always going to be too many slices. Artifacts introduced by the illustrator's hand are unacceptable for precise analysis.

There are serious limitations of the state of the art in segmentation technology and theory. Currently, selecting objects in one slice only is a time consuming and frustrating exercise. The partial solution is that the segmentor can see a portion of the object in the image plane. With rapid 2D contouring, the user can quickly find a suitable contour ring from a seed point. This line represents the intersection of a larger surface through the seed slice pixel image plane. We then use this to seed a three dimensional surface. However, the segmentor may find that the surface may have attachments to other objects we do not wish to include in our desired object. The segmentor will need to hunt down the attachment points and do 'something' damming. This is the current state of the art in segmentation.

DMT calculates the connections (DMT Criticalities). DMT segmentation minimally perturbs the contrast at attachment points to achieve the separation we desire. In RGB space, the segmentor may find that there are attachments in one portion of color space, and a suitable segmentation surface

exists in another portion of color space. The goal of the segmentor menu is to navigate a segmentation surface through color and other (CT, MRI) spaces; a task 3D interactive computer graphics does not make simple or help visualize.

Isosurface algorithms generally over-tile a surface. Each triangular tile is constructed independently of its neighbor. The size scale of the triangles is less than the voxel size, and in a large data set, the number of triangular tiles can become burdensome to manipulate and display, particularly in real time. The current state of the art is to build a marching tiled surface, then use triangle decimation to collapse almost co-planar triangular tiles into one another. This approach generates large intermediate memory consumption (bloom) of having to build a fully resolved surface then decimate it. This approach, while functional for graphic display purposes, is not deterministic. This means the resultant tiling is very different for every seed tile used to decimate a surface. Decimation changes the geometry of the decimated object in an uncontrolled and possibly unsuitable way.

Digital Morse Theory can provide a solution to these limitations in the state of the art. It can be used as a novel basis for segmentation, data fusion, and LOD management. The technical risks are than that the algorithm has not been fully implemented, tested, power tested, and accepted in the image and modeling processing community. The algorithm may have computational bottlenecks as we scale up service to production levels on very large images. We ameliorate this risk by using a heavy-duty computer server that can manage large intermediate calculations and memory requirements.

Related topics are hot research on level set theory, isosurface methods, differential equations, and Morsė theory. An exhaustive bibliography is beyond the scope and page limits of this proposal, but we refer to the work of J.A. Sethian, Jack Snoeyink, Chandrajit Bajaj, Robin Forman, Stan Osher, John Hart, Carroll K. Johnson, and others. Some of the key theoretical ideas we seeking to develop in medical modeling (Segmentation manipulation by DMT Graph) were explored by C.K. Wall in "Surgeries on Compact Manifolds" (1964, republished 1970, and 1999) by the American Mathematical Society. Marsdon Morse published "The Calculus of Variations in the Large" in 1932. Our principal contribution to the field is the realization of Morse Theory in discrete representations of the underlying continuous world. We make Morse Theory computable. Very recent applications of Braid Theory in Morse Theory have been discussed in applications as diverse as fluid flow and air traffic control avoidance trajectory planning. The intellectual atmosphere is embracing Morse Theory. CASI's computational approach in Digital Morse Theory will have wide applications that we are most keenly aware. Indeed, medical surgery can be considered changing the topology of the patient; Mathematical and computer surgery on DMT object models is the next step logical step in computer modeling of surgical procedures.

3.1.1.2 What is Digital Morse Theory?

Digital Morse Theory describes the behavior of SpiderWeb iso-valued surfaces (US Patent #5,898,793). These surfaces are composed of a simplicial complex of triangular tiles. The surface has the property of being Jordan (no holes). The surface is manifold (no Klein bottles, with consistent normal vectors, a well defined inside and outside). The surfaces within any particular family are "Morseian," (family member surfaces nest entirely inside or outside each other. As we raise or lower the threshold isovalue, the surfaces arise or disappear at well-defined Morse Criticalities. These are kinds of local maxima, local minima, and various kinds of saddles. The surfaces arise from maxima (sources), disappear at minima (sinks), and merge at saddles. Therefore, by scanning through a dataset, we can identify all these component objects by cataloging only the criticalities by their characteristic bit patterns. This is computationally very efficient.

These SpiderWeb surfaces capture essential inflections (transitions from concavity to convexity) in object geometry. Fine scale features (noise) in the geometry create excessive numbers of triangular tiles. DMT provides a method that can reduce the density of tiling by removing smaller through larger scale geometry features in the surface. This is the basis for Level of Detail (LOD) management. For example, if we are using facial features to define a patent based coordinate system, a

natural fiducial point such as Nasion (the saddle point on the bridge of nose), can, shift unpredictably in triangle decimation technology. In DMT theory, the larger-scale saddle point remains stable while the smaller, noisy surface features are relaxed smaller to larger, in a hierarchical fashion.

A family of isosurfaces is the collection of surfaces that shares a "one to one" mapping for any point on any member surface to any other such member surface. At Morse criticalities, and only at criticalities, does the mapping property change. This is due to the creation of a new object, the destruction of an object, or the connection to another, object. By showing the Morseian relationship between criticalities (nesting), we establish the relationship between families of surfaces. Because the server can quickly find the Digital Morse Criticalities as bit patterns in the data, we have a new, powerful, and fast way to make topologically coherent, geometrically sound, realizable objects from an image data stack.

A Digital Morse Theory Graph (DMT Graph) is a hierarchical linked list (graph) of all of the separable objects in an image. Each object is identified by its source criticality. We cannot see all of these objects simultaneously because most of the objects are inside other objects, and therefore obscured. Computer graphics does not elucidate the relationship between objects. The hierarchical nature of the DMT Graph is derived from the isosurface families being Jordan Manifold.

There are a number of important practical uses for this insight. We can supply instructions to a rapid prototyping system for making any object or collection of objects in our images. We can rapidly manufacture fixtures to hold patients precisely and accurately for RT beam steering. Further, we can define optimal paths between these objects, such as minimal distance paths, minimal height paths, or minimal paths subject to some other type of constraint. Constrains surfaces would include maximal avoidance from no-go regions (blood vessels, eloquent brain cortex, or some such vital structure that must not be affected by our surgical robot manipulator). Very recent applications of braid theory to these Morseian paths may be a very efficient method to calculate robotic trajectories and radiation treatment beam plans.

3.1.1.3 The Fish Tank thought experiment: Counting Islands as the water level changes

The essential insight of continuous Morse Theory can be intuited by a thought experiment. Consider a rectangular fish tank. Into this tank, we pour small quantity of sand such that we have two smoothly sloping small hills, one taller than the other. Now, we fill this tank to the brim with water. We now start a count of the number of island objects as we very slowly drain the tank. Our first observation is that there are no island features in our tank scene. As the water level drops, we observe the water level just coincident with the peak of the tallest sand hill. We notice behavior of the water at the critical peak of the hill. We get a degenerate point island contour, with zero area, zero perimeter, and infinite curvature. A vanishing small change in the water level and this point contour expand into a tiny island. We increment our island object count by +1. We continue to drain water from the tank and observe the birth of the second island at the peak of the second little hill. We again increment out island object count by +1 to two objects. As we continue to observe the drop in water level in our tank, we observe the two island contours expand and grow toward each other. As the water level reaches the level of the critical saddle point between the two hills the island contours touch at precisely the saddle point. We observe that our object count decrements by –1 to give a total island count of one. The essential feature of this rubric is that we only need to count the peaks and passes to inventory all of the object islands in our scene. This approach works even as we increase the complexity of the scene. We can use the same idea of enumerating peak, pits and pass criticalities in a very complex archipelago of island features, at any size scale, or any range of size scales, including noise at any size scale.

3.1.1.4 Why a Digital version of Morse Theory?

Morse theory works precisely because it solves the problem of singularities in data models. CASI will use its digital version of Morse Theory that works on computers with pixilated data, which will yield the same results as continuum Morse theory on analytic Morseian functions. Digital Morse Theory extends Morse Theory to discrete data, such as a digital image. Digital Morse Theory

describes the behavior of SpiderWeb surfaces and objects. There has been significant research effort to build quickly computable surfaces. There is little work on technology that effectively describes all of the isosurface objects in a volume data set. No research provides a practical method of indexing all of these objects in a useful and comprehensive fashion. In order to make Morse Theory work in this digital setting, DMT adapted the notion Peaks, Pits, and Passes in subtle but important ways. We extended the idea of a Peak to include not just a point peak or pit, but plateau peaks, and pits. Criticalities can also be ridges, extremum of curvature, and umbilicus of curvature (a curvature saddle). Saddles had to be extended to include not just vertex saddles (where the saddle point is collocated on a vertex) but also the most common interstitial saddle point. This solved the so-called problem of "ambiguous" voxels. This means that the surface is completely determined, unambiguously tiled, and stable surface representation in any texture or noise.

3.1.1.5 Digital Morse Theory for rapid effective semiautomatic segmentation

The eye sees interesting objects in a 2D image and the mind would like to reach into the image and isolate (segment) that object from the surrounding pixels. If the 2D image is a slice through a stack of slices imaging a 3D volume, we can attempt to segment the entire object from the surrounding voxels, including the unseen portions above and below our planar sub-sample. If we are lucky, we can use 2D isocontours lines to estimate 3D objects. The current state of the art in segmentation is to select a seed location and use that seed to start propagating contours lines in the reference image plane and contour surfaces in the volume image stack. The problems arise where we have a likely looking contour ring object, and use that to seed a volume object surface. What may look appropriate in one slice will frequently run amuck and connect inappropriately to other extraneous objects in other slices. The segmentor needs some guidance as to where the object that we wish to segment in any one image slice will connect to other objects anywhere in the volume image stack; including the currently visible slice, and/or in slices above or below. To make matters worse, the very surface we are seeking to grow obscures the critical features where it connects to other objects.

The current state of the art is to build pixel fences of higher valued pixels to constrain a growing surface. This is a modified kind of image retouching. We are attempting to retouch not the object, but just a vanishing distance beyond the objects' borders. It is retouching almost blindly, in hope that we are corralling our emergent surface appropriately. A lot of fencing may be used in a complicated object. While not all fence objects are required, they will change the shape of the object in the immediate vicinity. In order to guarantee that our surface won't leap over the pixel fence, we have to use a very high value, typically fully saturated white values at the upper end of the image histogram. By raising a high fence around the object, we are changing the strength of the surface. The strength of the surface is the intensity of the gradient normal to the surface. A surface can be weak if the delta intensity crossing from inside to outside is very small, or an identical surface can have a very large intensity change across the threshold value. The only way the surfaces can be independent of the strength of the surface is for the strength of the surfaces be identical at all points. Therefore, any uneven changes in the strength of the surface (which would result from hand carving or hand fencing by changing pixel values) would introduce geometric changes in the surface that we have dubbed 'tool marks'. Typically, these artifactual features are removed by post processing operations to smooth out rough spots. This makes using this technology for modeling expensive, time consuming, and requires an expert operator.

Edisonian invention vs. Advanced Math Insight: The state of the art in image segmentation is trial and error, cut and fit, iterate, and refine; reminiscent of Edison's attempts at managing the voltage drops in the early DC power distribution grids. Edison built scale models of the grid with copper wire, and measured the voltages the subscribers on the grid would see. A young scientist came to Edison looking for a job, boasting that he could calculate the voltage drops without trial and error estimation. Edison needed a hard worker, but resented the hubris of the man. Eventually Edison eventually threw Telsa out. DMT afford a way to directly map/graph the objects in a data volume at every threshold, without browsing or exploring the volume with 3D interactive computer graphics. CASI will move

the state of the art out of Edisonian segmentation and into the deep insight that DMT provides; an application of advanced math to solve a multi-industry problem.

3.1.1.6 Decomposition of pixel image into DMT graph representation

The DMT graph is the first step in the analysis of an image in terms of its surface defined objects. All objects are composed of various implicit isosurface objects. This graph representation is a hierarchical index of all of the component objects in the data volume. Additional information can be encoded into the graph with the geometric shape information of each implicit object. Essentially this operation recodes the image intensity information into a system of peaks, pits and passes organized into parents, peers, and progeny (the PPP to ppp relationship). Further, each component of the object shape can be further graphed as a system of concavities, convexities, and their umbilici (the region between where the surface passes through flat. Since each object is a closed, manifold, this enforces the surprising and useful parent to progeny hierarchical organization. DMT analysis effectively turns a pixel image into a vector drawing in terms of contour line and simplicial triangular tiles.

3.1.1.7 Application of Union and Intersection operations to establish homology between images

Because each related images is a rooted tree graph, we can start matching trees by various graph-matching algorithms we will be designing with our computational geometry colleagues at the CUNY. Our algorithm design approach is based on the idea that the root of an image graph contains all of the area of the image. Each node under the root contains a normalized fraction of the image area relative to the whole of the image. In this way, the DMT graph is a completely dimensionless representation of an image in terms of area/volume fraction and Morse criticality a union image graph is all of the common image features between two related images, such as an MRI and a CT image. It is calculated by recursive descent searching into each node, then sub node. The intersection image is all of the independent features not common between two images. The novel applications of such a graph will be among the most exciting and useful new finding expected to come from this research. We believe that the brain uses this approach for steriopsis and the synthesis of range information from two related points of view. Previous efforts at image graph decomposition were confusing and generally considered not fruitful. Because the SpiderWeb surfaces are Jordan Manifold, they decompose naturally into a tree graph (because the surfaces don't interpenetrate and join only at critical nodes), and the results are natural to understand.

3.1.1.8 Medical Illustration and Medical Modeling

Medical illustration is the communication of a medical concept from the mind of the artist to the mind of the viewer. It is intended as an educational process, not necessary as data display and analysis. Medical Modeling, as we wish to compare and contrast against, is the technology for the building of geometric models of anatomic features. Without suitable tools for the segmentation and modeling of geometry from medical images, medical modeling can become medical illustration using three dimensional computer graphics because of excessive hand retouching and smoothing. While computer graphics is an important part displaying our computer anatomy, computer graphics is not the product and imaging it not out intention. We consider this a biomedical engineering project. However, we recognize that there is a significant need and highly profitable market in medical illustration and animation industry that we can serve and derive a significant revenue stream. This is because our technology can reduce the extreme costs of preparation of high-resolution anatomic images and animations significantly.

3.1.1.9 Computer graphics and the curse of dimensionality

As technology provides us with more raw data channels, at faster rates, at greater resolution, our ability to comprehend it is limited by our ability to visualize it in three dimensions, in three primary colors, interactively. High-speed interactive computer graphics, and advanced rendering algorithms, require slow, careful, and expensive examination of the spatial nature of the data by a dedicated expert. Each channel of information may be dependent on each other. Additional resolution may not increase our understanding of the relationship between objects. We need new ways to understand higher dimensional data where computer graphics overwhelms the visual system of the

observer, or requires extensive interactive exploration, observation, and analysis of an expert operator. As technology give us more channels of data, computer graphics can compound the "curse" of too many dimensions of data.

A DMT graph based topological understanding of complex higher dimensional (Color, CT, MRI, PET information dimensions) spatial relationship is our proposed "cure" for the "curse" of higher dimensional data channels. This is because a topological relationship can be represented independently of the dimensionality of the data; A ball in 3-dimensions is one node on the graph, as is a ball in 20 hyperspectral colors.

3.1.1.10 Description of technical challenges and barriers we will tackle

3.1.1.10.1 DMT for image segmentation

Segmentation for precise and accurate application requires the segmentor make no, or minimal changes in the image. For many images, we only need to find a path (segmentation plane) around an object. Where none exists, we need to 'carve' one. We require well-defined minimal 'surgical' changes in the image such that we minimize warpage in the resultant objects' geometry. We define a 'DMT Segmentation Operator' to manipulate connecting saddle values to enable wholesale connection or disconnection of objects; effectively carving (separating) and gluing (joining) objects with single mouse clicks.

In noisy data, or when segmenting in uneven difficult geometry (blood vesicles, nerves, thin bone), in order to separate an object multiply connected to its proximate objects, we have to introduce additional contrast to separate the desired object. We can restate the problem; what pixel locations with what value changes need to be applied to achieve the separation we specify. We employ a contrast mask image layer, to preserve the original pixel data values. Using the DMT graph, the user select the most proximate saddle nodes and applies the 'segment' operation to elevate or depress saddles as required to parse an object from its neighbors. We then mark this 'cut' surface so that we are aware that this is an artificial surface. As we make only the minimum changes in gradient, we minimize the introduction of 'tool marks', and maximally generate a smooth cut surface. Preliminary testing of this procedure has been most promising.

3.1.1.10.2 DMT for image registration

Image registration is any of a number of methods that translate, scale, and rotate an image such that common features in both images are made to be co-incident. The determination of the common features, or homologous points, lines, and regions, is typically specified by a technician's eye. The popular animation effect of morphing one (somewhat) related image into another image requires a lot of human interpretation to specify which points and image regions are to be warped into another. An important application in medical imaging is the combination of multiple imaging modalities into one image representing the fusion of features between both images. Manual determination of common features, particularly in cinematic medical image series, can be time consuming and expensive. Automatic or semiautomatic methods are needed. Digital Morse Theory provides a new means of image understanding to identify common features between one or many images.

3.1.1.10.3 Registration of images by DMT union operators and digital image warping

The goal of registration is to recognize homologous features in disparate view of the same scene. Decomposition of disparate images into DMT graphs is the approach for this project. An example would be calculating range information from two closely spaced Point of View (POV) images, or varying the MRI pulse sequence progressively from one sequence to another. At very small POV disparity (in distance, or pulse sequence), we increase the disparity between the two images. We will conduct experiments where we continuously calculate the DMT scene graph from two views with increasing disparity between the views. Our aim is to validate algorithms for calculating the DMT Union and Intersection graph. With a validated algorithm for calculating the Union between two scenes, we can do fully automatic registration between scenes and solve an important problem in image fusion, automatic steriopsis, and the CASI modeling service.

We can register disparate but similar images by calculating the common features of the images (union) without the disparate features (the intersection of the images). From the union graph, we can calculate the digital affine transform required to match each homologous node to occupy the same space (An affine matrix at each Morse criticality node). We can then apply the intersection image at each parent node to generate a topologically correct but warped to fit the union fusion image that is geometrically calibrated by one of the images' calibrations.

3.1.1.10.4 Bandwidth management

DMT based representations can be used to transmit an image from large features to progressively smaller images. This will be an important spillover benefit, in that we will be able to send images efficiently through limited bandwidth by organizing the image for transmission from largest to smallest component. We will be able to transmit a pixel image without drawing any pixels. We will transmit the image as large component contours first. Successively smaller and smaller contour objects will build on the client web browser, but the essential geometry of an image will build in the first data packets of the image. We will draw the vector geometry of pixel images at significant bandwidth savings. That way the image will more quickly recognizable very early in the image build process. Optimized picture transmission over the web important for sending images echoing clients data back down to clients browser.

3.1.1.10.5 Trajectory planning for surgery: Braided Digital Morse Theory

The state of the art in Surgical Robotics is remote actuators with video and/or haptic feed back. A true robot has some algorithm and model about the environment it is attempting to navigate. Improved algorithms for navigating inside the body are required which need models from which we can calculate internal trajectories. This is a technical challenge we believe we can tackle in this project because we can calculate optimal paths between criticalities. Between two peak criticalities, there must be a saddle criticality. New Variational Calculus and Morse Theory methods can provide a "least distance" or "minimum height" path between the two. We will research new concepts in Braid theory applied to DMT (Braided Digital Morse Theory) with Braid expert Professor. M. Anshel.

3.1.1.10.6 Trajectory planning for Radiation Therapy Beams

A particularly difficult tumor location to treat with radiation or electron beams is the breast. The goal is to destroy the cancerous tissue, which may or may not be a well-defined mass inside the breast, overlaying the thorax and in dangerous proximity to the heart and lungs. Patient fixation and re-fixation during the course of radiation therapy is difficult. In the current state of the art, it is expected that collateral damage be inflicted to the heart and lungs during high-energy breast RT. CASI and its clinical collaborators at NYUMC believe that with better modeling of the breast, the tumor, and the thorax, we can design better therapies. RT requires serial models the tumor during the course of therapy. CASI will be able to build models of critical organ geometry, design fixation jigs for the patient, and beam trajectories.

3.1.2 Assessment of success of the project approaches and alternatives

Our assessment of the success of this project is based these positive and negative features of our proposal:

3.1.2.1 PLUS

We have a comprehensive new theory that solves important problems in the state of the art in a number of fields. The theory is proven, and based on classical Morse Theory, and is a hot research topic (Braided Morse Theory, Level Set Theory, Contour Trees). The principals and faculty are world-class graphics programmers, applied mathematicians, expert in algorithm design, optimization, and complexity analysis, expert in ISP and web site management, and the DICOM Imaging Instrument interchange standard. The PI's preliminary results with 2D RGB (color) Visible Human project data are encouraging.

3.1.2.2 MINUS

The utility of our new algorithms are not established in surgical or radiological practice. The software is written as academic demonstrations and proof of concepts only. Significant work is

required to make the applied math solve our customers problems. We need to educate technologists and professionals in the field, as DMT graph segmentation is based on a new paradigm. Technical superiority of a new algorithm alone will not necessarily lead to widespread acceptance. The delivery of a solution and the ease of its use can be more important to market adoption.

We must understand the biology as well as the anatomy of what we are modeling. Using only anatomic imaging to attempt to pin down issues of precision, accuracy, in a living, highly variable, perverse human population is going to fail. Intraoperative visualization is the way to get geometric feedback for accurate geometric placement, but it will not necessarily improve patient treatment results. Functional imaging may show that the source of pathology is not at the center of the anatomy. Functional imaging (functional MRI, volume impedance tomography or neuromagnetic source imaging) will ultimately be the solution. CASI DMT can manage issues of precision and accuracy in data fusion between widely disparate resolution scales typically found in functional images fusion. The biology of the pathology will most certainly complicate the geometry in novel and exciting ways.

3.1.3 Implementation details rational

The main interface to the CASI system will be by connecting to the CASI web site at http://www.casi.net/ and logging in via a secured socket level connection, with all image and model transactions encrypted to the appropriate privacy standards for patient information (HIPPA). There are two fundamental operations on the server. The first is uploading raw image data and then generating the topological decomposition and recoding into a DMT graph. The DMT graph indexes each object in a volume, and each feature in the object geometry. The graph of a volume contains the same information as the pixel data; but in a hierarchical segment able object format. The second fundamental operation is tiling from a node on the DMT graph. The model is created at a bandwidth appropriate tile density and downloaded to the user. This is possible at interactive speeds because the DMT graph is an index into the volume, enabling rapid segmentation and model generation.

The model server is the heart and soul of our effort, the "forge" through which pixels become anatomy. Raw image stacks are uploaded. A DMT graph is presented back to the user. As the user moves the mouse, tiled models are forwarded to the client for real time interactive approval or further pick, drag and drop assembly.

The radiological client user will log into their account at CASI, on a client machine on their local network, which will also connect to the imaging equipment via the radiologist facility TCP/IP net to a DICOM (Digital Image Communication) protocol for interchange of medical images that runs on all medium to high end medical imaging equipment. Each radiological facility will provide access to its imaging equipment image files. We will write code that will enable the client to push the code up to the server, or the server will be able to automatically pull client images as they are produced. The images and associated patient identifying information will be encoded and encrypted to HIPPA (Health Insurance Portability and Accountability Act of 1996.) Software features are a universal file and directory recognition system, that can learn the format of any medical imaging instrument file format, and any popular digital image format so that installation in a client radiological site is quick and trouble free. We will also build a universal calibration service into the radiological client. Most imaging equipment has maintenance contracts and quality assurance requires that the equipment be calibrated by imaging an imaging phantom with known geometry and dimensions. We propose to provide a uniform calibration service to insure uniform model fidelity for all of our client images. In that way we can provide a cross instrument, cross instrument manufacturer, calibration standard so that our geometric models are of well defined quality, independent of the standards of instrument care the client maintenance standards call for, and meet CASI defined standards.

The design goal for the referring physician client software is to have immediate access to the imaging study and minimize the work required to do a three-dimensional work up. The referring physician, the attending surgeon and any of the consulting caregivers authorized by the referring physician, can access the images, the patient models, and any study tools, annotations, and other material. This may include medical illustrations, reference materials, annotated treatment plan models,

pre, post treatment photographs, intraoperative photographs, and so on. The materials may be to educate the patient as to the upcoming procedure, document the procedure plan, report the procedure results, or even sell a prospective case to an uncertain patient. Because we are going to be doing interactive three-dimensional computer graphics on the downloaded anatomic models, we will enforce a minimum level of graphics resolution and triangle rendering speed by the client. These standards are approximately the same as available in any high-end computer video board with OpenGL support. These boards cost approximately 100 to 1,000 dollars with a polygon draw rate of at least 30 million illuminated, z buffered triangles per second. This a standard value for a PC workstation class graphics accelerator board, or a high end computer game OpenGL board

The patient client software can display study models permitted to the patient by the referring physicians' client. This is a limited functionality physician interface. In this, the physician can educate, inform, or sell the case to the patient.

We will use VHP RGB data and register the base anatomy to the CT and MRI patient specific images. We will build detailed models that contain the diagnostic information particular to the patient. Our goal is to generate a fused composite model of the patient, containing standardized anatomic data scaled and registered into the patient coordinate system, to provide color and other inferred structure detail that MRI and CT do not measure. As we validate our code, and the radiology facilities client code approaches completion, we will move to using patient specific MRI and CT source data.

Level of Detail (LOD) management is key to the commercial success of this project. The models, as built on the server will be over tiled (have more triangles than required to solve most modeling and trajectory problems). Delivery of the product models and images to the client computer must be appropriate to the available client bandwidth, display resolution, and the client computer storage capacity. Interactivity requires rapid LOD management so server downloads only enough detail to permit the client computer to display the model on its OpenGL graphics accelerator subsystem. Failure to achieve the desired bandwidth and latency by the project termination data will be offset by the expected growth in next generation Internet bandwidth and yet even faster graphics chip sets. Should hardware technology obviate the need for an extensive LOD management subsystem, we will scale back our effort in this area appropriately.

We will close the loop with our users by installing a click stream subsystem to monitor how our users interact with the selection/segmentation menu. From are able to optimize the interface to minimize the selection, and segmentation clicks required of our users. Selecting objects can require a lot of picking and selecting on a deep the DMT graph menu. We expect that most users will make canonical selections, and by monitoring patterns in the selection behaviour, we believe we can intuit users intention, taste, and desired objects after they make similar choices in different patient datasets. As our system gains experience with alpha testers ad users, we will test to see if this facility makes using our system intuitive and decreases each users number of selection clicks to find the models they wish. In this way the user interface and the speed and quality of the users' modeling effort is improved.

We will build a Radiation and Oncology Physician Client Interface that implements special features requested by our Radiation Therapy (RT) collaborators at NYUMC. We will use our core technology to segment and build models, but also track successive tumor model changes during treatment, develop beam trajectories (via Braided DMT) through the target (the breast tumor) and no-go regions (the lungs and heart). We will develop ablation isodose isosurfaces (surfaces of dosage intensity great enough to ablate tissue), and low dose isodose surface (the surfaces of dosage intensity safe for healthy tissue), for no go region. We will build union and intersections of these organ and isodose objects using our DMT graph technology to highlight dangerous problems before the patient is hurt, and to validate treatment plans prior to treatment.

We will begin by doing breast cancer cases using the generalized physician client with the radiation oncology department at NYUMC. We will be building patient models from CT slices, and modeling tumors during the course of treatment. We will also develop isodose surface maps of total radiation absorbed as well calculating beam trajectories. Our goal is to minimize the radiation dosage

in the thorax and maximize dosage in the targeted tumor. The research challenge is to do difficult beam trajectories that the department software cannot manage because of the geometric complexity or lack of critical organ models.

We will build a Neurosurgical client interface, to provide steriotactic brain surgery planning for keyhole surgery. We will incorporate features requested by our Neurosurgical colleagues at St. Louis University (SLU). We use our modeling technology to build no go regions such as articulate un-diseased brain and major blood vessels, and the target region we wish to biopsy, ablate, or deliver therapeutic agents. We can model the union of the no go regions and the access path to validate surgical plans prior to surgery. Any volume in that object class will immediately flags a problem.

3.1.4 State of the art before project:

The current state of the art for anatomic modeling is hand pixel picking or semi-automatic power hand assists (snakes, dilation / erosion operators, flooding regions, etc.), drawing contour rings, sewing a surface between rings. Marching cubes and friends tiles all objects at a threshold value, regardless of their connectivity. Various advanced techniques require hand drawing pixel "dams" to contain surfaces from spilling into inappropriate regions, or "roughing in objects" prior to contouring. These techniques distort the object geometry, are imprecise, create tool marks, and other dimensional instabilities. They require an expert operator, are not repeatable, even with the same operator on the same data. Critical radiation therapy simulation modeling for beam trajectory planning is done by the seat of the pants, line of sight, with insufficient computational geometry support on physical simulators. Robotic surgery is not; there is no theoretical, robotics technology to makes calculation of intraoperative trajectories possible without good anatomic modeling. Currently, neurosurgical trajectories are typically simple straight lines avoiding large internal obstacles (blood vesicles or eloquent cortex). Anatomic computer animation for medical or commercial illustration requires many technicians working on multiple packages doing hundreds of hours of hand editing to make seconds of finished rendered animation frames.

3.1.5 State of the art after project

Within three to four years from the start of this project, segmentation will be accomplished in seconds; simply by moving a mouse over a DMT graph (specifying a threshold value and parent criticality) browser widget, and immediately seeing the 3D object selected. If the object is not simply selectable (the desired object is has multiple connection nodes to other objects), the user can click on the graph node to have the proximate connecting nodes disconnected by changing the minimum number of pixels the minimum contrast. Surgical robots will use real time updated anatomic model information to navigate deep inside the body. Difficult to reach breast tumors will be treated with no burnt lungs. The segmented models will be precise, accurate, and suitable for Hollywood computer animation, deep brain surgery, and high school student science fair projects. The technical leverage of understanding surfaces, objects, and being able to manipulate them adroitly are manifold. Any engineering or scientific application that typically uses isosurfaces for analysis will benefit from DMT graph analysis.

3.1.6 Technical leverage into a broad spectrum of spillover benefits

The technical leverage of understanding images, surfaces, objects, and being able to manipulate them adroitly are manifold. We will be able to effectively transmit large pixel images as nested large to small contour objects. Any engineering or scientific application that typically uses isosurfaces for analysis will benefit from DMT graph analysis.

3.1.7 Technical Rational and Advancement of the State of the Art (TABLE)

Figure of Merit	Projected Technical Targets	Current State of the Art	Technical Barriers	Innovative Approach
Resolution (Distance)	No Resolution Limits	1/3 mm pixel size	Scanner device pixel size, typically, imaging devices produce too many pixels to use all of information effectively	Vector from pixels
Effort (Time)	1,2 seconds, possibly interactive speeds (1/30th second)	Hours, days, weeks	Patience of operator, excessive resolution of image data. Objects to be extracted require specifying every pixel, or every perimeter pixel.	DMT Graph specified objects are hierarchal, so groups of objects can be manipulated instead of individual pixels. Single mouse clicks segment complex objects
Cost of Professional Effort	200.00 to 500.00 / man hour	10.00 / man hour	Low productivity of current algorithms and software	
Accuracy (Standard Deviation Distance)	< 1 pixel	> 4 pixels	Segmentor technician hand work; Movement of patient during surgery, time interval from imaging to treatment cause measurements drift	Rapid modeling minimizes changes due to time delay from imaging to treatment. Real time intraoperative modeling possible
Patient Results (Percent Improvement)	95 %	45%	Precise determination of pathology location	Accurate and precise modeling preserving imaging calibration

3.2 Research and Development Plan

3.2.1 R&D Plan overview

The development strategy is a simultaneous attack on the math and implementation problem; algorithm design, and software engineering problem. The principle division of tasks is between the user interfaces (client side Java development) and the DMT image recoding, graph generation, union and intersection matching, Level of Detail (LOD) management, bandwidth management, and warping tasks (server side math and remote graphics). The PI will program the DMT decomposition and graphing code. A core algorithm research and programming team will be assembled from the faculty and PhD student pool. Dr. Wolberg will program manual and automatic image registration. CUNY faculty will do algorithm development and analysis. NYUMC RT and SLU Neurosurgery faculty will be our alpha clients. PhD students with Java and C++ experience will program the client side browser plug-ins. The math research milestones are the development of the server image graphing, matching, registration, and LOD management. CASI will launch its alpha test network based client-server image-processing services directly to the public, to imaging facilities and physicians (and their patients) even before all of the server services are functional or complete. By having the client technology base working, even at mock-up prototype functionality, CASI will transition research milestones rapidly, effectively, and explosively diffusing the technology into clients' lap (tops).

3.2.2 Technical Barriers Overcome by CASI that will yield Economic Benefits (TABLE)

Technical Barrier	New Technology	Economic Benefit
Extensive, expensive human segmentation by pixels, hand drawn contours, hand drawn pixel dams, segmentation snakes, and other current ineffective technology: Imprecise and Inaccurate	DMT critical point manipulation precisely segments objects.	Creation of new market low cost computer modeling Cheap patient specific graphics and animations,
Smoothing operations on hand segmented objects: Warps object geometry	Maximal smooth 'cut' segmentation surfaces	Reduced dependence on student and technician for retouching and smoothing
Dimensional Fidelity of segmented, smoothed objects: Inability to preserve of instrument calibrations from image to model		Increased market in patient specific imaging and modeling,
Robotic Surgical Planning: no technology to calculate in patient specific model anatomy; no way to model constraint space (no-go regions); no way to calculate optimal trajectories	Braided Digital Morse Theory for paths between features	Better surgical results, Less insurance costs, Lower hospitalization costs, Less hospital time, Less disability payout, Increased worker productivity

Radiation Treatment Planning; inability to get precise and accurate simulator models; no technology to calculate optimal beam trajectories subject to constrain spaces (no-go regions):		NO surgery required, Better treatment results, Less insurance costs, Reduced hospitalization costs, Less disability payout
Treatment Results Evaluation: repeated hand modeling of tumor or target organ during therapy too expensive, imprecise, and labor intensive	Reliable tracking of tissue morphological changes from radiation or surgery over time	Quantitative measure of treatment effect (Tumor volume shrinkage, qualitative morphology improvement, etc)

3.3 Statement of project tasks and anticipated accomplishments

3.3.1 First year project milestones

For the first project year, we will focus on algorithm development and implementation to efficiently produce and manipulate the images and models by their DMT graph node. Concurrently, the client side interface team will design, mock up, and write browser-based interfaces for our intended medical imaging shops and clients. This will demonstrate of DMT principle of producing map of objects that do not require contrast enhancement to be parsed out of their proximate objects. We will boot up our network services server on the Internet.

3.3.1.1 MILESTONE 1: Server live on Internet

We will launch our project with the purchase and configuration of the CASI project web site server.

TASK: install the project management software, and establish protocols for collaborative programming with the team members.

3.3.1.2 MILESTONE 2: Public client mock-up facility life on Internet

Publish concept mock up our system into which we will insert the real functionality as that milestone is achieved.

TASK: Design various user interfaces for radiological, RT, Neurosurgical, patient and public use classes.

3.3.1.3 MILESTONE 3: Surface tiled models from DMT graphs

Generate a tiled surface model in RGB Color image data from a user selected threshold value and a DMT graph node.

TASK: Program SpiderWeb algorithm and DMT graph decomposition

3.3.1.4 MILESTONE 4: Generate DMT graph from image stacks

Generate DMT Gray scale graph from MRI and CT from the VHP. Generate DMT graph of the color (RGB) VHP pixel data. We will use the female 'Eve' data set, and do the thorax and abdomen.

TASK:

3.3.2 Second year project milestones

The second year of the project will focus on the DMT segmentation operator and registration, then delivering them into network clients.

3.3.2.1 MILESTONE 5: Gray scale and RGB Image graph matching (registration precursor)

We will build the union graph of the RGB and one or more of the CT and MRI image stacks for manageable subset of the VHP data.

TASK:

3.3.2.2 MILESTONE 6: Segmentation functionality demonstration

Using the public VHP data, we will demonstration on the website DMT graph selection of component objects. Users will select DMT objects from the RGB, CT, or MRI data sets. DMT segmentation operator demonstration, by clicking on the DMT graph node, the user will move saddle connections up or down to connect or disconnect objects.

TASK: Write saddle criticality navigator (finds segmentation plane if possible), else edit saddle values to edit DMT graph edges.

3.3.2.3 MILESTONE 7: The Patient, RT Physician and Steriotactic Neurosurgery Client demonstration goes live

TASK

3.3.3 Third year project milestones

CASI focuses on the problem of object registration and delivery of reduced density images and models.

3.3.3.1 MILESTONE 8: Registration of models by DMT graph demonstration

We will demonstrate the union and warping of DMT graphs from selected subsets of each data set resulting in a fused model.

TASK:

3.3.3.2 MILESTONE 9: Level of Detail management 10-x reduction in tile density

We will demonstrate a minimum of 10-x reduction in tile density, with a maximum reduction of tile density of an object into a tetrahedron (4 triangular tiles).

TASK:

3.3.3.3 MILESTONE 10: Segmentation click stream learning captures segmentor insight

We will demonstrate a 10x reduction in the number of clicks to segment major components by learning patterns that will enable us to intuit objects to segment.

TASK:

3.3.4 MILESTONE PROGRESS (TABLE)

N	Major Project Tasks	Project Time Y1	Y2	Y3	Cost in $K	Major Milestone
1	Server hardware installation and software configuration task				412.5	Server live on Internet
2	Public client mock up facility design task				111	Public client mock-up facility life on Internet
3	Program SpiderWeb surface tile generator task				111	Surface tiled models from DMT graphs
4	Recognize, sort Crits, connect; graph display code task				202	Generate DMT graph from image stacks
5	Write node figure of merit, sorting, matching code for Union and Intersection operator				210	Gray scale and RGB Image graph matching (registration precursor)
6	Write saddle Crit navigator and editor				210	Segmentation functionality demonstration
7	Write DICOM, upload, download compression, encryption, radiological, referring physician client				210.5	Web based upload and download of raw images and tiled models
8	Node warping code				211	Registration of CT and MRI to VHP Base Anatomy
9	Level of Detail Management				211	Level of Detail management 10-x reduction in tile density
10	Install clicks stream technology on clients; collect data from alpha users				221.5	Intuiting segmentation from users

3.4 How will our project handle technical and managerial problems we will encounter

3.4.1 Computational load problems in larger scale image stacks

There may be complexity issues as the images scale, the number of image dimensions increases (independent or dependant image channels). Scaling up to a production system may overload the server, or increases in image resolution in future CT and MRI systems may similarly overload the server. Interactivity may suffer. The NP completeness of these algorithms has not yet been analyzed. Software optimization as well as new capital to buy a larger server may required as we process more and larger alpha client datasets.

3.4.2 Computational intermediate solution memory "bloom"

Registration of large images with disjoint area may cause problems. If the two images have the same borders, then the root of the graphs will be the same and graph matching can start at the same depth levels on each graph. If the two images are disjoint, i.e., there is only a small common area between the two images, and then the graph-matching algorithm will exhaustively search for matches in the regions where no such match is possible. This unproductive searching may cause problems with excessive temporary memory requirements. Images that have no common features may produce

spurious matches, perhaps matching textures and small features only, while assigning most features to the intersection list

3.4.3 Automatic registration problems: managing matching incomplete graphs

An incomplete graph is a graph of a portion of the object that we wish to register. It is important we start with a complete view of the structure we wish to register, but the algorithm should be able to find the best matching node tree segment by exhaustive searching.

The worst-case situation is that automatic graph matching cannot be made to work fully automatically to our satisfaction. In that situation, and until we can design a fully automatic graph matching algorithm, we will ask users provide a starting point on graph pairs to the matching process.

3.4.4 Segmentation of difficult images

A difficult image is an image that contains features that distort isosurfaces on a large scale, and or fine grain noise that causes a very large number of small noise objects. We can eliminate small-scale features by truncating our graph below an object size, typically on the scale of two or four pixel lengths. Large-scale distortions include bright MRI antenna fields, a 'tilted' image background, where the image is distinctly lighter on one side, and darker on another side. Other problems we have encountered are bright 'hot' spots produced by MRI pickup antennas placed directly on the patient to improve image resolution in the immediate vicinity. This causes an intense detailed and bright hot region whose brightness decays away from the antenna. For those images, we have to model and brightness compensate the antenna field.

We are prepared to do additional traditional image processing, even hand editing, as part of our technical assistance to the user, until we can design and implement automatic methods to minimize this kluge step. This experience is a necessary and unpredictable part of dealing with real images that we expect from our clients.

3.4.5 Management issues

Access to necessary research facilities by proximity; We will have access to offices of the City University of New York (CUNY) Graduate Center (GC) on 34th street and 5th Ave, a short distance from CASI on 33rd street and 2nd Avenue. Team programmers will have the option to work directly on the machine for very fast image rendering, and manipulation, or work from PC clients on site or remotely. Clinical collaborators are all well Internet connected, and mainly at New York University Medical Center (NYUMC) on 34th Street and at St. Louis University (SLU). As we move from computer modeling to clinical modeling, we expect to be working extensively on site at the Radiation Oncology facilities directly across the street from CASI. The PI has many years standing as former faculty at NYUMC and collaborations there are easy to negotiate as required.

3.4.6 Fostering a team approach and team member communications

3.4.6.1 Project Management Policies

We will establish a simple task delegation and completion policy, as well as regular weekly face-to-face meetings at CASI and at the CUNY Grad Center. A good interpersonal working environment is vital to any network based collaboration with deadlines, milestones, validation tests, release dates, and other organizational stresses. We will also sponsor bi-monthly retreat activities to relieve stress and to foster a unity of purpose. We will hold quarterly progress reviews, and in the second year, start a monthly business development meeting to focus on marketing our emerging technology and recruiting alpha test customers.

3.4.6.2 Project Management Software

Our company will use an open source development model. Open Source developers use SourceForge for network access to source code version management systems (code check-in, check out), mailing lists, bug tracking, message boards / forums, and task assignment, ownership, completion, and management. We will install the SourceForge project management software as private instance of the popular open source collaboration SourceForge.net web site. The principles behind SourceForge are use to hosts more than 12,000 open source projects.

We will support a DMT project at the CUNY Graduate Center on 34th St. and 5th, directly

cross-town on is NYUMC. The CUNY Institute for Software Design and Development (CISDD) is a University Consortium that will act as the conduit for this project. The computer team is a short walk from the clinical facilities, which is crucial for fostering communication with our ultimate clients and customers.

3.4.6.3 Team members (TABLE)

Name Core Members	Affiliation	Role, Expertise and Task Areas
Professor D. B. Karron, PhD	CASI PI, CCNY	PI, DMT Inventor, C++, Computational Geometry, Computer Graphics, Algorithm Development, Will write DMT recoding core on server, market technology to prospective alpha customers and industries
Professor G Wolberg, PhD	CASI, CCNY	Lead Programmer. C++ programmer, algorithm development, digital image warping expert
Professor J L Cox, PhD	CCNY	DMT developer, Theoretical computer scientist, analysis of algorithms.
Consulting Members		
Professor M. Anshel, PhD	CCNY	Encryption, Braid Theory, computational geometry, development of Braided DMT for Trajectory Planning and Analysis
Professor G. Herman, PhD	CCNY	Theory of surfaces, image segmentation, digital topology
Professor F. Bookstein, PhD	University of Michigan	Morphometrics, medical imaging and applied math
Mr. E. Gurfein, MBA	Meridian Resource and Development, Ltd.	VC fundraising for biotech, medical device, and chemistry startups; engineering venture capital, financial management and technical marketing
Clinical Participants	NYUMC Radiation Oncology	Breast cancer warrior using radiation therapy beams.
Chair S. Formenti, MD PhD		
Professor J..K. Dewyngaert, PhD	NYUMC Radiation Oncology	Radiation physicist; Specialist in prostate \cancer research using radiation and brachiotherapy
Professor and Col (Ret) R. A. Satava, MD	Yale University Medical Center Department of Surgery	Endoscopic and Virtual Reality in Medicine pioneer
Professor L. Liebis, PhD	NYU MC	Instrumentation specialist. Statistical epidemiology,
Chair R. Bucholz MD,	St. Louis University Medical Center, Department of Neurosurgery	Endoscopic surgeon and medical technology entrepreneur Neurosurgeon and steriotactic neurosurgery system inventor
S. V. Grasso, MD,	Stevens Institute of Technology and TIMA	Technology for Medical Integration (TIMA), robotic surgery expert and promoter
Post Doc/ Visiting Scientist	Graduating from Mayo Clinic Medical Imaging PhD Program	C++ image programming registration and warping, 3D modeling,
J. Patrichare, PhD (expected 2002)		
PhD graduate students	CUNY Graduate Center	Java programmer, System administrator, Web site designer and user interface tester
To be named; 3 total		

3.5 Potential for Broad-Based Economic Benefits

The nation will benefit by improved health care that will prolong the quality of life. Reduced employee sick leave will decrease disability related payouts and reduce costs to insurers. The efficient use of medical information will produce better yield on capital in imaging technology. Better patient and physician communication, treatment results, and patient satisfaction will result in less litigation and insurance costs. CASI will create new markets for model-based information as the core competency is established that will go beyond our initial Radiation Treatment project. As the medical imaging industry matures into the medical modeling industry, CASI will seek new markets for services, only dreamed of at present.

High technology medicine is widely viewed as beneficial the public, mainly because of the probability that any one of us may unexpectedly become the beneficiary of a new life saving therapies; However the costs of such technology to insurers, taxpayers, and the underinsured can be staggering. Expensive new hardware and drug offerings bombard the medical market. In a life-threatening situation, these high costs are relegated to a lower priority. When the bills have to be paid, and policymakers review galloping high technology medicine costs, they must consider the value to our society of "big iron" capital-intensive purchases such as multimillion-dollar diagnostic imaging facilities and therapeutic equipment. The value added to our nations' economy is that CASI will be a filter and conduit to increase the worth of this investment, by increasing the ability of medical

diagnostic imaging to accomplish its promise: Save lives and keep us healthy.

3.5.1 National Economic Benefits

America is underutilizing the product of its diagnostic imaging capital base. The medical imaging industry is not making the best use of the mega pixels of patient data these systems generate. From an information theoretic perspective, we estimate that 99% of that information is not contributing to the making of therapeutic decisions. We are not disseminating this information to all concerned parties rapidly and effectively. This is partly because we do not understand, use, or effectively model the important features in these images. This is because of limitations in the state of the art for understanding modeling key features, and applying this information in rapid and effective ways for broad base of radiologists, physicians, surgeons, and therapists. Further, we need to make it understandable to the ultimate customer, the patient, and / or the patients' family. New picture archiving and network distribution systems are helping to manage the raw data, the Next Generation Internet can make more of the raw data move faster, but the nation needs better technology to understand these images, make consistent precise patient specific determinations, and maximize the effective use for this data as essential insight. CASI will decrease the entropy and increase the pragmatic value of medical pixels by winnowing them down to geometric models, trajectory vectors, and critical points.

Customers include any radiologist, radiology practice, imaging facility, medical center, and associated diagnostic or therapeutic practitioner. The patient needs to be kept in the loop as the ultimate paying customer, and consumer of the therapeutic decisions based on this information. The customers that will benefit the most are any interpretative method of CT, MRI, PET, SPECT, etc. that currently is hand contouring stacks of images prefatory to designing a patient treatment, are evaluating the ongoing results of treatment. Similarly, anyone attempting to spot critical surgical targets, such as in steriotactic brain surgery, by sighting by the center of blobby objects in hundreds of slices will be a customer. Radiation Therapy (RT) practitioners were most eager to find better methods to eliminate this time consuming drudgery in their practice.

Competitors are scattered across various application area, using mainly volume rendering technology instead of shell surface technology. Most imaging companies are focused on one technology, almost to the exclusion of other application areas. Typically, these firms arise from image consulting firms working with one large customer with a specific application in petrology, histology, computer graphics, and so on. There are general-purpose visualization systems sponsored by government research labs (NCAR), and commercialization of large university programs (ANALYZE from Rich Robb's group at the Mayo Clinic), 3DVIEWNIX (From Jay Udupa's group at U. Penn). Commercial packages include Voxel View, AVS (Advanced Visualization System), Resolution3D, Khoros, IBM Data Explorer (DX), Iris Explorer, VTK tool kit (From Kitware) are but a few of the more popular general packages. Some have exceptional interactivity based on their optimization to special graphics accelerator hardware, now common with the explosion of the computer game industry). Many have intricate and comprehensive facilities for hand segmentation, contouring, snake segmentation, thresholding, flood filling, edge detection, marching cubes, and so on. None have anything that approaches the power and insight that Digital Morse Theory based segmentation can do to simplify many segmentation tasks. We will never manage to penetrate such a broad spread of markets, but we expect that we will license our technology and that will become an important source of revenue and diffusion of our technology and theory into the industry and broader national economy in ways we can barely foresee

End users are generally serviced by consultant using any of the above visualization packages. We will focus initially on the niche markets of Radiation Therapy and Neurosurgery as vehicles to develop our core technology. However, most of direct users will be software developers integrating our technology in their software packages for use by their individual specialty markets.

It is our plan to license our technology to other industries that can apply our technology are industrial non-destructive testing (industrial CT), meteorology, metrology, histopathology imaging,

entertainment industry animation, medical illustration, commercial computer graphics for advertising, virtual reality, air traffic control, multimedia, medical education and training, simulation, topography, mapping, surveying, (not topology) fluid mechanics and dynamics modeling and visualization, hyperspectral scanner imaging, Earth Imaging Systems (for interpreting satellite imagery)

The benefits to the public are longer life, better quality of life, through improved medical care, at reduced cost through more effective delivery and utilization if medical imagery.

3.5.1.1 Business opportunities addressed and economic importance to proposer and the nation

Our business opportunity is the expense and time required to produce imprecise and inaccurate segmentations from which 3D models are generated for many disparate applications. There is no underlying paradigm for understanding how segmentation works. Most of the thinking current segmentation theory is *ad-hoc*, problem, and image specific, not repeatable, and requires an expert user. Discussions with robotic surgery designers and manufactures point out the problem designing robotic trajectories are bottlenecked with the patient specific modeling. Our core technology is being hailed as a breakthrough, if we can develop working systems from our concept demonstration. Alpha site customers and business interest is building as word of our possible technology circulates in our target markets. NYUMC Radiation and Oncology and St. Louis University have agreed to participate in our development effort as alpha test sites.

The economic important to CASI of this technology is based getting meaningful assistance in surgery from computer imaging. This requires 3D modeling on a rapid patient specific basis with precision, accuracy, and dimensional fidelity. This technology gap prompted the PI's research in this area and prompted our request for funding to develop this technology.

The economic importance to the nation is improving the utility and distribution of medical imaging information, and will improve the value of this expensive technology with our inexpensive, but Internet pervasive technology. Further, this is not a comparatively expensive technology in its application because we will use centralized computer servers, connected eventually, but not necessarily by Next Generation Internet or Internet II. Our value added is our intellectual property that will lead to improve health and longer life of American citizens.

3.5.1.2 Discussion of potential users of this technology

Patient specific anatomic modeling from medical imaging and true three-dimensional modeling is required by many medical specialties. The specialization of the physician based research groups and the lack of a common language and communication leads fractionation of effort. The results of style of research effort tends to degenerate the state of the art into a large collection of tricks, techniques, conflicting algorithms, and overloaded toolboxes. Most of these techniques lack an underlying mathematical rubric, uniform precision, and validation. Computer graphics has not provided the 'sound' solutions that it appears to illustrate. This is due to the lack of computational geometry and advanced math sophistication in the graphics industry. We see a wide range of medical, engineering, technical, and scientific users for our uniform approach and new technology.

CASI's DMT based technology has a number of potential users and applications. Our initial target markets are breast Radiation Therapy and neurosurgical steriotactic surgery. Once our technology has been show to be advantageous, it is expected that other specialties will utilize it. We will cultivate bellwether client collaborations in each surgical specialty, and market through their training programs with their residents and fellows, post doctoral students and visiting scientists. Expected application areas include: Cosmetic plastic surgery (modeling skin profile changes to sell cases to patients), Craniofacial surgery (model bone cuts, skin reconstruction due to trauma, birth defects, and cancer), Obstetrics (pelvis measurements are key parts of the decision to perform a caesarian), Oral surgery (tooth implants), Orthodontics (bone growth and effect of braces, selling cases to parents), Histopathology (cancer detection, cell type recognition, and cell counting), Biological shape analysis for surgical application.

3.5.1.2.1 Market estimates

At the end of this proposal, this technology will be successful for RT and Neurosurgery. At that

time, for a cost of one hundred dollars the attending physician will a model of a patient's tumor, and be able to plan and demonstrate that plan for surgery or radiation.

In the RT focus area of our project, we measure the total market from cancer epidemiology. Unfortunately, we can expect an increased cancer rate in the future caused by environmental pollution. The survival rate due to better treatment technology will also increase. This increases the CASI market by an estimated 20%. CASI technology will be a part of that survival improvement.

Breast Cancer, the target of our RT collaboration at NYUMC saw ~176,300 new cases and 43,700 deaths in 1999. Prostate cancer had ~136 new cases per 100, 000 men. Surgical treatment brachiotherapy (treatment by implanting highly radioactive seed in the cancer) and RT are all require modeling and targeting technology that is CASI's core technology.

Expected growth of markets opportunity by increased cases and increased survival of 20 % is assumed as CASI technology is embraced by medicine. Assuming a 20% market capture share, that means that in breast RT we can expect by the time of product roll out in 4 years to 42,000 cases / year. We can estimate a similar participation in prostate cancer therapy at 50,000 cases / year.

3.5.1.2.2 Markets change and new markets from new technology.

Our initial focus area is breast RT and Brain surgery. As we penetrate in these markets CASI will license its technology into other market areas; because we will need to focus the R & D effort on the generalized problem, and a few limited specific problem areas at a time. CASI will effectively franchise its technology into market application areas for maximal rapid diffusion. We estimate that we will be doing well over 10x our base RT revenue by franchising. CASI will promote bellwether researchers to adopt our technology for their specific application area by doing custom web interfaces to their spec, as CASI are developing our generalized application area.

3.5.2 Need for ATP funding

ATP funding is required to enable CASI to complete our ongoing research and make the technological leap to market of low cost, network based anatomic computer 'foundry' modeling. We will build on the progress we started making as a subcontractor on the NIH Visible Human Project (VHP) female 'Eve' dataset. The primary mission of the VHP program is to supply anatomic content for medical school education. CASI's broader therapeutic vision requires ATP development funding because the NIH mission in this area at this time is limited.

Segmentation and Registration issues impede progress in many disparate medical and scientific fields. No one industry or medical superspeciality has the patience to fund this development effort in the general case. Few programs share the vision of this technology for its broad applicability to medicine, technology, and science.

The visualization and modeling technology is not being effectively developed in the United States. The medical imaging industry is dominated by foreign owned and controlled companies such as Sony, Picker, Hitachi, Siemens, and General Electric. We believe that the market for pixel intensive hardware-accelerated graphics is wedged in the Internet last mile bottleneck. Wide diffusion for image-based information will require new thinking, not just more bandwidth. CASI will move from a "pixel based high entropy high bandwidth" representation to a "DMT based object geometry "representation with low entropy and high information theoretic pragmatic value.

3.5.2.1 Summary of efforts to get external and private funding

The CASI vision is to provide patient specific precise and accurate Level of Detail (LOD) models for diagnostic and therapeutic applications. CASI's raw input is medical images uploaded over the Internet. The time for development of this technology is too long for Venture Capitalist window of opportunity. We do not intend to become a medical computer graphics-imaging house, medical informatics consulting firm, or a surgical robotics firm. Our goal is to focus on solving the problems that are hindering the start of the art in radiation therapy, surgical robotics, 3D modeling, animation, and many other application areas. CASI's solution will become our core competency. The PI intends to aggressively grow the company into this wide-open opportunity field. CASI's broad therapeutic vision frightens private venture capitalists, and their funding. CASI is currently funded by angel

investors and the PI. CASI will leap into the modeling business with ATP funding, and be able to focus on the long-term benefits of this technology.

CASI believes that it become profitable within 5 years, which is longer than the private equity market will tolerate. As we demonstrate our core technology by the third year, we expect that we will be able to rise significant private funding, but not before.

3.5.2.2 Description of how the technology will be broadly diffused

Broad diffusion of our technology will occur because of the strong need in a broad variety of medical and general scientific modeling applications. This strong gradient will pull our technology out of our lab and into commercial franchise or licensure-based adoption. Because the application runs as an ASP, anyone who can upload an image file will be able to run their image for a demonstration of the modeling facility, and see how the CASI system will solve their problems. The short time constant of internet based technology diffuses out into the global community, and the strong needs gradient, means we can expect explosive growth in demand as we start public demonstrations and reporting our results in the literature and major scientific and medical meetings. CASI is preparing for this onslaught and will carefully not oversell its solutions and permit it to grow in managed and healthy manor for maximal benefit to the nation and for the company.

3.5.2.3 Business experience of PI and Staff

CASI was founded in 1995, while the PI was research professor of surgery at NYUMC. The PI has managed approximately one million dollars in DARPA funding, as well as such administrative tasks as running a payroll, subcontracting, DoD audits, Federal and State audits, bank audits, invoicing, collections, financing, and accounts payables with and without an administrative staff. CASI has kept meticulous records and attained a high professional standard under difficult business conditions. The PI has demonstrated fiscal responsibility managing significant federal funds responsibly. The PI has extensive technical management experience. Mr. E. Gurfein will be joining our team as our business manager, bringing his experience in scientific startup funding, finance, management, and marketing.

JUL 25 2003

MEMORANDUM FOR: Shamim Shaikh, Acting Chief
Grants and Agreements Management Division
National Institute of Standards and Technology

Kathleen M. McKevitt

FROM: for William F. Bedwell, Jr.
Regional Inspector General
for Audits

SUBJECT: NIST Cooperative Agreement Number 70NANB1H3050
Computer Aided Surgery, Inc., NY
Final Report No. ATL-16095-3-0001

This report on our audit of the subject NIST Advanced Technology Program cooperative agreement with Computer Aided Surgery, Inc. is to inform NIST officials of significant findings that require their immediate attention. Based on Computer Aided Surgery's own accounting records, the company should reimburse NIST $205,126. The corporation has not contributed any of its required cost-share, which currently totals $54,068, and has drawn down $205,126 in excess of the federal share of ATP project costs identified in its accounting records. The Financial Status Reports filed with NIST are inaccurate because they show that the company contributed the required matching funds and the reports overstate ATP project expenses. We will issue a separate comprehensive audit report including questioned costs and other non-compliance issues covering the period October 1, 2001, through June 27, 2003.

We are providing a copy of this report to Computer Aided Surgery. However, we have not requested the company prepare a written response to NIST addressing the report findings or recommendations. We will include these findings in the subsequent comprehensive audit report to allow for due process. Requests from the public for copies of this report must be referred to the Office of Inspector General, Office of Compliance and Administration Publication Unit, Room 7009C, Herbert C. Hoover Building, for response under the Freedom of Information Act.

Any information or inquiry regarding this final report should be directed to me at (404) 730-2780, or Kathleen McKevitt of this office at the same number. We appreciate the cooperation and courtesies extended by NIST officials during our audit.

Introduction

In September 2001, NIST awarded a $2,110,500 Advanced Technology Program cooperative agreement to Computer Aided Surgery, Inc., a for-profit company involved in innovative composite design and engineering. The agreement was for a 3-year period with $800,000 in federal funds for the first year, $600,000 for the second year, and $600,000 in the third year. The agreement required the company provide a matching share of $36,500 for the first year, $30,500 for the second year, and $43,500 for the third year.

The purpose of the agreement was to develop and demonstrate novel computer and engineering technology based on Digital Morse Theory to enhance the quality and usability of computerized anatomic models for precise and accurate cancer treatment therapies.

Purpose and Scope of Audit

We performed the audit of the NIST award at the company's office in New York City during June 2003. NIST requested that our office conduct the audit because the grants and program officials were concerned about Computer Aided Surgery's ability to account for federal funds being spent. The purpose of the audit was to determine the financial status of the award, the reasonableness and allowability of expenses charged against the award and review compliance with applicable laws and regulations. The audit covered the period from October 1, 2001, through June 27, 2003. We examined pertinent NIST and company records, and interviewed agency and company officials as deemed necessary.

We relied on computer-processed data supplied by the company as the basis for our audit findings and recommendations. Consequently, we tested the accuracy by tracing and comparing the data to original source documents and other supporting documents. Based on our tests, we concluded that the computerized data was sufficiently reliable for use in meeting our objectives.

We conducted the audit in accordance with generally accepted government auditing standards, and performed it under the authority of the Inspector General Act of 1978, as amended, and Department Organization Order 10-13, dated May 22, 1980, as amended.

Results of the Audit

During our audit, we found significant problems that we brought to the grants officers attention with a conference call on June 24, 2003 and are documenting with this report. Computer Aided Surgery has not contributed any of its required matching funds, which currently totals $54,068. In addition, the company drew down $205,126 in excess of the federal share of ATP project costs recorded in its accounting records. Finally, the Financial Status reports filed with NIST are inaccurate because they overstate expenses to justify the excess draw-downs and include a cost-share amount that was never contributed. NIST informed us that they suspended further award payments to Computer Aided Surgery as of June 27, 2003. We are working with the company to obtain additional documentation so that we can provide a comprehensive audit of the allowability and reasonableness of ATP project expenses for the period October 1, 2001 through June 27, 2003.

269A

$54,068 of Required Matching Funds Not Contributed

Computer Aided Surgery has not contributed any matching funds to the project even though the NIST award agreement requires a cost share of 4.57 percent. The Chief Technical Officer of Computer Aided Surgery identified the State of New York as the source of the matching funds, but the funding was not received due to the state's budget problems after September 11, 2001. While the primary owner and Chief Technical Officer of Computer Aided Surgery intends to contribute his own funds to the ATP project, none of these required funds have been contributed to date.

The matching funds required for the project based on the ATP identified expenses in the company's accounting records are shown below:

Award Amendment	Period	Required Cost-Share	ATP Project Costs Per Books	Required Cost-Share
#2	10/01/2001 - 09/30/2002	4.36%	$ 779,905	$ 34,004
#3	10/01/2002 - 06/27/2003	4.84%	414,537	20,064
Total			$1,194,442	$ 54,068

$205,126 in Excess Drawdowns

Our audit revealed that Computer Aided Surgery drew down $205,126 of federal funds over the 21-month period in excess of the federal share of ATP expenses identified in its own accounting records. A review of the company's financial records revealed that these excess draw-downs were not spent on ATP project expenses. The amount of drawdowns in excess of the federal share of ATP project expenses for the period October 1, 2002 through June 27, 2003 is shown below:

	10/01/01 – 09/30/02	10/01/02 – 06/27/03	Cumulative
ATP Project Expenses Per Books	$ 779,905	$ 414,537	1,194,442
Federal Share of Project	95.64%	95.16%	
Federal Share of ATP Expenses	$745,901	$394,473	1,140,374
Federal Funds Drawn-down	800,000	545,500	1,345,500
Excess Draw-downs of Federal Funds	$ 54,099	$ 151,027	$ 205,126

As shown above, the company drew down $1,345,500 in federal funds between October 1, 2001 and June 27, 2003. However, a review of the company's general ledger revealed only

$1,194,442 in ATP project costs during this same 21-month period and based on the project's federal cost-share, Computer Aided Surgery was only entitled to $1,140,374. The $205,126 excess funds went to pay expenses not related to the ATP project. It appears that Computer Aided Surgery's only source of revenue during the period of the award has been the NIST funds.

The *Advanced Technology Program Special Award Conditions* Section 9. c. states:

> "Advances ... shall be limited to the minimum amounts necessary to meet immediate disbursement needs. Advanced funds not disbursed in a timely manner must be promptly returned .... Advances shall be for periods not to exceed 30 days."

Inaccurate Financial Status Reports

Computer Aided Surgery filed inaccurate Financial Status Reports (SF-269's) for each of the four quarters during the period October 1, 2001 through September 30, 2002. The erroneous reports show the amount of federal funds drawn down rather than actual federal expenditures in the box designated "federal outlays for the quarter," thereby, overstating expenditures. Additionally, Computer Aided Surgery claimed that it had contributed the required cost-share funds, when in fact; no matching funds have been contributed. The Financial Status Reports have not been completed for the periods ending December 31, 2002 or March 31, 2003.

The *Advanced Technology Program General Terms and Conditions* Section 7.c. (1) states:

> "By signing this award the Recipient agrees to ensure that only actual costs incurred will be charged to the award and that all costs will be reasonable, allocable, and allowable in accordance with the applicable Federal Cost Principles."

Additionally section 7.c. (3)(a) states:

> "The Recipient shall submit a "Financial Status Report" (SF-269) on a calendar quarter basis for the periods ending March 31, June 30, September 30, and December 31, or any portion thereof, unless otherwise specified in a special award condition. Reports are due no later than 30 days following the end of each reporting period."

Recommendations

We are recommending that NIST:

1. Continue to suspend award payments to Computer Aided Surgery, Inc., until it meets with the following requirements:

   - Reimburse NIST $205,126 for funds drawn down in excess of the federal share of ATP project expenses.

   - File the Financial Status Reports (SF-269) for the quarters ending December 31, 2002, and March 31, 2003.

2. Designate the company as a "high risk" organization and, at a minimum place it on a reimbursement basis for future drawdowns, if the suspension of award payments is removed.

Funds to Be Put to Better Use

By implementing this recommendation, $205,126 in federal funds will be put to better use by returning the funds to NIST and ensuring that the funds are used only for the NIST project.

Ms. Hope Snowden
Grants Management Specialist
United States Department of Commerce
NIST/Advanced Technology Program
Bldg. 411, Rm. A143
Gaithersburg, MD 20899-0001

Dear Ms. Snowden;

Thank you for taking the time to work with us on the revisions to our August 2002 Budget submission.

I appreciate the urgency in putting this matter to bed even at this late date.

Because of the problems caused by the departure of our previous business lead, Mr. Gurfein, and the delays caused by our new business lead Dr. Peter Ross, and the resolution of all of the problems left by Gurfein that we are facing, I must respectfully make the following request.

Computer Aided Surgery begs an extension for the completion of its first year project audit for an additional 60 days.

This moves the due date for the final submission of the audit back from Dec 29, the original audit deadline to March 1, 2003.

I will make every effort to provide our auditor with the necessary information to conclude our audit in a timely manner so that I may return my focus to the project technical problems.

Sincerely,

C. A. S. I.

Budget Data

Proposal Number 70NANB1H3050

Name of Company Computer Aided Surgery, Inc **Year** 1 (2001-2002)

A. Personnel - List each position by name of employee and title, if available. Show the annual salary rate and the percentage of time devoted to the project. Compensation paid for employees must be consistent with that paid for similar work within the proposer's organization and similar positions in the industry. Employees who are considered indirect labor should not be included in the breakdown of direct salaries or in section 1A of the Form NIST-1262 or NIST-1263. Escalation rates for the out-years should be reasonable. We recognize that a company may not be able to identify all of the personnel to be assigned to the project several years down the road. Where this cannot be done, use generic position titles such as "senior chemical engineer" and for name, "to be determined." Consultants should NOT be included in this category, but more appropriately under the "subcontracts" category and described on Form NIST-1262 or NIST-1263, pages 4 and 5, respectively.

Name/Position Title	Annual Salary	Percentage of Time on Project	Cost
Dr. D B Karron/PI	$175,000	100%	$175,000
Elisha Gurfein/Project Manager	$133,333	75%	$100,000
Prof. James L Cox / Lead Pgmr	$130,000	49% (40%)	$5,200
Scott Albin / Systems (summer only)	$17,600	42%	$4,950
Charles DaSalla / Systems (full time)	$21,905	100%	$19,800
Nicholee Wynter / Fiscal Control	$30,000	100%	$9,400
Regner Peralla (Summer Student)	$22,000	50%	$1,300
RG Wine (1 month)	$60,000	100%	$3,550
Matthew Rothman	$33,000	100%	$3,405

TOTAL $322,600

B. Fringe Benefits - Identify percentage rate; if greater than 35 %, provide a breakdown of what makes up the fringe benefits (i.e., vacation, sick, military leave, health and life insurance, retirement, social security, etc.). If fringe benefits are normally included in your organization's indirect cost rate, they should be budgeted as such, and check the appropriate line below.

Percentage Rate: 34% **Check here if included in indirect:** _____

If percentage rate exceeds 35%, provide breakdown.

TOTAL $109700

C. **Travel** - Provide best estimate of travel required for the project, and provide the basis of computation (i.e., item x number of people x number of trips). Note that ATP recipients are expected to adhere to government policies regarding travel, such as, coach rather than first class accommodations, etc. Travel costs should represent a coherent part of the project's "communications strategy" for smooth coordination among participants. While foreign travel is not precluded, it is discouraged and will require a strong justification on how it is directly related to the R&D activities of the ATP project. Likewise, the travel cost for attending conferences must be strongly justified as essential and relevant to the research and development aspects of the project.

Purpose of Travel	Destination	Item (mode transportation, lodging, and subsistence)	Computation	Cost
MMVR trip (3 people) to give talk at nist and general sessions				4000
kick-off	Washington			1000
NIST	Washington			1000
NIIBIB	Washington			1000
NIST	Washington			1000
NIST	Washington			1000
NIST	Washington			1000
local transit	taxi and subway			800

Travel justification for foreign travel and conferences:

TOTAL 10,800

D. Equipment - Identify each item of equipment, methodology used to arrive at the proposed costs, (i.e., historical costs, competitive bid, published price lists, or cost/price analysis), basis of computation (i.e., cost per item x number of items), and cost. Budget estimates for equipment items exceeding $100,000 each must be described and justified separately. Also identify by placing an asterisk on any in-kind owned equipment and its current depreciated value using the participant's preestablished depreciation accounting methods. The value of equipment will be further prorated according to the share of total use dedicated to carrying out the proposed ATP work. ATP funds may not be used for construction of new buildings or extensive renovations of existing laboratory buildings. ATP funds may, however, be used for construction of experimental research and development facilities to be located within a new or existing building provided that the equipment or facilities are essential for carrying out the project. If such costs are proposed, include below and provide justification.

Item	Methodology	Computation	Cost
video system			5000
6 PCs			60000
2 servers			60000
1 RAID			35000
1 SGI machine			25000
3 monitors			12000
components			31300

Justification for any item over $100,000, or construction costs:

Note: a request is pending for items purchased in year 1 but not billed in year 1 to be paid from year 2 funds. These items are not listed above.

TOTAL 223300

E. Materials/Supplies - Provide a complete breakdown of each item/type of expendable materials and supplies, methodology used to arrive at the proposed costs (i.e., historical costs, competitive bid, published price lists, or cost/price analysis), basis of computation (i.e., item x number of items), and cost.

Item	Methodology	Computation	Cost
Software (anti virus, winXP, linux, MS servver, NFS for PCs, IRIX, virtual studio, some in multiple copies)			25,000
Cables and other hardware			4000
office supplies			4800
video camera			1200

TOTAL 35000

F. Subcontractors - For each subcontractor identified on the NIST-1262 Page 4 or NIST-1263 Page 5, enter the name, if known, service to be provided, hourly or daily fee (8-hour day), and estimated time on the project. Subcontractor fees in excess of $450 per day require additional justification. Proposers are encouraged to promote free and open competition in awarding subcontracts.

Name of Subcontractor	Service Provided	Computation	Cost
George Wolberg, PhD	Graphics Programming	525 hours @ 80/hour	$37,674
ATC Consulting	Specalized Network and Systems programming and System Administration	100 hours@ 120/hour	$12,000
The Jackson Group	Fiscal Control, Budget, and Bookeeping Contract help	240 hours @ 25/hour	$5539
Abe Karron	Computer video projection design and installation	20h @ $50/h	$1,000
Jim Cox	Contract work done prior to hire.	660 hours @ $50/h	$33,000
Scot Albin, MD	systems and medical research		$2000
		Subtotal	$91213

Subcontractor Expenses: List all expenses to be paid from the award to the individual subcontractors in addition to their fees (i.e., travel, meals, lodging, etc.).

Item	Location	Computation	Cost
Meals	Conferences, on site late work	10 meals @ 20$/each	$200.00
Travel	Airfare and Trainfare	10 trips @ 200$/each	$2000
Honoraria	Bringing scientists to CASI	4 trips @ 200 each	$425
		Subtotal	$2625
		TOTAL	$93838

G. Other - Identify and provide a detailed description of any other direct costs which do not fall into the object cost categories above, basis of computation (i.e., cost per item x number of items), and cost. The cost of the project audit should also be included in this category unless it is part of the indirect costs. If it is part of the indirect costs indicate it as such. Each JV partner should budget for an audit. For awards less than 24 months, an audit is required at the end of the project; for 2, 3, or 4 year awards, an audit is required after the first year and at the end of the project; for 5 year awards, an audit is required after the first year, third year, and at the end of the project.

Description	Computation	Cost
Audit		
Jill Feldman, ATP audit		4000
Power	100% of increase due to NIST grant	4724
ISP		10000
Insurance		1100
Data Communication		10650
rent	44% of mtge plus common charges	10787
	TOTAL	41262

H. Indirect Costs -Specify the current indirect cost rate(s), computation used, and cost. If an indirect cost rate was negotiated with a cognizant Federal agency, include a copy of the approved negotiated agreement. If an indirect cost rate has not been established by a cognizant Federal agency please state this below.

Percentage Rate	Computation	Cost
rent on CASI office suite	24% (80% used for CASI)	7000
	TOTAL	7000

Budget Data

Proposal Number 70NANB1H3050

Name of Company Computer Aided Surgery, Inc **Year** 1 (2001-2002)

A. Personnel - List each position by name of employee and title, if available. Show the annual salary rate and the percentage of time devoted to the project. Compensation paid for employees must be consistent with that paid for similar work within the proposer's organization and similar positions in the industry. Employees who are considered indirect labor should not be included in the breakdown of direct salaries or in section 1A of the Form NIST-1262 or NIST-1263. Escalation rates for the out-years should be reasonable. We recognize that a company may not be able to identify all of the personnel to be assigned to the project several years down the road. Where this cannot be done, use generic position titles such as "senior chemical engineer" and for name, "to be determined." Consultants should NOT be included in this category, but more appropriately under the "subcontracts" category and described on Form NIST-1262 or NIST-1263, pages 4 and 5, respectively.

Name/Position Title	Annual Salary	Percentage of Time on Project	Cost
Dr. D B Karron/PI	$175,000	100%	$175,000
Elisha Gurfein/Project Manager	$133,333	75%	$100,000
Prof. James L Cox / Lead Pgmr	$130,000	49% (4%)	$5,200
Scott Albin / Systems (summer only)	$17,600	42%	$4,950
Charles DaSalla / Systems (full time)	$21,905	100%	$19,800
Nicholee Wynter / Fiscal Control	$30,000	100%	$9,400

RG Wine (1 month)	$60,000	100%	$3,550
Matthew Rothman	$33,000	100%	$3,405

TOTAL $322,600

B. Fringe Benefits - Identify percentage rate; if greater than 35 %, provide a breakdown of what makes up the fringe benefits (i.e., vacation, sick, military leave, health and life insurance, retirement, social security, etc.). If fringe benefits are normally included in your organization's indirect cost rate, they should be budgeted as such, and check the appropriate line below.

Percentage Rate: 34% **Check here if included in indirect:** _____

If percentage rate exceeds 35%, provide breakdown.

TOTAL $109700

C. **Travel** - Provide best estimate of travel required for the project, and provide the basis of computation (i.e., item x number of people x number of trips). Note that ATP recipients are expected to adhere to government policies regarding travel, such as, coach rather than first class accommodations, etc. Travel costs should represent a coherent part of the project's "communications strategy" for smooth coordination among participants. While foreign travel is not precluded, it is discouraged and will require a strong justification on how it is directly related to the R&D activities of the ATP project. Likewise, the travel cost for attending conferences must be strongly justified as essential and relevant to the research and development aspects of the project.

Purpose of Travel	Destination	Item (mode transportation, lodging, and subsistence)	Computation	Cost
MMVR trip (3 people) to give talk at nist and general sessions				4000
kick-off	Washington			1000
NIST	Washington			1000
NIIBIB	Washington			1000
NIST	Washington			1000
NIST	Washington			1000
NIST	Washington			1000
local transit	taxi and subway			800

Travel justification for foreign travel and conferences:

TOTAL 10,800

D. Equipment - Identify each item of equipment, methodology used to arrive at the proposed costs, (i.e., historical costs, competitive bid, published price lists, or cost/price analysis), basis of computation (i.e., cost per item x number of items), and cost. Budget estimates for equipment items exceeding $100,000 each must be described and justified separately. Also identify by placing an asterisk on any in-kind owned equipment and its current depreciated value using the participant's preestablished depreciation accounting methods. The value of equipment will be further prorated according to the share of total use dedicated to carrying out the proposed ATP work. ATP funds may not be used for construction of new buildings or extensive renovations of existing laboratory buildings. ATP funds may, however, be used for construction of experimental research and development facilities to be located within a new or existing building provided that the equipment or facilities are essential for carrying out the project. If such costs are proposed, include below and provide justification.

Item	Methodology	Computation	Cost
video system			5000
6 PCs			60000
2 servers			60000
1 RAID			35000
1 SGI machine			25000
3 monitors			12000
components			31300

Justification for any item over $100,000, or construction costs:

Note: a request is pending for items purchased in year 1 but not billed in year 1 to be paid from year 2 funds. These items are not listed above.

TOTAL 223300

E. Materials/Supplies - Provide a complete breakdown of each item/type of expendable materials and supplies, methodology used to arrive at the proposed costs (i.e., historical costs, competitive bid, published price lists, or cost/price analysis), basis of computation (i.e., item x number of items), and cost.

Item	Methodology	Computation	Cost
Software (anti virus, winXP, linux, MS servver, NFS for PCs, IRIX, virtual studio, some in multiple copies)			25,000
Cables and other hardware			4000
office supplies			4800
video camera			1200

TOTAL 35000

F. **Subcontractors** - For each subcontractor identified on the NIST-1262 Page 4 or NIST-1263 Page 5, enter the name, if known, service to be provided, hourly or daily fee (8-hour day), and estimated time on the project. Subcontractor fees in excess of $450 per day require additional justification. Proposers are encouraged to promote free and open competition in awarding subcontracts.

Name of Subcontractor	Service Provided	Computation	Cost
George Wolberg, PhD	Graphics Programming	525 hours @ 80/hour	$37,674
ATC Consulting	Specalized Network and Systems programming and System Administration	100 hours@ 120/hour	$12,000
The Jackson Group	Fiscal Control, Budget, and Bookeeping Contract help	240 hours @ 25/hour	$5539
Abe Karron	Computer video projection design and installation	20h @ $50/h	$1,000
Jim Cox	Contract work done prior to hire.	660 hours @ $50/h	$33,000
Scot Albin, MD	systems and medical research		$2000
		Subtotal	$91213

Subcontractor Expenses: List all expenses to be paid from the award to the individual subcontractors in addition to their fees (i.e., travel, meals, lodging, etc.).

Item	Location	Computation	Cost
Meals	Conferences, on site late work	10 meals @ 20$/each	$200.00
Travel	Airfare and Trainfare	10 trips @ 200$/each	$2000
Honoraria	Bringing scientists to CASI	4 trips @ 200 each	$425
		Subtotal	$2625
		TOTAL	$93838

G. Other - Identify and provide a detailed description of any other direct costs which do not fall into the object cost categories above, basis of computation (i.e., cost per item x number of items), and cost. The cost of the project audit should also be included in this category unless it is part of the indirect costs. If it is part of the indirect costs indicate it as such. Each JV partner should budget for an audit. For awards less than 24 months, an audit is required at the end of the project; for 2, 3, or 4 year awards, an audit is required after the first year and at the end of the project; for 5 year awards, an audit is required after the first year, third year, and at the end of the project.

Description	Computation	Cost
Audit		
Jill Feldman, ATP audit		4000
Power	100% of increase due to NIST grant	4724
ISP		10000
Insurance		1100
Data Communication		10650
rent	44% of mtge plus common charges	10787
	TOTAL	41262

H. Indirect Costs -Specify the current indirect cost rate(s), computation used, and cost. If an indirect cost rate was negotiated with a cognizant Federal agency, include a copy of the approved negotiated agreement. If an indirect cost rate has not been established by a cognizant Federal agency please state this below.

Percentage Rate	Computation	Cost
rent on CASI office suite	24% (80% used for CASI)	7000
	TOTAL	7000

Budget Data

Proposal Number 70NANB1H3050

Name of Company Computer Aided Surgery, Inc. **Year** 3 (2003 - 2004)

A. Personnel - List each position by name of employee and title, if available. Show the annual salary rate and the percentage of time devoted to the project. Compensation paid for employees must be consistent with that paid for similar work within the proposer's organization and similar positions in the industry. Employees who are considered indirect labor should not be included in the breakdown of direct salaries or in section 1A of the Form NIST-1262 or NIST-1263. Escalation rates for the out-years should be reasonable. We recognize that a company may not be able to identify all of the personnel to be assigned to the project several years down the road. Where this cannot be done, use generic position titles such as "senior chemical engineer" and for name, "to be determined." Consultants should NOT be included in this category, but more appropriately under the "subcontracts" category and described on Form NIST-1262 or NIST-1263, pages 4 and 5, respectively.

Name/Position Title	Annual Salary	Percentage of Time on Project	Cost
D B Karron, Ph.D./ PI	175,000	100%	175,000
J.L Cox, Ph.D. / Lead Pgmr	100,000	45%	45,000
M B Rothman / Graphics Pgmr	70,000	50%	35,000
Peter M. Ross, Ph.D. / Business Manager	130,000	25%	32,000
Tony Pahati, / financial specialist	110,000	30%	33,000
Charles DaSalla / programmer	40,000	75%	30.000

TOTAL 350,000

B. Fringe Benefits - Identify percentage rate; if greater than 35 %, provide a breakdown of what makes up the fringe benefits (i.e., vacation, sick, military leave, health and life insurance, retirement, social security, etc.). If fringe benefits are normally included in your organization's indirect cost rate, they should be budgeted as such, and check the appropriate line below.

Percentage Rate: 34 **Check here if included in indirect:** _____

If percentage rate exceeds 35%, provide breakdown.

TOTAL $119,000

C. **Travel** - Provide best estimate of travel required for the project, and provide the basis of computation (i.e., item x number of people x number of trips). Note that ATP recipients are expected to adhere to government policies regarding travel, such as, coach rather than first class accommodations, etc. Travel costs should represent a coherent part of the project's "communications strategy" for smooth coordination among participants. While foreign travel is not precluded, it is discouraged and will require a strong justification on how it is directly related to the R&D activities of the ATP project. Likewise, the travel cost for attending conferences must be strongly justified as essential and relevant to the research and development aspects of the project.

Purpose of Travel	Destination	Item (mode transportation, lodging, and subsistence)	Computation	Cost
15000 is requested mainly to attend conferences for presentation of the results obtained in this project.				

Travel justification for foreign travel and conferences:

TOTAL 15000

D. Equipment - Identify each item of equipment, methodology used to arrive at the proposed costs, (i.e., historical costs, competitive bid, published price lists, or cost/price analysis), basis of computation (i.e., cost per item x number of items), and cost. Budget estimates for equipment items exceeding $100,000 each must be described and justified separately. Also identify by placing an asterisk on any in-kind owned equipment and its current depreciated value using the participant's preestablished depreciation accounting methods. The value of equipment will be further prorated according to the share of total use dedicated to carrying out the proposed ATP work. ATP funds may not be used for construction of new buildings or extensive renovations of existing laboratory buildings. ATP funds may, however, be used for construction of experimental research and development facilities to be located within a new or existing building provided that the equipment or facilities are essential for carrying out the project. If such costs are proposed, include below and provide justification.

Item	Methodology	Computation	Cost
Upgrade and replace PCs			31500
Upgrade/replace other equipment			35000

Justification for any item over $100,000, or construction costs:

TOTAL 66500

E. Materials/Supplies - Provide a complete breakdown of each item/type of expendable materials and supplies, methodology used to arrive at the proposed costs (i.e., historical costs, competitive bid, published price lists, or cost/price analysis), basis of computation (i.e., item x number of items), and cost.

Item	Methodology	Computation	Cost
	Materials and supplies expected to be about same or a little less.		

TOTAL 29500

F. Subcontractors - For each subcontractor identified on the NIST-1262 Page 4 or NIST-1263 Page 5, enter the name, if known, service to be provided, hourly or daily fee (8-hour day), and estimated time on the project. Subcontractor fees in excess of $450 per day require additional justification. Proposers are encouraged to promote free and open competition in awarding subcontracts.

Name of Subcontractor	Service Provided	Computation	Cost
George Wohlberg Ph.D.	Trouble shoot validation suite for DMT tree calculation	166 h @ $60/h	7,000
Misc. Programmers	Assist with front end development and refinement	438h @ $50/h	21900
Axiom/Benedict	Grant Management consultants	20h @ $250/h	5000
ATC Consulting	Network/system programming and system administration	100h @ 120/h	12000

Subtotal $45,900

Subcontractor Expenses: List all expenses to be paid from the award to the individual subcontractors in addition to their fees (i.e., travel, meals, lodging, etc.).

Item	Location	Computation	Cost

Subtotal 0

TOTAL $45,900

G. Other - Identify and provide a detailed description of any other direct costs which do not fall into the object cost categories above, basis of computation (i.e., cost per item x number of items), and cost. The cost of the project audit should also be included in this category unless it is part of the indirect costs. If it is part of the indirect costs indicate it as such. Each JV partner should budget for an audit. For awards less than 24 months, an audit is required at the end of the project; for 2, 3, or 4 year awards, an audit is required after the first year and at the end of the project; for 5 year awards, an audit is required after the first year, third year, and at the end of the project.

Description	Computation	Cost
Audit		
Joan Hayes, ATP Audit	66h @ 150/h	10,000
direct costs of electricity	633/month X 12 mo	7600

TOTAL 17600

H. Indirect Costs -Specify the current indirect cost rate(s), computation used, and cost. If an indirect cost rate was negotiated with a cognizant Federal agency, include a copy of the approved negotiated agreement. If an indirect cost rate has not been established by a cognizant Federal agency please state this below.

Percentage Rate	Computation	Cost

Subject: cd364 for prospective project employees

Dear Ms. Snowden;

Here are scanned copies of the CD364forms for our prospective new employees for you to transmit for background checks.
Blue pen original signed copies will be shipped fedex today or tomorrow. One additional person (Antonio Pahati [Pahati@worldnet.att.net]) is still pending, but I wanted to let you know that we are in the process of complying with your request.

I believe that the remainder of the other personnel cited in our 8/02 budget revision are already cleared by downtown.

If there is any other forms you need please write Dr. Ross and Myself.
I am in downtown Gaithersburg for the day and I can come in and sign anything that needs my signature on short notice.

Thank you !

Dr. Karron

Budget Revision Notes and Justifications.doc

nist-2002-10-20 budget sheet only.pdf

Ross POC CASI DBK New Letterhead 01.doc

Justification of budget: Year 1 and Year 2 revision

CASI has a budget revision pending since August; This revision is effectively that pending revision. No action has been taken at ATP concerning that budget. It is imperative that the budget revision be acted on and settled as our auditor is commencing the audit on a budget effectively developed in August, when the proposal for this project was being formulated. A number of technical and arithmetic errors were discovered in the original budget which were corrected in December 2001, but the essential budget has not been revised; The project fidelity is intact, the milestones are being met; new and exciting, unexpected and fundamental research findings are being developed. However the PI has elected to eliminate off site contractors and enforce the development effort on the SGI computers purchased for this effort. Development by contractors on differing computers added unnecessary complexity and delay, and reduced the speed and efficiency of the developed code.

CASI is a startup with ambitious goals and limited resources. Presently, an ATP/NIST grant is the sole funding source. During the first year, a number of changes in the spending of ATP money became necessary as a result of unanticipated delay in obtaining matching funds from New York State and business decisions made by the PI to centralize the work effort to the CASI premises.

The purpose of this document is to specify and justify these changes in light of the original budget and current direction. The narrative will show that the changes were not only useful, but that they strengthen CASI's position to further its objectives in light of present circumstances.

Salaries: Dr. Karron billed unevenly, on an hourly basis, for 100% of his time, as was discussed with BJ and Jayne and documented in a memo.

Fringe benefits : The decrease of $25,000 in Fringe was converted to materials and supplies.

Travel: The decrease of $4,000 in travel budget was also used to increase supplies.

Other: Other category is increased to $11900 to absorb new direct costs.

Decrease in consultant fees: There is a decrease in consultancy fees from 250,000 approved to 60,000 actually used.

Increase in equipment purchases: There is an approximately offsetting increase in equipment purchased from 110,000 to 303,400. In addition, equipment was purchased in year 1 that was not paid for with year 1 funds. These equipment purchases total 88,000. It is requested that these purchases be made his amount into the year 2 budget.

Conversion of consultant fees to equipment: The task breakdown in the approved year 1 budget reflects an approximately even split between salaries and equipment. However, in

the original approved budget, request was made for more consultancy fees. It was felt that programming could be outsourced and done at home on pc. Early on in the project, it was found that work was not progressing when outsourced this way. It was found that the PC environment could not handle the workload of heavy image processing. In addition, one contractor was working at home on a Sun Computer Systems environment and was unable to get his code to run on the machines in CASI. It was therefore decided to do all development in the actual CASI shop. In order to get more control over the project, it was further decided to have all personnel work on site. Accordingly, the increase in equipment basis reflects a decrease in the amount spent on consultancy fees. It was decided to get better value from equipment purchases than from the one-time services of outsourced work. By means of this change, Dr. Karron has in fact strengthened the business plans considerably. As the work in years 2 and 3 unfolds, availability of these high-powered computers will make the services more widely available. This consolidation increases accessibility of CASI services to potential clients. When appropriate IRB approvals are available, this will make it even more attractive for physicians in the local community to use the service for their data.

Transfer of Year 1 equipment charges to year 2 The amount of $88,000 is requested to be transferred from year 1 to year 2 of the grant. Year 1 equipment spending exceeded the original budgeted amount for the reasons described above. SGI provided one machine on permanent loan. A second graphics super workstation was ordered and delivered in January but not billed until late September. When we asked them whether this machine was part of their support of CASI's project, they gave indirect answers. An invoice was requested repeatedly by CASI. SGI sent a statement, at our request acting on an ATP suggestion, showing no balance due. It looked like this machine was a contribution from SGI to CASI for the NIST project, and Dr. Karron had several conversations with SGI employees on this topic. Then, unexpectedly, SGI back billed CASI $35,000 without the benefit of discounts they applied to a third machine purchased subsequently. Having already adopted a policy that all programming must be done on site, CASI found it needed the machine. At present, therefore, CASI feels that the most prudent course is to renegotiate the bill and pay it from year 2 funds. After receiving evidence that the first bill was not going to b e rendered, CASI decided to use then available equipment funds to buy a third machine, at a 60% discount. This machine was a low end superworkstation with two graphics heads permitting two people to simultaneously work on the same machine. This machine was found to be highly valuable to our work for this reason. These items, and additional $14,000 to Silicon City needed to replace a unit that broke to provide comprehensive, high density backup of all our computer systems, and the balance in miscellaneous technology glue are necessary expenses in use and vital to the project. All the bills were either unexpected or came due right at the juncture of years 1 and There remained no money in year 1 budget. It is therefore requested to transfer the amount for these items to the year 2 budget.

Reduction in investigator matching funds to the grant and increase in costs absorbed:
The budget was changed to reflect the fact that unexpected personal taxes are reducing the available funds the PI can match ATP supplied funds. Currently, the only available source of matching funds is from the PI's salary, which is taxed in the approximately 50% tax bracket. This was unanticipated during the original budget drafted last year. There has been serious controversy about what is direct and chargable and what is not. A significant number of overhead and direct costs are being paid by the PI; The urgency of obtaining matching funds has not been lost.

Year 3 revisions reflect changes in year 1 and 2 to keep the total project cost constant.

ESTIMATED MULTI-YEAR BUDGET - SINGLE COMPANY

	YEAR ONE	YEAR TWO	YEAR THREE	TOTAL
1. OBJECT CLASS CATEGORY				
A. Personnel Salaries/Wages	$ 327963	$ 330000	$ 375000	$ 1033000
B. Personnel Fringe Benefits	85500	85000	90000	260500
C. Travel	15880	7500	15000	38400
D. Equipment	303400	133000	75000	511400

Dan, thank you for the updated Budget Data sheets and the 1262 forms pages 3 and 4. Please note that the numbers on these two sets of documents do not match. For example, under fringe benefits for years one and two, your Budget Data sheets read $108,776 for year one and $112 K for year 2. Yet your 1262 page 3 reads $85,500 for each year. Another example, your subcontractor expenses on the Budget Data sheets for year one are a total of $92,213 yet the 1262 page 3 reads $61,000. A similar problem exists for year two under subcontractors.

Please provide a detailed explanation of the Honoraria item under subcontractor expenses for year one. Discuss who, when and why.

Please revise and resubmit all forms. Additionally, provide the detailed Budget Data for each section in the Budget Data sheets where the line item amount within any year has changed from the most recently approved 1262.

Thank you.

Dear Jayne ---

As per our conversation this morning, the discrepancy did not arise from carelessness but from frustration over inability to extract correct figures from books. We are working on that.

Thanks again for your patience. We are happy to comply with all your requests.

Peter

RE: Cooperative Agreement 70NANB1H3050 Computer Aided Surgery, Inc.
CASI Person for Contact (POC)

Dear Hope;

This letter authorizes Dr. Peter Ross (PhD) as CASI POC, replacing Mr. Elisha Gurfein, to discuss CASI business with you and for you to discuss the same with him.

The effective date of this change is Oct 1,2001 and remains in effect for 1 year, terminating Sept 30, 2003.

Thank you for your attention to this detail.

Sincerely,

Dr. D B Karron
PI
President

Re: Cooperative Agreement 70NANB1H3050

Subj: Disallowed Expenses

Ms. Snowden, please believe Dr. Karron did not knowingly misstate his SF269A submissions through Year One. He signed documents prepared by his project Administrator, who, along with Dr. Karron, did not understand the ATP Guidelines or Cost Principles FAR 31.2, and mistook certain financial deposits by Dr. Karron, for Member Contributions.

We acknowledge that there are disallowed expenses and they do go back to Year One, but they primarily come from two sources. First, Dr. Karron was trying to do the Bookkeeping himself and as he's not an accountant, mistakes were made. Secondly, there were differing opinions on what is and isn't allowable between the prior Administrators of the CA and those now Administering the CA. Primarily, myself, and The Jackson Group, the bookkeeping firm CASI, LLC has hired to manage the company's ledgers, including the project accounts.

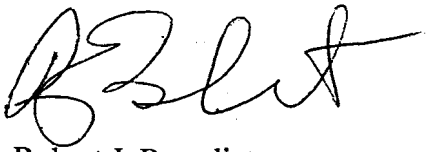
Further, we expect our independent auditor and Belinda Riley, the OIG Auditor, may identify some additional disallowed expenses, but we have not yet seen this data.

In fairness, however, the disallowed expenses included in the OIG Report, issued July 25, 2003, include CASI ledger data for the period 4/1/2003-6/27/2003, that was neither audited by OIG or reconciled by CASI Management. The normal reconciliation process was not completed for May or June, as all CASI efforts, once the OIG Audit was announced, was focused on this review. In addition, the June accounting period had not closed by June 27.

A quick review of the monthly expenses for these periods would indicate the disallowed line noted by OIG for Year 2, is in fact, overstated by at least $60K as payroll for those periods had not been recorded on the project side of the ledger. A complete reconciliation will be included in our written response to the OIG and independent audits when filed.

In closing, please be assured that we are doing everything we can to address the mistakes and to establish a controlled environment, to prevent future occurrences of these errors.

Respectfully,



Robert J. Benedict
Administrator

Re: Cooperative Agreement 70NANB1H3050

Subj: SF 269A Forms

Marilyn, attached are the SF 269A Forms for Cooperative Agreement 70NANB1H3050.

We have revised the Year One Reports to reflect the audit findings that no Member Contribution was applied to the project. In addition, the Reports through 6/30/03 also reflect this finding. CASI has its full Member Contribution in place and will apply it in 3Q03. This will bring our program-to-date commitment into compliance.

Finally, these reports reflect the period draws taken and expended by CASI. They do not reflect the disallowed expenses. The disallowed expense resolution will be reflected in the 3Q03 Report, once all parties agree on the amount.

Please let me know if there is further information required.

Respectfully,

Dr. D. B. Karron
Sr. Partner

Previous Edition Usable 269-104 Standard Form 269 (Rev. 7-97)

NSN 7540-01-012-4285 Prescribed by OMB Circulars A-102 and A-110

200-498 P.O. 139 (Face)

Public reporting burden for this collection of information is estimated to average 30 minutes per response, including time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding the burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to the Office of Management and Budget, Paperwork Reduction Project (0348-0039), Washington, DC 20503.

PLEASE DO NOT RETURN YOUR COMPLETED FORM TO THE OFFICE OF MANAGEMENT AND BUDGET.

Please type or print legibly. The following general instructions explain how to use the form itself. You may need additional information to complete certain items correctly, or to decide whether a specific item is applicable to this award. Usually, such information will be found in the Federal agency's grant regulations or in the terms and conditions of the award (e.g., how to calculate the Federal share, the permissible uses of program income, the value of in-kind contributions, etc.). You may also contact the Federal agency directly.

Item	Entry
1, 2 and 3.	Self-explanatory.
4.	Enter the Employer Identification Number (EIN) assigned by the U.S. Internal Revenue Service.
5.	Space reserved for an account number or other identifying number assigned by the recipient.
6.	Check *yes* only if this is the last report for the period shown in item 8.
7.	Self-explanatory.
8.	Unless you have received other instructions from the awarding agency, enter the beginning and ending dates of the current funding period. If this is a multi-year program, the Federal agency might require cumulative reporting through consecutive funding periods. In that case, enter the beginning and ending dates of the grant period, and in the rest of these instructions, substitute the term "grant period" for "funding period."
9.	Self-explanatory.
10.	The purpose of columns I, II, and III is to show the effect of this reporting period's transactions on cumulative financial status. The amounts entered in column I will normally be the same as those in column III of the previous report *in the same funding period*. If this is the first or only report of the funding period, leave columns I and II blank. If you need to adjust amounts entered on previous reports, footnote the column I entry on this report and attach an explanation.
10a.	Enter total gross program outlays. Include disbursements of cash realized as program income if that income will also be shown on lines 10c or 10g. Do not include program income that will be shown on lines 10r or 10s. For reports prepared on a cash basis, outlays are the sum of actual cash disbursements for direct costs for goods and services, the amount of indirect expense charged, the value of in-kind contributions applied, and the amount of cash advances and payments made to subrecipients. For reports prepared on an accrual basis, outlays are the sum of actual cash disbursements for direct charges for goods and services, the amount of indirect expense incurred, the value of in-kind contributions applied, and the net increase or decrease in the amounts owed by the recipient for goods and other property received, for services performed by employees, contractors, subgrantees and other payees, and other amounts becoming owed under programs for which no current services or performances are required, such as annuities, insurance claims, and other benefit payments.
10b.	Enter any receipts related to outlays reported on the form that are being treated as a reduction of expenditure rather than income, and were not already netted out of the amount shown as outlays on line 10a.
10c.	Enter the amount of program income that was used in accordance with the deduction alternative.
Note:	Program income used in accordance with other alternatives is entered on lines q, r, and s. Recipients reporting on a cash basis should enter the amount of cash income received; on an accrual basis, enter the program income earned. Program income may or may not have been included in an application budget and/or a budget on the award document. If actual income is from a different source or is significantly different in amount, attach an explanation or use the remarks section.
10d,	e, f, g, h, i and j. Self-explanatory.
10k.	Enter the total amount of unliquidated obligations, including unliquidated obligations to subgrantees and contractors. Unliquidated obligations on a cash basis are obligations incurred, but not yet paid. On an accrual basis, they are obligations incurred, but for which an outlay has not yet been recorded. Do not include any amounts on line 10k that have been included on lines 10a and 10j. On the final report, line 10k must be zero.
10l.	Self-explanatory.
10m.	On the final report, line 10m must also be zero.
10n,	o, p, q, r, s and t. Self-explanatory.
11a.	Self-explanatory.
11b.	Enter the indirect cost rate in effect during the reporting period.
11c.	Enter the amount of the base against which the rate was applied.
11d.	Enter the total amount of indirect costs charged during the report period.
11e.	Enter the Federal share of the amount in 11d.
Note:	If more than one rate was in effect during the period shown in item 8, attach a schedule showing the bases against which the different rates were applied, the respective rates, the calendar periods they were in effect, amounts of indirect expense charged to the project, and the Federal share of indirect expense charged to the project to date.

Please type or print legibly. The following general instructions explain how to use the form itself. You may need additional information to complete certain items correctly, or to decide whether a specific item is applicable to this award. Usually, such information will be found in the Federal agency's grant regulations or in the terms and conditions of the award (e.g., how to calculate the Federal share, the permissible uses of program income, the value of in-kind contributions, etc.). You may also contact the Federal agency directly.

Item	Entry
1, 2 and 3.	Self-explanatory.
4.	Enter the Employer Identification Number (EIN) assigned by the U.S. Internal Revenue Service.
5.	Space reserved for an account number or other identifying number assigned by the recipient.
6.	Check *yes* only if this is the last report for the period shown in item 8.
7.	Self-explanatory.
8.	Unless you have received other instructions from the awarding agency, enter the beginning and ending dates of the current funding period. If this is a multi-year program, the Federal agency might require cumulative reporting through consecutive funding periods. In that case, enter the beginning and ending dates of the grant period, and in the rest of these instructions, substitute the term "grant period" for "funding period."
9.	Self-explanatory.
10.	The purpose of columns, I, II, and III is to show the effect of this reporting period's transactions on cumulative financial status. The amounts entered in column I will normally be the same as those in column III of the previous report *in the same funding period*. If this is the first or only report of the funding period, leave columns I and II blank. If you need to adjust amounts entered on previous reports, footnote the column I entry on this report and attach an explanation.
10a.	Enter total gross program outlays. Include disbursements of cash realized as program income if that income will also be shown on lines 10c or 10g. Do not include program income that will be shown on lines 10r or 10s. For reports prepared on a cash basis, outlays are the sum of actual cash disbursements for direct costs for goods and services, the amount of indirect expense charged, the value of in-kind contributions applied, and the amount of cash advances and payments made to subrecipients. For reports prepared on an accrual basis, outlays are the sum of actual cash disbursements for direct charges for goods and services, the amount of indirect expense incurred, the value of in-kind contributions applied, and the net increase or decrease in the amounts owed by the recipient for goods and other property received, for services performed by employees, contractors, subgrantees and other payees, and other amounts becoming owed under programs for which no current services or performances are required, such as annuities, insurance claims, and other benefit payments.
10b.	Enter any receipts related to outlays reported on the form that are being treated as a reduction of expenditure rather than income, and were not already netted out of the amount shown as outlays on line 10a.
10c.	Enter the amount of program income that was used in accordance with the deduction alternative.
Note:	Program income used in accordance with other alternatives is entered on lines q, r, and s. Recipients reporting on a cash basis should enter the amount of cash income received; on an accrual basis, enter the program income earned. Program income may or may not have been included in an application budget and/or a budget on the award document. If actual income is from a different source or is significantly different in amount, attach an explanation or use the remarks section.
10d,	e, f, g, h, i and j. Self-explanatory.
10k.	Enter the total amount of unliquidated obligations, including unliquidated obligations to subgrantees and contractors. Unliquidated obligations on a cash basis are obligations incurred, but not yet paid. On an accrual basis, they are obligations incurred, but for which an outlay has not yet been recorded. Do not include any amounts on line 10k that have been included on lines 10a and 10j. On the final report, line 10k must be zero.
10l.	Self-explanatory.
10m.	On the final report, line 10m must also be zero.
10n,	o, p, q, r, s and t. Self-explanatory.
11a.	Self-explanatory.
11b.	Enter the indirect cost rate in effect during the reporting period.
11c.	Enter the amount of the base against which the rate was applied.
11d.	Enter the total amount of indirect costs charged during the report period.
11e.	Enter the Federal share of the amount in 11d.
Note:	If more than one rate was in effect during the period shown in item 8, attach a schedule showing the bases against which the different rates were applied, the respective rates, the calendar periods they were in effect, amounts of indirect expense charged to the project, and the Federal share of indirect expense charged to the project to date.

FINANCIAL STATUS REPORT

(Long Form)

(Follow instructions on the back)

Standard Form 269 (Rev. 7-97)
Prescribed by OMB Circulars A-102 and A-110

200-498 P.O. 139 (Face)

Public reporting burden for this collection of information is estimated to average 30 minutes per response, including time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding the burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to the Office of Management and Budget, Paperwork Reduction Project (0348-0039), Washington, DC 20503.

PLEASE DO NOT RETURN YOUR COMPLETED FORM TO THE OFFICE OF MANAGEMENT AND BUDGET.

Please type or print legibly. The following general instructions explain how to use the form itself. You may need additional information to complete certain items correctly, or to decide whether a specific item is applicable to this award. Usually, such information will be found in the Federal agency's grant regulations or in the terms and conditions of the award (e.g., how to calculate the Federal share, the permissible uses of program income, the value of in-kind contributions, etc.). You may also contact the Federal agency directly.

Item	Entry
1, 2 and 3.	Self-explanatory.
4.	Enter the Employer Identification Number (EIN) assigned by the U.S. Internal Revenue Service.
5.	Space reserved for an account number or other identifying number assigned by the recipient.
6.	Check *yes* only if this is the last report for the period shown in item 8.
7.	Self-explanatory.
8.	Unless you have received other instructions from the awarding agency, enter the beginning and ending dates of the current funding period. If this is a multi-year program, the Federal agency might require cumulative reporting through consecutive funding periods. In that case, enter the beginning and ending dates of the grant period, and in the rest of these instructions, substitute the term "grant period" for "funding period."
9.	Self-explanatory.
10.	The purpose of columns, I, II, and III is to show the effect of this reporting period's transactions on cumulative financial status. The amounts entered in column I will normally be the same as those in column III of the previous report *in the same funding period*. If this is the first or only report of the funding period, leave columns I and II blank. If you need to adjust amounts entered on previous reports, footnote the column I entry on this report and attach an explanation.
10a.	Enter total gross program outlays. Include disbursements of cash realized as program income if that income will also be shown on lines 10c or 10g. Do not include program income that will be shown on lines 10r or 10s. For reports prepared on a cash basis, outlays are the sum of actual cash disbursements for direct costs for goods and services, the amount of indirect expense charged, the value of in-kind contributions applied, and the amount of cash advances and payments made to subrecipients. For reports prepared on an accrual basis, outlays are the sum of actual cash disbursements for direct charges for goods and services, the amount of indirect expense incurred, the value of in-kind contributions applied, and the net increase or decrease in the amounts owed by the recipient for goods and other property received, for services performed by employees, contractors, subgrantees and other payees, and other amounts becoming owed under programs for which no current services or performances are required, such as annuities, insurance claims, and other benefit payments.
10b.	Enter any receipts related to outlays reported on the form that are being treated as a reduction of expenditure rather than income, and were not already netted out of the amount shown as outlays on line 10a.
10c.	Enter the amount of program income that was used in accordance with the deduction alternative.
Note:	Program income used in accordance with other alternatives is entered on lines q, r, and s. Recipients reporting on a cash basis should enter the amount of cash income received; on an accrual basis, enter the program income earned. Program income may or may not have been included in an application budget and/or a budget on the award document. If actual income is from a different source or is significantly different in amount, attach an explanation or use the remarks section.
10d,	e, f, g, h, i and j. Self-explanatory.
10k.	Enter the total amount of unliquidated obligations, including unliquidated obligations to subgrantees and contractors. Unliquidated obligations on a cash basis are obligations incurred, but not yet paid. On an accrual basis, they are obligations incurred, but for which an outlay has not yet been recorded. Do not include any amounts on line 10k that have been included on lines 10a and 10j. On the final report, line 10k must be zero.
10l.	Self-explanatory.
10m.	On the final report, line 10m must also be zero.
10n,	o, p, q, r, s and t. Self-explanatory.
11a.	Self-explanatory.
11b.	Enter the indirect cost rate in effect during the reporting period.
11c.	Enter the amount of the base against which the rate was applied.
11d.	Enter the total amount of indirect costs charged during the report period.
11e.	Enter the Federal share of the amount in 11d.
Note:	If more than one rate was in effect during the period shown in item 8, attach a schedule showing the bases against which the different rates were applied, the respective rates, the calendar periods they were in effect, amounts of indirect expense charged to the project, and the Federal share of indirect expense charged to the project to date.

FINANCIAL STATUS REPORT

(Long Form)

Public reporting burden for this collection of information is estimated to average 30 minutes per response, including time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding the burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to the Office of Management and Budget, Paperwork Reduction Project (0348-0039), Washington, DC 20503.

PLEASE DO NOT RETURN YOUR COMPLETED FORM TO THE OFFICE OF MANAGEMENT AND BUDGET.

Please type or print legibly. The following general instructions explain how to use the form itself. You may need additional information to complete certain items correctly, or to decide whether a specific item is applicable to this award. Usually, such information will be found in the Federal agency's grant regulations or in the terms and conditions of the award (e.g., how to calculate the Federal share, the permissible uses of program income, the value of in-kind contributions, etc.). You may also contact the Federal agency directly.

Item	Entry
1, 2 and 3.	Self-explanatory.
4.	Enter the Employer Identification Number (EIN) assigned by the U.S. Internal Revenue Service.
5.	Space reserved for an account number or other identifying number assigned by the recipient.
6.	Check *yes* only if this is the last report for the period shown in item 8.
7.	Self-explanatory.
8.	Unless you have received other instructions from the awarding agency, enter the beginning and ending dates of the current funding period. If this is a multi-year program, the Federal agency might require cumulative reporting through consecutive funding periods. In that case, enter the beginning and ending dates of the grant period, and in the rest of these instructions, substitute the term "grant period" for "funding period."
9.	Self-explanatory.
10.	The purpose of columns I, II, and III is to show the effect of this reporting period's transactions on cumulative financial status. The amounts entered in column I will normally be the same as those in column III of the previous report *in the same funding period*. If this is the first or only report of the funding period, leave columns I and II blank. If you need to adjust amounts entered on previous reports, footnote the column I entry on this report and attach an explanation.
10a.	Enter total gross program outlays. Include disbursements of cash realized as program income if that income will also be shown on lines 10c or 10g. Do not include program income that will be shown on lines 10r or 10s. For reports prepared on a cash basis, outlays are the sum of actual cash disbursements for direct costs for goods and services, the amount of indirect expense charged, the value of in-kind contributions applied, and the amount of cash advances and payments made to subrecipients. For reports prepared on an accrual basis, outlays are the sum of actual cash disbursements for direct charges for goods and services, the amount of indirect expense incurred, the value of in-kind contributions applied, and the net increase or decrease in the amounts owed by the recipient for goods and other property received, for services performed by employees, contractors, subgrantees and other payees, and other amounts becoming owed under programs for which no current services or performances are required, such as annuities, insurance claims, and other benefit payments.
10b.	Enter any receipts related to outlays reported on the form that are being treated as a reduction of expenditure rather than income, and were not already netted out of the amount shown as outlays on line 10a.
10c.	Enter the amount of program income that was used in accordance with the deduction alternative.
Note:	Program income used in accordance with other alternatives is entered on lines q, r, and s. Recipients reporting on a cash basis should enter the amount of cash income received; on an accrual basis, enter the program income earned. Program income may or may not have been included in an application budget and/or a budget on the award document. If actual income is from a different source or is significantly different in amount, attach an explanation or use the remarks section.
10d,	e, f, g, h, i and j. Self-explanatory.
10k.	Enter the total amount of unliquidated obligations, including unliquidated obligations to subgrantees and contractors. Unliquidated obligations on a cash basis are obligations incurred, but not yet paid. On an accrual basis, they are obligations incurred, but for which an outlay has not yet been recorded. Do not include any amounts on line 10k that have been included on lines 10a and 10j. On the final report, line 10k must be zero.
10l.	Self-explanatory.
10m.	On the final report, line 10m must also be zero.
10n,	o, p, q, r, s and t. Self-explanatory.
11a.	Self-explanatory.
11b.	Enter the indirect cost rate in effect during the reporting period.
11c.	Enter the amount of the base against which the rate was applied.
11d.	Enter the total amount of indirect costs charged during the report period.
11e.	Enter the Federal share of the amount in 11d.
Note:	If more than one rate was in effect during the period shown in item 8, attach a schedule showing the bases against which the different rates were applied, the respective rates, the calendar periods they were in effect, amounts of indirect expense charged to the project, and the Federal share of indirect expense charged to the project to date.

FINANCIAL STATUS REPORT

(Long Form)

(Follow instructions on the back)

1. Federal Agency and Organizational Element to Which Report is Submitted	2. Federal Grant or Other Identifying Number Assigned By Federal Agency	OMB Approval No.	Page of
NIST/ATP	70NANB1H3050	0348-0039	1 of 1 pages

3. Recipient Organization (Name and complete address, including ZIP code)
Computer Aided Surgery, LLC 300 E. 33rd St., New York, New York 10016

4. Employer Identification Number	5. Recipient Account Number or Identifying Number	6. Final Report	7. Basis

FINANCIAL STATUS REPORT

(Long Form)

Public reporting burden for this collection of information is estimated to average 30 minutes per response, including time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding the burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to the Office of Management and Budget, Paperwork Reduction Project (0348-0039), Washington, DC 20503.

PLEASE DO NOT RETURN YOUR COMPLETED FORM TO THE OFFICE OF MANAGEMENT AND BUDGET.

Please type or print legibly. The following general instructions explain how to use the form itself. You may need additional information to complete certain items correctly, or to decide whether a specific item is applicable to this award. Usually, such information will be found in the Federal agency's grant regulations or in the terms and conditions of the award (e.g., how to calculate the Federal share, the permissible uses of program income, the value of in-kind contributions, etc.). You may also contact the Federal agency directly.

Item	Entry
1,	2 and 3. Self-explanatory.
4.	Enter the Employer Identification Number (EIN) assigned by the U.S. Internal Revenue Service.
5.	Space reserved for an account number or other identifying number assigned by the recipient.
6.	Check *yes* only if this is the last report for the period shown in item 8.
7.	Self-explanatory.
8.	Unless you have received other instructions from the awarding agency, enter the beginning and ending dates of the current funding period. If this is a multi-year program, the Federal agency might require cumulative reporting through consecutive funding periods. In that case, enter the beginning and ending dates of the grant period, and in the rest of these instructions, substitute the term "grant period" for "funding period."
9.	Self-explanatory.
10.	The purpose of columns I, II, and III is to show the effect of this reporting period's transactions on cumulative financial status. The amounts entered in column I will normally be the same as those in column III of the previous report *in the same funding period*. If this is the first or only report of the funding period, leave columns I and II blank. If you need to adjust amounts entered on previous reports, footnote the column I entry on this report and attach an explanation.
10a.	Enter total gross program outlays. Include disbursements of cash realized as program income if that income will also be shown on lines 10c or 10g. Do not include program income that will be shown on lines 10r or 10s. For reports prepared on a cash basis, outlays are the sum of actual cash disbursements for direct costs for goods and services, the amount of indirect expense charged, the value of in-kind contributions applied, and the amount of cash advances and payments made to subrecipients. For reports prepared on an accrual basis, outlays are the sum of actual cash disbursements for direct charges for goods and services, the amount of indirect expense incurred, the value of in-kind contributions applied, and the net increase or decrease in the amounts owed by the recipient for goods and other property received, for services performed by employees, contractors, subgrantees and other payees, and other amounts becoming owed under programs for which no current services or performances are required, such as annuities, insurance claims, and other benefit payments.
10b.	Enter any receipts related to outlays reported on the form that are being treated as a reduction of expenditure rather than income, and were not already netted out of the amount shown as outlays on line 10a.
10c.	Enter the amount of program income that was used in accordance with the deduction alternative.
Note:	Program income used in accordance with other alternatives is entered on lines q, r, and s. Recipients reporting on a cash basis should enter the amount of cash income received; on an accrual basis, enter the program income earned. Program income may or may not have been included in an application budget and/or a budget on the award document. If actual income is from a different source or is significantly different in amount, attach an explanation or use the remarks section.
10d,	e, f, g, h, i and j. Self-explanatory.
10k.	Enter the total amount of unliquidated obligations, including unliquidated obligations to subgrantees and contractors. Unliquidated obligations on a cash basis are obligations incurred, but not yet paid. On an accrual basis, they are obligations incurred, but for which an outlay has not yet been recorded. Do not include any amounts on line 10k that have been included on lines 10a and 10j. On the final report, line 10k must be zero.
10l.	Self-explanatory.
10m.	On the final report, line 10m must also be zero.
10n,	o, p, q, r, s and t. Self-explanatory.
11a.	Self-explanatory.
11b.	Enter the indirect cost rate in effect during the reporting period.
11c.	Enter the amount of the base against which the rate was applied.
11d.	Enter the total amount of indirect costs charged during the report period.
11e.	Enter the Federal share of the amount in 11d.
Note:	If more than one rate was in effect during the period shown in item 8, attach a schedule showing the bases against which the different rates were applied, the respective rates, the calendar periods they were in effect, amounts of indirect expense charged to the project, and the Federal share of indirect expense charged to the project to date.

12/20/02

OMB Approval No: 0693-0009
Approval Expires: November 30, 2003

EXHIBIT 14

Budget Data

[Paperwork Reduction Act: Under the Paperwork Reduction Act no person is required to respond to a collection of information unless it displays a valid OMB control number. Public reporting burden for this collection of information is estimated to average 45 minutes per response, including time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding the burden estimates or any other aspect of this collection of information, including suggestions for reducing this burden, to Director, Advanced Technology Program, Administration Building, Room A333, MS 4700, Gaithersburg, MD 20899-4700.]

Purpose: The Budget Data worksheets should be used for the preparation of your budget information and should be submitted in **Gate 2**. The electronic version can be found at the ATP website http://www.atp.nist.gov.

The budget is excluded from the page limitation and is used by both technical and business reviewers and by a Grants Official to determine reasonableness and allowability of costs. The overall estimated multi-year budget numbers are to be provided on page 3 of Form NIST-1262 or NIST-1263. Your budget information is a breakdown of the figures reported on the NIST-1262 or NIST-1263. Breakdowns should be as accurate and specific as possible. Include a breakdown for each year of the project and if a joint venture (JV) proposal, include the budget data for each JV participant for each year including each JV participant's annual cost sharing. Make sure any figures presented exactly match the figures on Form NIST-1262 or NIST-1263, and make sure the arithmetic is correct. **Please round to the nearest dollar.**

Proposed costs must be reasonable, allocable, and allowable in accordance with the applicable Federal cost principles (see 15 CFR 14.27). All salaries/wages, fringe benefits, travel, materials and supplies, equipment, subcontracts, other costs, and indirect costs proposed are to be consistent with costs incurred for like or similar items on all other Federal and non-Federal projects or cost centers.

We recognize that unexpected events occur frequently in R&D projects, and that budgets may need to be changed as a project proceeds. Don't fear that by providing a multi-year budget beyond the first year, you will be locked into those details. ATP allows a certain amount of flexibility in moving funds from one line item to another as circumstances change. By stating an amount for a given task, you will not be required to spend precisely that amount on that task. For example, if, in the second or third year of your project, you find that you need to spend more on one task and less on another than anticipated, that can be accommodated. A task that proves unnecessary can be deleted and a new task can be defined if there is adequate justification that such changes will enhance the chances of accomplishing the objectives of the project.

Recognizing that change is inevitable, we may ask our recipients for a revised budget at the beginning of each year of a multi-year project. However, the total amount provided by ATP for the project cannot be increased. You will NOT be reimbursed for project overruns. Try to avoid overestimating or underestimating your project costs. The dollar amount of your request must be commensurate with the tasks you define.

At a minimum, details on the following object class categories must be provided

ESTIMATED MULTI-YEAR BUDGET - SINGLE COMPANY

	YEAR ONE	YEAR TWO	YEAR THREE	TOTAL
1. OBJECT CLASS CATEGORY				
A. Personnel Salaries/Wages	$ 322537	$ 331000	$ 347000	$ 1000537
B. Personnel Fringe Benefits	112565	112000	117000	341565
C. Travel	19920	7500	16000	43420
D. Equipment	231719	95,900	75000	402619
E. Materials/Supplies	22449	31000	25000	78449
F. Subcontracts	73605	33600	45900	153105
G. Other	53705	20000	17600	91305
H. Total Direct Costs (Lines A thru G)	836500	631000	634500	2111000
I. Total Direct Costs Requested From ATP	800000	600000	600000	2000000
J. Total Direct Costs Shared by Proposer (If Any)	$ 29500	$ 21600	$ 43500	$ 94600
K. Total Indirect Costs Absorbed by Proposer	$ 7000	$ 9400	$	$ 16400
L. Total Costs (Lines H + K)	$ 836500	$ 631000	$ 643500	$ 2111000
2. SOURCES OF FUNDS				
A. ATP (Same as Line I)	$ 800000	$ 600000	$ 600000	$ 2000000
B. Direct Costs Shared by	36,500	31000	43500	111000
C. Indirect costs shared				
D. Total sources	836,500	631000	643500	2111000
E. Total Sources of Funds (Same as Line L)	$ 835,900	$ 631000	$ 643500	$ 2111000
3. TASKS				
A. Server Hardware Installation and config	$ 412,500	$	$	$ 412500
B. Public client design mockup	111000			111000
C. Program spider web surface gen	111000			111000
D. Recog sort crits	202000			202000
E. Write Union/intersection operator		210500		210500
F. Write Saddle Crit navigator/editor		210000		210000
G. Write Diocom up/down load compres/crypt		210500		210500
H. Node warping code			214500	214500
I. Write level of detail management code			211000	211000
J. Install clickstream technology on clients			211500	211500
K. Total Costs of All Tasks (Same as Line L)	$ 836500	$ 631000	$ 643500	$ 2111000

Budget Data

Proposal Number 70NANB1H3050

Name of Company Computer Aided Surgery, Inc **Year** 1 (2001-2002)

A. Personnel - List each position by name of employee and title, if available. Show the annual salary rate and the percentage of time devoted to the project. Compensation paid for employees must be consistent with that paid for similar work within the proposer's organization and similar positions in the industry. Employees who are considered indirect labor should not be included in the breakdown of direct salaries or in section 1A of the Form NIST-1262 or NIST-1263. Escalation rates for the out-years should be reasonable. We recognize that a company may not be able to identify all of the personnel to be assigned to the project several years down the road. Where this cannot be done, use generic position titles such as "senior chemical engineer" and for name, "to be determined." Consultants should NOT be included in this category, but more appropriately under the "subcontracts" category and described on Form NIST-1262 or NIST-1263, pages 4 and 5, respectively.

Name/Position Title	Annual Salary	Percentage of Time on Project	Cost
Dr. D B Karron/PI (12 months)	$175,000	100%	$175,000
Elisha Gurfein/Project Manager (12 months)	$133,333	75%	$100,000
Prof. James L Cox / Lead Pgmr (1 month)	$127,346	49%	$5,200
Scott Albin / Systems (3 months)	$47,142	42%	$4,950
Charles DaSalla / Systems (11 months)	$21,905	100%	$19,800
Nicholee Wynter / Fiscal Control (4 months)	$29,000	100%	$9,348
Regner Peralla (1 month)	$31,488	50%	$1,312
RG Wine (1 month)	$42,240	100%	$3,520
Matthew Rothman (5 wks)	$33,000	100%	$3,405
		TOTAL	$322,537

B. Fringe Benefits - Identify percentage rate; if greater than 35 %, provide a breakdown of what makes up the fringe benefits (i.e., vacation, sick, military leave, health and life insurance, retirement, social security, etc.). If fringe benefits are normally included in your organization's indirect cost rate, they should be budgeted as such, and check the appropriate line below.

Percentage Rate: 34.9% **Check here if included in indirect:** _____

If percentage rate exceeds 35%, provide breakdown.

TOTAL $112,565

C. Travel - Provide best estimate of travel required for the project, and provide the basis of computation (i.e., item x number of people x number of trips). Note that ATP recipients are expected to adhere to government policies regarding travel, such as, coach rather than first class accommodations, etc. Travel costs should represent a coherent part of the project's "communications strategy" for smooth coordination among participants. While foreign travel is not precluded, it is discouraged and will require a strong justification on how it is directly related to the R&D activities of the ATP project. Likewise, the travel cost for attending conferences must be strongly justified as essential and relevant to the research and development aspects of the project.

Purpose of Travel	Destination	Item (mode transportation, lodging, and subsistence)	Computation	Cost
MMVR (Presentation)	Newport Beach, CA	2x RT Air, Hotel, Rental Car, Meeting Fees, Per Diem for PI and R. Bucholz, MD		6000
NIST Kickoff	Gatherburg, MD	2x Trainfare, Car Rental, Taxi, Per Diem for PI, Gurfein, and R. Satava MD		2000
SPIE Medical Imaging (Presentation)	Boston, MA	2x Amtrak, meeting fees, Taxi, Per Diem, PI and Cox		2621
SGI Developer Conference	San Jose, CA	Airfare, meeting fees, car rental, Hotel, Per Diem for PI		2700
IEEE Signal Proc Soc and NIH NIBIB Joint Conf side visit to Nist	Washington, DC Gaitherburg, MD	Car Rental, Hotel Meeting Fees, Per Diem:PI and Zevi		2000 10
Gurfein Travel to CASI	Ft. Lee, NJ	Fuel, Parking, Tolls for visits to CASI for NIST Program Management		1589
DBK Travel to NIST NYC Parking for Staff and Visitors	Gaitherburg, MD New York, NY	Fuel, Tolls, Per Diem Muni Meter and Parking Garage for Program Work by Visitors and Staff, Honoraria Parking		1000 2000

Travel justification for foreign travel and conferences:

TOTAL 19,920

D. Equipment - Identify each item of equipment, methodology used to arrive at the proposed costs, (i.e., historical costs, competitive bid, published price lists, or cost/price analysis), basis of computation (i.e., cost per item x number of items), and cost. Budget estimates for equipment items exceeding $100,000 each must be described and justified separately. Also identify by placing an asterisk on any in-kind owned equipment and its current depreciated value using the participant's preestablished depreciation accounting methods. The value of equipment will be further prorated according to the share of total use dedicated to carrying out the proposed ATP work. ATP funds may not be used for construction of new buildings or extensive renovations of existing laboratory buildings. ATP funds may, however, be used for construction of experimental research and development facilities to be located within a new or existing building provided that the equipment or facilities are essential for carrying out the project. If such costs are proposed, include below and provide justification.

Item	Methodology	Computation	Cost
	see attached exhibit		

Justification for any item over $100,000, or construction costs:

TOTAL 231719

E. Materials/Supplies - Provide a complete breakdown of each item/type of expendable materials and supplies, methodology used to arrive at the proposed costs (i.e., historical costs, competitive bid, published price lists, or cost/price analysis), basis of computation (i.e., item x number of items), and cost.

Item	Methodology	Computation	Cost
Printing and reproduction	GSA Schedule Vendor	historical	397
Office supplies	"	historical	14,012
small computer support tools	"	historical	3,486
diagnostic tools	"	historical	1,000
computer supplies, expendables	"	historical	3,554

TOTAL 22,449

F. Subcontractors - For each subcontractor identified on the NIST-1262 Page 4 or NIST-1263 Page 5, enter the name, if known, service to be provided, hourly or daily fee (8-hour day), and estimated time on the project. Subcontractor fees in excess of $450 per day require additional justification. Proposers are encouraged to promote free and open competition in awarding subcontracts.

Name of Subcontractor	Service Provided	Computation	Cost
George Wolberg, PhD	Graphics Programming	525 hours @ 80/hour	37,674
Jim Cox	Contract work done prior to hire.	660 hours @ $50/h	33,930
Scot Albin, MD	systems and medical research	100 hours@ 20/hour	2,000

Subtotal 73,605

Subcontractor Expenses: List all expenses to be paid from the award to the individual subcontractors in addition to their fees (i.e., travel, meals, lodging, etc.).

Item	Location	Computation	Cost

Subtotal

TOTAL 73,605

G. Other - Identify and provide a detailed description of any other direct costs which do not fall into the object cost categories above, basis of computation (i.e., cost per item x number of items), and cost. The cost of the project audit should also be included in this category unless it is part of the indirect costs. If it is part of the indirect costs indicate it as such. Each JV partner should budget for an audit. For awards less than 24 months, an audit is required at the end of the project; for 2, 3, or 4 year awards, an audit is required after the first year and at the end of the project; for 5 year awards, an audit is required after the first year, third year, and at the end of the project.

Description	Computation	Cost
Audit		
Jill Feldman, ATP pre-certification		5,000
Power delivery	100% of increase due to NIST grant	9,724
Data Communication		8,205
PDA		349
ATG Consulting Specialized Network and Systems programming and System Administration	100 hours@ 120/hour	12,000
Professional fees for payroll tax preparation, accounting, and legal services		16,691
Dues and professional memberships		736
Misc		500
Program related postage and delivery		500
	TOTAL	53,705

H. Indirect Costs -Specify the current indirect cost rate(s), computation used, and cost. If an indirect cost rate was negotiated with a cognizant Federal agency, include a copy of the approved negotiated agreement. If an indirect cost rate has not been established by a cognizant Federal agency please state this below.

Percentage Rate	Computation	Cost
	TOTAL	

Budget Data

Proposal Number 70NANB1H3050

Name of Company Computer Aided Surgery, Inc. **Year** 2 (2002 - 2003)

A. Personnel - List each position by name of employee and title, if available. Show the annual salary rate and the percentage of time devoted to the project. Compensation paid for employees must be consistent with that paid for similar work within the proposer's organization and similar positions in the industry. Employees who are considered indirect labor should not be included in the breakdown of direct salaries or in section 1A of the Form NIST-1262 or NIST-1263. Escalation rates for the out-years should be reasonable. We recognize that a company may not be able to identify all of the personnel to be assigned to the project several years down the road. Where this cannot be done, use generic position titles such as "senior chemical engineer" and for name, "to be determined." Consultants should NOT be included in this category, but more appropriately under the "subcontracts" category and described on Form NIST-1262 or NIST-1263, pages 4 and 5, respectively.

Name/Position Title	Annual Salary	Percentage of Time on Project	Cost
D B Karron, Ph.D./ PI	175,000	100%	175,000
J L Cox, Ph.D. / Lead Pgmr	100,000	45%	45,000
M B Rothman / Graphics Pgmr	66,000	50%	33,000
Peter M. Ross, Ph.D. / Business Manager	127,300	30%	38,000
Tony Pahati, / fiscal control specialist	50,000	30%	15,000
Charles DaSalla / programmer	43,000	60%	25,800
		TOTAL	331,000

B. Fringe Benefits - Identify percentage rate; if greater than 35 %, provide a breakdown of what makes up the fringe benefits (i.e., vacation, sick, military leave, health and life insurance, retirement, social security, etc.). If fringe benefits are normally included in your organization's indirect cost rate, they should be budgeted as such, and check the appropriate line below.

Percentage Rate: 34 **Check here if included in indirect:** _____

If percentage rate exceeds 35%, provide breakdown.

TOTAL $112,000

C. Travel - Provide best estimate of travel required for the project, and provide the basis of computation (i.e., item x number of people x number of trips). Note that ATP recipients are expected to adhere to government policies regarding travel, such as, coach rather than first class accommodations, etc. Travel costs should represent a coherent part of the project's "communications strategy" for smooth coordination among participants. While foreign travel is not precluded, it is discouraged and will require a strong justification on how it is directly related to the R&D activities of the ATP project. Likewise, the travel cost for attending conferences must be strongly justified as essential and relevant to the research and development aspects of the project.

Purpose of Travel	Destination	Item (mode transportation, lodging, and subsistence)	Computation	Cost
7500 is requested mainly for trips to Washington or to nearby conferences.				

Travel justification for foreign travel and conferences:

TOTAL 7500

D. Equipment - Identify each item of equipment, methodology used to arrive at the proposed costs, (i.e., historical costs, competitive bid, published price lists, or cost/price analysis), basis of computation (i.e., cost per item x number of items), and cost. Budget estimates for equipment items exceeding $100,000 each must be described and justified separately. Also identify by placing an asterisk on any in-kind owned equipment and its current depreciated value using the participant's preestablished depreciation accounting methods. The value of equipment will be further prorated according to the share of total use dedicated to carrying out the proposed ATP work. ATP funds may not be used for construction of new buildings or extensive renovations of existing laboratory buildings. ATP funds may, however, be used for construction of experimental research and development facilities to be located within a new or existing building provided that the equipment or facilities are essential for carrying out the project. If such costs are proposed, include below and provide justification.

Item	Methodology	Computation	Cost
computer equipment purchased year 2			15,900
An allowance is requested for computer equipment purchased in year 1 billed in year 2			
second RAID			10,000
SGI octane plus			30,000
SGI octane plus			40,000

Justification for any item over $100,000, or construction costs:

TOTAL 95900

E. Materials/Supplies - Provide a complete breakdown of each item/type of expendable materials and supplies, methodology used to arrive at the proposed costs (i.e., historical costs, competitive bid, published price lists, or cost/price analysis), basis of computation (i.e., item x number of items), and cost.

Item	Methodology	Computation	Cost
	A 25% increase in materials use is anticipated due to the increase in on-site work.		

TOTAL 31000

F. Subcontractors - For each subcontractor identified on the NIST-1262 Page 4 or NIST-1263 Page 5, enter the name, if known, service to be provided, hourly or daily fee (8-hour day), and estimated time on the project. Subcontractor fees in excess of $450 per day require additional justification. Proposers are encouraged to promote free and open competition in awarding subcontracts.

Name of Subcontractor	Service Provided	Computation	Cost
Ed Weinberger, Ph.D.	Construct 3-D pointer arrows for graphic user interface.	166 h @ $60/h	$7,000
George Wohlberg Ph.D.	Prepare validation suite for DMT tree calculation	75h @ $80/h	$6,000
Isaac Dimitrovsky, Ph.D.	Assist with validation paradigm stochastic properties	100h @ $60/h	$6,000
Axiom/Benedict	Grant Management consultants	22h @ 250/h	5,400
J. Case	Programming	83h @ $30/h	1000
E Bostwick	Programming	33.5h @ $30/h	1000
ATC Consulting	Network/system programming and system administration	30h @ 120/h	3600
		Subtotal	$30,000

Subcontractor Expenses: List all expenses to be paid from the award to the individual subcontractors in addition to their fees (i.e., travel, meals, lodging, etc.).

Item	Location	Computation	Cost
Meals and travel	10 meals @ $20 each		200
	10 trips @ $240 each		2400
honoraria	bringing scientists to CASI	5 @ $200 each	1000
		Subtotal	3600
		TOTAL	$33,600

G. Other - Identify and provide a detailed description of any other direct costs which do not fall into the object cost categories above, basis of computation (i.e., cost per item x number of items), and cost. The cost of the project audit should also be included in this category unless it is part of the indirect costs. If it is part of the indirect costs indicate it as such. Each JV partner should budget for an audit. For awards less than 24 months, an audit is required at the end of the project; for 2, 3, or 4 year awards, an audit is required after the first year and at the end of the project; for 5 year awards, an audit is required after the first year, third year, and at the end of the project.

Description	Computation	Cost
Audit		
Joan Hayes, ATP Audit	133h @ 150/h	20,000

TOTAL 20,000

H. Indirect Costs -Specify the current indirect cost rate(s), computation used, and cost. If an indirect cost rate was negotiated with a cognizant Federal agency, include a copy of the approved negotiated agreement. If an indirect cost rate has not been established by a cognizant Federal agency please state this below.

Percentage Rate	Computation	Cost

TOTAL

Budget Data

Proposal Number 70NANB1H3050

Name of Company Computer Aided Surgery, Inc. **Year** 3 (2003 - 2004)

A. Personnel - List each position by name of employee and title, if available. Show the annual salary rate and the percentage of time devoted to the project. Compensation paid for employees must be consistent with that paid for similar work within the proposer's organization and similar positions in the industry. Employees who are considered indirect labor should not be included in the breakdown of direct salaries or in section 1A of the Form NIST-1262 or NIST-1263. Escalation rates for the out-years should be reasonable. We recognize that a company may not be able to identify all of the personnel to be assigned to the project several years down the road. Where this cannot be done, use generic position titles such as "senior chemical engineer" and for name, "to be determined." Consultants should NOT be included in this category, but more appropriately under the "subcontracts" category and described on Form NIST-1262 or NIST-1263, pages 4 and 5, respectively.

Name/Position Title	Annual Salary	Percentage of Time on Project	Cost
D B Karron, Ph.D./ PI	175,000	100%	175,000
J L Cox, Ph.D. / Lead Pgmr	100,000	40%	40,000
M B Rothman / Graphics Pgmr	70,000	50%	35,000
Peter M. Ross, Ph.D. / Business Manager	130,000	30%	39,000
Tony Pahati, / financial specialist	60,000	30%	18,000
Charles DaSalla / programmer	40,000	100%	40,000

TOTAL 347,000

B. Fringe Benefits - Identify percentage rate; if greater than 35 %, provide a breakdown of what makes up the fringe benefits (i.e., vacation, sick, military leave, health and life insurance, retirement, social security, etc.). If fringe benefits are normally included in your organization's indirect cost rate, they should be budgeted as such, and check the appropriate line below.

Percentage Rate: 34 **Check here if included in indirect:** _____

If percentage rate exceeds 35%, provide breakdown.

TOTAL $117,000

C. Travel - Provide best estimate of travel required for the project, and provide the basis of computation (i.e., item x number of people x number of trips). Note that ATP recipients are expected to adhere to government policies regarding travel, such as, coach rather than first class accommodations, etc. Travel costs should represent a coherent part of the project's "communications strategy" for smooth coordination among participants. While foreign travel is not precluded, it is discouraged and will require a strong justification on how it is directly related to the R&D activities of the ATP project. Likewise, the travel cost for attending conferences must be strongly justified as essential and relevant to the research and development aspects of the project.

Purpose of Travel	Destination	Item (mode transportation, lodging, and subsistence)	Computation	Cost
16000 is requested mainly to attend conferences for presentation of the results obtained in this project.				

Travel justification for foreign travel and conferences:

TOTAL 16000

D. Equipment - Identify each item of equipment, methodology used to arrive at the proposed costs, (i.e., historical costs, competitive bid, published price lists, or cost/price analysis), basis of computation (i.e., cost per item x number of items), and cost. Budget estimates for equipment items exceeding $100,000 each must be described and justified separately. Also identify by placing an asterisk on any in-kind owned equipment and its current depreciated value using the participant's preestablished depreciation accounting methods. The value of equipment will be further prorated according to the share of total use dedicated to carrying out the proposed ATP work. ATP funds may not be used for construction of new buildings or extensive renovations of existing laboratory buildings. ATP funds may, however, be used for construction of experimental research and development facilities to be located within a new or existing building provided that the equipment or facilities are essential for carrying out the project. If such costs are proposed, include below and provide justification.

Item	Methodology	Computation	Cost
Upgrade and replace PCs and other equipment needed for project completion.			75000

Justification for any item over $100,000, or construction costs:

TOTAL 75000

E. Materials/Supplies - Provide a complete breakdown of each item/type of expendable materials and supplies, methodology used to arrive at the proposed costs (i.e., historical costs, competitive bid, published price lists, or cost/price analysis), basis of computation (i.e., item x number of items), and cost.

Item	Methodology	Computation	Cost
	Materials and supplies expected to be about same or a little less.		

TOTAL 25000

F. Subcontractors - For each subcontractor identified on the NIST-1262 Page 4 or NIST-1263 Page 5, enter the name, if known, service to be provided, hourly or daily fee (8-hour day), and estimated time on the project. Subcontractor fees in excess of $450 per day require additional justification. Proposers are encouraged to promote free and open competition in awarding subcontracts.

Name of Subcontractor	Service Provided	Computation	Cost
George Woberg Ph.D.	Trouble shoot validation suite for DMT tree calculation	116.6 h @ $60/h	7,000
Misc. Programmers	Assist with front end development and refinement	438h @ $50/h	21900
Axiom/Benedict	Grant Management consultants	20h @ $250/h	5000
ATC Consulting	Network/system programming and system administration	100h @ 120/h	12000

Subtotal $45,900

Subcontractor Expenses: List all expenses to be paid from the award to the individual subcontractors in addition to their fees (i.e., travel, meals, lodging, etc.).

Item	Location	Computation	Cost

Subtotal 0

TOTAL $45,900

G. Other - Identify and provide a detailed description of any other direct costs which do not fall into the object cost categories above, basis of computation (i.e., cost per item x number of items), and cost. The cost of the project audit should also be included in this category unless it is part of the indirect costs. If it is part of the indirect costs indicate it as such. Each JV partner should budget for an audit. For awards less than 24 months, an audit is required at the end of the project; for 2, 3, or 4 year awards, an audit is required after the first year and at the end of the project; for 5 year awards, an audit is required after the first year, third year, and at the end of the project.

Description	Computation	Cost
Audit		
Joan Hayes, ATP Audit	66h @ 150/h	10,000
direct costs of electricity	633/month X 12 mo	7600

TOTAL 17600

H. Indirect Costs -Specify the current indirect cost rate(s), computation used, and cost. If an indirect cost rate was negotiated with a cognizant Federal agency, include a copy of the approved negotiated agreement. If an indirect cost rate has not been established by a cognizant Federal agency please state this below.

Percentage Rate	Computation	Cost

TOTAL 0

1. NAME AND ADDRESS OF SUBCONTRACTOR

George Wolberg, Ph.D.
NAC 8/202G
Department of Computer Science
City College of New York
138th St. at Convent Ave., Rm. R8/206
New York, NY 10031

NAME OF CONTACT:
TELEPHONE NUMBER: (212) 650-6160
FAX NUMBER: +1 (212) 650-6184
E-MAIL ADDRESS: wolberg@cs-mail.engr.ccny.cuny.edu

2. TYPE OF ORGANIZATION (CHECK ALL THAT APPLY)

- [x] PROFIT - SMALL BUSINESS
- [ ] PROFIT - LARGE BUSINESS
- [ ] PROFIT - MEDIUM BUSINESS
- [ ] FOREIGN-OWNED U.S. SUBSIDIARY
- [ ] NON-PROFIT INDEPENDENT RESEARCH ORGANIZATION
- [ ] UNIVERSITY
- [ ] GOVERNMENTAL LABORATORY

3. ESTIMATED AMOUNT OF SUBCONTRACT

$6,000

4. DESCRIBE SCOPE OF WORK

Programming of validation suite for assessment of accuracy of DMT tree construction and mapping.

5. IS THIS A SOLE SOURCE CONTRACT?

- [x] YES (IF YES, EXPLAIN)
- [ ] NO

Dr. Wohlberg wrote early versions of the computer algorithms for DMT based segmentation in this CASI-NIST grant. He is uniquely qualified to develop effective validation software.

1. NAME AND ADDRESS OF SUBCONTRACTOR

Peter M. Ross, Ph.D.
MedReply, Inc.
415 Central Park West, #9D
New York, NY 10025-4

NAME OF CONTACT:
TELEPHONE NUMBER: 212-665-5126

OMB Approval No: 0693-0009
Approval Expires: November 30, 2003

EXHIBIT 14

Budget Data

[Paperwork Reduction Act: Under the Paperwork Reduction Act no person is required to respond to a collection of information unless it displays a valid OMB control number. Public reporting burden for this collection of information is estimated to average 45 minutes per response, including time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding the burden estimates or any other aspect of this collection of information, including suggestions for reducing this burden, to Director, Advanced Technology Program, Administration Building, Room A333, MS 4700, Gaithersburg, MD 20899-4700.]

Purpose: The Budget Data worksheets should be used for the preparation of your budget information and should be submitted in **Gate 2**. The electronic version can be found at the ATP website http://www.atp.nist.gov.

The budget is excluded from the page limitation and is used by both technical and business reviewers and by a Grants Official to determine reasonableness and allowability of costs. The overall estimated multi-year budget numbers are to be provided on page 3 of Form NIST-1262 or NIST-1263. Your budget information is a breakdown of the figures reported on the NIST-1262 or NIST-1263. Breakdowns should be as accurate and specific as possible. Include a breakdown for each year of the project and if a joint venture (JV) proposal, include the budget data for each JV participant for each year including each JV participant's annual cost sharing. Make sure any figures presented exactly match the figures on Form NIST-1262 or NIST-1263, and make sure the arithmetic is correct. **Please round to the nearest dollar.**

Proposed costs must be reasonable, allocable, and allowable in accordance with the applicable Federal cost principles (see 15 CFR 14.27). All salaries/wages, fringe benefits, travel, materials and supplies, equipment, subcontracts, other costs, and indirect costs proposed are to be consistent with costs incurred for like or similar items on all other Federal and non-Federal projects or cost centers.

We recognize that unexpected events occur frequently in R&D projects, and that budgets may need to be changed as a project proceeds. Don't fear that by providing a multi-year budget beyond the first year, you will be locked into those details. ATP allows a certain amount of flexibility in moving funds from one line item to another as circumstances change. By stating an amount for a given task, you will not be required to spend precisely that amount on that task. For example, if, in the second or third year of your project, you find that you need to spend more on one task and less on another than anticipated, that can be accommodated. A task that proves unnecessary can be deleted and a new task can be defined if there is adequate justification that such changes will enhance the chances of accomplishing the objectives of the project.

Recognizing that change is inevitable, we may ask our recipients for a revised budget at the beginning of each year of a multi-year project. However, the total amount provided by ATP for the project cannot be increased. You will NOT be reimbursed for project overruns. Try to avoid overestimating or underestimating your project costs. The dollar amount of your request must be commensurate with the tasks you define.

At a minimum, details on the following object class categories must be provided

Budget Data

Proposal Number 70NANB1H3050

Name of Company Computer Aided Surgery, Inc **Year** 1 (2001-2002)

A. Personnel - List each position by name of employee and title, if available. Show the annual salary rate and the percentage of time devoted to the project. Compensation paid for employees must be consistent with that paid for similar work within the proposer's organization and similar positions in the industry. Employees who are considered indirect labor should not be included in the breakdown of direct salaries or in section 1A of the Form NIST-1262 or NIST-1263. Escalation rates for the out-years should be reasonable. We recognize that a company may not be able to identify all of the personnel to be assigned to the project several years down the road. Where this cannot be done, use generic position titles such as "senior chemical engineer" and for name, "to be determined." Consultants should NOT be included in this category, but more appropriately under the "subcontracts" category and described on Form NIST-1262 or NIST-1263, pages 4 and 5, respectively.

Name/Position Title	Annual Salary	Percentage of Time on Project	Cost
Dr. D B Karron/PI (12 months)	$175,000	100%	$175,000
Elisha Gurfein/Project Manager (12 months)	$133,333	75%	$100,000
Prof. James L Cox / Lead Pgmr (1 month)	$127,346	49%	$5,200
Scott Albin / Systems (3 months)	$47,142	42%	$4,950
Charles DaSalla / Systems (11 months)	$21,905	100%	$19,800
Nicholee Wynter / Fiscal Control (4 months)	$29,000	100%	$9,348
Regner Peralla (1 month)	$31,488	50%	$1,312
RG Wine (1 month)	$42,240	100%	$3,520
Matthew Rothman (5 wks)	$33,000	100%	$3,405
		TOTAL	$322,537

B. Fringe Benefits - Identify percentage rate; if greater than 35 %, provide a breakdown of what makes up the fringe benefits (i.e., vacation, sick, military leave, health and life insurance, retirement, social security, etc.). If fringe benefits are normally included in your organization's indirect cost rate, they should be budgeted as such, and check the appropriate line below.

Percentage Rate: 34.9% **Check here if included in indirect:** _____

If percentage rate exceeds 35%, provide breakdown.

TOTAL $112,565

C. **Travel** - Provide best estimate of travel required for the project, and provide the basis of computation (i.e., item x number of people x number of trips). Note that ATP recipients are expected to adhere to government policies regarding travel, such as, coach rather than first class accommodations, etc. Travel costs should represent a coherent part of the project's "communications strategy" for smooth coordination among participants. While foreign travel is not precluded, it is discouraged and will require a strong justification on how it is directly related to the R&D activities of the ATP project. Likewise, the travel cost for attending conferences must be strongly justified as essential and relevant to the research and development aspects of the project.

Purpose of Travel	Destination	Item (mode transportation, lodging, and subsistence)	Computation	Cost
MMVR (Presentation)	Newport Beach, CA	2x RT Air, Hotel, Rental Car, Meeting Fees, Per Diem for PI and R. Bucholz, MD		6000
NIST Kickoff	Gatherburg, MD	2x Trainfare, Car Rental, Taxi, Per Diem for PI, Gurfein, and R. Satava MD		2000
SPIE Medical Imaging (Presentation)	Boston, MA	2x Amtrak, meeting fees, Taxi, Per Diem, PI and Cox		2621
SGI Developer Conference	San Jose, CA	Airfare, meeting fees, car rental, Hotel, Per Diem for PI		2700
IEEE Signal Proc Soc and NIH NIBIB Joint Conf side visit to Nist	Washington, DC Gaitherburg, MD	Car Rental, Hotel Meeting Fees, Per Diem:PI and Zevi		2000 10
Gurfein Travel to CASI	Ft. Lee, NJ	Fuel, Parking, Tolls for visits to CASI for NIST Program Management		1589
DBK Travel to NIST NYC Parking for Staff and Visitors	Gaitherburg, MD New York, NY	Fuel, Tolls, Per Diem Muni Meter and Parking Garage for Program Work by Visitors and Staff, Honoraria Parking		1000 2000

Travel justification for foreign travel and conferences:

TOTAL 19,920

D. Equipment - Identify each item of equipment, methodology used to arrive at the proposed costs, (i.e., historical costs, competitive bid, published price lists, or cost/price analysis), basis of computation (i.e., cost per item x number of items), and cost. Budget estimates for equipment items exceeding $100,000 each must be described and justified separately. Also identify by placing an asterisk on any in-kind owned equipment and its current depreciated value using the participant's preestablished depreciation accounting methods. The value of equipment will be further prorated according to the share of total use dedicated to carrying out the proposed ATP work. ATP funds may not be used for construction of new buildings or extensive renovations of existing laboratory buildings. ATP funds may, however, be used for construction of experimental research and development facilities to be located within a new or existing building provided that the equipment or facilities are essential for carrying out the project. If such costs are proposed, include below and provide justification.

Item	Methodology	Computation	Cost
	see attached exhibit		

Justification for any item over $100,000, or construction costs:

TOTAL 231719

E. Materials/Supplies - Provide a complete breakdown of each item/type of expendable materials and supplies, methodology used to arrive at the proposed costs (i.e., historical costs, competitive bid, published price lists, or cost/price analysis), basis of computation (i.e., item x number of items), and cost.

Item	Methodology	Computation	Cost
Printing and reproduction	GSA Schedule Vendor	historical	397
Office supplies	"	historical	14,012
small computer support tools	"	historical	3,486
diagnostic tools	"	historical	1,000
computer supplies, expendables	"	historical	3,554

TOTAL 22,449

F. Subcontractors - For each subcontractor identified on the NIST-1262 Page 4 or NIST-1263 Page 5, enter the name, if known, service to be provided, hourly or daily fee (8-hour day), and estimated time on the project. Subcontractor fees in excess of $450 per day require additional justification. Proposers are encouraged to promote free and open competition in awarding subcontracts.

Name of Subcontractor	Service Provided	Computation	Cost
George Wolberg, PhD	Graphics Programming	525 hours @ 80/hour	37,674
Jim Cox	Contract work done prior to hire.	660 hours @ $50/h	33,930
Scot Albin, MD	systems and medical research	100 hours@ 20/hour	2,000
		Subtotal	73,605

Subcontractor Expenses: List all expenses to be paid from the award to the individual subcontractors in addition to their fees (i.e., travel, meals, lodging, etc.).

Item	Location	Computation	Cost
		Subtotal	
		TOTAL	73,605

G. Other - Identify and provide a detailed description of any other direct costs which do not fall into the object cost categories above, basis of computation (i.e., cost per item x number of items), and cost. The cost of the project audit should also be included in this category unless it is part of the indirect costs. If it is part of the indirect costs indicate it as such. Each JV partner should budget for an audit. For awards less than 24 months, an audit is required at the end of the project; for 2, 3, or 4 year awards, an audit is required after the first year and at the end of the project; for 5 year awards, an audit is required after the first year, third year, and at the end of the project.

Description	Computation	Cost
Audit		
Jill Feldman, ATP pre-certification		5,000
Power delivery	100% of increase due to NIST grant	9,724
Data Communication		8,205
PDA		349
ATG Consulting Specialized Network and Systems programming and System Administration	100 hours@ 120/hour	12,000
Professional fees for payroll tax preparation, accounting, and legal services		16,691
Dues and professional memberships		736
Misc		500
Program related postage and delivery		500
	TOTAL	53,705

H. Indirect Costs -Specify the current indirect cost rate(s), computation used, and cost. If an indirect cost rate was negotiated with a cognizant Federal agency, include a copy of the approved negotiated agreement. If an indirect cost rate has not been established by a cognizant Federal agency please state this below.

Percentage Rate	Computation	Cost
	TOTAL	

Budget Data

Proposal Number 70NANB1H3050

Name of Company Computer Aided Surgery, Inc. **Year** 2 (2002 - 2003)

A. Personnel - List each position by name of employee and title, if available. Show the annual salary rate and the percentage of time devoted to the project. Compensation paid for employees must be consistent with that paid for similar work within the proposer's organization and similar positions in the industry. Employees who are considered indirect labor should not be included in the breakdown of direct salaries or in section 1A of the Form NIST-1262 or NIST-1263. Escalation rates for the out-years should be reasonable. We recognize that a company may not be able to identify all of the personnel to be assigned to the project several years down the road. Where this cannot be done, use generic position titles such as "senior chemical engineer" and for name, "to be determined." Consultants should NOT be included in this category, but more appropriately under the "subcontracts" category and described on Form NIST-1262 or NIST-1263, pages 4 and 5, respectively.

Name/Position Title	Annual Salary	Percentage of Time on Project	Cost
D B Karron, Ph.D./ PI	175,000	100%	175,000
J L Cox, Ph.D. / Lead Pgmr	100,000	45%	45,000
M B Rothman / Graphics Pgmr	66,000	50%	33,000
Peter M. Ross, Ph.D. / Business Manager	127,300	30%	38,000
Tony Pahati, / fiscal control specialist	50,000	30%	15,000
Charles DaSalla / programmer	43,000	60%	25,800

TOTAL 331,000

B. Fringe Benefits - Identify percentage rate; if greater than 35 %, provide a breakdown of what makes up the fringe benefits (i.e., vacation, sick, military leave, health and life insurance, retirement, social security, etc.). If fringe benefits are normally included in your organization's indirect cost rate, they should be budgeted as such, and check the appropriate line below.

Percentage Rate: 34 **Check here if included in indirect:** _____

If percentage rate exceeds 35%, provide breakdown.

TOTAL $112,000

C. Travel - Provide best estimate of travel required for the project, and provide the basis of computation (i.e., item x number of people x number of trips). Note that ATP recipients are expected to adhere to government policies regarding travel, such as, coach rather than first class accommodations, etc. Travel costs should represent a coherent part of the project's "communications strategy" for smooth coordination among participants. While foreign travel is not precluded, it is discouraged and will require a strong justification on how it is directly related to the R&D activities of the ATP project. Likewise, the travel cost for attending conferences must be strongly justified as essential and relevant to the research and development aspects of the project.

Purpose of Travel	Destination	Item (mode transportation, lodging, and subsistence)	Computation	Cost
7500 is requested mainly for trips to Washington or to nearby conferences.				

Travel justification for foreign travel and conferences:

TOTAL 7500

D. Equipment - Identify each item of equipment, methodology used to arrive at the proposed costs, (i.e., historical costs, competitive bid, published price lists, or cost/price analysis), basis of computation (i.e., cost per item x number of items), and cost. Budget estimates for equipment items exceeding $100,000 each must be described and justified separately. Also identify by placing an asterisk on any in-kind owned equipment and its current depreciated value using the participant's preestablished depreciation accounting methods. The value of equipment will be further prorated according to the share of total use dedicated to carrying out the proposed ATP work. ATP funds may not be used for construction of new buildings or extensive renovations of existing laboratory buildings. ATP funds may, however, be used for construction of experimental research and development facilities to be located within a new or existing building provided that the equipment or facilities are essential for carrying out the project. If such costs are proposed, include below and provide justification.

Item	Methodology	Computation	Cost
computer equipment purchased year 2			15,900
An allowance is requested for computer equipment purchased in year 1 billed in year 2			
second RAID			10,000
SGI octane plus			30,000
SGI octane plus			40,000

Justification for any item over $100,000, or construction costs:

TOTAL 95900

E. Materials/Supplies - Provide a complete breakdown of each item/type of expendable materials and supplies, methodology used to arrive at the proposed costs (i.e., historical costs, competitive bid, published price lists, or cost/price analysis), basis of computation (i.e., item x number of items), and cost.

Item	Methodology	Computation	Cost
	A 25% increase in materials use is anticipated due to the increase in on-site work.		

TOTAL 31000

F. Subcontractors - For each subcontractor identified on the NIST-1262 Page 4 or NIST-1263 Page 5, enter the name, if known, service to be provided, hourly or daily fee (8-hour day), and estimated time on the project. Subcontractor fees in excess of $450 per day require additional justification. Proposers are encouraged to promote free and open competition in awarding subcontracts.

Name of Subcontractor	Service Provided	Computation	Cost
Ed Weinberger, Ph.D.	Construct 3-D pointer arrows for graphic user interface.	166 h @ $60/h	$7,000
George Wohlberg Ph.D.	Prepare validation suite for DMT tree calculation	75h @ $80/h	$6,000
Isaac Dimitrovsky, Ph.D.	Assist with validation paradigm stochastic properties	100h @ $60/h	$6,000
Axiom/Benedict	Grant Management consultants	22h @ 250/h	5,400
J. Case	Programming	83h @ $30/h	1000
E Bostwick	Programming	33.5h @ $30/h	1000
ATC Consulting	Network/system programming and system administration	30h @ 120/h	3600
		Subtotal	$30,000

Subcontractor Expenses: List all expenses to be paid from the award to the individual subcontractors in addition to their fees (i.e., travel, meals, lodging, etc.).

Item	Location	Computation	Cost
Meals and travel	10 meals @ $20 each		200
	10 trips @ $240 each		2400
honoraria	bringing scientists to CASI	5 @ $200 each	1000
		Subtotal	3600
		TOTAL	$33,600

G. Other - Identify and provide a detailed description of any other direct costs which do not fall into the object cost categories above, basis of computation (i.e., cost per item x number of items), and cost. The cost of the project audit should also be included in this category unless it is part of the indirect costs. If it is part of the indirect costs indicate it as such. Each JV partner should budget for an audit. For awards less than 24 months, an audit is required at the end of the project; for 2, 3, or 4 year awards, an audit is required after the first year and at the end of the project; for 5 year awards, an audit is required after the first year, third year, and at the end of the project.

Description	Computation	Cost
Audit		
Joan Hayes, ATP Audit	133h @ 150/h	20,000

TOTAL 20,000

H. Indirect Costs -Specify the current indirect cost rate(s), computation used, and cost. If an indirect cost rate was negotiated with a cognizant Federal agency, include a copy of the approved negotiated agreement. If an indirect cost rate has not been established by a cognizant Federal agency please state this below.

Percentage Rate	Computation	Cost

Attention: Hope Snowden

Dear Ms. Snowden:

It was a pleasure meeting you on the phone Monday morning.

Please find appended the budget pages for years 1-3 of NIST grant 70NANBH13050 to CASI.

We appreciate your patient help and will gladly comply with any further suggestions you may have.

Sincerely,

Peter Ross

EXHIBIT 14

Budget Data

[Paperwork Reduction Act: Under the Paperwork Reduction Act no person is required to respond to a collection of information unless it displays a valid OMB control number. Public reporting burden for this collection of information is estimated to average 45 minutes per response, including time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding the burden estimates or any other aspect of this collection of information, including suggestions for reducing this burden, to Director, Advanced Technology Program, Administration Building, Room A333, MS 4700, Gaithersburg, MD 20899-4700.]

Purpose: The Budget Data worksheets should be used for the preparation of your budget information and should be submitted in **Gate 2.** The electronic version can be found at the ATP website http://www.atp.nist.gov.

The budget is excluded from the page limitation and is used by both technical and business reviewers and by a Grants Official to determine reasonableness and allowability of costs. The overall estimated multi-year budget numbers are to be provided on page 3 of Form NIST-1262 or NIST-1263. Your budget information is a breakdown of the figures reported on the NIST-1262 or NIST-1263. Breakdowns should be as accurate and specific as possible. Include a breakdown for each year of the project and if a joint venture (JV) proposal, include the budget data for each JV participant for each year including each JV participant's annual cost sharing. Make sure any figures presented exactly match the figures on Form NIST-1262 or NIST-1263, and make sure the arithmetic is correct. **Please round to the nearest dollar.**

Proposed costs must be reasonable, allocable, and allowable in accordance with the applicable Federal cost principles (see 15 CFR 14.27). All salaries/wages, fringe benefits, travel, materials and supplies, equipment, subcontracts, other costs, and indirect costs proposed are to be consistent with costs incurred for like or similar items on all other Federal and non-Federal projects or cost centers.

We recognize that unexpected events occur frequently in R&D projects, and that budgets may need to be changed as a project proceeds. Don't fear that by providing a multi-year budget beyond the first year, you will be locked into those details. ATP allows a certain amount of flexibility in moving funds from one line item to another as circumstances change. By stating an amount for a given task, you will not be required to spend precisely that amount on that task. For example, if, in the second or third year of your project, you find that you need to spend more on one task and less on another than anticipated, that can be accommodated. A task that proves unnecessary can be deleted and a new task can be defined if there is adequate justification that such changes will enhance the chances of accomplishing the objectives of the project.

Recognizing that change is inevitable, we may ask our recipients for a revised budget at the beginning of each year of a multi-year project. However, the total amount provided by ATP for the project cannot be increased. You will NOT be reimbursed for project overruns. Try to avoid overestimating or underestimating your project costs. The dollar amount of your request must be commensurate with the tasks you define.

At a minimum, details on the following object class categories must be provided:

Budget Data

Proposal Number 70NANB1H3050

Name of Company Computer Aided Surgery, Inc **Year** 1 (2001-2002)

A. Personnel - List each position by name of employee and title, if available. Show the annual salary rate and the percentage of time devoted to the project. Compensation paid for employees must be consistent with that paid for similar work within the proposer's organization and similar positions in the industry. Employees who are considered indirect labor should not be included in the breakdown of direct salaries or in section 1A of the Form NIST-1262 or NIST-1263. Escalation rates for the out-years should be reasonable. We recognize that a company may not be able to identify all of the personnel to be assigned to the project several years down the road. Where this cannot be done, use generic position titles such as "senior chemical engineer" and for name, "to be determined." Consultants should NOT be included in this category, but more appropriately under the "subcontracts" category and described on Form NIST-1262 or NIST-1263, pages 4 and 5, respectively.

Name/Position Title	Annual Salary	Percentage of Time on Project	Cost
Dr. D B Karron/PI (12 months)	$175,000	100%	$175,000
Elisha Gurfein/Project Mgr (12 months)	$133,333	75%	$100,000
Prof. James L Cox / Lead Pgmr (1 month)	$130,000	4%	$5,200
Scott Albin / Systems (3 months)	$30,938	16%	$4,950
Charles DaSalla / Systems (11 months)	$31,429	63%	$19,800
Nicholee Wynter /Fiscal Cntrl (4 months)	$31,160	30%	$9,348
Regner Peralla (1 month)	$32,800	4%	$1,312
RG Wine (1 month)	$88,000	4%	$3,522
Matthew Rothman (5 wks)	$30,954	11%	$3,405
		TOTAL	$322,537

B. Fringe Benefits - Identify percentage rate; if greater than 35 %, provide a breakdown of what makes up the fringe benefits (i.e., vacation, sick, military leave, health and life insurance, retirement, social security, etc.). If fringe benefits are normally included in your organization's indirect cost rate, they should be budgeted as such, and check the appropriate line below.

Percentage Rate: 34.9% **Check here if included in indirect:** _____

If percentage rate exceeds 35%, provide breakdown.

TOTAL $112,565

C. **Travel** - Provide best estimate of travel required for the project, and provide the basis of computation (i.e., item x number of people x number of trips). Note that ATP recipients are expected to adhere to government policies regarding travel, such as, coach rather than first class accommodations, etc. Travel costs should represent a coherent part of the project's "communications strategy" for smooth coordination among participants. While foreign travel is not precluded, it is discouraged and will require a strong justification on how it is directly related to the R&D activities of the ATP project. Likewise, the travel cost for attending conferences must be strongly justified as essential and relevant to the research and development aspects of the project.

Purpose of Travel	Destination	Item (mode transportation, lodging, and subsistence)	Computation	Cost
MMVR (Presentation)	Newport Beach, CA	2x RT Air, Hotel, Rental Car, Meeting Fees, Per Diem for PI and R. Bucholz, MD		6000
NIST Kickoff	Gatherburg, MD	2x Trainfare, Car Rental, Taxi, Per Diem for PI, Gurfein, and R. Satava MD		2000
SPIE Medical Imaging (Presentation)	Boston, MA	2x Amtrak, meeting fees, Taxi, Per Diem, PI and Cox		2621
SGI Developer Conference	San Jose, CA	Airfare, meeting fees, car rental, Hotel, Per Diem for PI		2700
IEEE Signal Proc Soc and NIH NIBIB Joint Conf	Washington, DC	Car Rental, Hotel Meeting Fees, Per Diem:PI and Zevi		2000
side visit to Nist	Gaitherburg, MD			10
Gurfein Travel to CASI	Ft. Lee, NJ	Fuel, Parking, Tolls for visits to CASI for NIST Program Management		1589
DBK Travel to NIST	Gaitherburg, MD	Fuel, Tolls, Per Diem		1000
NYC Parking for Staff and Visitors	New York, NY	Muni Meter and Parking Garage for Program Work by Visitors and Staff, Honoraria Parking		2000

Travel justification for foreign travel and conferences:

TOTAL 19,920

D. Equipment - Identify each item of equipment, methodology used to arrive at the proposed costs, (i.e., historical costs, competitive bid, published price lists, or cost/price analysis), basis of computation (i.e., cost per item x number of items), and cost. Budget estimates for equipment items exceeding $100,000 each must be described and justified separately. Also identify by placing an asterisk on any in-kind owned equipment and its current depreciated value using the participant's preestablished depreciation accounting methods. The value of equipment will be further prorated according to the share of total use dedicated to carrying out the proposed ATP work. ATP funds may not be used for construction of new buildings or extensive renovations of existing laboratory buildings. ATP funds may, however, be used for construction of experimental research and development facilities to be located within a new or existing building provided that the equipment or facilities are essential for carrying out the project. If such costs are proposed, include below and provide justification.

Item	Methodology	Computation	Cost
	see attached exhibit		

Justification for any item over $100,000, or construction costs:

TOTAL 231719

E. Materials/Supplies - Provide a complete breakdown of each item/type of expendable materials and supplies, methodology used to arrive at the proposed costs (i.e., historical costs, competitive bid, published price lists, or cost/price analysis), basis of computation (i.e., item x number of items), and cost.

Item	Methodology	Computation	Cost
Printing and reproduction	GSA Schedule Vendor	historical	397
Office supplies	"	historical	14,012
small computer support tools	"	historical	3,486
diagnostic tools	"	historical	1,000
computer supplies, expendables	"	historical	3,554

TOTAL 22,449

F. Subcontractors - For each subcontractor identified on the NIST-1262 Page 4 or NIST-1263 Page 5, enter the name, if known, service to be provided, hourly or daily fee (8-hour day), and estimated time on the project. Subcontractor fees in excess of $450 per day require additional justification. Proposers are encouraged to promote free and open competition in awarding subcontracts.

Name of Subcontractor	Service Provided	Computation	Cost
George Wolberg, PhD	Graphics Programming	580 hours @ 65/hour	37,674
Jim Cox, Ph.D.	Contract work done prior to hire.	522 hours @ $65/h	33,930
Scot Albin	systems and medical research	100 hours@ 20/hour	2,000

Subtotal 73,604

Subcontractor Expenses: List all expenses to be paid from the award to the individual subcontractors in addition to their fees (i.e., travel, meals, lodging, etc.).

Item	Location	Computation	Cost

Subtotal

TOTAL 73,604

G. Other - Identify and provide a detailed description of any other direct costs which do not fall into the object cost categories above, basis of computation (i.e., cost per item x number of items), and cost. The cost of the project audit should also be included in this category unless it is part of the indirect costs. If it is part of the indirect costs indicate it as such. Each JV partner should budget for an audit. For awards less than 24 months, an audit is required at the end of the project; for 2, 3, or 4 year awards, an audit is required after the first year and at the end of the project; for 5 year awards, an audit is required after the first year, third year, and at the end of the project.

Description	Computation	Cost
Audit		
Jill Feldman, CPA, ATP pre-certification		5,000
Power delivery	100% of increase due to NIST grant	9,724
Data Communication		8,205
PDA		349
ATG Consulting Specialized Network and Systems programming and System Administration	100 hours@ 120/hour	12,000
Professional fees for payroll tax preparation, accounting, and legal services		16,691
Dues and professional memberships		736
Misc		500
Program related postage and delivery		500
	TOTAL	53,705

H. Indirect Costs -Specify the current indirect cost rate(s), computation used, and cost. If an indirect cost rate was negotiated with a cognizant Federal agency, include a copy of the approved negotiated agreement. If an indirect cost rate has not been established by a cognizant Federal agency please state this below.

Percentage Rate	Computation	Cost
	TOTAL	

Item	methodology	computation	cost
video system		components and installation	4934
workstations (C02, 04, 07, 11, 12, 13, 16, 17)		total cost	84896
servers (C01, 03, 08, 15, 06, 05)		total cost	54394
Power handling (C14)		components and installation	6050
hub and firewall (C00, 10)		components and installation	4236
printers (C09)		units and maintenance	1323
lab camera Sony F7000		single item	1520
scanners (C009)		total cost	15583
tape drive/library (C05)		tapes and drives	22085
switches (casi 025)		single item	20129
air conditioning	room upgrade to cool computers		4963
software		total cost	11606
		total	**231719**

Budget Data

Proposal Number 70NANB1H3050

Name of Company Computer Aided Surgery, Inc. **Year** 2 (2002 - 2003)

A. Personnel - List each position by name of employee and title, if available. Show the annual salary rate and the percentage of time devoted to the project. Compensation paid for employees must be consistent with that paid for similar work within the proposer's organization and similar positions in the industry. Employees who are considered indirect labor should not be included in the breakdown of direct salaries or in section 1A of the Form NIST-1262 or NIST-1263. Escalation rates for the out-years should be reasonable. We recognize that a company may not be able to identify all of the personnel to be assigned to the project several years down the road. Where this cannot be done, use generic position titles such as "senior chemical engineer" and for name, "to be determined." Consultants should NOT be included in this category, but more appropriately under the "subcontracts" category and described on Form NIST-1262 or NIST-1263, pages 4 and 5, respectively.

Name/Position Title	Annual Salary	Percentage of Time on Project	Cost
D B Karron, Ph.D./ PI	175,000	100%	175,000
J L Cox, Ph.D. / Lead Pgmr	135,000	33.339%	45,000
M B Rothman / Graphics Pgmr	33,000	100%	33,000
Peter M. Ross, Ph.D. / Business Manager	126,666	30%	38,000
Tony Pahati, / fiscal control specialist	50,000	30%	15,000
Charles DaSalla / programmer	32,051	78%	25,000

TOTAL 331,000

B. Fringe Benefits - Identify percentage rate; if greater than 35 %, provide a breakdown of what makes up the fringe benefits (i.e., vacation, sick, military leave, health and life insurance, retirement, social security, etc.). If fringe benefits are normally included in your organization's indirect cost rate, they should be budgeted as such, and check the appropriate line below.

Percentage Rate: 33.84 **Check here if included in indirect:** _____

If percentage rate exceeds 35%, provide breakdown.

TOTAL $112,000

C. **Travel** - Provide best estimate of travel required for the project, and provide the basis of computation (i.e., item x number of people x number of trips). Note that ATP recipients are expected to adhere to government policies regarding travel, such as, coach rather than first class accommodations, etc. Travel costs should represent a coherent part of the project's "communications strategy" for smooth coordination among participants. While foreign travel is not precluded, it is discouraged and will require a strong justification on how it is directly related to the R&D activities of the ATP project. Likewise, the travel cost for attending conferences must be strongly justified as essential and relevant to the research and development aspects of the project.

Purpose of Travel	Destination	Item (mode transportation, lodging, and subsistence)	Computation	Cost
MMVR/Presentation	Newport Beach CA	Air/Hotel/Car Rental/Conference Fee/ Per Diem	1 person 5days	3000
SGI/Presentation	Mountainview CA	Air/Hotel/Car Rental / Per Diem	1 person 2 days	2000
DIMACS/Presentation	Rutgers NJ	Per Diem, Hotel, Conference Fees	2 person 3 days	2000
SIGGRAPH/Presentation	Los Angeles CA	Air, Hotel, Conference Fees, Per Diem, Car Rental	2 people 5days	3700
NIST/Meeting	Gaitherburg MD	Per Diem, Hotel	2 people 2 days	400

Travel justification for foreign travel and conferences:

TOTAL 11100

D. Equipment - Identify each item of equipment, methodology used to arrive at the proposed costs, (i.e., historical costs, competitive bid, published price lists, or cost/price analysis), basis of computation (i.e., cost per item x number of items), and cost. Budget estimates for equipment items exceeding $100,000 each must be described and justified separately. Also identify by placing an asterisk on any in-kind owned equipment and its current depreciated value using the participant's preestablished depreciation accounting methods. The value of equipment will be further prorated according to the share of total use dedicated to carrying out the proposed ATP work. ATP funds may not be used for construction of new buildings or extensive renovations of existing laboratory buildings. ATP funds may, however, be used for construction of experimental research and development facilities to be located within a new or existing building provided that the equipment or facilities are essential for carrying out the project. If such costs are proposed, include below and provide justification.

Item	Methodology	Computation	Cost
computer equipment purchased year 2			15,900
An allowance is requested for computer equipment purchased in year 1 billed in year 2			
second RAID			10,000
SGI octane plus			30,000
SGI octane plus			40,000

Justification for any item over $100,000, or construction costs:

TOTAL 95900

E. Materials/Supplies - Provide a complete breakdown of each item/type of expendable materials and supplies, methodology used to arrive at the proposed costs (i.e., historical costs, competitive bid, published price lists, or cost/price analysis), basis of computation (i.e., item x number of items), and cost.

Item	Methodology	Computation	Cost
	A 38% increase in materials use is anticipated due to the increase in on-site work.		

TOTAL 31000

F. Subcontractors - For each subcontractor identified on the NIST-1262 Page 4 or NIST-1263 Page 5, enter the name, if known, service to be provided, hourly or daily fee (8-hour day), and estimated time on the project. Subcontractor fees in excess of $450 per day require additional justification. Proposers are encouraged to promote free and open competition in awarding subcontracts.

Name of Subcontractor	Service Provided	Computation	Cost
George Wolberg Ph.D.	Prepare validation suite for DMT tree calculation	75h @ $80/h	$6,000
Isaac Dimitrovsky, Ph.D.	Assist with validation paradigm stochastic properties	216.333h @ $60/h	$13,000
J. Case	Network Programming	33.333h @ $30/h	1000
Peter Ross, Ph.D.	Report preparation and analysis	40h @ $25/h	1000

Subtotal 21000

Subcontractor Expenses: List all expenses to be paid from the award to the individual subcontractors in addition to their fees (i.e., travel, meals, lodging, etc.).

Item	Location	Computation	Cost

Subtotal

TOTAL $21,000

Tony Pahati, / financial specialist	$60,000.00	30%	18,000
Charles DaSalla / programmer	$40,000.00	100%	40,000

TOTAL 347,000

B. Fringe Benefits - Identify percentage rate; if greater than 35 %, provide a breakdown of what makes up the fringe benefits (i.e., vacation, sick, military leave, health and life insurance, retirement, social security, etc.). If fringe benefits are normally included in your organization's indirect cost rate, they should be budgeted as such, and check the appropriate line below.

Percentage Rate: 33.72 **Check here if included in indirect:** _____

If percentage rate exceeds 35%, provide breakdown.

TOTAL $117,000

C. Travel - Provide best estimate of travel required for the project, and provide the basis of computation (i.e., item x number of people x number of trips). Note that ATP recipients are expected to adhere to government policies regarding travel, such as, coach rather than first class accommodations, etc. Travel costs should represent a coherent part of the project's "communications strategy" for smooth coordination among participants. While foreign travel is not precluded, it is discouraged and will require a strong justification on how it is directly related to the R&D activities of the ATP project. Likewise, the travel cost for attending conferences must be strongly justified as essential and relevant to the research and development aspects of the project.

Purpose of Travel	Destination	Item (mode transportation, lodging, and subsistence)	Computation	Cost
MMVR/Presentation	Newport Beach CA	Air/Hotel/Car Rental/Conference Fee/ Per Diem/Booth Rental	2 person 5days	5000
SGI/Presentation	Mountainview CA	Air/Hotel/Car Rental / Per Diem	1 person 2 days	3000
IEEE/NIBIBPresentation	Washington	Car Rental, Per Diem, Hotel, Conference Fees	2 person 3 days	2800
SIGGRAPH/Presentation	Los Angeles CA	Air, Hotel, Conference Fees, Per Diem, Car Rental	2 people 5days	4400
NIST/Meeting x2	Gaitherburg MD	Per Diem, Hotel	2x trips 2 people 2 days	800

Travel justification for foreign travel and conferences:

TOTAL 16000

D. Equipment - Identify each item of equipment, methodology used to arrive at the proposed costs, (i.e., historical costs, competitive bid, published price lists, or cost/price analysis), basis of computation (i.e., cost per item x number of items), and cost. Budget estimates for equipment items exceeding $100,000 each must be described and justified separately. Also identify by placing an asterisk on any in-kind owned equipment and its current depreciated value using the participant's preestablished depreciation accounting methods. The value of equipment will be further prorated according to the share of total use dedicated to carrying out the proposed ATP work. ATP funds may not be used for construction of new buildings or extensive renovations of existing laboratory buildings. ATP funds may, however, be used for construction of experimental research and development facilities to be located within a new or existing building provided that the equipment or facilities are essential for carrying out the project. If such costs are proposed, include below and provide justification.

Item	Methodology	Computation	Cost
Upgrade and replace PCs and other equipment needed for project completion.			75000

Justification for any item over $100,000, or construction costs:

TOTAL 75000

E. Materials/Supplies - Provide a complete breakdown of each item/type of expendable materials and supplies, methodology used to arrive at the proposed costs (i.e., historical costs, competitive bid, published price lists, or cost/price analysis), basis of computation (i.e., item x number of items), and cost.

Item	Methodology	Computation	Cost
	Materials and supplies expected to be about same or a little less.		

TOTAL 25000

F. Subcontractors - For each subcontractor identified on the NIST-1262 Page 4 or NIST-1263 Page 5, enter the name, if known, service to be provided, hourly or daily fee (8-hour day), and estimated time on the project. Subcontractor fees in excess of $450 per day require additional justification. Proposers are encouraged to promote free and open competition in awarding subcontracts.

Name of Subcontractor	Service Provided	Computation	Cost
George Woberg Ph.D.	Trouble shoot validation suite for DMT tree calculation	116.6 h @ $60/h	7,000
Misc. Programmers	Assist with front end development and refinement	438h @ $50/h	21900

Subtotal $28,900

Subcontractor Expenses: List all expenses to be paid from the award to the individual subcontractors in addition to their fees (i.e., travel, meals, lodging, etc.).

Item	Location	Computation	Cost

Subtotal 0

TOTAL $28,900

G. Other - Identify and provide a detailed description of any other direct costs which do not fall into the object cost categories above, basis of computation (i.e., cost per item x number of items), and cost. The cost of the project audit should also be included in this category unless it is part of the indirect costs. If it is part of the indirect costs indicate it as such. Each JV partner should budget for an audit. For awards less than 24 months, an audit is required at the end of the project; for 2, 3, or 4 year awards, an audit is required after the first year and at the end of the project; for 5 year awards, an audit is required after the first year, third year, and at the end of the project.

Description	Computation	Cost
Audit		
Joan Hayes, CPA, ATP Audit	66.6h @ 150/h	10,000
direct costs of electricity	633/month X 12 mo	7600
Axiom/Benedict Grant Management	20h @ $250/h	5000
ATC Consulting Network/system programming and system administration	100h @ 120/h	12000
	TOTAL	34,600

H. Indirect Costs -Specify the current indirect cost rate(s), computation used, and cost. If an indirect cost rate was negotiated with a cognizant Federal agency, include a copy of the approved negotiated agreement. If an indirect cost rate has not been established by a cognizant Federal agency please state this below.

Attention: Hope Snowden

Dear Ms. Snowden:

It was a pleasure meeting you on the phone Monday morning.

Please find appended the budget pages for years 1-3 of NIST grant 70NANBH13050 to CASI.

We appreciate your patient help and will gladly comply with any further suggestions you may have.

Sincerely,

Peter Ross

ESTIMATED MULTI-YEAR BUDGET - SINGLE COMPANY

	YEAR ONE	YEAR TWO	YEAR THREE	TOTAL
1. OBJECT CLASS CATEGORY				
A. Personnel Salaries/Wages	$ 322537	$ 331000	$ 347000	$ 1000537
B. Personnel Fringe Benefits	112565	112000	117000	341565
C. Travel	19920	11100	16000	47020
D. Equipment	231719	95,900	75000	402619
E. Materials/Supplies	22449	31000	25000	78449
F. Subcontracts	73605	21000	28900	123505
G. Other	53705	29000	34600	117305
H. Total Direct Costs (Lines A thru G)	836500	631000	643500	2111000
I. Total Direct Costs Requested From ATP	800000	600000	600000	2000000
J. Total Direct Costs Shared by Proposer (If Any)	$ 36500	$ 31000	$ 43500	$ 111000
K. Total Indirect Costs Absorbed by Proposer	$	$	$	$
L. Total Costs (Lines H + K)	$ 836500	$ 631000	$ 643500	$ 2111000
2. SOURCES OF FUNDS				
A. ATP (Same as Line I)	$ 800000	$ 600000	$ 600000	$ 2000000
B. Direct Costs Shared by	36,500	31000	43500	111000
C. Indirect costs shared				
D. Total sources	836,500	631000	643500	2111000
E. Total Sources of Funds (Same as Line L)	$ 836,500	$ 631000	$ 643500	$ 2111000
3. TASKS				
A. Server Hardware Installation and config	$ 412,500	$	$	$ 412500
B. Public client design mockup	111000			111000
C. Program spider web surface gen	111000			111000
D. Recog sort crits	202000			202000
E. Write Union/intersection operator		210500		210500
F. Write Saddle Crit navigator/editor		210000		210000
G. Write Diocom up/down load compres/crypt		210500		210500
H. Node warping code			214500	214500
I. Write level of detail management code			211500	211500
J. install clickstream technology on clients			217500	217500
K. Total Costs of All Tasks (Same as Line L)	$ 836500	$ 631000	$ 643500	$ 2111000

OMB Approval No: 0693-0009
Approval Expires: November 30, 2003

EXHIBIT 14

Budget Data

[Paperwork Reduction Act: Under the Paperwork Reduction Act no person is required to respond to a collection of information unless it displays a valid OMB control number. Public reporting burden for this collection of information is estimated to average 45 minutes per response, including time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding the burden estimates or any other aspect of this collection of information, including suggestions for reducing this burden, to Director, Advanced Technology Program, Administration Building, Room A333, MS 4700, Gaithersburg, MD 20899-4700.]

Purpose: The Budget Data worksheets should be used for the preparation of your budget information and should be submitted in **Gate 2**. The electronic version can be found at the ATP website http://www.atp.nist.gov.

The budget is excluded from the page limitation and is used by both technical and business reviewers and by a Grants Official to determine reasonableness and allowability of costs. The overall estimated multi-year budget numbers are to be provided on page 3 of Form NIST-1262 or NIST-1263. Your budget information is a breakdown of the figures reported on the NIST-1262 or NIST-1263. Breakdowns should be as accurate and specific as possible. Include a breakdown for each year of the project and if a joint venture (JV) proposal, include the budget data for each JV participant for each year including each JV participant's annual cost sharing. Make sure any figures presented exactly match the figures on Form NIST-1262 or NIST-1263, and make sure the arithmetic is correct. **Please round to the nearest dollar.**

Proposed costs must be reasonable, allocable, and allowable in accordance with the applicable Federal cost principles (see 15 CFR 14.27). All salaries/wages, fringe benefits, travel, materials and supplies, equipment, subcontracts, other costs, and indirect costs proposed are to be consistent with costs incurred for like or similar items on all other Federal and non-Federal projects or cost centers.

We recognize that unexpected events occur frequently in R&D projects, and that budgets may need to be changed as a project proceeds. Don't fear that by providing a multi-year budget beyond the first year, you will be locked into those details. ATP allows a certain amount of flexibility in moving funds from one line item to another as circumstances change. By stating an amount for a given task, you will not be required to spend precisely that amount on that task. For example, if, in the second or third year of your project, you find that you need to spend more on one task and less on another than anticipated, that can be accommodated. A task that proves unnecessary can be deleted and a new task can be defined if there is adequate justification that such changes will enhance the chances of accomplishing the objectives of the project.

Recognizing that change is inevitable, we may ask our recipients for a revised budget at the beginning of each year of a multi-year project. However, the total amount provided by ATP for the project cannot be increased. You will NOT be reimbursed for project overruns. Try to avoid overestimating or underestimating your project costs. The dollar amount of your request must be commensurate with the tasks you define.

At a minimum, details on the following object class categories must be provided:

Budget Data

Proposal Number 70NANB1H3050

Name of Company Computer Aided Surgery, Inc **Year** 1 (2001-2002)

A. Personnel - List each position by name of employee and title, if available. Show the annual salary rate and the percentage of time devoted to the project. Compensation paid for employees must be consistent with that paid for similar work within the proposer's organization and similar positions in the industry. Employees who are considered indirect labor should not be included in the breakdown of direct salaries or in section 1A of the Form NIST-1262 or NIST-1263. Escalation rates for the out-years should be reasonable. We recognize that a company may not be able to identify all of the personnel to be assigned to the project several years down the road. Where this cannot be done, use generic position titles such as "senior chemical engineer" and for name, "to be determined." Consultants should NOT be included in this category, but more appropriately under the "subcontracts" category and described on Form NIST-1262 or NIST-1263, pages 4 and 5, respectively.

Name/Position Title	Annual Salary	Percentage of Time on Project	Cost
Dr. D B Karron/PI (12 months)	$175,000	100%	$175,000
Elisha Gurfein/Project Mgr (12 months)	$133,333	75%	$100,000
Prof. James L Cox / Lead Pgmr (1 month)	$130,000	4%	$5,200
Scott Albin / Systems (3 months)	$30,938	16%	$4,950
Charles DaSalla / Systems (11 months)	$31,429	63%	$19,800
Nicholee Wynter /Fiscal Cntrl (4 months)	$31,160	30%	$9,348
Regner Peralla (1 month)	$32,800	4%	$1,312
RG Wine (1 month)	$88,000	4%	$3,522
Matthew Rothman (5 wks)	$30,954	11%	$3,405

TOTAL $322,537

B. Fringe Benefits - Identify percentage rate; if greater than 35 %, provide a breakdown of what makes up the fringe benefits (i.e., vacation, sick, military leave, health and life insurance, retirement, social security, etc.). If fringe benefits are normally included in your organization's indirect cost rate, they should be budgeted as such, and check the appropriate line below.

Percentage Rate: 34.9% **Check here if included in indirect:** ____

If percentage rate exceeds 35%, provide breakdown.

TOTAL $112,565

C. **Travel** - Provide best estimate of travel required for the project, and provide the basis of computation (i.e., item x number of people x number of trips). Note that ATP recipients are expected to adhere to government policies regarding travel, such as, coach rather than first class accommodations, etc. Travel costs should represent a coherent part of the project's "communications strategy" for smooth coordination among participants. While foreign travel is not precluded, it is discouraged and will require a strong justification on how it is directly related to the R&D activities of the ATP project. Likewise, the travel cost for attending conferences must be strongly justified as essential and relevant to the research and development aspects of the project.

Purpose of Travel	Destination	Item (mode transportation, lodging, and subsistence)	Computation	Cost
MMVR (Presentation)	Newport Beach, CA	2x RT Air, Hotel, Rental Car, Meeting Fees, Per Diem for PI and R. Bucholz, MD		6000
NIST Kickoff	Gatherburg, MD	2x Trainfare, Car Rental, Taxi, Per Diem for PI, Gurfein, and R. Satava MD		2000
SPIE Medical Imaging (Presentation)	Boston, MA	2x Amtrak, meeting fees, Taxi, Per Diem, PI and Cox		2621
SGI Developer Conference	San Jose, CA	Airfare, meeting fees, car rental, Hotel, Per Diem for PI		2700
IEEE Signal Proc Soc and NIH NIBIB Joint Conf	Washington, DC	Car Rental, Hotel Meeting Fees, Per Diem:PI and Zevi		2000
side visit to Nist	Gaitherburg, MD			10 remove
Gurfein Travel to CASI	Ft. Lee, NJ	Fuel, Parking, Tolls for visits to CASI for NIST Program Management		1589 remove
DBK Travel to NIST	Gaitherburg, MD	Fuel, Tolls, Per Diem		1000 remove
NYC Parking for Staff and Visitors	New York, NY	Muni Meter and Parking Garage for Program Work by Visitors and Staff, Honoraria Parking		2000 remove

Travel justification for foreign travel and conferences:

TOTAL 19,920

D. Equipment - Identify each item of equipment, methodology used to arrive at the proposed costs, (i.e., historical costs, competitive bid, published price lists, or cost/price analysis), basis of computation (i.e., cost per item x number of items), and cost. Budget estimates for equipment items exceeding $100,000 each must be described and justified separately. Also identify by placing an asterisk on any in-kind owned equipment and its current depreciated value using the participant's preestablished depreciation accounting methods. The value of equipment will be further prorated according to the share of total use dedicated to carrying out the proposed ATP work. ATP funds may not be used for construction of new buildings or extensive renovations of existing laboratory buildings. ATP funds may, however, be used for construction of experimental research and development facilities to be located within a new or existing building provided that the equipment or facilities are essential for carrying out the project. If such costs are proposed, include below and provide justification.

Item	Methodology	Computation	Cost
	see attached exhibit		

Justification for any item over $100,000, or construction costs:

TOTAL 231719

E. Materials/Supplies - Provide a complete breakdown of each item/type of expendable materials and supplies, methodology used to arrive at the proposed costs (i.e., historical costs, competitive bid, published price lists, or cost/price analysis), basis of computation (i.e., item x number of items), and cost.

Item	Methodology	Computation	Cost
Printing and reproduction	GSA Schedule Vendor	historical	397
Office supplies	"	historical	14,012
small computer support tools	"	historical	3,486
diagnostic tools	"	historical	1,000
computer supplies, expendables	"	historical	3,554

TOTAL 22,449

Item	methodology	computation	cost
video system		components and installation	4934
Workstations (C02, 04, 07, 11, 12, 13, 16, 17)		total cost	84896
servers (C01, 03, 08, 15, 06, 05)		total cost	54394
Power handling (C14)		components and installation	6050
hub and firewall (C00, 10)		components and installation	4236
printers (C09)		units and maintenance	1323
lab camera Sony F7000		single item	1520
scanners (C009)		total cost	15583
tape drive/library (C05)		tapes and drives	22085
switches (casi 025)		single item	20129
air conditioning	room upgrade to cool computers		4963
software		total cost	11606
		total	**231719**

F. Subcontractors - For each subcontractor identified on the NIST-1262 Page 4 or NIST-1263 Page 5, enter the name, if known, service to be provided, hourly or daily fee (8-hour day), and estimated time on the project. Subcontractor fees in excess of $450 per day require additional justification. Proposers are encouraged to promote free and open competition in awarding subcontracts.

Name of Subcontractor	Service Provided	Computation	Cost
George Wolberg, PhD	Graphics Programming	580 hours @ 65/hour	37,~~674~~ 700
Jim Cox, Ph.D.	Contract work done prior to hire.	522 hours @ $65/h	33,930
Scot Albin	systems and medical research	100 hours@ 20/hour	2,000
		Subtotal	73,604

Subcontractor Expenses: List all expenses to be paid from the award to the individual subcontractors in addition to their fees (i.e., travel, meals, lodging, etc.).

Item	Location	Computation	Cost
		Subtotal	
		TOTAL	73,604

G. Other - Identify and provide a detailed description of any other direct costs which do not fall into the object cost categories above, basis of computation (i.e., cost per item x number of items), and cost. The cost of the project audit should also be included in this category unless it is part of the indirect costs. If it is part of the indirect costs indicate it as such. Each JV partner should budget for an audit. For awards less than 24 months, an audit is required at the end of the project; for 2, 3, or 4 year awards, an audit is required after the first year and at the end of the project; for 5 year awards, an audit is required after the first year, third year, and at the end of the project.

Description	Computation	Cost
Audit		
Jill Feldman, CPA, ATP pre-certification		5,000
Power delivery	100% of increase due to NIST grant	9,724
Data Communication		8,205
PDA		349
ATG Consulting Specialized Network and Systems programming and System Administration	100 hours@ 120/hour	12,000
Professional fees for payroll tax preparation, accounting, and legal services		16,691
Dues and professional memberships		736
Misc		500
Program related postage and delivery		500
		-17907
	TOTAL	53,705

H. Indirect Costs -Specify the current indirect cost rate(s), computation used, and cost. If an indirect cost rate was negotiated with a cognizant Federal agency, include a copy of the approved negotiated agreement. If an indirect cost rate has not been established by a cognizant Federal agency please state this below.

Percentage Rate	Computation	Cost
	TOTAL	

1. NAME AND ADDRESS OF SUBCONTRACTOR

Scot Albin
157c hillsbeach rd
biddeford, me 04005

NAME OF CONTACT: Scot Albin
TELEPHONE NUMBER: (917) 951 1610
FAX NUMBER:
E-MAIL ADDRESS: scott@casi.net

Budget Data

Proposal Number 70NANB1H3050

Name of Company Computer Aided Surgery, Inc. **Year** 2 (2002 - 2003)

A. Personnel - List each position by name of employee and title, if available. Show the annual salary rate and the percentage of time devoted to the project. Compensation paid for employees must be consistent with that paid for similar work within the proposer's organization and similar positions in the industry. Employees who are considered indirect labor should not be included in the breakdown of direct salaries or in section 1A of the Form NIST-1262 or NIST-1263. Escalation rates for the out-years should be reasonable. We recognize that a company may not be able to identify all of the personnel to be assigned to the project several years down the road. Where this cannot be done, use generic position titles such as "senior chemical engineer" and for name, "to be determined." Consultants should NOT be included in this category, but more appropriately under the "subcontracts" category and described on Form NIST-1262 or NIST-1263, pages 4 and 5, respectively.

Name/Position Title	Annual Salary	Percentage of Time on Project	Cost
D B Karron, Ph.D./ PI	175,000	100%	175,000
J L Cox, Ph.D. / Lead Pgmr	135,000	33.339%	45,000
M B Rothman / Graphics Pgmr	33,000	100%	33,000
Peter M. Ross, Ph.D. / Business Manager	126,666	30%	38,000
Tony Pahati, / fiscal control specialist	50,000	30%	15,000
Charles DaSalla / programmer	32,051	78%	25,000

TOTAL 331,000

B. Fringe Benefits - Identify percentage rate; if greater than 35 %, provide a breakdown of what makes up the fringe benefits (i.e., vacation, sick, military leave, health and life insurance, retirement, social security, etc.). If fringe benefits are normally included in your organization's indirect cost rate, they should be budgeted as such, and check the appropriate line below.

Percentage Rate: 33.84 **Check here if included in indirect:** _____

If percentage rate exceeds 35%, provide breakdown.

TOTAL $112,000

C. **Travel** - Provide best estimate of travel required for the project, and provide the basis of computation (i.e., item x number of people x number of trips). Note that ATP recipients are expected to adhere to government policies regarding travel, such as, coach rather than first class accommodations, etc. Travel costs should represent a coherent part of the project's "communications strategy" for smooth coordination among participants. While foreign travel is not precluded, it is discouraged and will require a strong justification on how it is directly related to the R&D activities of the ATP project. Likewise, the travel cost for attending conferences must be strongly justified as essential and relevant to the research and development aspects of the project.

Purpose of Travel	Destination	Item (mode transportation, lodging, and subsistence)	Computation	Cost
MMVR/Presentation	Newport Beach CA	Air/Hotel/Car Rental/Conference Fee/ Per Diem	1 person 5days	3000

Travel justification for foreign travel and conferences:

TOTAL 11100

D. Equipment - Identify each item of equipment, methodology used to arrive at the proposed costs, (i.e., historical costs, competitive bid, published price lists, or cost/price analysis), basis of computation (i.e., cost per item x number of items), and cost. Budget estimates for equipment items exceeding $100,000 each must be described and justified separately. Also identify by placing an asterisk on any in-kind owned equipment and its current depreciated value using the participant's preestablished depreciation accounting methods. The value of equipment will be further prorated according to the share of total use dedicated to carrying out the proposed ATP work. ATP funds may not be used for construction of new buildings or extensive renovations of existing laboratory buildings. ATP funds may, however, be used for construction of experimental research and development facilities to be located within a new or existing building provided that the equipment or facilities are essential for carrying out the project. If such costs are proposed, include below and provide justification.

Item	Methodology	Computation	Cost
computer equipment purchased year 2			15,900
An allowance is requested for computer equipment purchased in year 1 billed in year 2			
second RAID			10,000
SGI octane plus			30,000
SGI octane plus			40,000

Justification for any item over $100,000, or construction costs:

TOTAL 95900

clarify what is it. when will year 2. How much why do you need it?

E. Materials/Supplies - Provide a complete breakdown of each item/type of expendable materials and supplies, methodology used to arrive at the proposed costs (i.e., historical costs, competitive bid, published price lists, or cost/price analysis), basis of computation (i.e., item x number of items), and cost.

Item	Methodology	Computation	Cost
	A 38% increase in materials use is anticipated due to the increase in on-site work.		

duplicate from year 1

TOTAL 31000

F. Subcontractors - For each subcontractor identified on the NIST-1262 Page 4 or NIST-1263 Page 5, enter the name, if known, service to be provided, hourly or daily fee (8-hour day), and estimated time on the project. Subcontractor fees in excess of $450 per day require additional justification. Proposers are encouraged to promote free and open competition in awarding subcontracts.

Name of Subcontractor	Service Provided	Computation	Cost
George Wolberg Ph.D.	Prepare validation suite for DMT tree calculation	75h @ $80/h	$6,000
Isaac Dimitrovsky, Ph.D.	Assist with validation paradigm stochastic properties	216.333h @ $60/h	$13,000 ?
J. Case	Network Programming	33.333h @ $30/h	1000
Peter Ross, Ph.D.	Report preparation and analysis	40h @ $25/h	1000 remove

Subtotal 21000

Subcontractor Expenses: List all expenses to be paid from the award to the individual subcontractors in addition to their fees (i.e., travel, meals, lodging, etc.).

Item	Location	Computation	Cost

3. ESTIMATED AMOUNT OF SUBCONTRACT

$6,000

4. DESCRIBE SCOPE OF WORK

Programming of validation suite for assessment of accuracy of DMT tree construction and mapping.

5. IS THIS A SOLE SOURCE CONTRACT?

[x] YES (IF YES, EXPLAIN) [ ] NO

Dr. Wolberg wrote early versions of the computer algorithms for DMT based segmentation in this CASI-NIST grant. He is uniquely qualified to develop effective validation software.

1. NAME AND ADDRESS OF SUBCONTRACTOR

Peter M. Ross, Ph.D.
415 Central Park West
New York, NY 10025-4812

NAME OF CONTACT:
TELEPHONE NUMBER: 212 665-5126
FAX NUMBER: 877 823-1066
E-MAIL ADDRESS: pross@bww.com

2. TYPE OF ORGANIZATION (CHECK ALL THAT APPLY)

- [x] PROFIT - SMALL BUSINESS
- [ ] PROFIT - LARGE BUSINESS
- [ ] PROFIT - MEDIUM BUSINESS
- [ ] FOREIGN-OWNED U.S. SUBSIDIARY
- [ ] NON-PROFIT INDEPENDENT RESEARCH ORGANIZATION
- [ ] UNIVERSITY
- [ ] GOVERNMENTAL LABORATORY

3. ESTIMATED AMOUNT OF SUBCONTRACT

1,000

4. DESCRIBE SCOPE OF WORK

Assistance with editing and preparation of reports for submission.

5. IS THIS A SOLE SOURCE CONTRACT?

[x] YES (IF YES, EXPLAIN) [ ] NO

This was help needed on short notice for which Dr. Ross is uniquely qualified.

G. Other - Identify and provide a detailed description of any other direct costs which do not fall into the object cost categories above, basis of computation (i.e., cost per item x number of items), and cost. The cost of the project audit should also be included in this category unless it is part of the indirect costs. If it is part of the indirect costs indicate it as such. Each JV partner should budget for an audit. For awards less than 24 months, an audit is required at the end of the project; for 2, 3, or 4 year awards, an audit is required after the first year and at the end of the project; for 5 year awards, an audit is required after the first year, third year, and at the end of the project.

Description	Computation	Cost
Audit		
Joan Hayes, CPA ATP Audit	133h @ 150/h	20,000
Axiom/Benedict Grant Management	22h @ 250/h	5,400
ATC Consulting Network/system programming and system administration	30h @ 120/h	3,600

remove

TOTAL 29,000

H. Indirect Costs -Specify the current indirect cost rate(s), computation used, and cost. If an indirect cost rate was negotiated with a cognizant Federal agency, include a copy of the approved negotiated agreement. If an indirect cost rate has not been established by a cognizant Federal agency please state this below.

Percentage Rate	Computation	Cost

TOTAL

Budget Data

Proposal Number 70NANB1H3050

Name of Company Computer Aided Surgery, Inc. **Year** 3 (2003 - 2004)

A. Personnel - List each position by name of employee and title, if available. Show the annual salary rate and the percentage of time devoted to the project. Compensation paid for employees must be consistent with that paid for similar work within the proposer's organization and similar positions in the industry. Employees who are considered indirect labor should not be included in the breakdown of direct salaries or in section 1A of the Form NIST-1262 or NIST-1263. Escalation rates for the out-years should be reasonable. We recognize that a company may not be able to identify all of the personnel to be assigned to the project several years down the road. Where this cannot be done, use generic position titles such as "senior chemical engineer" and for name, "to be determined." Consultants should NOT be included in this category, but more appropriately under the "subcontracts" category and described on Form NIST-1262 or NIST-1263, pages 4 and 5, respectively.

Name/Position Title	Annual Salary	Percentage of Time on Project	Cost
D B Karron, Ph.D./ PI	$175,000.00	100%	175,000
J L Cox, Ph.D. / Lead Pgmr	$137,931.03	29%	40,000
M B Rothman / Graphics Pgmr	$35,000.00	100%	35,000
Peter M. Ross, Ph.D. / Business Manager	$130,000.00	30%	39,000
Tony Pahati, / financial specialist	$60,000.00	30%	18,000
Charles DaSalla / programmer	$40,000.00	100%	40,000

TOTAL 347,000

B. Fringe Benefits - Identify percentage rate; if greater than 35 %, provide a breakdown of what makes up the fringe benefits (i.e., vacation, sick, military leave, health and life insurance, retirement, social security, etc.). If fringe benefits are normally included in your organization's indirect cost rate, they should be budgeted as such, and check the appropriate line below.

Percentage Rate: 33.72 **Check here if included in indirect:** ____

If percentage rate exceeds 35%, provide breakdown.

TOTAL $117,000

C. Travel - Provide best estimate of travel required for the project, and provide the basis of computation (i.e., item x number of people x number of trips). Note that ATP recipients are expected to adhere to government policies regarding travel, such as, coach rather than first class accommodations, etc. Travel costs should represent a coherent part of the project's "communications strategy" for smooth coordination among participants. While foreign travel is not precluded, it is discouraged and will require a strong justification on how it is directly related to the R&D activities of the ATP project. Likewise, the travel cost for attending conferences must be strongly justified as essential and relevant to the research and development aspects of the project.

break down — remove booth rental

Purpose of Travel	Destination	Item (mode transportation, lodging, and subsistence)	Computation	Cost
MMVR/Presentation	Newport Beach CA	Air/Hotel/Car Rental/Conference Fee/ Per Diem/Booth Rental	2 person 5days	5000
SGI/Presentation	Mountainview CA	Air/Hotel/Car Rental / Per Diem	1 person 2 days	3000
IEEE/NIBIBPresentation	Washington	Car Rental, Per Diem, Hotel, Conference Fees	2 person 3 days	2800
SIGGRAPH/Presentation	Los Angeles CA	Air, Hotel, Conference Fees, Per Diem, Car Rental	2 people 5days	4400
NIST/Meeting x2	Gaitherburg MD	Per Diem, Hotel	2x trips 2 people 2 days	800

7 relevance

remove

Travel justification for foreign travel and conferences:

TOTAL 16000

D. Equipment - Identify each item of equipment, methodology used to arrive at the proposed costs, (i.e., historical costs, competitive bid, published price lists, or cost/price analysis), basis of computation (i.e., cost per item x number of items), and cost. Budget estimates for equipment items exceeding $100,000 each must be described and justified separately. Also identify by placing an asterisk on any in-kind owned equipment and its current depreciated value using the participant's preestablished depreciation accounting methods. The value of equipment will be further prorated according to the share of total use dedicated to carrying out the proposed ATP work. ATP funds may not be used for construction of new buildings or extensive renovations of existing laboratory buildings. ATP funds may, however, be used for construction of experimental research and development facilities to be located within a new or existing building provided that the equipment or facilities are essential for carrying out the project. If such costs are proposed, include below and provide justification.

Item	Methodology	Computation	Cost
Upgrade and replace PCs and other equipment needed for project completion.			75000
Itemized	—	—	justify

Justification for any item over $100,000, or construction costs:

TOTAL 75000

E. Materials/Supplies - Provide a complete breakdown of each item/type of expendable materials and supplies, methodology used to arrive at the proposed costs (i.e., historical costs, competitive bid, published price lists, or cost/price analysis), basis of computation (i.e., item x number of items), and cost.

Item	Methodology	Computation	Cost
	Materials and supplies expected to be about same or a little less.		

duplicate from previous years

TOTAL 25000

F. Subcontractors - For each subcontractor identified on the NIST-1262 Page 4 or NIST-1263 Page 5, enter the name, if known, service to be provided, hourly or daily fee (8-hour day), and estimated time on the project. Subcontractor fees in excess of $450 per day require additional justification. Proposers are encouraged to promote free and open competition in awarding subcontracts.

Name of Subcontractor	Service Provided	Computation	Cost
George Woberg Ph.D.	Trouble shoot validation suite for DMT tree calculation	116.6 h @ $60/h	7,000
Misc. Programmers	Assist with front end development and refinement	438h @ $50/h	21900

looks like product development

explain why employee can't do this

Subtotal $28,900

Subcontractor Expenses: List all expenses to be paid from the award to the individual subcontractors in addition to their fees (i.e., travel, meals, lodging, etc.).

Item	Location	Computation	Cost

Subtotal 0

TOTAL $28,900

G. Other - Identify and provide a detailed description of any other direct costs which do not fall into the object cost categories above, basis of computation (i.e., cost per item x number of items), and cost. The cost of the project audit should also be included in this category unless it is part of the indirect costs. If it is part of the indirect costs indicate it as such. Each JV partner should budget for an audit. For awards less than 24 months, an audit is required at the end of the project; for 2, 3, or 4 year awards, an audit is required after the first year and at the end of the project; for 5 year awards, an audit is required after the first year, third year, and at the end of the project.

Description	Computation	Cost
Audit		
Joan Hayes, CPA, ATP Audit	66,6h @ 150/h	10,000

Robert J. Benedict
E-mail: rbenedict1@ec.rr.com **voice:** (910) 253-1411
2762 Harbormaster Dr., Southport, NC 28461

OBJECTIVE:
Seeking positions that will offer challenging work environment and opportunity to utilize my skills and experience to grow new businesses on a sound financial and management footing.

QUALIFICATIONS AND SKILLS:

Highly motivated team player; Learns quickly and is conditioned to being responsible/accountable. 22 years financial management experience in manufacturing, software development and business control disciplines. Proven track record of exceeding business commitments throughout career. 34 years with IBM and 3 with Axiom Systems. Team/people management skills consistently rated in top 5% of the management team.

Experienced with quality programs and process improvement techniques as well as writing Baldrige Award Applications. Skilled user of Internet, MS and Lotus software tools, i.e. spreadsheets, presentations, etc..

EXPERIENCE

8 years ATP project management with only 1 personnel change, No cost overruns, no audit exceptions, and no disallowed costs under my direction

4/00-Present
Joined Axiom Systems to continue as Business Operations Manager, CFO CIIMPLEX Consortium, after retiring from IBM. Managed all Business aspects of Federal Grant program.

2/95-3/00
IBM Charlotte, Business Operations Manager, CFO CIIMPLEX Consortium. Consortium is a $55M joint venture, partially funded by National Institute of Standards and Technology/Advanced Technology Programs (NIST/ATP), with adtech mission in software tool and method enhancements for manufacturing companies, focused on supply-chain issues. Participants from small, midsize and large companies actively involved. Prepared proposals and chaired reviews with NIST, leading to changes in federal policy regarding matching contribution and travel expense reimbursement allowances for "for profit" companies participating in grant funded joint ventures.

9/89-2/95
Managed IBM Atlanta Business Planning organization. Created a software model to ensure consistency in sizing business forecasts, eliminating 80% of the callback reviews. Visiting instructor at IBM International Finance and Planning Academy (IFPA), teaching Software Estimating and Cost Estimating. Received $10K Presidential Award for leadership provided during the ownership transfer of an IBM software product to a third party buyer.

5/83-9/89
Managed IBM Atlanta Financial Operations and Controls organization. Software Lab, investing $60M annually in application software development, marketing and support with average annual revenues of $70M. Managed expense commitments, revenue recognition and cost estimating. Also managed Business Controls Group, with responsibility for internal policy compliance. All audits were successfully executed. Developed self-assessment programs for each department in the lab and conducted peer reviews, allowing for proactive problem identification and correction.

8/78-5/83
Managed IBM Burlington Cost Accounting and Inventory Control departments. Headed IBM Manufacturing Division's product inventory management team. Reduced inventory write-offs by $6M in Burlington and by $32M within the division. Developed cause and effect analysis model to expedite cost problem identification in manufacturing process. Promoted to middle management in 12 months. Managed IBM Burlington Accounting Services organization. Responsible for Fixed Asset, Site Operations, Payroll, A/R, A/P and General Ledger services for $1B manufacturing site.

6/66-8/78
IBM Burlington staff positions in General Accounting, Cost Accounting and Financial Planning. Advancing from Jr. Accountant to Sr. Staff Financial Analyst before accepting first management position.

EDUCATION
Prof. Certification in Federal Grant Management, Management Concepts, 1999
IBM International Finance and Planning Academy
- Market Driven Quality – 1993
- Effective Leadership – 1990
- Quality Focus on the Business Process – 1988
- Control Methods and Procedures – 1986

Dear BJ and Jayne;

One of the comments Belinda Riley, from the Inspector General office made after her second visit was we need to get the budget amended to reflect the actuals else we will get disallowed on our expenses based on that alone.

We started going this last year but with our then accountant/auditor, Joan Hayes, we thought we were getting solid figures. One thing that trigged the audit was that Joan was giving us different figures each time we asked her. I did not even notice it.

We need to complete the budget revision process started last year before the close of the project, else we will really have a train wreck.

We have a team of accountants and lawyers, headed by Professor Jerome Schwartz who has corrected most of Joan Hayes audit findings (no contribution being the biggest mis-finding).

Soon, you and I will need to finish the budget revision using final and correct actuals.

Please don't abandon me and this project after all we have been through.

I can would like to send you a copy of our latest MMVR presentation, done entirely during the suspension, using my own funds/credit.

Cheers!

Dr. Karron

I haven't been able to reach you by phone, so in support of the phone message I left, here's an update
as to what our plan is to address and resolve the compliance issues that have lead to the suspension of
Award #70NANB1H3050.

I spoke with Belinda Riley, the OIG rep who conducted the audit of CASI's books and she indicated she'd
sent the audit report to ATP and Dr. Karron on Friday and they should expect it today or tomorrow, depending on the mail.

Basically, the audit will identify Dr. Karron as having spent approximately $150K on unallowable items and that
he did not make his Member Contribution commitment. We will agree with these findings and respond in the following

manner.

Dr. Karron will reimburse ATP for all unallowable expenses. These expenses were incurred in support of the CASI research mission, but did not comply with ATP guidelines and as such were disallowed. In addition, Dr. Karron has deposited $46K in cash to be used to meet a portion of his program-to-date match commitment, the remaining 30% of this commitment would be addressed by using the FMV of equipment he owned prior to the start of the project, but has been used 100% in support of the research. The FMV assessment was recently done by a disinterested party and is allowable under ATP guideline, but the rub is he did not indicate he would use in-kind match in his budget, so ATP is balking at this inclusion.

The bottom line is all of Dr. Karron's problems are related to the fact that he had no ATP expertise on his staff for the first 18 months of the project. I have significant ATP experience and worked with Cita Furlani, Barbara Goldstein, the late Shelden Stewart, Shamim Shaikh and Carls Grinspon for approximately 8 years without incident. I have implemented procedures and preventive guidance that will eliminate the reoccurance of these problems.

We need ATP to accept reimbursement for all unallowable expenses, their acceptance of the in-kind, FMV equipment contribution as part of his Match, and we need them to allow him to spend the money he has deposited in his project bank account on allowable project costs over the next 30 days, to get back on plan.

I am sending Marilyn Goldstein, whom I've also worked with in the past, a letter outlining the above and including the refiling of all SF269 Forms, based on the ledger data audited by OIG, in hopes our actions and future plans will convince the Grants Office to lift the suspension of Dr. Karron's Award.

We must not lose the momentum gained on his research when we are 2/3 of the way through the project. It makes no sense for ATP to stop this project when all financial wrongs can be righted.

Dr. Karron and I appreciate your support and we are willing to do whatever it takes to get the project back on-line.

Please let me know if you have any questions. I would like to talk to you both about this. The work that's been done is too important to walk away from.

Thank you.

Budget Revision Notes and Justifications.doc

nist-2002-10-20 budget sheet only.pdf

Ross POC CASI DBK New Letterhead 01.doc

Justification of budget: Year 1 and Year 2 revision

CASI has a budget revision pending since August; This revision is effectively that pending revision. No action has been taken at ATP concerning that budget. It is imperative that the budget revision be acted on and settled as our auditor is commencing the audit on a budget effectively developed in August, when the proposal for this project was being formulated. A number of technical and arithmetic errors were discovered in the original budget which were corrected in December 2001, but the essential budget has not been revised; The project fidelity is intact, the milestones are being met; new and exciting, unexpected and fundamental research findings are being developed. However the PI has elected to eliminate off site contractors and enforce the development effort on the SGI computers purchased for this effort. Development by contractors on differing computers added unnecessary complexity and delay, and reduced the speed and efficiency of the developed code.

CASI is a startup with ambitious goals and limited resources. Presently, an ATP/NIST grant is the sole funding source. During the first year, a number of changes in the spending of ATP money became necessary as a result of unanticipated delay in obtaining matching funds from New York State and business decisions made by the PI to centralize the work effort to the CASI premises.

The purpose of this document is to specify and justify these changes in light of the original budget and current direction. The narrative will show that the changes were not only useful, but that they strengthen CASI's position to further its objectives in light of present circumstances.

Salaries: Dr. Karron billed unevenly, on an hourly basis, for 100% of his time, as was discussed with BJ and Jayne and documented in a memo.

Fringe benefits : The decrease of $25,000 in Fringe was converted to materials and supplies.

Travel: The decrease of $4,000 in travel budget was also used to increase supplies.

Other: Other category is increased to $11900 to absorb new direct costs.

Decrease in consultant fees: There is a decrease in consultancy fees from 250,000 approved to 60,000 actually used.

Increase in equipment purchases: There is an approximately offsetting increase in equipment purchased from 110,000 to 303,400. In addition, equipment was purchased in year 1 that was not paid for with year 1 funds. These equipment purchases total 88,000. It is requested that these purchases be made his amount into the year 2 budget.

Conversion of consultant fees to equipment: The task breakdown in the approved year 1 budget reflects an approximately even split between salaries and equipment. However, in

the original approved budget, request was made for more consultancy fees. It was felt that programming could be outsourced and done at home on pc. Early on in the project, it was found that work was not progressing when outsourced this way. It was found that the PC environment could not handle the workload of heavy image processing. In addition, one contractor was working at home on a Sun Computer Systems environment and was unable to get his code to run on the machines in CASI. It was therefore decided to do all development in the actual CASI shop. In order to get more control over the project, it was further decided to have all personnel work on site. Accordingly, the increase in equipment basis reflects a decrease in the amount spent on consultancy fees. It was decided to get better value from equipment purchases than from the one-time services of outsourced work. By means of this change, Dr. Karron has in fact strengthened the business plans considerably. As the work in years 2 and 3 unfolds, availability of these high-powered computers will make the services more widely available. This consolidation increases accessibility of CASI services to potential clients. When appropriate IRB approvals are available, this will make it even more attractive for physicians in the local community to use the service for their data.

Transfer of Year 1 equipment charges to year 2 The amount of $88,000 is requested to be transferred from year 1 to year 2 of the grant. Year 1 equipment spending exceeded the original budgeted amount for the reasons described above. SGI provided one machine on permanent loan. A second graphics super workstation was ordered and delivered in January but not billed until late September. When we asked them whether this machine was part of their support of CASI's project, they gave indirect answers. An invoice was requested repeatedly by CASI. SGI sent a statement, at our request acting on an ATP suggestion, showing no balance due. It looked like this machine was a contribution from SGI to CASI for the NIST project, and Dr. Karron had several conversations with SGI employees on this topic. Then, unexpectedly, SGI back billed CASI $35,000 without the benefit of discounts they applied to a third machine purchased subsequently. Having already adopted a policy that all programming must be done on site, CASI found it needed the machine. At present, therefore, CASI feels that the most prudent course is to renegotiate the bill and pay it from year 2 funds. After receiving evidence that the first bill was not going to b e rendered, CASI decided to use then available equipment funds to buy a third machine, at a 60% discount. This machine was a low end superworkstation with two graphics heads permitting two people to simultaneously work on the same machine. This machine was found to be highly valuable to our work for this reason. These items, and additional $14,000 to Silicon City needed to replace a unit that broke to provide comprehensive, high density backup of all our computer systems, and the balance in miscellaneous technology glue are necessary expenses in use and vital to the project. All the bills were either unexpected or came due right at the juncture of years 1 and There remained no money in year 1 budget. It is therefore requested to transfer the amount for these items to the year 2 budget.

Reduction in investigator matching funds to the grant and increase in costs absorbed:
The budget was changed to reflect the fact that unexpected personal taxes are reducing the available funds the PI can match ATP supplied funds. Currently, the only available source of matching funds is from the PI's salary, which is taxed in the approximately 50% tax bracket. This was unanticipated during the original budget drafted last year. There has been serious controversy about what is direct and chargable and what is not. A significant number of overhead and direct costs are being paid by the PI; The urgency of obtaining matching funds has not been lost.

Year 3 revisions reflect changes in year 1 and 2 to keep the total project cost constant.

ESTIMATED MULTI-YEAR BUDGET - SINGLE COMPANY

	YEAR ONE	YEAR TWO	YEAR THREE	TOTAL
1. OBJECT CLASS CATEGORY				
A. Personnel Salaries/Wages	$ 327963	$ 330000	$ 375000	$ 1033000
B. Personnel Fringe Benefits	85500	85000	90000	260500
C. Travel	15880	7500	15000	38400
D. Equipment	303400	133000	75000	511400
E. Materials/Supplies	30800	31000	25000	86800
F. Subcontracts	61000	29200	45900	136100
G. Other	5200	15300	17600	44800
H. Total Direct Costs (Lines A thru G)	836500	631000	634500	2111000
I. Total Direct Costs Requested From ATP	800000	600000	600000	2000000
J. Total Direct Costs Shared by Proposer (If Any)	$ 29500	$ 21600	$ 43500	$ 94600
K. Total Indirect Costs Absorbed by Proposer	$ 7000	$ 9400	$	$ 16400
L. Total Costs (Lines H + K)	$ 836500	$ 631000	$ 643500	$ 2111000
2. SOURCES OF FUNDS				
A. ATP (Same as Line I)	$ 800,000	$ 600000	$ 600000	$ 2000000
B. Direct Costs Shared by	36500	31000	43500	111000
C. Indirect costs shared				
D. Total sources	836500	631000	643500	2111000
E. Total Sources of Funds (Same as Line L)	$ 835900	$ 631000	$ 643500	$ 2111000
3. TASKS				
A. Server Hardware Installation and config	$ 412500	$	$	$ 412500
B. Public client design mockup	111000			111000
C. Program spider web surface gen	111000			111000
D. Recog sort crits	202000			202000
E. Write Union/intersection operator		210500		210500
F. Write Saddle Crit navigator/editor		210000		210000
G. Write Diocom up/down load compres/crypt		210500		210500
H. Node warping code			214500	214500
I. Write level of detail management code			211000	211000
J. install clickstream technology on clients			211500	211500
K. Total Costs of All Tasks (Same as Line L)	$ 836500	$ 631000	$ 643500	$ 2111000

Justification of budget: Year 1 and Year 2 revision and year 3 budget.

CASI is a startup with ambitious goals and limited resources. Presently, an ATP/NIST grant is the sole funding source. During the first year, a number of changes in the spending of ATP money became necessary as a result of unanticipated delay in obtaining matching funds from New York State and business decisions made by the PI to centralize the work effort to the CASI premises.

The purpose of this document is to specify and justify changes in the original budget in light of current direction. The narrative will show that the changes were not only useful, but that they strengthen CASI's position to further its objectives in light of present circumstances. CASI has a budget revision that has been pending since August 2002; this revision is effectively that pending revision. No action has been taken at ATP concerning that budget. Technical and arithmetic errors discovered in the 08/01 budgets were corrected in December 2001, but the revised 08/01 budget has not yet been approved. It is important that we coax the budget approval process along so that we can manage our project without audit exceptions and make the high technology and his risk spending decisions required to make this project a success. The very nature of high risk and high cost technology research means that budgeting is a fine art and predicting spending requirements more than a few months in advance is fraught with perils and problems. The ATP program has managed to bridge the gap between high-risk high reward basic research and the government spending regulations that require spending approval and strict budget/spending strictures through a mixture of wisdom, keen insight into the technicalities of the Government Spending Principles and the needs of advanced

The project fidelity is intact, the milestones are being met; new and exciting, unexpected and fundamental research findings are being developed. However, there are two main changes in the budget, which resulted from the above-mentioned change in project execution strategy.

The first is a request for a potential one time only hardship allowance of POSSIBLY as much as $51,000 in indirect costs that the PI has been unable to pay out of pocket in the fist year. The actual amount depends on the auditor's opinion of some marginal cost items that the auditors will need letter decisions from ATP on.

The second is a transfer of year 1 equipment purchase to year 2.

The PI elected to reduce off site contractors and instead work on site on the SGI computers purchased for this purpose. Programming is now conducted in a 'programming bullpen' so that each programmer can ask any other developer questions and get immediate help. A sense of team spirit and unity of purpose requires everyone work together in the same place under the constant care and support of the PI. Taking on students and interns, some of who are doing wonderful work, requires close supervision not possible in a formal office environment. Further, work is progressing almost around the clock, with people working on site almost 16 hours a day. Improving working conditions is also a priority so that the ambient noise and temperature are kept tolerable and healthy. Development by contractors on differing computers added unnecessary complexity and delay, and reduced the speed and efficiency of the developed code.

Allowance of $51,000 "indirect costs". CASI accepted this grant anticipating, as did ATP, that some sort of state matching funds would be available to help with costs not readily assumed under the grant. However, the fallout from 9/11 and the economic downturn in NYC and NYS, led to difficulty in securing the needed moneys. Accordingly, the PI accepted a very large salary,

intending to re-invest after-tax dollars in the project. Indeed, that is what happened. However, the failure to secure additional money and the lack of strong accounting guidance led to a deficit in indirect costs for which there existed no other source of funds. The PI does not have another income.

Our auditor is now auditing a budget submitted in August 2001 (i.e. a full year earlier than the 08/02 revision), when the proposal for this project was being formulated. To date, the auditor has tagged $51,000 in charges to the grant as "unallowable". The exact figures from that audit are a moving target. This is because as we justify costs and explain individual items, this total disallowed sum is being reduced. We are facing a years worth of bad business decisions from the previous business manager and poor accounting from the first CASI accountant. We do not know exactly what the final audited actual cost figures will be. It is hard to submit a budget with confidence. Many of the items disallowed in the audit should, in our understanding of previous policy, have been allowed. As explained below, we are now requesting a potential allowance of some these items so we can plan for the future.

CASI engaged a second CPA with many years NIST ATP program management to get a firmer perspective on these matters. We were led to believe by our consultant that a number of costs could be broken out and accounted for as a direct charge if a clear direct cost basis could be established. For example, we found that power bills and telecommunications increased many-fold over pre-project levels, clearly as a result of project utilization. Although we did our best to follow those guidelines, our auditor has chosen to these as "indirect costs" out of hand. The result may appear in the year 1 audit as much as 51 thousand dollars in disallowed costs.

To summarize, despite CASI's serious efforts to manage its budget in accordance with NIST requirements, and following the counsel of ATP-savvy experts hired by CASI, the PI may have to refund $51,000 as a charge back to year 2. Fairness concerns aside, we believe that defeats the purpose of the NIST grant to CASI.

It should be noted that CASI, while situated in a dwelling, fully occupies that dwelling. Aside from this grant, there are no other projects going on at CASI, and at present this grant is the sole source of funding. The residential apartment in which CASI is located is fully in use for the business. The auditor has expressed similar thoughts. Therefore, it is intuitively questionable whether there is any true "sharing" of the cost basis.

Based on the above, CASI requests that the $51,000 excluded in the audit be allowed for the purpose of offsetting costs that in CASI's situation are clearly direct costs. In the proposed year 1 revision accompanying this, those charges are shared between "materials" and "other".

Salaries: Dr. Karron billed unevenly, on an hourly basis, for 100% of his time, as was discussed with BJ and Jayne and documented in a memo. The auditor requires a written authorization so as not to except this practice.

Fringe (actual for year 1) was decreased by $24,700 due to the hiring of personnel on work schedules who did not accumulate enough hours for full benefits.

Travel: The decrease of $9,000 in travel budget was used to increase supplies.

Other: Other category is increased to $57,500 to absorb new direct costs.

Materials and supplies: This category is increased to $35,000 due to increased supply needs because of the larger amount of onsite work.

Decrease in consultant fees: There is a decrease in consultancy fees from 250,000 approved to $101,500 actually used due to the larger amount of onsite work.

Increase in equipment purchases: There is a partially offsetting increase in equipment purchased from 110,000 to 223,300. In addition, equipment was purchased in year 1 that was not paid for with year 1 funds. These equipment purchases total 88,000. It is requested that these purchases be made from the year 2 budget for reasons explained under "Transfer of Year 1 equipment charges to year 2."below.

Conversion of consultant fees to equipment: The task breakdown in the approved year 1 budget reflects an approximately even split between salaries and equipment. However, in the original approved budget, request was made for more consultancy fees. It was felt that programming could be outsourced and done at home on pc. Early on in the project, it was found that work was not progressing when outsourced this way. It was found that the PC environment could not handle the workload of heavy image processing. In addition, one contractor was working at home on a Sun Computer Systems environment and was unable to get his code to run on the machines in CASI. It was therefore decided to do all development in the actual CASI shop. In order to get more control over the project, it was further decided to have all personnel work on site. Accordingly, the increase in equipment basis reflects a decrease in the amount spent on consultancy fees. It was decided to get better value from equipment purchases than from the one-time services of outsourced work. By means of this change, Dr. Karron has in fact strengthened the business plans considerably. As the work in years 2 and 3 unfolds, availability of these high-powered computers will make the services more widely available. This consolidation increases accessibility of CASI services to potential clients. When appropriate IRB approvals are available, this will make it even more attractive for physicians in the local community to use the service for their data.

Transfer of Year 1 equipment charges to year 2.The amount of $88,000 is requested to be transferred from year 1 to year 2 of the grant. Year 1 equipment spending exceeded the original budgeted amount for the reasons described above. SGI provided one machine on permanent loan. A second graphics super workstation was ordered and delivered in January but not billed until late September. When we asked them whether this machine was part of their support of CASI's project, they gave indirect answers. An invoice was requested repeatedly by CASI. SGI sent a statement, at our request acting on an ATP suggestion, showing no balance due. It looked like this machine was a contribution from SGI to CASI for the NIST project, and Dr. Karron had several conversations with SGI employees on this topic. Then, unexpectedly, SGI back billed CASI $35,000 without the benefit of discounts they applied to a third machine purchased subsequently. Having already adopted a policy that all programming must be done on site, CASI found it needed the machine. At present, therefore, CASI feels that the most prudent course is to renegotiate the bill and pay it from year 2 funds. After receiving evidence that the first bill was not going to b e rendered, CASI decided to use then available equipment funds to buy a third machine, at a 60% discount. This machine was a low-end superworkstation with two graphics heads permitting two people to simultaneously work on the same machine. This machine was found to be highly valuable to our work for this reason. These items, and additional $14,000 to Silicon City needed to replace a heat related RAID failure to provide comprehensive, high density backup of all our computer systems, and the balance in miscellaneous technology glue are necessary expenses in use and vital to the project. All the bills were either unexpected or came

due right at the juncture of years 1 and There remained no money in year 1 budget. It is therefore requested to transfer the amount for these items to the year 2 budget.

Reduction in investigator matching funds to the grant and increase in costs absorbed:
We propose budget changes to reflect the fact that unexpected personal taxes are reducing the available funds the PI can use to match ATP supplied funds. Currently, the only available source of matching funds is from the PI's salary, which is taxed in the approximately 50% tax bracket. Instead of the anticipated 175 + fringes K the PI considered abundant for co-funding the project, the PI now nets approximately 85K, which is in midtown not a even considered a middle class income. With a co-funding contribution of 36,500 that leaves about 49K for living expenses and for CASI overhead funding. The PI has had to borrow 30K to help fund the first year and still was unable to make the full contribution. There exists the real possibility the PI will run out of salary in project year 2 to make the year 2 co-funding requirement and repay the first year loan. This was unanticipated during the original budget drafted last year. There has been serious controversy about what is a direct and chargeable cost element and what is not. The PI is paying a significant number of overhead and direct costs; the urgency of the need obtaining matching funds has not been lost. This is going to be an important uncompensated task of Dr. Ross. This was a major factor in Mr. Gurfein's abrupt departure at the end of year one.

Year 3 budget: Year 3 revisions reflect changes in years 1 and 2. Year 3 salaries reflect small cost increases and an increase in project involvement by Mr. Rothman. $15,000 travel is requested mainly for the dissemination of findings and publicizing the availability of the techniques developed under the grant. A significant request for equipment ($65,000) is included because of the heavy reliance of the project on high end computing and the consequent need to ensure availability of adequate computing power to process and display data. A slot is requested for "miscellaneous programmers" to assist with front-end development and refinement. We are really looking for a salaried person, but we do not yet have continuation funding, and we prefer to bring new people in as consultants to see how they work with the group. We have also had excellent experience with Dr. Karron's students hired on a semester-to-semester basis. Overall, the year 3 budget is a natural extension of the year 2 budget leading to the wind-up of the project.

Dear Ms. Jayne Orthwein and Ms. Hope Snowden;

In the budget of CASI's proposal for the ATP grant that was awarded effective October 1, 2001, E. Gurfein was included in the amount of $100,000 per year for 75% of his time. As he is an employee of Meridian Resources and Development, Ltd., we are requesting that the $100,000 annual payment be made to Meridian as a subcontractor instead of to Gurfein as a labor item. In addition, the corresponding fringe amount will be reallocated, as CASI will not be paying fringe benefits on a subcontract to Meridian.

Please consider this request and advise.

Sincerely,

D. B. Karron, Ph.D.

D. B. Karron, Ph.D. President and C.T.O.

Subject: Request for Approval of Proposed Budget Changes

Upon review and reconsideration of the approved budget, we are submitting the following changes for your approval:

A. Personnel Salaries/Wages from $375,000 to 325,000 -$50,000

B. Personnel Fringe Benefits from $127,500 to $110,500 -$17,000

C. Travel from $4,000 to $20,000 +$16,000

D. Equipment from $120,000 to $110,000 -$10,000

E. Material from $0 to $11,000 +$11,000

F. Subcontractors from $200,000 to $250,000 +$50,000

Net Change 0

Reasons for requested budgetary changes:

A. In an effort to get more for each dollar, we intend to engage Prof. George Wolberg as a consultant for well defined assignments instead of as an employee (-$100,000). However, we are adding two employees: one Financial Control Specialist (+$25,000) and one Systems Administrator (+$25,000). Net change: (-$50,000).

B. Fringe benefits are reduced by 34% of $50,000, because of reduction of $50,000 in Personnel Salaries. Net Change:-$17,000.

C. The travel amount budgeted was much too low. Based on expected travel for giving papers, attending relevant symposia and meetings, we request an increase to $20,000. Net change: +$16,000.

D. Based on some discounts that we are negotiating, we propose to reduce the equipment costs to $110,000. Net change:-$10,000.

E. Material: Various items for equipment and data services are estimated at $11,000. Net change: +$11,000.

F. Changing George Wolberg from employee to subcontractor adds +$100,000. NYU Medical Center and CUNY are expected to be subcontracted for $50,000. With an additional total of $50,000 in subcontracts to several consultants, the revised number for subcontracts is $250,000. Net change: +$50,000.

The net change for all the above changes is zero.

Please consider these requested changes and advise at your earliest.
Sincerely,
EGurfein

Responses to Questions in Detail

Year 1:

A. Personnel – Please provide a job description, justification and CV for the following personnel:

Scott Albin

Provide dates for the transfer of Scot Albin from subcontractor to employee.

Mr. Albin was a contractor briefly in 2001. He left to start medical school and then was hired as an employee, after several months away at school, in summer, 2002.

Job description: Mr. Albin tasks include library and internet research, utilizing his ancient clinical insight, PC support, network programming and wiring, and telecommunications and maintains software and security on our PCs. He set up bulkheads between the main CASI NYC offices and implemented remote access between main CASI NYC office and Mr. Gurfein's NJ office. We consider ourselves lucky to have him even the little time he is available between semesters at Medical School.

CV attached.

Nicholee Wynter

Job description: Fiscal Control Specialist, bookkeeping, electronic file clerk. Tasks include managing payroll, filing, audit support, bookkeeping entry, and account reconciliation, managing phone calls.

CV attached.

Regner Peralta

Job description Mr. Peralta helped designed the CASI web site and does system/network administration, and programming support. Regner did a lot of experimental programming and research. He tested software tools & complicated user input/output to determine its capability to support large graphics and graphics analysis programs. Regner then installed and supported the appropriate applications for CASI use. He also assisted Matt Rothman with his job duties whenever possible.

CV attached.

RG Wine

Job description: Network Programmer and system support.

CV attached.

Matthew Rothman

Job Description: Graphics and Network Lead Programmer.

Included in his responsibilities are the following technical aspects; research programming, integration of research programs, optimization and efficiency improvements in programs including testing and portability of code to common supercomputer clusters and grid platforms, system administration (SGI IRIX, LINUX, Windows) , network administration, Web administration and design, system analysis, user requirements analysis and user-interface design, physical plant wiring and design, programming support for other programmers & research scientists. Matthew also co-ordinates technical details of CASI outside collaborations, assists in technology (hardware & software) budget projections and justifications, technical support for Project Management activities such as PC support (help desk and installing programs) and technology inventory management. He also assists in research publication development.

Mr Rothman is becoming a mainstay in the emerging CASI organization and a jewel of a programmer.

CV attached

DEFINITIONS

Part Time Employee

A part time employee is an employee who works 20 hours or less per week.

Full Time Employee

A part time employee is an employee who works 20 hours or more per week.

Junior Employee

A Junior Employee is a full time employee who has worked less than 2 years for CASI

Senior Employee

A senior employee is a full time employee who has worked 2 years or more for CASI

B. Fringe – Please provide a detailed break-out of items covered within fringe benefits.

CASI Fringe Benefit policy

Federal Employer Taxes

Federal Withholding
Federal Unemployment
Medicare
Medicaid
Social Security

State Taxes

State Withholding
State disability insurance

State mandated unemployment insurance.

Local Taxes

New York City Resident Tax

Health Insurance

- CASI provides medical insurance coverage through Oxford Health Plans for FT employees.
- CASI pays medical/dental costs not covered by Oxford including deductibles and co-payments for all FT employees.
- CASI provides prescription drug coverage through Oxford Health Drug Plan.
- CASI pays drug plan costs not covered by Oxford, including co-payments and deductibles for Senior Employees ONLY.

CASI Benefits plan

- NYC Transit Check subway passes to the limit allowed by law
- CASI subscribes to the NYC Muni-Meter Card program to pay for parking for all employees/ contractors in the designated Muni-Meter parking lot downstairs, in recognition of the difficulties of parking in midtown Manhattan.
- Taxi fare home if an employee works later than 9PM,
- Taxi fare home if an employee gets sick on the job.
- Educational classes and coursework directly related to Grant/job function for the purpose of improvement of employee job task performance.

C. Travel – For each destination, provide a complete computation and breakout of all costs including hotel costs, air fare / train / car costs, car rental costs, meeting fees, and per-diem.

Actual/projected expenses for NIST ATP related travel

location	*Meeting Description*	*taxis*	*tolls*	*hotel*	*meals*	*air*	*rail*	meeting *registr*	*auto rental*	*gas*	*total*	*Comments*
Wash DC	NIST Kickoff	$45.00	$28.00		$ 29.00		$274.00		$ 188.88		$ 564.88	Rent a car in Ba
Newport Beach, CA	MMVR	$40.00			$270.00	$839.00		$880.00	$ 300.00	$50.00	$ 2,379.00	DBK, Bucholz[2]
Boston MA	SPIE imaging meeting				$ 84.00		$358.00	$250.00	$ 199.00	$20.00	$ 911.00	DBK, Cox prese
San Jose CA	SGI developer conference	$50.00		$670.00	$170.00	$280.00		$295.00	$ 288.00		$ 1,753.00	DBK work on w
Wash DC	IEEE NIBIB joint		$27.00	$435.00	$ 44.00			$375.00	$ 329.00	$42.00	$ 1,252.00	DBK, YYZevi p
Year 1 Totals											**$ 6,859.88**	

[1] Dr Satava's CV is appended. No hotel is in the calculation because we made a complex pick up of Dr. Satava in Baltimore, drove him to NIST, then to the Baltimore-Washington Airport, and drove back to NYC in one day.

[2] Dr Bucholz's CV is appended. Dr. Bucholz stayed with his brother in Newport Beach, and Dr. Karron stayed with colleagues most of the meeting in the area. In order to write up the two papers the PI presented at the meeting, we did rent a hotel room for two nights and used the ThinkPad computer to write the papers on site together.

[3] No Hotel is in calculation because we took the fast Accella train to Boston and back in one day.

1051

Newport Beach, CA	MMVR	$10.00			$263.00	$200.00		$880.00			$ 1,353.00	DBK only
Delaware	SGI Bioinformatics		$21.00	$ 78.00	$ 24.00				$ 140.00	$37.00	$ 300.00	DBK, P Ross
Wash. DC	SGI homeland sec	$22.00		$510.00	$153.00		$295.00				$ 980.00	DBK, P Ross
Rutgers, NJ	DIMACS	$40.00		$200.00	$ 80.00			$400.00	$ 188.00	$30.00	$ 938.00	DBK, Cox In
Newark	NJIT			$100.00	$ 40.00			$400.00			$ 540.00	DBK, Cox Pı
LA., CA	SIGGRAPH	$80.00		$700.00	$250.00	$450.00		$600.00	$ 250.00	$60.00	$ 2,390.00	DBK, Cox Pı
Gaithersburg MD	NIST meeting	$45.00		$ 88.00					$ 188.00	$40.00	$ 361.00	DBK negotia
Year 2 Totals											**$ 5,509.00**	

1052

Newport Beach, CA	MMVR	$40.00			$270.00	$250.00	$880.00	$ 300.00	$50.00	$ 1,790.00	DBK, Cox prese
San Jose CA	SGI developer conference	$50.00		$670.00	$170.00	$280.00	$295.00	$ 288.00		$ 1,753.00	DBK on DMT p
Wash DC	IEEE NIIBIB joint		$27.00	$435.00	$ 44.00		$375.00	$ 329.00	$42.00	$ 1,252.00	DBK, Cox prese
LA CA	SIGGRAPH	$80.00		$700.00	$250.00	$450.00	$600.00	$ 250.00	$60.00	$ 2,390.00	DBK, Cox prese
Year 3 Totals										**$ 7,185.00**	
Three Year Total										**$19,553.88**	

1053

Explain who R. Bucholz is and why the ATP project should pay his/her travel and expenses for MMVR.

Dr. Bucholz is a colleague and potential collaborator with whom CASI plans to test an implementation embodying CASI technology (see attached CV and letter of intent). Dr. Bucholz is a founder in the field of image guided surgery and has the widely used commercialized 'Stealth Station" neurosurgical navigation system and many patents to his credit.

Explain who Zevi is and why the ATP project should pay his/her travel and expenses for IEEE and NIBIB.

Dr. Zeevi is a potential collaborator with special mathematical and interest in Digital Morse Theory and who possesses unique programming expertise. His letter of intent explaining his role in greater detail, and his CV are likewise enclosed.

Please remove expenses for:

Side visit to NIST	**$ 10.00**
Gurfein Travel to CASI	**$1589.00**
DBK Travel to NIST	**$1000.00**
NYC Parking for Staff and Visitors	**$2000.00**

Removed.

F: Subcontractors

Please provide a much more detailed justification for sole source contracts under all identified subcontractors.

A CV and explanation has been provided for all subcontractors (see attachment).

G. Other

Please identify and describe "Data Communication". Provide a detailed computation for this expense.

CASI started this project with TWO ISP's, Thorn Communication based in lower Manhattan and Webworms, based in Maryland. Thorn was effectively out of business during the early days of this project after 9/11 due to the destruction of the communications infrastructure in lower Manhattan. Rather than abandon Thorn, and because of the resultant reliability and cost problems, Thorn is currently used only for local access and nothing else. Webworqs is used for the CASI web host site, and nothing else. Webworqs hosts the ATP Project web demonstrations and web pages. Access to CASI is thought Thorn because Thorn provides local access at reasonable cost, but is too expensive for any of the extensive hosting required for an image processing research web site.

CASI's web service host is in Maryland; it is in a very high bandwidth D3 service location; CASI personnel do Research demonstrations and testing by logging on from NYC to Maryland. Programs/image files uploaded to Maryland for distribution.

CASI's research in image processing makes special demands on ISPs, and given the collapse of the ISP and Internet industry, we have experienced severe problems with vendors going bankrupt. We protect ourselves from ISP problems by working with two ISPs simultaneously.

CASI has a slow ISDN 56 KB connection to Thorn that we attempted to upgrade to a DSL line. We retained the ISDN service as a fallback in the event of DSL failures. This decision has proven valuable due to reliability issues with the DSL service provider that Thorn subcontracted with. Subsequently the Thorn bulk DSL carrier has announced they are bankrupt in January 2003, and Thorn has withdrawn from

providing DSL service. It was also decided that fractional or full T1 service was too expensive and not required given the cheap availability of two broadband data carriers in the CASI building

CASI's location is serviced by two broadband cable companies, both offering competing inexpensive residential broadband packages. However, both carriers do not provide fixed ip addresses and can not sustain heavy continuous usage. Also, other users in the building contend for bandwidth. We decided to subscribe to both services and provide dynamic outbound routing (balanced flow control via two redundant pathways) for CASI connectivity to its Maryland ISP.
Inbound connectivity requires a fixed IP address, and that is supplied by our ISDN service to Thorn Communications. Inbound connectivity is required because many CASI employees and contractors work remotely and need access to our UNIX systems while off site.

Please justify the purchase and use of the PDA for this project.

There is no PDA used in this project. This was a spurious entry. [4]The PI apologizes for the confusion caused by this entry.

Budget item removed.

Please put ATG consulting in the Subcontractor category and provide a revised 1262 for this subcontractor. If this is a sole source, please justify.

Done.

Please place "program related postage and delivery" under Materials and Supplies.

Done.

Please remove expenses for:
Professional fees for payroll tax preparation, accounting, and legal services.
Dues and professional memberships
Misc. specify

- Fees for payroll tax preparation are in Fringe Benefit section.
- Legal costs were incurred in negotiating an employment contract for Mr. Gurfein.
- Dues and professional memberships are required for this project because accesses to online libraries require membership fees to be paid for IEEE (Institute for Electronic and Electrical Engineers) and AAAS (American Association for the Advancement of Science).
- Miscellaneous expenses have been removed as requested.

[4] The PI uses an IBM ThinkPad for code development and off site connectivity. It can serve as a PDA, but that function is not why the laptop was purchased. Further, it is used by all CASI employees as needed, and is not a personal device in any way.

Year 2

A. Personnel

Please provide a job description and justification for Tony Pahati as well as his CV.

Job description: Fiscal Control Specialist.

Mr. Pahati has held senior management positions in overseas banks and other businesses. His skill in the area of bookkeeping is needed for operations at CASI.
CV attached.

C. Travel Breakout

Please provide a detailed complete breakout of all expenses associated with the travel budget.

The table provides figures for Year 1, 2, and 3.
See Appendix.

NIST Meetings

Please provide detailed information for the NIST / Meeting including when the meeting will take place, the purpose of the meeting and the individuals that will attend.

NIST Kickoff Meeting.

In attendance from CASI were the PI, Mr. Gurfein and Dr. Satava. Dr. Satava's CV and justification are in the appendix.

Year 2 meeting

Given the dynamic evolution of CASI and this project, close communication is extremely important to ensure our plans continue to address high-risk research activities and to gain NIST guidance as we move into the second year.

D. Equipment

For each item provide a detailed description of the equipment including the brand and model, an explanation of its relevance and use within the project, the methodology used for computing the cost and the computation.

We have included, in the appendix, a detailed equipment inventory showing the relationship of each item and the project milestones and tasks.

Year 1 Equipment Project-Milestone Mapping

NIST ATP Project Milestone - Purchased Equipment Map

	Milestone		Equipment Category											
Year	#	Name	INDIGOS GI	OCTANE SGI	PC Devel	PC Raid File Server	User input/ output Devices	Monitors	Disk	Memory/ RAM	Tape Backup	Pow Ctls	Intrnl Net	Extrn Net
1	1	Server hardware installation and software configuration task												
	2	Public client mock up facility design task												
	3	Program SpiderWeb surface tile generator task												
	4	Recognize, sort Crits, connect; graph display code task												
		Application in Year 1 Tasks	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y

1058

Year 2 Equipment Project-Milestone Mapping

Year	#	Name	INDIGOSGI	OCTANE SGI	PC Devel	PC Raid File Server	User input/ output Devices	Monitors	Disk	Memory/ RAM	Tape Backup	Pow Ctls	Intrnl Net	Extrn Net
2	5	Write node figure of merit, sorting, matching code for Union and Intersection operator	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y
	6	Write saddle Crit navigator and editor	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y
	7	Write DICOM, upload, download compression, encryption, radiological, referring physician client	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y
		Sub-total Year 2 & 1	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y

1059

Year 3 Equipment Project-Milestone Mapping

Year	#	Name	INDIGOSGI	OCTANE SGI	PC Devel	PC Raid File Server	User input/ output Devices	Monitors	Disk	Memory/ RAM	Tape Backup	Pow Ctls	Intrnl Net	Extrn Net
3	8	Node warping code	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y
	9	Level of Detail Management												
	1 0	Install clicks stream technology on clients; collect data from alpha users					Y							
		Grand Total Year 1,2,3	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y

Notes

The above chart does not reference the purchase year for any particular piece of equipment, it refers to the use of a class of equipment in the execution of a milestone.

1060

Equipment Vendor Late Billing

Please clarify the requested allowance for equipment purchased in year 1/billed in year 2. What is the equipment?

Brand: Silicon Graphics

Model: Octane II w/V12 Graphics

Price: $46,000 and $30,000 respectively

Vendor did not invoice for equipment and when pressed for statements, did not show an open balance on their books.

See letter of explanation from SGI in appendix.

F. Subcontractors

Please provide detailed information on Dr. Dimitrovsky, his contribution to the project, his address, academic associations if any, his CV and citizenship. Please provide justification as to why this is a sole source.

The PI met Dr. Dimitrovsky while he was pursuing a second PhD in biochemistry at NYU Medical Center/ Skirball Institute under Dr. Ruben Abykian, specializing in X-ray crystallography. This is a unique skill with potential application of DMT technology (mapping electron cloud density and fitting a chemical bond skeleton).
Dr. Dimitrovsky is a US Citizen.

CV attached.

Pease provide detail about the emergency work performed by J. Case (dates, nature of emergency, work performed).

Ms. Case was originally identified as our programmer and network employee in the original proposal and original award. She chose not to join CASI and has since gone on to become a successful independent software consultant. Subsequently, she was engaged to deal with a security incident in which our network was attacked and our system security compromised. She ran network analysis software to determine the source of attack, helped repair infected systems, installed a firewall and re-configured network switch to prevent further problems.
The Dates of Service for J. Case are the week of November 2, 2001.
The attacker was discovered using our mail server to send mail and receive Internet news free of charge and had also used an unusual attack on java programs. All of these problems were too complex to be fixed and prevented by standard anti-virus and anti-spy ware packages. It was also deemed a major distraction from our ATP mission and the PI decided to outsource security to Ms. Case. Since then, because of her consulting recommendation, network security is much tighter now and further disruption has been avoided.

Please remove Peter Ross from the subcontractor category.

Done

G. Other

Please remove Axiom Benedict from the "Other" expense list.

Done.

Please Place ATC (or ATG Consulting as was written in Year 1 budget) in the Subcontractors category and revise the 1262 budget and sole source explanation and justification.

Removed.

Year 3

C. Travel

Please provide a complete breakdown of all items associated with each travel destination including hotel costs, airline costs, per diem, rental car costs, conference fees, etc.

Please see attached travel justification spreadsheet

Please remove "Booth Rental" from the Travel expenses list.

Done. This should never have appeared in the ATP budget. The PI apologizes for this spurious entry.

Please provide an explanation of the relevance of the SGI presentation to the technical project goals.

1) The audience at the SGI meeting is comprised of peers in the field of handling extremely large computations in computer graphic environment;
2) SGI is the platform of choice for large image processing software development. Special software programming techniques are required to enable images consisting of gigabytes of stacks of images to be processed in main memory by multiple processors.

Please remove NIST / Meeting x2 from the Travel expense list.

Done.

D. Equipment

Please itemize each item that is projected to be purchased, upgraded or replaced, and provide a detailed breakdown of all costs. Itemize by Brand and model. Provide a detailed methodology and computation for costs.

See Appendix: Equipment and relation to Milestones

Please justify the rational for these purchases, upgrades or replacements in year 3 with respect to the technical project goals.

Year three equipment purchases are expected to be light, but given the need to upgrade, and expand our existing capabilities as our software base becomes more sophisticated, we have numerous situations where we must upgrade and add hardware capabilities so as not to spend precious time optimizing our software when we are focusing on demonstration of principals, not production software tuning.
A specific example is our no cost upgrade of our SGI systems by scavenging PC disks (recall we have the same disks in all of our systems in anticipation of this kind of reallocation of hardware resources). We need shared memory regions of as large as 100 gigabytes of memory. Such large memory allocations are made on swap disks, not hardware memory. We have configured a no cost RAID for the SGI boxes using PC parts as we have shifted our development requirements to SGI and can now program in very large memory environments using fast RAID memory disks (as opposed to RAID filesystems).

F. Subcontractors

Please explain the need for miscellaneous subcontractors to perform this work.

Prof. Cox and Prof. Karron have picked the best students in their classes to work on this project. As we don't yet know who we will pick for Year 3, we wish to reserve these slots and when we find the candidate for the slot, we will forward their CV's to ATP for approval in advance.

Please explain in detail the technical work that will be done and relate this back to the original R&D plan in the proposal.

We have found student graphics programmers can be more productive, put in more hours, and bring new insight to our project than overpaid faculty graphics programmer working part time and using their propriety graphics code. Given that the PI provides close supervision of the programming effort, students can be effectively managed and provide valuable contributions to this effort. The technical effort we expect from our student graphics programmers is the development of the FLTK (Fast Light Tool Kit, a freeware GUI package) for our special applications and needs (Shared Memory, large 64 bit pointers, unusual I/O devices such as sterio and torque balls).

G. Other

Please remove Axiom/Benedict from the budget.

Done.

Please move ATC Consulting to Subcontractors category and provide the revised 1262, sole source justification, description of work and relevance to the technical goals of the project.

Removed.

This ends the questions posed by ATP. Support material follows in the Appendix to follow.

APPENDIX

SGI Letter re: Late Billing for Equipment

-----Original Message-----
From: dr d b karron [mailto:karron@casi.net]
Sent: Monday, February 10, 2003 2:53 PM
To: 'Stacey Walker'
Subject: RE: Old E-mail harassing SGI for invoices

Would it be too much trouble to put this on letterhead for our auditors?
-----Original Message-----
From: Stacey Walker [mailto:staceyw@sgi.com]
Sent: Monday, February 10, 2003 10:49 AM
To: 'karron@casi.net'
Cc: Stacey Walker
Subject: RE: Old E-mail harassing SGI for invoices

Hi Dr. Karron,

Let me start by apologizing on behalf of SGI for the inconvenience and frustration this situation has caused.

Purchase Order # 2001015 was booked by SGI in Jan 2002. When the order was booked in our system there was an internal booking error that inadvertently billed SGI as opposed to Computer Aided Surgery Inc. When you called SGI for an invoice there was no receivable for your company because it was sitting on an internal SGI account. The credit analyst at the time was unaware of the booking error and had no visibility to your order or an invoice. SGI has since made a computer change which made the error even less visible. It wasn't until recently the error was caught and the order was credited and rebilled to generate the invoice to your company. Outstanding invoice 3010300 dated 24-Jan-03 has been generated in the amount of $30726.15 which includes $234.65 in freight.

PO# 2001029 was received at SGI for booking 6-28-02. Our records show we shipped the product 8/21/02 after resolving what appeared to be credit issues. When the order was released for shipment the billing hold was not released so the invoice did not generate. Once we discovered this issue the billing hold was released and the invoice generated a month later. Invoice 3010036410 dated 09/27/02 generated in the amount of $43727.40. I believe there have been several payments made against this order so the current outstanding balance is $34000.00.

I hope this helps explain, but does not excuse, the errors and issues that transpired with your orders. Your business is valuable to SGI and we look forward to working with you to come to a speedy resolution to the outstanding invoices.

Should you need anything further from me please let me know.

Sincerely,

Stacey Walker

CV's and Resumes

Scott Myles Albin MD (expected 2004)
SSN 075-56-4525 / DOB 5/20/1975 – US Citizen
157 Hills Beach Road Apt. 3C, Biddeford ME 04005, (917) 951-1610 scottalbin@yahoo.com

Education

BS, Major in Biology, Minor Spanish from Binghamton University 1999
MD (Expected 2005) Second year medical school at the University of New England

Professional Experience:

Laparoscopic surgical technician for two and half years prior to medical school. My duties included the maintenance of video and surgical instrumentation for all client surgical services that used video assistance in their operations.
Consulting computer technical support for several MD surgeons/clients.
President of the 'Surgical", the Jewish student organization at my medical school.
Teach medical Spanish to my classmates.

MEMBERSHIPS:

National treasurer for the Student Association of Surgeons.
National Society of Surgical Technologists , AAAS

PRESENTATIONS:

Endoscopic and Laproscopic surgical technology for Computer Scientists:Lecture/Demonstration for Prof. Karron's Bioinformatics class at CCNY Fall 2001

ANTONIO S. PAHATI
330 E38 St. Apt. 24E, New York, NY 10016 U.S.A.

EDUCATION

MBA - Philippine Christian University, 1982, Manila
BSC - De La Salle College, 1959, Manila Accounting Major, Graduated "Magna Cum Laude "
Various Management Training Seminars (more than 50)
Various Computer Training and Programming Courses. Skilled in programming relational X-based applications extensively used in business. (GL, Inv, A/r etc)

PROFESSIONAL EXPERIENCE

1986 – 1996 Professional Manager with Pt. Duta Anggada Realty in Indonesia, a public company engaged in development, design,construction, marketing and managing real estate projects. At latest count the inventory of properties was estimated at 5 million square feet. Positions occupied (as an ex-patriat) during this period were, Finance manager, VP-Group Controller, VP Business Development and Corporate Planning. Acted as in-house Consultant to the President and major stockholder.
1978 – 1984 President & CEO of PCIBCard - a local credit card operation owned by PCIBank, one of the, bigger banks in the Philippines .
1957 – 1977 FNCB Finance, Manila Philippines - VP Marketing Philacor - Local Westinghouse Manufacturing Franchise - Vice President for Credit and Collection Elizalde International - International Trading Company and manufacturer of Local Wines and rope. Procter & Gamble (Philippine Manufacturing Company) - Supervisor IBM Unit, Manager, Sales Accounting.
acquisition of USA Assets, exercises function of Group Controller and Administrative Officer. Moved to New York in 2001, maintaining a consultancy relationship with the same company on a retainer basis.

ROBERT G. WINE
251 East 51st Street - New York NY 10022 (212) 758-4762 bwine@acm.org

Career Objective:

Software and Network Project Manager with hands-on technical responsibilities.

Summary of experience

Extensive management experience in software and data communications including: Software Project Management, Product Design, Development, Research, Deployment, and Testing.
Developed mission critical commercial products including: Ticketron machines, Tape query system, ATM machines, medical data retrieval systems, and a FORTRAN software compiler.
Worked at several high technology software development companies as lead technologist to investigate, test and provide risks management for the deployment of new technology.
Broad knowledge includes: project management, software, hardware, networking, web development, and current Internet technologies. Excellent communication skills and team leadership including responsibility of mentoring.
Used many languages (VB(A), C, Fortran, Assemblers, etc.) and has worked with many technologies including SQL server, MS Exchange, Web and Internet communications, email, etc.

Previous Positions

NYU Rusk Institute (2001 – present)
Manager -- Managing the development of several Medical Web sites.
Isogon Corporation (1997-2001)
MIS Projects Manager – Responsible for management, development and integration of corporate systems at a software development firm that produces cross platform systems for software asset management. Network architect and provides internal system consulting for product development. Managed a team of 4 in upgrading the corporate Web site using Netobjects fusion, ASP, perl, including online web support services specific to customers, managed the implementation of Sales/Marketing (Gold Mine) and Service request systems (HEAT) and upgrade management of infrastructure to Microsoft Exchange Server, and technical infrastructure upgrades of T1 access and fiber optic 100MB switches.
PCSI, Inc. (1993–1997)
Senior Consultant – PCSI is a Microsoft (MS) Solutions Partner specializing in Back Office and Client-Server applications. A Microsoft Certified System Engineer who provided clients with consulting services on MS SQL Server, MS Exchange Server, Windows NT Server and Networking. As a consultant he designed and implementing Client-Server systems and client applications, SQL Servers, deployment of corporate MS Exchange email applications, NT Servers and Internet connections.
Developed applications for various clients, including a major communications company, medical firms, and a major real estate firm using VBA, Access, Paradox and SQL. Designed, for a medical care firm, a client/server system featuring optimization of data transferred over their wide-area network. Consulted on SQL design and optimization, designed specialized mail subsystem on a specialized backbone and provided Windows NT Server tuning and setup.
The Irons Group, Inc. (1989–1992)
Vice President – Responsible for product development and developed many systems and add-on products for the Paradox database system. Two major add-on products are Query 9-Track/3480, providing query-by-example access to mainframe and minicomputer data on tape media, using C, assembler and Paradox database.
Mastersoft Corporation (1982–1989)

Manager -- Projects include: Medical services company: Provided analysis, enhancement and development of a medical application using high-resolution graphics for computed thermography scanning of the human body. Educational Services Company in the design and development of a scheduling system for teachers and classes as well as an attendance tracking system. Manage the software development for an Automated Teller Machine (ATM) involving microcomputers, networking and communications for a major New York bank. Project management and software development for automated robotic retrieval systems and automated factory systems. Used C, Pascal, paradox, and various assemblers,

Advanced Computer Techniques, Corp. (1976–1981)

Software Project Manager –Managed a project to port a FORTRAN 77 Compiler for a military computer and developed the code generator. Designed a re-targetable Assembler for a military project. Designed and implemented a large mainframe database project (4.5 GB) for a government agency. Project leader for a major foreign bank's design and implementation of a current accounts database using Pascal, Cobol, Fortran and assembler.

Chase Manhattan Bank, N.A. (1975-1976)

Project Manager –Designed and implemented a processing system to analyze Multinational and Domestic Relationship Profitability using a FORTAN time-sharing service.

Ticketron, Inc. (1972-1975)

Software Manager –Developed intelligent microprocessor software for Ticket Vending applications. Managed the upgrade design and implementation of OTB Track Interface including I/O, communications drivers and operating system. He implemented on-line terminal software including system executive for the Lottery System. Used Fortran and assembler.

Data Dimensions Inc. (1970-1972)

System Analyst –Designed developed and implemented a business applications system for cost accounting, inventory control, order processing and accounts receivables in Cobol.

Education

Graduate Mathematics at Indiana University
Industrial Management at Polytechnic Institute of Brooklyn
BS degree in Mathematics from the City College of New York

Certifications

Microsoft Certified System Engineer
Microsoft Certified in MS SQL Server and Networking and MS Exchange
ICCP–CDP

Teaching and professional activities

Past Chairman of the New York Chapter of ACM
Association for Computing Machinery (ACM) National Lecturer and Professional Development Lecturer
Judge: School Science Fairs 1988-90 for New York Academy of Sciences
Past Member of DP Advisory Board of New York City Technical College
Lecturer to various ACM chapters, DPMA, New York Academy of Sciences, and computer user groups
Presented Professional Development Seminars for ACM chapters

Reginald Peralta, MA

Job description

Mr. Peralta is a former students, just now graduated with a masters, of Dr. Karron. He helped designed the CASI web site and did system and network administration, and programming support. Regner did a lot of experimental programming and research. He tested software tools & complicated user input/output to see if it could support large graphics and graphics analysis programs and then installed/supported its use for other CASI programmers. He also assisted Matt Rothman with his job duties whenever possible

Regner Peralta

1750 Montgomery Ave. #1B, Bronx, NY 10453
(917) 886-5432 Regner_P@hotmail.com

OBJECTIVE: To obtain a full time position in the IT solutions industry.

EDUCATION

The City College of The City University of New York, New York, NY
Master of Science in Computer Science - December, 2002 - GPA: 4.00 / 4.00
B.E., Summa cum Laude, Electrical Engineering - June, 2000 - GPA 3.87 / 4.00

COMPUTER SKILLS

- **Operating Systems:** UNIX (Solaris, HP-UX, AIX), LINUX, OS/2, Win32
- **Programming Languages:** C, C++, Java, and Visual Basic
- **Internet Technology:** HTML, JavaScript, XML, PHP
- **Databases:** MySQL, MS Access

EXPERIENCE

Computer Aided Sugery, Inc. — New York, NY
Student Intern — Sept 2002- Present

- Designed, developed, and tested Java application for automated graph displays.
- Designed, installed, and maintained data in MySQL database.
- Aided in the network design, installation, and testing.

IBM Corporation; — Austin, TX
Software Intern, Software Group, Bank Branch Transformation; — June 2002 - August 2002

- Tested computer software to find glitches, bugs, and other defects.
- Developed a Java tool used to automate the testing of this software.
- Performed system installations of the client and server software which included installation of the Operating (OS/2, Win 2K/Me, Redhat Linux) and configuration of the server (DNS, DHCP, Firewalls, etc.).

Telcordia Technologies; — Piscataway, NJ
Software Engineer, NGN Team; — June 2000 - August 2001

- Implemented and tested telecommunication features for NGN class 5 switch in C/C++.
- Develop UNIX TCL/TK scripts to simulate external devices to test software.
- Complied with software quality standards throughout development process.

IBM Corporation; — Poughkeepsie, NY
Summer Intern, S390 Division, Service and Recovery Department; — June 1999 - August 1999

- Tested diverse service and recovery scenarios for various configurations of FICON cards.
- Created daily reports on progress of testing.
- Installed fixes and upgraded software as it became available.

The City College of New York; — New York, NY
Windows NT Network Administrator, Office of Student Affairs; — Jan. 1999 - June 2000

- Configured user accounts, e-mail accounts, and network settings.
- Performed hardware and software upgrades, data backups, and other administrative tasks.

IBM Corporation; — Poughkeepsie, NY
Summer Intern, S390 Division, Service and Recovery Department; — June 1998 - August 1998

- Designed and supported software tools to automate testing on System 390, using REXX for OS/2 and VM.
- Designed and supported tools to decode strings of computer output, and to present them in a human-readabl

EXTRA-CURRICULAR ACTIVITIES

- Tau Beta Pi Engineering Honor Society, Inducted 1998
- Member of the Society of Hispanics Professional Engineers (SHPE)

Yehoshua Y. (Josh) Zeevi, PhD

Affiliations

Techion
Professor

Harvard University
Visiting Lecturer

Columbia University
Research in Medical Image Analysis

City College of New York
Teaches Image Analysis Class

Biography

Yehoshua Y. Zeevi was born in Israel and is a US Citizen. He received the B.Sc. degree in Electrical Engineering from the Technion, in 1965, the M.Sc. from the University of Rochester N.Y., in 1967, and the Ph.D. from the University of California, Berkeley, in 1972.
From 1968 to 1971 he was an NIH Fellow in the Electronics Research Laboratories of the Department of Electrical Engineering, U.C. Berkeley. In 1971 he was a Guest Scientist at the Lawrence Berkeley Laboratory, U.C. Berkeley, and from 1972 to 1974 a Vinton Hayes Fellow at the Division of Applied Sciences of Harvard University, where he has been a regular visitor. During the period of 1972-1974 he was also a Fellow-at-large of the MIT-NRP program. In 1974 he returned to the Technion where he is the Norman and Barbara Seiden Professor of Computer Sciences in the Department of Electrical Engineering, with a secondary appointment in the Department of Biomedical Engineering. He was a Visiting Professor at MIT on a joint appointment with Harvard University (1980-1982), and at the CAIP Center of Rutgers University, and Harvard University (1989-1991). He was also a visitor at various universities and research centers for shorter periods, including a Senior Visiting Scientist at the NTT Research Labs in Yokoska, Japan, and SCEEE-AFOSR Fellow at the U.S. Air Force flight simulators center. He has served on various Technion, national and international committees, including being a member of the Technion's Board of Governors (1993-1996; 1999-.), Technion Research and Development Foundation (1986-1989, 1999-.), Board of Bicora ("First") Foundation, executive committee of The 100 Club, and a Vice Chairman of the general assembly Academia Rodinesis (Stockholm, 1988-). He is a Fellow of the SPIE and of the Rodin Academy. In 1983 he received the Klien Research Award and In 1993 the Herschel Rich Technion Innovation Award. He was the Dean of the Faculty of Electrical Engineering, 1994-1998.
His research interests include image representation and understanding, visual communication, biological and computer vision, and medical technology. His work on the automatic gain control in vision and on superresolution led to the development of the Adaptive Sensitivity camer, by i Sight, Inc; a company devoted to digital imaging systems that mimic visual systems. His work of variable resolution was implemented in various technologies. In addition to *i Sight*, he is also one of the founders of *UltraGuide*; a medical technology company that develops real-time visual guidance systems for interventional ultrasound procedures. He is the Editor-in-Chief of the Journal of Visiual Communication and Image Representation, published by Academic Press, and the member of Editorial Boards of three journals. He is a co-editor of the books "Neural

networks-Theory and Applications" (with R. Mammone) and of "Signal and Image Representaion in Combined Spaces" (with R. Coifman), published by Academic Press in 1991 and 1998, respectively.

Current Research Interests:

Biological and Computational Vision. Visual Communication and Image Representation. Intelligent Image Acquisition Technology. Biological and artificial Neural Networks. Image Structure, analysis and understanding. Image representation by wavelet-type techniques. Biomedical Information Technology.

THESIS

1. Y.Y. Zeevi, ``Structural Functional Relationships in Single Neurons: Scanning Electron Microscopy and Theoretical Studies", Ph.D. Thesis.

BOOKS

1. R. Mammone and Y. Y. Zeevi (Ed's), ``Neural Networks - Theory and Applications" Academic Press, 1991.
2. Y. Y. Zeevi and R. Coifman (Ed's), ``Signal and Image Representation in Combined Spaces", Academic Press, 1998.

Subject: My research activities at CASI

Dear Dan,

I am writing at your request to outline, in short, my research involvement with CASI.

About a year ago we met for the first time while we were both teaching at CCNY and have started to explore research topics of mutual interest. Consequently, I have been introduced to your work on DMT, and reciprocated by introducing you to my work on BSS. As it turned out that we have several topics of mutual interest, and of tremendous scientific potential insofar as the potential for combining them in medical applications, we started to collaborate under the umbrella of CASI, where I agreed to defer compensation for my research effort to "better days"--when joint grants will be submitted and sponsored.

In this spirit we decided to go together to the ISBI in Washington D.C., and to meet with representatives of NIH and other agencies, to explore potential sources of support for our joint scientific research projects. You, in turn, agreed to cover in part my expenses related to participation in this International Conference, and so you did.

I am looking forward to continue my involvement with CASI, and hope that the funding situation will permit compensation for my effort.

Regards,

Josh

Nicholee Wynter

1132 East 222 Street (718) 231-7031
Bronx, N.Y. 10469

Nicholee Wynter

Objective

To obtain a position that utilizes my skills and educational background.

Experience

Jun '02' – Present Computer Aided Surgery New York, NY

Temporary Assignment

Nov '01' - Jan '02' BMW Management White Plains, NY

Accounting Assistant

- Bank Reconciliation for clients.
- Ensure that clients' bill are paid on time.
- Cut checks to pay clients bill.

Temporary Assignment

Jan '01' - Jun '01' Schildwacther Oil Company Bronx, NY

Accounts Payable Manager & A/R Assistant

- Entered payments received from customers.
- Entered invoices to be paid to customers.
- Cut checks for each invoice entered.

Aug '99' - May '00' Register.Com Inc. New York, NY

Accounting Clerk

- Reconciled and rectified discrepancies found on invoices.
- Ensure proper payment to vendors.
- Responsible for daily check deposits.
- Assisted in the depreciation schedule.
- Responsible for daily Bookings Report.

Education

2000–present Westchester Community College Valhalla, NY

- A.A.S. degree in progress

Computer Skills

Excel, Access, Microsoft Word, Great Plains, Quick Books and Mas 90.

Interests

History & Religion.

Julia Anne Case

10 Pheasant Lane, New Milford, CT 06776, Email - julie@MageNet.com,
http://julie.MageNet.com
Phone: (860) 354-2774 / Mobile: (860) 608-8325

Objective

To obtain a position in programming or system administration that will both challenge my skills and provide room for growth and advancement.

Work History

Valley of the Mage Consulting, New Milford, CT *August 2001- Present*

Self employed. Web hosting and application design. Contract work for programming and systems administration. Firewall and gateway design.

NSI Web, Farmingdale, NY January 2001-July 2001

Systems Administration and database management. Systems worked on included FreeBSD, Linux and Windows 2000. PHP programming for clients.

MICROS Systems, Beltsville, MD April 1998-December 1998

Programmer
Programming projects involving Visual Basic, Visual C++ and Perl.
• Interface to systems software written in Visual C++.
• Extensive scripting in Perl.

Webworqs, Silverspring, MD *October 1996 –March 1998*

Programmer/System Administrator
Technical research for new technologies in the wireless LAN area. Programming projects involving Visual
Basic and Visual C++.
Projects included
• Point of sale for a small grocery store (Visual Basic).
• Relationship Management software maintenance (Visual Basic).
• MS SQL server access application (Visual C++).

VDot.Net Inc., Huntington, New York *April 1996-October 1996*

System Administrator
Responsible for the setup and daily administration of all aspects of an Internet Service Provider. Administration includes Technical Support for customers, technical maintenance of systems running under
Linux Operating System, custom programming of Linux Systems, and monitoring systems on an ongoing
basis.
Projects include:
• Installation and setup of servers for World Wide Web, Internet mail, FTP, and Domain Name Services.

• Setup of dial-up account support for use with internet access accounts
• Setup and maintenance of custom user database interface

Merck & Co. West Point, Pennsylvania ***May 1994 -April 1996***

Programmer/Analyst Responsible for the day to day monitoring and reporting of a custom database interchange using FTP
between approximately 3,000 sales representatives and one custom database run on a mainframe. Monitored
the transfer of information and reported on success rates of transfers.
Projects included:
• Development of custom SQL Server application for tracking transmission of data
• Developed and implemented a custom FTP application using MS-Access and MAPI to incorporate data
transfer to and from 3,000 remote sales representatives.
• Developed and implemented a custom MS-Access interface to create flat e-mail files from database data
and vice versa.

Millennium Technologies, Inc. Lansdale, Pennsylvania ***September 1992 –May 1994***

System Administrator/Programmer/Analyst
Responsible for the administration of a Windows NT network, including the installation and integration of
new hardware and software as well as routine tasks. Various Programming tasks included database
management in dBase III+, developing a hypertext system using Visual C++, and various communications
applications using RS-232 serial ports and fossil drivers.
Projects Included:
• Providing business solutions for Microsoft Products as a Microsoft Solution Provider.
• Design and development of a Hypertext system for use on CD-ROM that takes advantage of the Win32
architecture. This was to be included for release on Sony's hand held CD-ROM unit prior to the cancellation of the hardware by Sony.
• Designed and implemented a Point Of Sale system using dBase III+
• Back propagated neural nets and genetic algorithms for use in artificial intelligence.

Quaker Alloy **Myerstown, Pennsylvania** ***September, 1990 -August, 1991***

Robot Operator Responsible for the operations and programming of an industrial robot in a steel foundry environment.

Eastern Lebanon County High School Myerstown, Pennsylvania ***August, 1988 -September, 1989***

Computer Room Aide
Responsible for the teaching of general computer skills and various applications on Apple IIgs systems for
grades 9 through 12. Also monitored and assisted students involved in the TELLS program (remedial math
and reading skills).

United States Navy ***June, 1985 - May, 1988 and August, 1991 September, 1992***

Electronics Technician

Responsible for the maintenance and operation of various electronic equipment.

Matthew Bart Rothman
CASI Job Description

Matthew Bart Rothman

555 West 151st Street, Apt 67-4
New York, New York 10021
Voice: 917-715-6903

08/02 – Present: Lead Graphics Programmer

Research programming, Integration of research programs, Optimization & efficiency improvements in programs including testing & portability of code to common supercomputer clusters and grid platforms,
System Administration (SGI IRIX, LINUX, Windows) , Network Administration, Web Administration & Design, System Analysis, User requirements analysis and user-interface design, Physical Plant wiring & design, Programming support for other programmers & research scientists, Co-ordinate technical details of CASI outside collaborations, Assist in technology (hardware & software) budget projections and justifications, Technical support for accounting (bookkeeping and auditor) activities such as PC support (help desk type stuff like printing, installing programs) and technology inventory management, Assist in research publications

06/93 – 08/99: Vice-president

- Credit Suisse First Boston, Mortgage Research & Trading
  - Worked on improving efficiency of CMO model
  - Econometric modeling
  - Ad-hoc Complex deal support & modeling
  - Project management
  - Technical support for other econometric modelers
  - Budgeting and business planning.
  - Provided advanced software tools and project management software to research department and other programmers.

03/93-06/93 – Associate Analyist

- Prudential Securities, CMO Structuring & Mortgage Research.
  - Maintained & Enhanced CMO model, i.e. Improved CMO parser, Added ability to handle floaters with margin calculations.
  - Reversed & Structured Asset-Backed Deals and fundings.
  - Converting MBS and Whole loan data from VAX/EMS to UNIX/ORACLE on a IBM RISC 6000 workstation.
  - Project Manager for 2 programmers to support Conversion and Maintenance of these tasks.

6/91-03/93 Consultant

- Nomura, Mortgage research.
  - Expanded ORACLE CMO database from about 200 deals to over 1900 deals.
  - Created Analytical systems and reports to structure Whole Loan Deals.

- Reverse-Engineered whole loan CMO deals.
- Improved CMO model to run 10 times faster, by Algorithmic Changes and Faster Unix Workstations.
- Ported 040 and OAS software from SUN to IBM and HP workstations.
- Technical Support for Mortgage Research including:
- Hardware & Software decisions
- Hiring and Supervising Additional consultants Unix System Administration and tuning for SUN, IBM and NP workstations.
- Solving Programming Problems on C, SQL, Unix shell, tools or internals.

9/87-6/91 Data Base Administrator - Assistant Vice President

- Citibank, North ~American Investment Bank, Fixed income research
  - Installed Oracle server on VAX/VMS cluster with sun workstations as clients. Database supported over 70 users on VAX/VMS cluster and 5-10 users over the network.
  - Designed logical and physical schemas.
  - Solved Multi-user locking problems.
  - Supervised programmer, operator and a consultant.
  - Responsible for C access and update routines for a large Fixed income database including Mortgage Back securities, Treasuries ,Options, Canadian and Tokyo securities.
  - Oracle DBA work including timing queries and updates, backups and Client/Server database access between DEC VMS and SUN workstations.
  - Nightly production cycle -
    - Re-designed production cycle using embedded SQL in C to increase reliability and speed.
    - Fixed most bugs which occur during the production cycle in analytical reports such as OAS and Treasury Rich-Cheap models.
    - Supervised and trained an operator and programmer to help run production cycle.
  - Converted VAX/VMS programs to UNIX programs Resulting in savings of over $ 300,000 for Citibank per year.
  - Converted IBM mainframe FOCUS data and programs into DEC VMS & Embedded SQL in C programs. Citibank saved over $ 500,000 per year as a result of this conversion.

8/86-9/87 Programner/Analyst Capital Markets

- E.F. Hutton
  - Created treasury note/bond analytical reports using C,SQL and R1'dS on DEC VMS.
  - Nightly production cycle, responsible for all major reports and graphs for trading floor.
  - Purchased and supported all P.C.'s and peripherals for Capital Market group (over 25 new and existing systems).
  - I created the first comprehensive Hardware/Software inventory.
  - Supervised a operator to run production cycle and do P.C. support work.
  - Database work included converting Dbase III programs into C programs under DEC VMS with RMS database access routines, and some INGRES SQL programming.

8/85-8/86 Project Manger

- Merrin Financial.
  - Risk Arbitrage portfolio trading system written in
  - C, on a 3com LAN with virtual windows, on-line help,
  - tracking of net positions, order status and distribution
  - to client portfolios through an Advent portfolio interface.
  - Micro-Mainframe links to .ADP, Walsh-Greenwood and the first voice synthesizer Quotron-P.C. link for a blind client.
  - Clients included Junction Partners, Soros Money Mgmt., Bank Paribas.
  - Supervised Several Programmers

7/84-8/ 85 Micro Computer programmer

- Shaw Data Services
  - Developed full, test (BETA) version of a stock portfolio system including programming, design and presentation of projects to senior management.
  - Created Mouse—driven interface to Shaw's mainframe portfolio system.
  - Computer consultation and short-term software patches
  - for Shaw clients including Lotus 1-2-3 reports and automated downloads from Shaw' s mainframe systems.
  - Automated Shaw's personnel department with a program that lasted for over 4 years.

TECHNICAL:

- Operating Systems - SUN UNIX,DEC VMS, MS-DOS, Windows
- Oracle Tools - Forms, Reports
- Web Site development including HTML and CGI-BIN PERL scripts
- Databases – SYBASE, ORACLE, INGRES, VMS RMS, DBASE II & III

BTRIEVE, DBC (reads & writes DBASE III files from C)

- Languages – C++,HTML, PERL, Java, Visual Basic, C, Pascal, FORTRAN, AWK, DEC DCL, UNIX Shells

Education:

City University of New York,
Baruch Graduate School of Statistics 24 credits completed towards a M.S. in Computer Science (9/84-8/85)
State University of New York at Albany
B.S., May 1983 - Major: Economics, Minor: Computer Science. Series 7 course from New York Institute of Finance completed.
Honors include National. Merit Scholarship Finalist, 24 College Credits awarded from College Level Equivalency Exams.

Richard M. Satava, MD FACS
Professor of Surgery Department of Surgery University of Washington Medical Center (Seattle)

Professor Faculty Positions:

University of Washington, Professor, 2002 - present.
Yale University, Professor, 1997-2002.
Uniformed Services University of Health Sciences, Bethesda, MD, Professor, 1996 - present.
Uniformed Services University of Health Sciences, Bethesda, MD, Clinical Associate Professor, 1992-96.
Silas B. Hays Army Hospital, Monterey CA, Teaching Instructor, 1987-93.
Eisenhower Army Center, Fort Gordon, Georgia, Teaching Staff, 1983-87.
University of North Carolina (Wilmington), Clinical Instructor, 1981-83.

Education:

Fellowships: Research, The Mayo Clinic, 1971-72.
Residency: The Mayo Clinic, 1969-74.
Internship: The Cleveland Clinic, 1968-69.
M.D. Degree: Hahnemann University, Philadelphia, 1968.
Board Certified: American Board of Surgery, 1979; recertified, 2000.

Clinical Interests:

Gastrointestinal surgery.

Research Interests:

Robotic surgery, virtual reality, surgical simulation, objective assessment of surgical skills.

Selected Publications:

Pearson AM, Gallagher AG, Rosser JC, Satava RM. Evaluation of structured and quantitative training methods for teaching intracorporeal knot tying. Surg Endoscopy. Vol. 16:130-137, 2001.
Satava RM, Jones, SB. Surgical robotics: The early chronicles, a personal historical perspective. Surg Laparoscopy Endoscopy and Percutaneous Techniques. 12(1):6-16, 2002.

Biosketch Narrative

Richard Satava, MD FACS, is a Professor of Surgery at the University of Washington Medical Center and a Special Assistant in Advanced Technologies at the US Army Medical Research and Materiel Command in Ft. Detrick, MD. Prior to this he was a Professor of Surgery at Yale University, and had a military appointment as a Professor of Surgery (USUHS) in the Army Medical Corps assigned to General Surgery at Walter Reed Army Medical Center.
His undergraduate training was at Johns Hopkins University, medical school at Hahnemann University of Philadelphia, internship at the Cleveland Clinic, surgical residency at the Mayo Clinic and a fellowship with a Master of Surgical Research at Mayo Clinic.
He has served on the White House Office of Science and Technology Policy (OSTP) committee on Health, Food and Safety, and was a program manager at the Defense Advanced Research Projects Agency (DARPA). He is currently a member of the Emerging Technologies, Resident Education, and Regents Committee on Informatics committees of the American College of Surgeons (ACS), has been the past President of the Society of American Gastrointestinal

Endoscopic Surgeons (SAGES), president elect of the Society of Laparoendoscopic Surgeons (SLS) and is on the Board of Governors of a number of surgical societies, editorial board of numerous surgical and scientific journals, and active in numerous surgical and engineering societies.

He has been continuously active in surgical education and surgical research with over 150 publications and book chapters in diverse areas of advanced surgical technology to include Surgery in the Space Environment, Video and 3-D imaging, Telepresence Surgery, and Virtual Reality Surgical Simulation.

During 20 years of military surgery he has been an active flight surgeon, an Army astronaut candidate, MASH surgeon for the Grenada Invasion, and a hospital commander during Desert Storm, all the while continuing clinical surgical practice. While striving to practice the complete discipline of surgery, he is aggressively pursuing the leading edge of advanced technologies to formulate the architecture for the next generation of Medicine.

Peter Ross, PhD

Curriculum vitae

PETER MAIMON ROSS, PH.D.

GENERAL: US citizen. Married, one child (1989)
LANGUAGES: Fluent French
ADDRESS: 415 CENTRAL PARK WEST *9D, NEW YORK, NY 10025-4812
PHONE: (212) 665-5126 (OFFICE) (877) 823-1066 (ELECTRONIC ASSISTANT/FAX)
E-MAIL: PROSS@BWW.COM

EDUCATION:

Yale University, New Haven, Connecticut. Department of Molecular Biophysics and Biochemistry. Ph.D.
University of California, Santa Cruz, California, Psychobiology Program B.A. Thesis & departmental honors

SUBSEQUENT TRAINING AND POSITIONS:

1981 -1989 Assistant Professor, The Rockefeller University, New York, New York.
1989 - 1993 Visiting Professor, CIBA-GEIGY Pharmaceuticals, Ardsley, New York.
1989 – 1994 President, Skin Tamer Corp, New York, NY
1993 -1995 Director, Pediatric Molecular Genetics, Maimonides Medical Center, Brooklyn, New York.
1993 - 1994 Research Scientist, Department of Microbiology and Immunology, SUNY Health Science Center at Brooklyn, New York.
1995 - 1999 Research Scientist, The American Health Foundation, Valhalla, New York.
1999 - present Principal, MedReply, Inc, New York, New York.

United States Citizen

Objectives/Interests:

Research in parallel computing, including both parallel algorithms and parallel programming environments.
Research in in digital film/video software and biocomputing.
Substantial experience in designing and implementing software projects, in both academic and commercial settings.

Education:

Graduate study (Molecular Biology), New York University, September 1995 - June 1996 Skirball Institute
Ph.D. (Computer Science), New York University, June 1988
Undergraduate study (Molecular Biology), City College, September 1994 - June 1995
B.Sc. (Math, Computer Science), Hebrew University, Jerusalem, June 1981

Experience:

Project Supervisor / Software Engineer, September 1999 - May 2002

Visible World, New York - Designed and programmed various modules for customization of video streams based on viewer profiles. This included creative tools (allowing editors to specify how to vary the stream based on profile), and server-side programs (supporting the streaming of video based on the editing instructions). Programming was in Java and C++.

Project Supervisor / Software Engineer, February 1997 - September 1999

Montage Group, New York - Designed and programmed a film server for the Philips Virtual Datacine.
The film server handled playback and processing of high quality digital film images at up to 400 megabytes/sec. Programmed the film server in C++ on SGI IRIX.

Project Supervisor / Software Engineer, February 1990 - September 1994

Montage Group, New York - Designed and programmed a video server for Montage, one of the first nonlinear digital video editors. The video server handled capture of video/audio from analog sources, variable speed digital playback with effects, and maintenance of data on captured material. Programmed the video server in C on Windows; later ported it to the IBM PVS supercomputer and the Digital Alpha.

Project Supervisor / Software Engineer, October 1988 - February 1990

HLH Associates, New York -Designed and supervised implementation of Market Close and Sportswire, two systems used by the Prodigy videotext service for automated content generation. These systems scanned wire stories from the Dow Jones, UPI, and Sportsticker services, parsed and stored relevant data in database files, and automatically generated several hundred Prodigy articles each day from the stored data.

Full-time Research Staff, September 1986 to June 1988

NYU Ultracomputer Project, New York University -
Developed and maintained the ZLISP system, a portable parallel LISP environment for shared memory MIMD supercomputers.

Ph.D. Candidate on Fellowship, September 1981 to June 1986

Courant Institute, New York University -
Taught advanced undergraduate course in artificial intelligence programming.Teaching assistant on several graduate courses. Research assistant on NYU Ultracomputer project.

Languages/Systems:

C++, Java, LISP, 80x86 assembler, Windows 2000/NT, various Unix flavors.

Publications:

The Group Lock and its Applications, Jour. Parallel & Distr. Comp. April 1991.
ZLISP - A Portable Parallel LISP Environment, Ph.D. thesis, NYU, May 1988.

***Richard Bucholz, MD** F.A.C.S.*
Professor of Surgery Division of Neurosurgery Director Jean H. Bakewell Section of Image Guided Surgery E-Mail: bucholz@musu2.slu.edu

Academic

B.S.: Yale College, 1973 M.D.: Yale University School of Medicine, 1977 General Surgery Internship: Yale New Haven Medical Center, 1977-78 Neurosurgery Residency: Yale New Haven Medical Center, 1978-83

Clinical Interests:

Neuroncology; epilepsy surgery; skull base surgery; stereotactic radiosurgery and radiotherapy; reconstructive techniques using computer-generated implants.

Current Clinical Research:

Multiple protocols are under investigation by the Jean H. Bakewell Section of Image Guided Surgery. In conjunction with Dr. Henderson, research is being performed on thalamic stimulation for the control of tremor. Another clinical research project involves the use of gene therapy in the management of newly diagnosed glioblastoma multiforme. A third research protocol utilizes an automated deformation technique to select the target for pallidotomy in the management of patients with Parkinson's disease. Other areas of research include stereotactic radiosurgery using frameless techniques.

Current Bench Research:

Research is being performed on new developments in the field of image guided surgery. Specifically, we are investigating the possibility of using surface contours to perform registration between a patient's anatomy and an image of that patient as depicted on either MRI, CT or PET scans. Another project involves the utilization of intraoperative ultrasound to track intracranial contents during the performance of image guided surgery. This research first addresses the error induced by brain shift, and secondly, proposes a solution to this error by updating preoperative high resolution studies with intraoperative low resolution ultrasound.

Other areas of research interest include the use of high order elastic deformations to match a cadaveric based atlas to the anatomy of a specific patient and carrying segmentations from that cadaveric based atlas to the patient in an automated form. Additional work is also being performed on the ability to percutaneously register the location of deep-seated skeletal elements using 3-dimensional ultrasonography.

Board certification:

- Diplomate, American Board of Neurological Surgery

Current position:

Professor of Surgery

Director, Jean H. Bakewell Section of Image Guided Surgery Saint Louis University School of Medicine St. Louis, Missouri

Clinical Staff appointments

- Saint Louis University Hospital
- Cardinal Glennon Children's Hospital
- Bethesda Memorial Hospital
- Deaconess Hospital
- St. Mary's Hospital
- St. Mary's Medical Center
- Lutheran Medical Center

Professional Society Memberships:

- American Medical Association
- St. Louis Metropolitan Medical Society
- Missouri Medical Association
- Congress of Neurological Surgeons
- Southern Medical Society
- St. Louis Surgical Society
- Missouri State Neurosurgical Society
- Society of Neurological Anesthesia and Critical Care
- American Association of Neurological Surgeons Pediatric Section Spinal Section Trauma Section Joint Section on Tumors Appointee, Joint Council of State Neurosurgical Societies Fellow, Stroke Council, American Heart Association
- Joint Section on Stereotactic and Functional Neurosurgery American Society for Stereotactic and Functional Neurosurgery World Society for Stereotactic and Functional Neurosurgery North American Skull Base Society
- International Stereotactic Radiosurgery Society
- International Society for Computer Aided Surgery

Honorary Societies, Honors and Awards:

- Fellow, American College of Surgeons
- Physician Recognition Award, American Medical Association
- Continuing Medical Education Award in Neurosurgery American Association of Neurological Surgeons
- Group Moderator, Image Guided Therapy Session. Robotics and Computer Assisted Medical Intervention Workshop. Bristol, England. June 22-26, 1996

Committee memberships

- Member, Radiology Chair Search Committee, Saint Louis University School of Medicine
- Member, Patient Services Committee, Saint Louis University Health Sciences Center
- Member, Joint Task Force on Stereotactic Radiosurgery of the American Association of Neurological Surgeons and Congress of Neurological Surgeons
- Member, Department of Neurology Review Committee, St. Louis University Health Sciences Center

- Member, Department of Otolaryngology Search Committee, St. Louis University Health Sciences Center
- Executive Council, Joint Section on Stereotactic and Functional Neurosurgery, American Association of Neurological Surgeons
- Member, DOB Physician Advisory Committee
- Co-Chairperson, Image Guided Procedures Subcommittee, Robotics and Computer Assisted Medical Interventions Workshop,Bristol, England
- Promotions Committee, Saint Louis University Health Sciences Center
- Editor, Neurosurgery Email List
- Editorial Board, NEUROSURGERY://ON-CALL
- Program Committee, First Joint Conference of CVRMed II and MRCAS III
- Executive Board, International Society for Computer Aided Surgery

Editorial and Journal review boards

- Editor-in-Chief, Computer Aided Surgery
- Ad Hoc Reviewing, Neurosurgery
- Ad Hoc Reviewing, Institute of Electrical and Electronic Engineers
- Editorial Board, Neurosurgery On-Call
- Editorial Board, Radiosurgery

Research Support:

Primary Investigator, "Sygen GM1 Therapy in the Treatment of Acute Spinal Cord Injury".

Editor-In-Chief, *Computer Aided Surgery* Developed World Wide Web Journal of Image Guided Surgery with John Wiley and Sons Publishing, New York, New York.

Primary Investigator, "Advanced Application of Image Guided Surgery".

Primary Investigator, "Prospective Open-Label Parallel-Group Randomized, Multicenter Trial Comparing the Efficacy of Surgery, Radiation and Injection of Murine Cells Producing Herpes Simplex Thymidine Kinase Factor Followed by Intravenous Gancyclovir Against the Efficacy of Surgery and Radiation in the Treatment of Previously Untreated Glioblastoma."

Primary Investigator, "Clinical Investigation of Deep Brain Stimulation for Treatment of Tremor Using the Medtronic Model 3382 DBS."

Grant Purchased Equipment to Project Milestone Relationship Detail

Introduction

This lists most of our equipment into functional categories, displays make/model number and describes how that equipment contributes to our milestones.
There is an overview section contains crucial information needed to understanding how our equipment choices were necessary and economically sound choices to accomplish our promised milestones.

Overview:

The PI has years of previous experience running research-computing facilities while he was working toward his PhD at New York University Medical Center. He also had many frustrating years writing software that had hardware requirements that exceeded the then available technology. Much of the early effort in computer aided surgery research at NYU Med Center was looking for optimizations to overcome financial and technology limitations of the computers of the late 80's and early 90's.

Correctness before Speed

This project main overall goal is to demonstrate correct results from reliable software (produces the same results for the same inputs consistently). After the results are verified, then the program is optimized (faster run time & ability to run on the cheapest possible hardware) to the extent dictated by economic factors such as programming costs for optimization, value of product to customers at each performance level and value of adding new features to product instead of optimizing slow but correct features in original product. Our goal is that we can do the DMT Graph Decomposition in real time for an interactive segmentation editor and

Validation Suite under Development

We are developing a validation suite to help the software development effort. Further, as we optimize the code for speed and the new applications opportunities that entails, we can verify the code during the debugging stage by ensuring that important DMT mandated properties are preserved.

First: Fast Hardware instead of Fast Software

We estimated our hardware needs based on projections of how much data storage and processing power is required for a correct DMT analysis of the Visible Human Project data. To the best of our knowledge, there was no way to calculate precisely how much storage and processing power is needed to do a fully correct DMT implementation until you create a correct or substantially correct DMT implementation and run it on sample human organ image data.

Correct Algorithms for Accurate Results before Software Optimization

Without a validated correct and complete DMT implementation we can not precisely determine equipment needs. The equipment budget estimation is based on a safety margin for slow but mathematically correct software running on fast hardware.

Factors considered in constructing our equipment request include:

- Equipment needed to process images for projects using different technologies attempting to get somewhat similar results.

- Crude Early estimations of how much computer power & storage DMT would need to run on an image of a typical large organ system. It is impossible to fully estimate this without implementing a computer program because there are millions of pixels in a human organ scan and this can result in over 100,000 distinct objects. We know that now based on our program but there is now way to do that calculation without an actual implementation! Therefore, you need to build a large margin of error into equipment budgets for research projects and hardware estimations get progressively more accurate as your software gets built.

Algorithm scaling metrics

- We expect that one finding of this project will be a scaling metric. This is a estimated linear estimate of the relationship between megabytes of pixels, an estimate of the image complexity (how many criticalities to map), and the number of gigabytes of intermediate memory required to process the graph, and the processing time needed per processor to generate a working graph.

Learning Curve will reduce incremental development costs

- Creating optimized (faster execution & running on cheaper hardware) implementations after successfully producing a correct (but slower) DMT implementation is much easier work then producing the original program. Since much of the hard mathematical work has already been done, you can usually create a faster version of the original program in 1/3 the time it took to create the original program.

Hardware dependencies

- We need to evaluate different hardware configurations and operating systems to evaluate the eventual properties of the algorithms as it is run in different environments. We will adjust our scaling figures with a coefficient for each of the tested processors and operating systems (Wintel, Linux, and IRIX).

Operating System Independence and Dependence

- Multiple hardware platforms are needed to run image-processing software purchased or downloaded from non-CASI sources. This is vital part of software verification. Many software packages for DICOM medical image processing only run on one platform such as PC or LINUX or SGI but not all 3!
- Expensive SGI hardware has many features to support high-end graphics programming projects. Buying SGI hardware increases hardware costs but decreases programming costs and time to complete our milestones
- Cheaper & More cost effective hardware (PC's) have higher programming costs but deliver more compute power per dollar. We used SGI heavily to develop a correct but slow version of DMT and are using PC's for the optimized version and for more compute power. The programming cost increase for using PCs is smaller for 2nd and 3rd year milestones (Optimizing an existing program is an easier programming problem then creating the first non-optimized version)
- We also need multiple platforms because we will have customers on multiple hardware platforms and need to test our software on the same computers our customers will be using.

Estimates of scaling metrics

Our preliminary estimates were reasonably accurate. Our first implementation of DMT was correct but required 36 hours to pre-process 1/5 of the VHP Female high-resolution human brain into a DMT tree. The other pieces of our system run interactively. See notes in 5th quarter technical report on this topic. If we produced medical equipment with this un-optimized code it would cost in the order of billions of dollars.

Lessons Learned

We now understand the problem well enough that we can get response times of a few minutes from our current hardware and a production version of our product will be in an acceptable range for medical applications. We have built sufficient infrastructure to develop, test and demonstrate the product to potential partners and customers but not enough facilities for a final production system. At the conclusion of this project, we should be able to draw up a budget for production system based on our development efforts. For example, we can estimate from our prototype software that if a 5-machine cluster produce 1 minute result, then project performance gains from adding machines to cluster for a potential customer or investor.

Summary and Conclusions

Based on the CASI-ATP funded infrastructure and software efforts to date we estimate we will be able to create an economically viable product with broad national benefit in 3-5 years.

Description of Infrastructure Requirements

Functional requirements for our equipment include

- Very fast computations
- Handle large programs with large in-memory data
- Huge disk storage needs
- Huge disk backup capability
- Reliable power
- Overall reliability for extended calculations
- Standard interchange of parts to allow flexible system reconfiguration.

We are anticipating using a grid / cluster approach. Both grid and clusters split a problem into multiple pieces which all run at the same time. This is called parallelization and means if a problem runs in 1 minute on 1 machine we can do the same work (excluding network overhead) in 1 second using 60 machines. Some of the differences between grid and clusters are:

- Speed of the connection between each machine being using to solve the problem (each machine in a grid or cluster is called a 'Node') . Cluster nodes have 10-100x faster connections between nodes.
- Cluster nodes are stripped-down cheap CPUs with memory and a fast network connection.
- Cluster nodes are stored in a rack with all the machines stacked next to each other. Grid nodes are usually separate machines running user programs at the same time as it is doing 'grid' work.

Supercomputer clusters are the most likely approach we will use as we approach production but we may also use a grid approach for customers who have excess compute capacity at their site. We also have the ability to form and test supercomputer clusters of computers in several different configurations. This flexibility is an important part to re-configure our machines in different ways to achieve each milestone promised in our grant proposal. All our disks are fast Seagate Cheetah X15 15,000 RPM very low latency 34 gigabyte[5] SCA[6] SCSI[7] and can be hot plugged in and out

---

[5] Seagate Cheetah X15: disks are very low data latency disks. A disk have high data capacity, but computer disks are limited by the rate that the disk can rotate the data under the disk magnetic heads to be read or written. By spinning the disk at very high speed, the average latency for random access of data is reduced. These line of disks have a 3.5 milisecond average latency as opposed to the slower 5 milisecond average latency of the Barracuda Disk line.

[6] SCA Single Connector Attachment: A single 80 pin connector supplies power, data, and grounding for a hard disk, as opposed to separate connectors for power, data, and disk lights, synchronization, and other standard disk functions. Hot Plugging means the disks can be removed and inserted (plugged) in a live system without turning off the computer. A type of disk drive connector that includes connection pins for the power cables as well as the data wires. The current version of SCA, called SCA-2, uses 80 pins and is frequently used for high-end SCSI devices.

[7] SCSI: Small Computer System Interface: A high quality disk inter connect standard, as opposed to IDE pc disk standard. A high-speed, system-level parallel interface defined by the ANSI X3T9.2 committee. SCSI is used to connect a PC to several peripheral devices using just one port. Devices connected in this way are said to be "daisy-chained" together, and each device must have a unique identifier or priority number. SCSI can be installed in an IBM-compatible computer as a

of any SGI Octane[8], SGI Indigo[9], PC Tower[10], PC Koolance[11], PC Raid Server (except for Fortra Raid[12] server, which uses much bigger but slower Seagate Barracuda disks). All our PCs have a common Supermicro[13] P4DC6+ Dual Xenon CPU motherboard model which can hold 2 CPU's each. Some systems have a full complement of 4 gig of Rambus[14] memory and 2 CPU; Some systems have minimal memory and only a single CPU. In emergencies we can and have scavenged parts from high end systems to keep low end systems supplied. I*n the same way that bilateral symmetry provides redundant kidneys, and lungs in humans , We can and do move CPU's and memory from PC to PC to reconfigure compute power for different tasks and milestones.

Grid and Cluster hardware platforms are current industry-standard approaches to getting the sort of performance needed by computationally intensive graphics processing. This was also discussed in our 5th quarter technical status report.

There are 2 industry-standard approaches to getting the sort of performance needed by computationally intensive graphics processing. This is industry-standard practice as demonstrated by this IEEE/ACM abstract

> [15]*Two new paradigms are changing the way we do computing: Clusters and Grids. Both have been born by the need for more economical means for High-performance computing. Clusters employ cost-effective commodity components for building powerful computers, and Grids allow to better use the computing resources that are available via Internet.*

---

single expansion board, with a special connector extending through the back of the computer case. It is often used to connect hard disks, tape drives, CD-ROM drives, and other mass storage media, as well as scanners.

[8] Octane: A brand of SGI Super workstation designed for high end computer graphics research

[9] Indigo: An older brand of SGI Graphics Workstations circa 1996

[10] PC Tower: A configuration for a PC class computer where the chassis is upended and sits under the desk. Typically used for midrange personal computing, not graphics workstations.

[11] Koolance is a brand of water cooled chassis specifically designed for low noise high heat dissipation PC class workstations and servers. Since CASI has a fan noise problem, we are investigating the use of water cooling for many computers as a way to reduce the head load on the room air conditioning and reduce the fan noise.

[12] Fortra Raid: A very high Reliability Dual Controller/Dual Power/Battery failover RAID-5 system: This is the workhorse RAID of CASI; It has 1.5 terabytes of online disk storage via 10 180 gigabyte Seagate Barracuda (slower latency) 10,000 RPM disks. It has dual disk controllers and is dual ported so that the RAID is available to two computers simultaneously, via two RAID controllers. It has a battery backup so that it can keep running when unplugged. See the full descriptions in this document. This provides secure online storage, as opposed to the very fast high performance secondary RAID-50 system also described in this document.

[13] Supermicro: A brand of motherboard system that supports two Intel Xenon class CPU. We have standardized on these boards so that most parts are interchangeable.

[14] Rambus: A brand of high speed low latency memory for High Performance PC computing.

Supporting Documentation Detail

We have attached supporting detail for this document. Some of this documentation has already been prepared and submitted as part of our first year NIST ATP audit.

Spreadsheets

Mapping of Milestones to Equipment category

This document tables the application of each individual and categories of equipment purchase to the Project Milestones in Project Years 1, 2, and 3.

Bills and descriptions for each piece of equipment purchased

- Bill list is exhaustive and complete.
- It is report from our accounting books data.
- This was supplied as part of our audit requirement.

A physical inventory from that list was prepared and each item tagged for property inventory equipment listed.

- Summary and Detailed inventory lists for each CASI computer and its components in both hardware and software.

If a machine uses Microsoft Windows 2000 operating for nominal operation, then we used a Microsoft system inventory tools to generate a CASI private network wide inventory. Because the level of detail from this tool is excessively verbose and some listings and can be over 80 pages long. This report is not printed out but included in the CD ROM submission as an appendix.

Allocation to NIST-ATP project

Most milestones require all CASI equipment and our equipment is 100% allocated to NIST-ATP project, even if not purchased with ATP funds. The milestones are inter-connected. Frequently a particular piece of resource is not used for a dependant milestone because it is required for predecessor milestone. This is demonstrated in the Gantt chart dependencies.

CASI Computer Hardware Contributions

CASI brought into this project all of its computer infrastructure and computer hardware to ATP project.

Computer – 2 each Indigo I SGI computers

See Details under Inventory by Equipment Model, Manufacturer and functionality class section plus monitor.
Each computer has a lifetime SGI Development License (SGI sold us the software per machine for the lifetime of the machine) and is has an FMV to the project of $10,000 per machine.

Computer – 1 each Indigo I SGI computers

See Details under Inventory by Equipment Model, Manufacturer and functionality class section plus monitor.
This computer has a lifetime development license (SGI sold us the software per machine for the lifetime of the machine) and has an FMV of $12,000 per machine currently. (Indigo II have faster CPU then Indigo I)
FMV $12,000

Casi08 Raid server with 15 legacy disks $5,000

Hp LaserJet 4m printer $300

FMV $5,000

15 9gig Seagate Barracuda 68 pin Disks for Casi08 Raid Server with unlimited replacement of damaged/failed disks for 5 years. $4,500

Hp LaserJet 4m printer

FMV $300

Projected Total CASI* In-Kind software and *hardware contribution to ATP project = $41,800

We project the total contribution to the ATP project at $41,800 by hardware and software licenses 100% committed to the project.

Inventory by Equipment Model, Manufacturer, and functionality Class.

Make & Model number:

SGI Indigo workstations

CASI Designation:

Casi06, casi05

Equipment description & contribution to milestones:

These are older SGI workstations which run network server software to support bot internal and external network functions. (NIS,DNS, DHCP)

This provides a necessary link for users outside CASI New York City office to log in and use our computers. This supports many activities such as non-CASI collaboration, remote access to our machines for CASI employees and consultants when on the road for conferences & such.

It is also necessary for e-mail and sharing files internally across all our local New York City office machines.

Casi06 is the backup server for Casi05.

I also use the backup sever (Casi06) as test platform for certain dangerous system administration options. I try them on the backup server first, then I roll out the tested changes to our development workstations or primary network name server casi05

SGI Indigo workstations
CASI Designation:
Casi04b, casi04b
Equipment description & contribution to milestones:
This is our main student and backup development machine.
It has Indigo II Extreme Graphics with a MIP R10,000 195 MHz CPU.
It was Dr. Karron's primary research machine prior to NIST ATP Funding with full compiler and development environment and full OpenGL hardware acceleration. This machine is principally used by visiting students in our lab to learn OpenGL and Medical Image Processing (Such as Armando Cubillos, DaSalla, and Praveen). It is also used as one of the nodes in our computer grid for large imaging problems and is used as compiler platform for SGI graphics software.

NIST-ATP Project Allocation	100%
Implements Milestones	All Milestones

Make & Model number:

SGI Indigo workstations

CASI Designation:

Casi02, casi12, casi15, casi16, casi13, casi_thinkpad

Equipment description & contribution to milestones:

Casi02, casi12, casi15 and casi13 are PC towers running Windows 2000 or Linux operating or both.

Casi16 is a water-cooled Koolantz PC tower with a dual xeon processor board. Board can be clocked to run extra fast because the water cooling system prevents the board from overheating and frying the chips.

CASI_thinkpad is a portable IBM laptop thinkpad development machine used when on-the-road or at conferences.

We run, test and develop C++ programs and java programs on those machines

We also use Microsoft and Linux tools for web development, documentation, network testing (security and performance), outside collaboration, e-mail filtering.

We get hundreds of spam mails each week because we publish our addresses on our web site and e-mail addresses are also included in our publications & miscellaneous internet newsgroups. This contributes to all milestones.

Component breakdown in this equipment:

If a machine uses Microsoft Windows 2000 operating in it's typical operation, I used Microsoft system tools to generate a inventory. The level of detail from Microsoft's tool is ENORMUS and can be over 80 pages long! For this reason, I am choosing to enclosing only the most important hardware summary data here and attaching several appendixes with complete listings.

Computer - PC RAID and Active Directory File Servers

Equipment Count 3

CASI Purchase Contribution	40% Casi08 box bought with ALL CASI money. Disk upgrades were paid for by NIST-ATP
NIST-ATP Purchase Contribution	60%
Purchase Status	1st year
NIST-ATP Project Allocation	100%
Implements Milestones	All Milestones

Make & Model number:

SGI Indigo workstations

CASI Designation:

Casi00, casi08, Fortra Chaparral Raid box (K Drive), Casi03

Equipment description & contribution to milestones:

These three computers represent the vast majority of our disk storage. Disks on all 3 of these computers are organized according to Raid Level 5 standard. This increases disk performance and reliability but decreases total storage capacity of the disks slightly.

Casi0 is mirror for casi08. All CASI vital data is written to casi08; and in the background a copy is made to casi00. Should casi08 has a failure, casi0 will perform casi08's function with no lose of data.

As this is a research shop, our main failures are not hardware but software.

Casi03 is an active directory server; It is a Microsoft Server that permits each user to login to accounts that can move between machines. Scott Albin installed this as a test and we found it unsuitable for research programming environments, but useful for business applications. This is because all files in Active Directory accounts are centrally stored and are moved over the local area network. This causes a performance penalty which is minor for business applications and a problem for graphics applications.

Some software failures can be catastrophic, wiping out disks or crashing systems. We do things with the computers that Microsoft never intended, and have to be very careful that all vital data is insulated from the programmers and secured in two places. This also provides a strong measure of protection from accidental erasure, because if a file is erased on the main server (casi08), it is NOT erased on casi00 for 7 days.

Intel PC's which run windows 2000 as their operating system. This is not very relevant because it not safe or practical to run application programs like Microsoft Excel or Word or run application programs on those machines. They function solely as very powerful, large, fast and reliable file servers for all of our UNIX and PC Windows computers (Development and Network server machines)

The Fortra RAID doesn't run any general operating system (like LINUX, SGI IRIX or Windows 2000) it solely functions as Raid Level 5 disk server. It has a built-in UPS (Battery in case power goes down) and alarms for temperature & power down. It also runs SNMP (Simple Network Management Protocol) which allows for a controlled re-boot and shutdown in case of power problems. It can survive single disk failures, single controller failures, single power supply failures and host computer crashes.

Fortra RAID application:

Our raid boxes store these and other types of data:

- Raw Image Data
  - Visible Human Data
    - Male
      - RGB Color Slices
      - Raw CT Data
      - MRI Data

- T2 Sections
- T1 Sections
- PD Sections

- Female
  - RGB Color Slices
  - Raw CT Data
  - MRI Data
    - T2 Sections
    - T1 Sections
    - PD Sections

- DICOM data
  - Medical School training sets
  - Radiology training sets
- Intermediate Image Processing Files (Temporary)
- Software installation images
  - Windows
  - SGI
  - LINUX
- Daily logs
  - Project code snapshots
  - Mail log
  - Business work
- Vital project records
  - Scientific Records
    - Publications
      - Manuscripts in progress
      - Galley Proofs
      - Reprints
    - Technical Library
      - Reprints Bibliographic
      - Literature Review
      - Scanned books
      - Scanned journals
  - System and Network administration database and configuration files
    - Mapping computer names to address across multiple operating systems
    - Configuration and Security access files
    - Temporary space for use by operating systems and network operations
    - Temporary space for testing system and network enhancements (We test on a isolated machine or small set of machines before we roll something out to all machines)
  - Business records
    - Accounting data such as QuickBooks
    - Personal files
    - Timesheets
    - Check images
    - Physical Inventory
    - Software Inventory
    - Sub-Contractor records

- ATP Records
- Federal Tax Records
- State Tax Records
- ATP Audit Trail work papers
- Tax Audit work papers
- Electronic Mail archives
- Spam Filter
- Outlook & Exchange Server calendar
- Outlook & Exchange Contacts (phone book)
- ASAP transfer logs
- Central Password Registry

This contributes to all milestones.

Subject: CASI Milestone to Equipment information

ALL_INVENTORY.doc (2 MB)

EquipmentDetails.xls (524 KB)

milestone_inventory.doc (133 K...

Joan,

I am attaching several files for your review.

First file is a word document that justifies equipment purchases, connects them back to project milestones. I want to draw extra special attention to a few things here:

1) We have included a contribution from CASI to ATP of 41,800 in hardware owned by CASI and used for NIST-ATP project.
I am listing 3 SGI Indigo CASI workstations in this report. I believe during our physical inventory you counted 3 machines but I only gave you the supporting inventory list from 2 SGI Indigo machines and not all 3.
Also, Casi00?s inventory list detail is missing but was counted physically by you during audit. Casi00 is a raid server with a lot of disks in it (varies depending upon our usage). I can generate that list if required (take me an hour or so to install the software to do it). I am hopeful it?'s not needed because that machine?s value is in the disks attached to it.

Second file is excel spreadsheet which lists milestones, all our bills, bills summaries (Last two items were already given to you for review during physical inventory). Milestones are new information that will hopefully answer ATP questions.

Lastly, I am including a large appendix (over 500 pages) which has supporting inventory detail. This should also be familiar to you as I gave you a CD with the inventory details during physical inventory audit.

Doc K has reviewed this mail message and the accompanying files.

Thanks for your help!

Matthew Bart Rothman

Subject: Yahoo Messenger and Free phone calls

FYI Joan,

Doctor Karron asked me to setup yahoo messenger accounts for both you and frank.

I set up a yahoo messenger id for you called casi_hayes@yahoo.com Note, I can also setup a yahoo account for you without the casi prefix if you prefer, so that you can use the messenger account

for other clients & friends.

It's against general CASI policy to send passwords in clear text so I will leave the password on your voice mail tomorrow.

What is this good for you may ask?

1) You can send text messages back and forth to Doctor Karron , myself or Peter Ross instantly. The hip computer geek jargon for this is called IM (Instant messaging). You also have a little screen that tells you when we are logged in (online) and when we aren't. You can also have other clients & friends IM you and be able to see if they are available as well.

2) You can buy a $50 headphone/microphone combination for your computer and do voice chats (very similar to a phone call except the quality is a bit lower) with Doctor Karron, me or Peter Ross. Note, Voice chat only works well over a fast internet connection like cable broadband (Road Runner or Cablevision etc.) or DSL from the phone company.

It's also easy to do conference calls and conference text messaging.

If you would like to trial test the voice chat feature before buying a headset, feel free to try voice chat at CASI's office to see if you like it.

I can also spend a few minutes and walk through some of the features of yahoo messenger with you if you like.

Matthew Bart Rothman

Subject: [Fwd: Brian Bonefant SGI]

Joan,

As per our converstation, Here's the phone number for SGI Brian Bonefant, Sales Development for Higher Education stuff.

Enjoy!

Brian Bonefant (Correct Spelling!)
Cell #: 603-674-4290
Email: brianb@sgi.com

Hi Joan,

I just spoke with Dr. Karron via yahoo messenger. Dr. Karron is currently in washington D.C.

I had some questions about your request which Doctor Karron asked that I confirm with you.

I apologize in advance if my lack of accounting background is slowing you down!

Anyhow here are my accounting questions!

- What is "prior" year? Is that 2001 or 2002 (calendar year?) or project year 1 or year 2 ?
- Do you want a paid invoice or an unpaid invoice?

And on the technical front...
- Doctor Karron reminded me that faxing loses a lot of detail like color.
- Is a pdf file okay? Black and White? Color?

Thank you!

Matthew Bart Rothman

Subject: RE: last copy of quick books

Lets chat/chew this up.
I would like to close up the burguney casi inc nist account;
I don't have up to date books to figure out how much money is needed to zero it out.
There may be other outstanding checks;
I have no idea at this point.
I need to see the account on quick books.
The copy I got from Ken on Friday is from 6/23.

There should be no checks written on the account if it is negative, why were checks written and no one Mentioned the account needed money ?

This note does not warrant a reply.

If you do not intend to maintain a proper accounting system, as you agreed to upon receipt of the grant, please let me know, and I will document your wishes accordingly.

Subject: Re: last copy of quick books

the problems is that I don't have current balances and the bookkeepers are not warning us of negative balances; they should have every check accounted for;
something i have not seen since i turned over business management to Bob.

God is in the details here.
I live or die by these numbers and I don't have good data to make good decisions on.

My partners are going to be all over bob now that we are starting to burn their real cash.

The new ledgers for CASI and for NIST should fit on a disc and do not require a CD. The old ledgers should

no longer be used. The new ledgers can easily be e-mailed, as the files are now small.

I do not understand the confusion between checking accounts. You should not be changing checking accounts without providing advance notice to The Jackson Group and without coordinating any changes with them. You must also coordinate any online payments, as this distorts the cash balance. It may be better to pay all bills by check to ensure proper approval and proper handling within the ledger system.

The ledger, not the bank on-line system, should be used for cash balances. Using the bank system disregards any checks that have been written and are not yet cashed, and should not be used for proper cash management.

These communications are a strong indication that procedures are not in place and that CASI management is not supporting the procedures that are being implemented.

Dear Ken, Frank and Bob;

The CD I picked up Ken is not current; it shows books as of 6/23.
I need current checking accounts with good balances.

I will put cash in the burgundy account tomorrow;
I may close the account and cause more checks to bounce.
I need to know what is going on with all of the accounts.

Subject: TransitChek MetroCard Program FAQ

Dear Joan and Bob;

I called the TransitCheck MetroCard program office here in NYC; I am talking to their Benefits Advisors, who work with employers on compliance issues for their various Benefits Programs employers can purchase. I am asking them for the precise verbiage to put in our benefits package as it evolves. Here is an abstract from some documentation I am putting in the material I am working on with Avery and Ira.

http://www.transitcenter.com/benefits/tc_co/FAQ.htm

How does my company get started?
Employees decide how much they want deducted from their pre-tax salary every month. The employer arranges for the amount to be deducted, then uses the Enrollment Form to order the TransitChek options it wants to distribute – Vouchers, Cards, or both. If the employer is giving TransitChek in addition to the employees' regular compensation – or as a reward or incentive – no payroll deduction arrangements are necessary; the employer fills out the Enrollment Form and distributes the Vouchers and/or MetroCards. The first order of TransitChek is sent within three weeks of receipt of payment.

What are the maximum employees can deduct for Premium TransitChek?
For calendar year 2002, federal limit allows your employees to use up to $100 a month/$1,200 a year of their pre-tax salary to pay for their commutation expenses with TransitChek.

!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!
What records need to be kept for the TransitChek program?
TransitChek has few record-keeping requirements. There's no need for a bona-fide reimbursement arrangement, unlike other benefit programs. There are no expense receipts, reports, plan filings, or other detailed paperwork required. Only a record of TransitChek purchases is required.
!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!

Is the pre-tax TransitChek program a section 125-cafeteria plan program that must be included in my section 125 plan?
No. TransitChek is authorized under Internal Revenue Code (IRC) section 132(f), as amended on June 9, 1998. Cafeteria plans are governed by IRC section 125, which specifically excludes IRC section 132 benefits. That means that TransitChek cannot be part of cafeteria plans and is not subject to the regulations governing cafeteria plans. Therefore, such rules as "use it or lose it" or limited annual enrollment are not required. Consult your tax advisor for specific details.

If TransitChek is given to employees as a fringe benefit, does everyone have to get the maximum?
No. Employers can decide whom to reward and how much to give. It can be used as an annual benefit, as a reward, an incentive, or a bonus. TransitChek can be distributed monthly, quarterly, or even once a year, as long as the amount provided for that period does not exceed $100 times the number of months in that period.

Is the TransitChek program exempt from state as well as federal taxes?
In most cases, the benefit is excluded from taxes. Pre-tax TransitChek is exempt from federal taxes, New York and Connecticut taxes. New Jersey does not exempt pre-tax transportation benefits from state taxes. However, it is exempt from New Jersey state taxes only if you give it free to your employees as a fringe benefit. Consult your tax advisor for details.

When can my company begin a pre-tax program?
You can start a TransitChek program at any time. The pre-tax TransitChek program is not subject to the requirements common to cafeteria plans that limit when an enrollment can be done.

Subject: Marian Karron/Dr. K's Mom

Dear Joan, Ken, Frank and Bob;

I am borrowing money to cover the current overdrafts from my mom (in addition to the money I am borrowing on my apartment). As my mom is a partner, and has a stake in the business (she has already given me 20K for her share in the company, and since I have to go to her to get cash, she will be calling to try to understand how with the bookkeepers and management I am turning the company over to we are coming up so short.

Please be polite, explain to her (and eventually to me) why we can't keep the checking account registered straight, that there is no missing money, no one is stealing and that I am in the process of repaying the government for overpayments and co-payments because we did not get co-investors.

She has been calling me insessently since I made the mistake of telling her that checks were bouncing and I needed to borrow more money from her. I am going out to visit her today, and it is the most I could do to keep her from calling all of you Sunday morhing; I am not answering my phone now.

Subject: RE: TransitChek MetroCard Program FAQ

Bob,

I suggest you discuss this with ProPayroll. Since it is a payroll deduction, they will have worked out the logistics and can advise how employers handle the program efficiently.

Dan, Bob,
From a benefit package point of view – one sentence is needed.

From an administrative point of view – a log of transit checks, by number, must be maintained. Each check is recorded on the log when purchased (with date of purchase). Each check is recorded on the log when distributed to the employee upon receipt of their payroll deductions (with name of employee and date).

This benefit allows employees to pay for a certain portion of their transportation with pre-tax dollars. A portion of the cost, as determined by the employee up to the maximum, is taken out of each pay check. Each month, the applicable, paid-for transit check is given to the employee. The cost to the employer is the cost of administration of the program. The transit checks are not given to the employees for free.

Because I know what I did before Bob came on board and I can speak for policy prior to Bob.
Bob can edit it as he sees fit and Ira can edit is more. Avery can redact, suggest, or inform.

This has been in editorial stages for a long time.
It is actually never done; it is a work in progress.
It goes round and round and round evolving, hopefully getting better all the time from polishing.

Each bullet heading contains one thought on the matter, expressed as succinctly or prolix as required by the readers.
The goal is that each reader have the same concept for that heading as the others, and not to leave anything to the readers immagination.

Subject: RE: CASI Benefits Program dbk 4.doc

Why did you send such extensive wording when you had a more concise document from Bob? It would have been more efficient to amend Bob's draft. My recommendation is to: (1) talk with Ira, (2) select your benefits, (3) update Bob's draft, (4) send it to Avery, (5) discuss it with Avery, (6) execute a plan.

In order for any plan to be deemed "reasonable" under FARS cost principles, the sponsoring company must be able to afford the benefits and any costs related to the plan's compliance.

Subject: RE: CASI Benefits Program dbk 4.doc

Thank you. I spoke with Ira. He is also reviewing possible solutions to your health benefits and will be able to discuss further next week. All of these solutions, and the related expenses, should be discussed and considered before a benefits plan is executed and before significant expenses are incurred to properly execute a benefits plan.

Needless to say, this does not alter the prior period findings regarding a benefit plan which was not only not written, it was not consistently followed nor predetermined. We have two separate issues here.

I will be happy to discuss further. If Bob is available, perhaps a telephone conference would be helpful. In the meantime, I will call Avery to answer his questions.

Please advise, did you send Avery the benefit plan template drafted by Bob or the much lengthier document that you sent to me?

Subject: RE: TransitChek MetroCard Program FAQ

We don't subscribe to the TransitChek Voucher Program.
We subscribe to the TransitChek MetroCard program;

We don't get checks or vouchers; we get actual MetroCards, effectively the same as you can get from a subway booth, only we pre-pay them from TransitCheck specifically for the assurances that they give
That the cards can only be used for the purposes intended. The rate that we have consumed TransitCheck MetroCards is clearly below the maximum permitted by law.
We don't need to keep records of dispersal within the company.
That is the beauty of the system; we have the records of delivery of the cards and the serial numbers;
We have purchased two kinds of cards: multiple use cards and unlimited use cards.
The main beneficiary of the unlimited cards was Nicky; I still have a stack of cards we can't use precisely because they are unlimited and no one here makes such heavy use of the subway that they
Would want to use the card.

Subject: RE: TransitChek MetroCard Program FAQ

Bob,
I suggest you discuss this with ProPayroll. Since it is a payroll deduction, they will have worked out the logistics and can advise how employers handle the program efficiently.

Dan, Bob,
From a benefit package point of view – one sentence is needed.

From an administrative point of view – a log of transit checks, by number, must be maintained. Each check is recorded on the log when purchased (with date of purchase). Each check is recorded on the log when distributed to the employee upon receipt of their payroll deductions (with name of employee and date).

This benefit allows employees to pay for a certain portion of their transportation with pre-tax dollars. A portion of the cost, as determined by the employee up to the maximum, is taken out of each pay check. Each month, the applicable, paid-for transit check is given to the employee. The cost to the employer is the cost of administration of the program. The transit checks are not given to the employees for free.

Subject: TransitChek MetroCard Program FAQ

Dear Joan and Bob;

I called the TransitCheck MetroCard program office here in NYC; I am talking to their Benefits Advisors, who

work with employers on compliance issues for their various Benefits Programs employers can purchase. I am asking them for the precise verbiage to put in our benefits package as it evolves. Here is an abstract from some documentation I am putting in the material I am working on with Avery and Ira.

http://www.transitcenter.com/benefits/tc_co/FAQ.htm

How does my company get started?
Employees decide how much they want deducted from their pre-tax salary every month. The employer arranges for the amount to be deducted, then uses the Enrollment Form to order the TransitChek options it wants to distribute – Vouchers, Cards, or both. If the employer is giving TransitChek in addition to the employees' regular compensation – or as a reward or incentive – no payroll deduction arrangements are necessary; the employer fills out the Enrollment Form and distributes the Vouchers and/or MetroCards. The first order of TransitChek is sent within three weeks of receipt of payment.

What are the maximum employees can deduct for Premium TransitChek?
For calendar year 2002, federal limit allows your employees to use up to $100 a month/$1,200 a year of their pre-tax salary to pay for their commutation expenses with TransitChek.

!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!
What records need to be kept for the TransitChek program?
TransitChek has few record-keeping requirements. There's no need for a bona-fide reimbursement arrangement, unlike other benefit programs. There are no expense receipts, reports, plan filings, or other detailed paperwork required. Only a record of TransitChek purchases is required.
!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!

Is the pre-tax TransitChek program a section 125-cafeteria plan program that must be included in my section 125 plan?
No. TransitChek is authorized under Internal Revenue Code (IRC) section 132(f), as amended on June 9, 1998. Cafeteria plans are governed by IRC section 125, which specifically excludes IRC section 132 benefits. That means that TransitChek cannot be part of cafeteria plans and is not subject to the regulations governing cafeteria plans. Therefore, such rules as "use it or lose it" or limited annual enrollment are not required. Consult your tax advisor for specific details.

If TransitChek is given to employees as a fringe benefit, does everyone have to get the maximum?
No. Employers can decide whom to reward and how much to give. It can be used as an annual benefit, as a reward, an incentive, or a bonus. TransitChek can be distributed monthly, quarterly, or even once a year, as long as the amount provided for that period does not exceed $100 times the number of months in that period.

Is the TransitChek program exempt from state as well as federal taxes?
In most cases, the benefit is excluded from taxes. Pre-tax TransitChek is exempt from federal taxes, New York and Connecticut taxes. New Jersey does not exempt pre-tax transportation benefits from state taxes. However, it is exempt from New Jersey state taxes only if you give it free to your employees as a fringe benefit. Consult your tax advisor for details.

When can my company begin a pre-tax program?
You can start a TransitChek program at any time. The pre-tax TransitChek program is not subject to the requirements common to cafeteria plans that limit when an enrollment can be done.

Tax Compliance Caution Statement

The well-publicized mass transit fringe benefit now available to employers and employees under Internal Revenue Code Section 132(f) has given rise to new services that claim to satisfy the requirements to qualify for the benefit. Unfortunately, many of these services are based on cash reimbursement or debit card and credit card systems and do not actually qualify. Commuter Check Services Corp., as a pioneer in this field since 1990, offers the following guidance.

The key issues concern:

- the availability of cash reimbursement
- the substantiation requirements when cash reimbursement is used
- the availability of credit/debit cards

The purpose of the transit benefit is to increase use of mass transit. This is explicitly stated in the regulations and reflected in the entire legislative history of the transit benefit. Accordingly, the regulations pertaining to the benefit establish very strict procedures to insure that the tax benefit actually is provided only for transit use. The law makes it clear that whenever a transit pass (defined as a pass, token, fare card, voucher or similar item entitling a person to use transit) is readily available in an area, only a transit pass can be used to take advantage of the benefit. Under current law, the fact that employers may be charged a small administration fee in addition to the face value of vouchers does not keep the voucher from being treated as readily available, so long as the voucher program does not impose unreasonable advance purchase or quantity requirements or inappropriate limitations on the denominations of vouchers available. Commuter Checks fully meet the standards set forth in the regulations for being readily available.

Most major metropolitan areas in the country have voucher or pass programs which are readily available for direct distribution by the employer to the employee; thus only vouchers or passes can be used for the transit benefit in those areas. Debit cards and credit cards (unless they qualify as a voucher) and cash reimbursement cannot be used in these areas. Such areas include the metropolitan areas of Boston, MA, New York, NY, Buffalo, NY, Washington, DC, Philadelphia, PA, Wilmington, DE, Norfolk, VA, Columbus, OH, Cincinnati, OH, Chicago, IL, Minneapolis, MN, Louisville, KY, Providence, RI, Denver, CO, Los Angeles, CA, Sacramento, CA, San Francisco/Oakland, CA, San Diego, CA. and Seattle WA. In these areas, the transit benefit can only be obtained by the employer acquiring for its employees vouchers or transit media from a voucher provider.

To qualify as a voucher, the instrument must be exchangeable only for transit fare media. Accordingly, the instrument must be designed so that the value contained on it cannot be used for any other purpose. Thus, for a debit card or credit card to qualify as a voucher, it must preclude use of the value on the card for any purpose other than transit fares. Debit cards and credit cards offered for use which do not contain technology to prevent the card from being used for the purchase of other products in addition to transit media do not qualify as a voucher. In most cities this is not practical because most transit media is sold at multi-purpose retailers that do not have transit dedicated card readers.

8/16/02

Cash reimbursement can be used for the transit benefit only in areas where vouchers or pass programs are not readily available and, even in those limited circumstances, to qualify for the transit benefit, the program must include a bona fide reimbursement arrangement. The regulations state that the determination of whether an arrangement meets this standard depends on facts and circumstances that indicate whether or not the reimbursement is for a payment made to a mass transit system. Receipts and record keeping are generally required, and the following rules must be satisfied if the arrangement relies on employee certifications:

1. A certification by the employee alone without a receipt evidencing actual transit use can only be used if (i) a receipt is not provided in the ordinary course of business by the transit agency and (ii) the employer has no reason to doubt the employee's certification;

2. No payment can be made before the date the applicable expense was incurred; and

3. No payment can be made based on an employee certification of a transit expense the employee expects to incur at some future date.

It is clear that accurate record keeping ("substantiation") is required of all employers seeking to use cash reimbursement to take advantage of the transit tax benefit. In addition, the employer must take steps to avoid any inference that it had reason to believe that an employee certification substantiating the reimbursement is subject to doubt. Credit or debit card services with uses not limited to transit are effectively cash reimbursements subject to substantiation requirements. These requirements do not exist when employers obtain and distribute transit fare media or vouchers such as Commuter Checks.

Debit /credit cards or cash reimbursement programs that do not meet these requirements impose a risk on the employer and its employees that upon audit the claim of a qualified transit benefit program will be denied, exposing the employer and its employees to income and payroll tax charges including interest and penalties. Accordingly, we recommend that any employer being offered a cash reimbursement or debit card/credit card based program for the transit tax benefit obtain from the provider a representation that the program as used by that employer will insure the employer's qualification for the transit tax benefit. In addition, indemnification for any losses the employer or any of its employees may incur if the program does not qualify should also be obtained. In any event, we recommend that any employer interested in using a cash reimbursement or debit/credit card program for the transit benefit consult with the employer's accountant to make certain that such program qualifies for the benefit in accordance with the strict requirements of the Internal Revenue Code and its regulations.

Of course, these precautions do not need to be taken when the employer distributes transit fare media or qualified vouchers to its employees as its transit tax benefit program since such a program will not be subject to a risk of denial upon audit.

Thank you. I spoke with Ira. He is also reviewing possible solutions to your health benefits and will be able to discuss further next week. All of these solutions, and the related expenses, should be discussed and considered before a benefits plan is executed and before significant expenses are incurred to properly execute a benefits plan.

Needless to say, this does not alter the prior period findings regarding a benefit plan which was not only not written, it was not consistently followed nor predetermined. We have two separate issues here.

I will be happy to discuss further. If Bob is available, perhaps a telephone conference would be helpful. In the meantime, I will call Avery to answer his questions.

Please advise, did you send Avery the benefit plan template drafted by Bob or the much lengthier document that you sent to me?

8.2 Introduction and Intent of Plan

8.2.1.1 History

CASI is a Limited Liability Company (LLC) formed from the merger / absorption of its predecessor corporation Computer Aided Surgery Inc. Computer Aided Surgery, Inc, was formed from a loose association of surgeons and scientists derived from New York University Medical Center and New York University Medical School, as well as colleagues from St. Louis University Medical Center in 1995 with funding from DARPA. It has consisted mainly of university faculty and students, and was closely held by Dr. Karron and family. As the company grew, its ability to perform groundbreaking medical research depended on its faculty and employees.

As such, CASI has maintained a policy of paying for the health and well being of its senior employees far beyond legal minimum requirements. Employment at CASI has always featured full medical benefits for senior employees. Catastrophic Medical exposure has always been minim zed because most of the employees of CASI have traditionally maintained health insurance with their primary employer and coordination of benefits has kept benefits plan costs far below the normal rates for comparative companies. This is done by using a high deductible medical benefits insurance plan offered by Oxford Health Plans to cover all costs above the 1000 deductible (which covers catastrophic

illness).

12 The intent of the plan is to encourage employees to become vested in the benefits package, and to enable our employee's to grow both professionally by paying for job and task related training at a high level as well as physical well being so important to the high stress levels of this kind of work.

13 Finally a new feature is planned for implementation to include retirement plans as well as the formalization of the pre-existing casi heath benefits plan being implemented this year 2003.

13.1 1 Personnel Definitions

14 These are the terms used throughout this document and define company policy in these employee classes.

14.1.1 Part Time Employee

15 A part time employee is an employee who works twenty (20) hours per week or less.

15.1.1 Full Time Employee

16 A part time employee is an employee who works strictly more than 20 hours per week.

16.1.1 Junior Employee

17 A Junior Employee is a full time employee who has worked less than 3 (Three) years for CASI

17.1.1 Senior Employee

18 A senior employee is a full time employee who has worked 2 years or more for CASI.

18.1.1 CASI Workday

The nominal CASI workday is from 9am through 5pm, Monday through Friday, exclusive of holidays and weekends.

18.1.2 CASI Workday Length

19 CASI workdays are 8 hours in length.

19.1.1 CASI Flextime

20 CASI has a flexible working schedule, employees are not required to report to work at a fixed time, nor are required to leave work at a fixed

time. However, in the weekly aggregate, full time employees are expected to work 20 or more hours on billable activities for recording.

CASI billable hours policy

Preface

CASI tracks employee time and pay through a system of timesheets that document employee work time and task billing.

21 Recovery of unbilled hours is possible by affidavit (???)

22 All employees of CASI work very hard and long hours. It is expected that employees work a minimum of their billable hours, but generally the long time practice is that employees work more than they bill for and record on their time sheets.

23 All time spent doing CASI work can be billed, but only the pre-allocated amount of hours may be billed on a project timesheet. This means that there are may be unbilled and unrecorded hours associated with each project.

24 Pending the revision of the semiautomatic project billing hour system, employees are to bill only the time for paying projects, and are not required to bill for hours spent not spent on specific paid projects.

Payment is mainly, through not exclusive through these documents and tracking facilities.

2. Vacations

24.1 Part Time (PT) employees will not be eligible for paid vacation days.

24.2 Full Time (FT) employees will receive paid vacation coverage on the following schedule. (CHECK WITH IRA)

CASI Vacation Policy

The number of days eligible for vacation depends on the years of CASI Employment according to the following schedule:

Earned Vacation Days

24.3 1

24.4 10

Advanced Scheduling of Vacations Required

25.1 Employees are required to inform management of their

vacation plans at least two weeks prior to the actual taking of vacation..

25.2 Unless there is a pressing business need employees may schedule their vacation at their discretion with management approval.

25.3 All vacation days not taken in the calendar year earned will be forfeit.

Vacation days may not be carried forward.

CASI Sabbatical Policy

Put this in

3. CASI Holidays

NEEDS TO BE FIXED to correspond to practice.

26 CASI employees will receive 12 paid Holidays per calendar year.

27

27.1 The following National Holidays are fixed.

27.2 New Years Day

27.3 Presidents Day

27.4 Memorial Day

27.5 4th of July

27.6 Labor Day

27.7 Thanksgiving Day

27.8 Christmas Day

28 Personal holiday preferences.

29 In addition, CASI employees will be allowed to take 5 additional optional days to allow for personal Holiday preferences.

4. Sick Days

Junior employees are can take up to 5 sick days per year.

30 However after five consecutive days of absence an employee must contact a physician for a medical release to return to work.

31 Senior Employees may take up to 10 sick days, however all days in excess of 5 days are counted against accrued vacation days.

Payment for Sick Days

32 CASI employees will be paid for sick days.

Dismissal for excessive Sick Days

Excessive (>5) sick days without medical support are ground for dismissal.

Severance Policy

Termination by conveyance

CASI may terminate employees at any time, at will, at its connivance.

CASI will attempt to give 30 days notice for termination.

In the situation where termination notice is not given, employees will receive two weeks severance payments commencing 4 weeks after termination and return of all CASI property, books, paper, computer materials, and resign non-disclosure and secrecy agreements.

Termination for cause

CASI employees who are terminated for cause

Causes of termination include, but are not limited to:

Malfeasance,
Incompetence,
Excessive non sick absence,
Failure perform job functions, poor job performance (fines, penalties, or other problem costs associated with poor job performance)
Other job related problems.

Termination Procedure

Termination will be by verbal notification followed by certified letter and e-mail.
Terminated for cause employees will not receive any severance benefit and forfeit their vacation days and medical benefits.
Termination notification will explain in full detail the reasons for the termination and the employee's options to appeal, and COBRA options).
They will not be eligible for unemployment, and employees who file for unemployment will be challenged by CASI shall they receive unemployment funding.

New Hire and Probation Policy

New Hires must pass through a probation period, in which they are being evaluated for full time employment.
Some employee's may be initially engaged as independent contractors, and their fitness and suitability for a particular position evaluated by seeing how they handle the various difficult tasks assigned to them They are contractors because CASI does not dictate precisely how the task will be accomplished, but CASI will evaluate the suitability of a potential employee based on how they approach a problem.

Probation Period

The current CASI probation period is 30 days from the first day of the first full calendar month worked.
For example new Hires that occur midmonth conclude their probation on the last day of the following month.

Probation terms

During the probation period an employee may be terminated without prior notice.

Probation evaluation

At the conclusion of the probation period, Management will make an oral report to the employee of its findings on the suitability of the employee. This report can be written if requested by either party.

Probation Evaluation Criteria

Technical Ability to accomplish tasks assigned.

Willingness to work harmoniously with others
Ability to focus on assignments
Ability to meet deadlines.
Creativity
Ability to balance conflicting priority
Makes a good appearance to customers and clients

CASI Medical Coverage

CASI, as a medical research firm, maintains a comprehensive employee health program, consisting mainly, but not exclusively, Oxford Health Plans as main insurer, First Rehabilitation as Disability Insurance carrier, and Princeton Insurance for Workman's Compensation. CASI full time employment AND Stock/Partnership is required for full participation in the CASI health plan. Part time Employees are not eligible. Non-Vested, non ownership employees are not eligible. Employees on track for being vested (partnership) after passing their 30 day probation, and earning time toward their 3 years of continuous employment are eligible.

CASI Medical Coverage Definitions

Partial Medical Benefits

Limited to Oxford Health Plan Benefits with the deductible not being reimbursed by CASI. No Dental Benefits, no Optical Benefits.
Fitness Reimbursement
Childcare Cost Reimbursement

Full Medical Benefits

Oxford Health Plans benefit
Dental Benefit
Optical Benefit
Outpatient Visits
Pharmacy Benefit
Fitness Benefit

Transportation to and from any approved Medical Benefit, including Taxi, Ambulance (not otherwise covered by Oxford), Airfare, associated meals and incidental costs on the day of visit.

Emergency Medical Benefits

All employees, regardless of status, appearing at work with any sufficiently serious medical problem, will be escorted to the hospital and / or medical facility for immediate treatment.
Payment for emergency treatment will be limited to 500 $ and must be made through approved CASI medical practitioners.
Examples of Emergency Medical Benefits are:
Dental Emergencies requiring extraction, lancing, or re-insertion of avulsed teeth.
Heart Attack and Resuscitation.
Trauma producing syncope, broken bones, excessive exsanguinations

Fitness Benefit

Gym Attendance at an approved Gym

Approved Medical / Dental / Optical Pharmacy Providers

CASI approved vendors are the vendors selected for services in these specialties by the CASI directories. Recommendation of a provider makes them selected.
An approved provider is a provider who has established a relationship with CASI in the past as vendors or as research collaborators. The CASI management must approve new providers.

Medical

New York University Medical Center
Davies Medical Center
St. Louis Medical Center
Columbia Presbyterian Medical Center

Specialists

Dr. Roberta White
Dr. Jeff Mechanic

Dr. Allan Grayson
Dr. Gail Schupak (orthodontic)
Others as approved.

Optical

Kips Bay Optical
Others as approved.

Pharmacy

Corner Pharmacy

Fitness

New York Sports Club
Crunch Sports Clubs

Medical Insurance Probation Period

Employee medical coverage does not begin until 30 days from their first billable service day.
Medical Probation subordinates to the Oxford Health Plans, or the current health insurance carrier in effect probation policy, such that etc. etc.

5. Medical Coverage

33 FT, CASI employees are covered by a company-paid Oxford Health Care Plan.

34 A company-paid Oxford Health Care Plan subject to the plan rules and policies covers all Full Time CASI employees.

35 Coverage commences at the conclusion of the Probationary, as specified by the Oxford Health Plan Benefits Manual. Further this benefits manual is modified, limited or extended by the CASI Oxford plan description and contract.

36 A copy of the Oxford Health Plan manual is available on request to the CASI Benefits Coordinator.

37 The CASI Managing Partner shall name the CASI Benefits Administrator.

38 The duties and obligations of the CASI benefits administrator mainly consist of interfacing with Oxford Health Plans in matters of Partnership and Employee benefits and communicating changes in Oxford Policy and Law.

39 The CASI Business Manager will serve as Benefits Administrator.

40 As an additional benefit CASI will reimburse all FT employees for their legitimate medical and ancillary costs not covered by the Oxford Health Care Plan.

41 Legitimate medical and ancillary cost are as defined by the IRS guidelines and rules.

42 Legitimate medical and ancillary costs include Oxford Health plan doctor co-payments and drug plan co-payments.

43 CASI has a preferred vendor for all Oxford drug plan purchases. Eligible employees are advised to use their Oxford Health Plan identification card to obtain their prescription supplies.

44 The CASI preferred Oxford Health Plan Prescription Drug Benefit is: **The Corner Pharmacy**, located at the corner of 31st Street and Third Avenue.

45 The CASI preferred Oxford Health Plan prescription vendor would directly invoice CASI on a monthly basis for the Oxford co-payments instead of the eligible employee paying. The intent of this is to minimize out of pocket cash and to reduce plan costs by obtaining generic equivalent drugs wherever possible with the patient and physician consent.

46 In addition, CASI will reimburse all FT employees for their co-pays, not covered by the Oxford Health Care Plan, with submission of their co-pay receipts.

Surgical Coverage

Dental Coverage

Optical Coverage

Mental Health Coverage

Pharmacy Coverage

Fitness Coverage

6. Traisit-Chek Metro Cards Benefit

47 CASI will purchase New York City (NYC) Metro Cards for employee use in traversing NYC.

48 CASI will control the use of these cards by following all, City, State and Federal requirements related to the use of NYC Metro Cards.

Unlimited Ride MetroCard
Terms and Conditions

49 **Where Accepted**
50 MTA New York City Transit subways and local buses
MTA Long Island Bus
MTA Staten Island Railway
Most NYC private bus lines
Only 7-Day Express Bus Plus accepted on express buses

51 **Restriction**
52 Cannot be used again at the same subway station or the same bus route for 18 minutes. The acceptance or solicitation of compensation for use of an Unlimited Ride MetroCard by other than authorized agents of MTA New York City Transit is prohibited.

53 Use of Regular MetroCard is subject to MTA New York City Transit tariff.

7. Job related training and Education

Justification

Advanced Research Requirements

54 CASI will pay for employee education when warranted for Company benefit and when pre-approved by CASI Management.

55 Employees will pay for the approved education out-of-pocket and will be reimbursed by earning a Grade of C or better. A report from the educational institution of such an earned grade must accompany the request for reimbursement.

Parking Benefit

Justification

Parking is a major problem in midtown Manhattan. Many CASI employee's hold primary jobs at nearby universities and must split their time during the day across the metropolitan area. As an inducement to get professionals to come and stay, and to reduce the wasted time of visitors, employees and professional staff searching for parking, CASI has had a practice of paying for on street parking using the NYC Muni Meter program. This program enables CASI to pre-pay for blocks of parking time that can be used only by the insertion of a MuniMeter card, much the same way as the MetroCards can be used for subway and bus fare.
Parking at private and more expensive garages must be approved in advance.

Muni Meter Program

Description of NYC Parking Program.
Street Parking Agents will feed the meter on your card.
Muhammad Islam

Parking Tickets

Many companies in the metropolitan area view parking tickets incurred during the execution of business functions as a routine cost of doing business. Parking tickets obtained by failure to feed the MuniMeter are not reimbursable by CASI unless submitted with a justification statement.

Childcare Benefit

Casi will pay bona fide child care costs where the an employee is otherwise unable to work unless a child under 10 requires day care or transportation to and from a day care facility, to the extent provided by IRS section XXX.

Late Night Ride Home Benefit

56

57 CASI will pay for reasonable and actual employee travel when commuting from work to home after 9:00 PM. The purpose of this is to protect and keep safe employees traveling late at night.

Late Night Meals Benefit

CASI employees working later than 8PM may have meals paid for.

NO OVERTIME PAYMENT BENEFIT

Late Hours/Overtime TIME NOT BEING LOGGED

Other Benefits

EXPLANATION AND INSTRUCTIONS

A penalty is being assessed under section 685(v)(1) of the New York State Tax Law because, according to our records, you have not filed a complete Quarterly Combined Withholding, Wage Reporting and Unemployment Insurance Return(s), form NYS-45. Refer to the DELINQUENT RETURN/REPORT SECTION of this notice for the tax period affected and the return(s) due.

THE RETURN(S) MUST BE FILED EVEN IF THERE IS NO TAX DUE FOR THE TAX PERIOD.

IF YOU HAVE NOT FILED THE REQUIRED RETURN(S) BUT DO SO WITHIN 30 DAYS FROM THE DATE OF THIS NOTICE, BY 08/06/03, THIS PENALTY MAY BE ABATED OR ADJUSTED. If you file the return(s) more than 30 days from the date of this notice, you may be subject to a higher penalty amount, which can increase the later the return(s) is filed.

NOTE: FILING OF THE REQUIRED INFORMATION DOES NOT PRECLUDE THE STATE FROM ISSUING ADDITIONAL BILLING NOTICES AS THE RESULT OF A REVIEW OF YOUR TAX RECORDS.

If you do not have the required return(s), call 1 800 972-1233 for forms and instructions. From areas outside the U.S. and outside Canada, call (518) 485-6800. Mail completed return(s) to:

NYS EMPLOYMENT TAXES
CHURCH STREET STATION
P O BOX 1417
NEW YORK NY 10008-1417

If you do not need returns, but have questions about this notice, please call 1 888 899-8810. When calling, please refer to the Employer Registration number on this notice.

To pay this penalty, complete the Payment Application Section on the enclosed Payment Document and mail with your remittance. Interest will be assessed unless the penalty is abated or you pay the total amount due within 21 days from the date of this notice, by 07/28/03. If you also wish to protest this assessment, refer to the protest instructions on the back of this page.

Although you may pay the penalty amount assessed in this notice, payment of this amount DOES NOT constitute filing the required return(s) due. Unless the return(s) is filed, the Department of Labor

(CONTINUED ON BACK)

EXPLANATION AND INSTRUCTIONS (continued)

will estimate wages and amounts due, which may adversely affect your future tax rate calculations. In addition, the Department of Taxation and Finance has an unlimited period of time in which to further assess taxes, (and interest and/or penalties) that may be due.

If you HAVE ALREADY FILED or believe you are NOT REQUIRED TO FILE the return(s) due, or you DISAGREE WITH THIS ASSESSMENT and wish to protest, you must complete the enclosed PROTEST DOCUMENT and mail it to:

NYS DEPARTMENT OF LABOR
P O BOX 1939
ALBANY NY 12201-1939

PROTEST OF THIS PENALTY ALLOWS THE DEPARTMENT OF TAXATION AND FINANCE TO DISCLOSE WITHHOLDING TAX INFORMATION TO THE DEPARTMENT OF LABOR.

TO PRESERVE YOUR RIGHT TO FURTHER REVIEW, YOU MUST REPLY WITHIN 90 DAYS FROM THE DATE OF THIS NOTICE (150 DAYS IF THIS NOTICE HAS BEEN MAILED OUTSIDE OF THE U.S.). Refer to the enclosed Notice of Taxpayer Rights for a detailed explanation of the options available to you.

DELINQUENT RETURN/REPORT SECTION

TAX PERIOD ENDED DATE: 03/31/03 ORIGINAL FILING DUE DATE: 04/30/03

Section 685(v)(1) penalty is imposed for failure to file the Quarterly Combined Withholding, Wage Reporting and Unemployment Insurance Return. The penalty is the greater of $1,000 or $50 times the number of employees as determined by information on our files, up to a maximum of $10,000.

You have not filed Part B and Part C of the Quarterly Combined Withholding, Wage Reporting and Unemployment Insurance Return, Form NYS-45.

In order to file correctly, YOU MUST:

- Complete Part B and Part C of the Quarterly Combined Withholding, Wage Reporting and Unemployment Insurance Return, NYS-45 and submit payment for the Total WT amount due shown on the return to avoid further accrual of interest. The return MUST be filed even if there is no tax due, or you are unable to pay the amount due at this time.
- If you have more than five employees, make no entries in Part C. All employees must be reported on Form NYS-45-ATT.
- If you would like to set up an installment payment agreement, call 1 800 570-4372 (From areas outside the U.S. and outside Canada, call (518) 485-6800).

The minimum penalty amount of $1,000.00 has been imposed.

NOTICE OF TAXPAYER RIGHTS

The NYS Tax Law provides that the NYS Department of Labor is responsible for resolving protests concerning failure to file penalty assessments.

If you disagree with the penalty assessment, you have three options (listed below) and certain rights with regard to the enclosed notice. You must reply within 90 days from the date of the enclosed notice to preserve your right to further review.

Whether you agree or disagree with the assessment, interest and/or penalties will continue to accrue unless you file the return **and**

- the penalty is abated,
  or
- you make full payment within the time period indicated on the enclosed notice.

1. Pay the total amount due and request a review by the NYS Department of Labor

Most differences can be resolved with this review, avoiding costly and time consuming hearings or appeals.

- Complete the enclosed *Payment Document* and submit with your remittance. Also complete the enclosed *Protest Document.* To ensure timely receipt of your protest, return each document to the address indicated on that document. Please do not send these documents together.

The information that you furnish will be reviewed provided you file your written explanation within the required 90 day period. You will be notified of the findings.

- If there is agreement with your position, you will be issued a refund for the amount of the penalty plus any applicable interest. However, if you have any other outstanding liabilities the refund may be applied to the amount(s) due.

- If there is disagreement with your position, you will be advised of your right to request a hearing with the NYS Department of Labor. The hearing will be conducted by an impartial Administrative Law Judge.*

You also have the right to file a formal claim for a refund. To obtain a claim form and inquire about the time period for filing a claim for a refund, call 1 800 462-8100. Refund claim forms will be considered a protest and will be reviewed by the NYS Department of Labor as described above. If you pay and complete a *Protest Document* within 90 days from the date of the enclosed notice, it is not necessary to also complete a formal refund claim form.

2. Make no payment now and request a review by the NYS Department of Labor

You are not required to pay the total amount due to obtain a departmental review of the enclosed notice. However, interest will continue to accrue on any unpaid amounts.

- Complete the enclosed *Protest Document* and return it to the address indicated on the document.

The information that you furnish will be reviewed provided you file your written explanation within the required 90 day period. You will be notified of the findings.

- If there is agreement with your position, the amount due will be adjusted or canceled.

- If there is disagreement with your position, you will be notified of the amount remaining due and be advised of your right to request a hearing with the NYS Department of Labor. The hearing will be conducted by an impartial Administrative Law Judge.*

3. Request a hearing with the NYS Department of Labor (with or without payment)

You are not required to pay the total amount due (although you may pay if you wish) to obtain a hearing with the NYS Department of Labor. However, interest will continue to accrue on any unpaid amounts. Your written request for a hearing must be submitted within 90 days from the date of the enclosed notice. Send your written request for a hearing and the basis for which you are requesting the hearing to:

NYS Department of Labor
Liability and Determination Section
State Office Building Campus
Albany, NY 12240

*A hearing by the NYS Department of Labor is an adversarial proceeding before an impartial Administrative Law Judge. It may involve submission of briefs and the use of lawyers, accountants, or other representatives. Decisions rendered are subject to appeal by all parties.

Call the Liability and Determination Section of the NYS Department of Labor at (518) 457-5807 if you have any questions regarding the hearing process.

Important telephone numbers

For information, call toll free 1 888 899-8810. To obtain forms, call toll free 1 800 462-8100. From areas outside the U.S. and outside Canada, call (518) 485-6800.

Subject: Re: last copy of quick books

will be back in nyc tonight and i can compose a considered and considerate description of my problem and angst.

Basically, i wish i could look up the balance and know how much needs to go into the burgundy account to close the account.

The new ledgers for CASI and for NIST should fit on a disc and do not require a CD. The old ledgers should no longer be used. The new ledgers can easily be e-mailed, as the files are now small.

I do not understand the confusion between checking accounts. You should not be changing checking accounts without providing advance notice to The Jackson Group and without coordinating any changes with them. You must also coordinate any online payments, as this distorts the cash balance. It may be better to pay all bills by check to ensure proper approval and proper handling within the ledger system.

The ledger, not the bank on-line system, should be used for cash balances. Using the bank system disregards any checks that have been written and are not yet cashed, and should not be used for proper cash management.

These communications are a strong indication that procedures are not in place and that CASI management is not supporting the procedures that are being implemented.

Dear Ken, Frank and Bob;

The CD I picked up Ken is not current; it shows books as of 6/23.
I need current checking accounts with good balances.

I will put cash in the burgundy account tomorrow;
I may close the account and cause more checks to bounce.
I need to know what is going on with all of the accounts.

the problems is that I don't have current balances and the bookkeepers are not warning us of negative balances; they should have every check accounted for;
something i have not seen since i turned over business management to Bob.

God is in the details here.
I live or die by these numbers and I don't have good data to make good decisions on.

My partners are going to be all over bob now that we are starting to burn their real cash.

To: 'Joan M. Hayes'
Subject: RE: TransitChek MetroCard Program FAQ

If the employer is giving TransitChek in addition to the employees' regular compensation – or as a reward or incentive – no payroll deduction arrangements are necessary; the employer fills out the Enrollment Form and distributes the Vouchers and/or MetroCards. The first order of TransitChek is sent within three weeks of receipt of payment.
TransitChek has few record-keeping requirements. There's no need for a bona-fide reimbursement arrangement, unlike other benefit programs. There are no expense receipts, reports, plan filings, or other detailed paperwork required. Only a record of TransitChek purchases is required.

Subject: RE: TransitChek MetroCard Program FAQ

We don't subscribe to the TransitChek Voucher Program.
We subscribe to the TransitChek MetroCard program;

We don't get checks or vouchers; we get actual MetroCards, effectively the same as you can get from a subway booth, only we pre-pay them from TransitCheck specifically for the assurances that they give
That the cards can only be used for the purposes intended. The rate that we have consumed TransitCheck MetroCards is clearly below the maximum permitted by law.
We don't need to keep records of dispersal within the company.
That is the beauty of the system; we have the records of delivery of the cards and the serial numbers
We have purchased two kinds of cards: multiple use cards and unlimited use cards.
The main beneficiary of the unlimited cards was Nicky; I still have a stack of cards we can't use precisely because they are unlimited and no one here makes such heavy use of the subway that they Would want to use the card.

Subject: RE: TransitChek MetroCard Program FAQ

Bob,
I suggest you discuss this with ProPayroll. Since it is a payroll deduction, they will have worked out the logistics and can advise how employers handle the program efficiently.

Dan, Bob,
From a benefit package point of view – one sentence is needed.

From an administrative point of view – a log of transit checks, by number, must be maintained. Each check is recorded on the log when purchased (with date of purchase). Each check is recorded on the log when distributed to the employee upon receipt of their payroll deductions (with name of employee and date).

This benefit allows employees to pay for a certain portion of their transportation with pre-tax dollars. A portion of the cost, as determined by the employee up to the maximum, is taken out of each pay check. Each month, the applicable, paid-for transit check is given to the employee. The cost to the employer is the cost of administration of the program. The transit checks are not given to the employees for free.

Subject: TransitChek MetroCard Program FAQ

Dear Joan and Bob;

I called the TransitCheck MetroCard program office here in NYC; I am talking to their Benefits Advisors, who work with employers on compliance issues for their various Benefits Programs employers can purchase. I am asking them for the precise verbiage to put in our benefits package as it evolves. Here is an abstract from some documentation I am putting in the material I am working on with Avery and Ira.

http://www.transitcenter.com/benefits/tc_co/FAQ.htm

How does my company get started?
Employees decide how much they want deducted from their pre-tax salary every month. The employer arranges for the amount to be deducted, then uses the Enrollment Form to order the TransitChek options it wants to distribute – Vouchers, Cards, or both. If the employer is giving TransitChek in addition to the employees' regular compensation – or as a reward or incentive – no payroll deduction arrangements are necessary; the employer fills out the Enrollment Form and distributes the Vouchers and/or MetroCards. The first order of TransitChek is sent within three weeks of receipt of payment.

What are the maximum employees can deduct for Premium TransitChek?
For calendar year 2002, federal limit allows your employees to use up to $100 a month/$1,200 a year of their pre-tax salary to pay for their commutation expenses with TransitChek.

!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!
What records need to be kept for the TransitChek program?
TransitChek has few record-keeping requirements. There's no need for a bona-fide reimbursement arrangement, unlike other benefit programs. There are no expense receipts, reports, plan filings, or other detailed paperwork required. Only a record of TransitChek purchases is required.
!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!

Is the pre-tax TransitChek program a section 125-cafeteria plan program that must be included in my section 125 plan?
No. TransitChek is authorized under Internal Revenue Code (IRC) section 132(f), as amended on June 9, 1998. Cafeteria plans are governed by IRC section 125, which specifically excludes IRC section 132 benefits. That means that TransitChek cannot be part of cafeteria plans and is not subject to the regulations governing cafeteria plans. Therefore, such rules as "use it or lose it" or limited annual enrollment are not required. Consult your tax adviso for specific details.

If TransitChek is given to employees as a fringe benefit, does everyone have to get the maximum?
No. Employers can decide whom to reward and how much to give. It can be used as an annual benefit, as a reward, an incentive, or a bonus. TransitChek can be distributed monthly, quarterly, or even once a year, as long as the amount provided for that period does not exceed $100 times the number of months in that period.

Is the TransitChek program exempt from state as well as federal taxes?
In most cases, the benefit is excluded from taxes. Pre-tax TransitChek is exempt from federal taxes, New York and Connecticut taxes. New Jersey does not exempt pre-tax transportation benefits from state taxes. However, it is exempt from New Jersey state taxes only if you give it free to your employees as a fringe benefit. Consult your tax advisor for details.

When can my company begin a pre-tax program?

You can start a TransitChek program at any time. The pre-tax TransitChek program is not subject to the requirements common to cafeteria plans that limit when an enrollment can be done.

This space for agency use

Public reporting burden for this collection of information is estimated to average 60 minutes per response, including time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding the burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to the Office of Management and Budget, Paperwork Reduction Project (0348-0004), Washington, DC 20503.

PLEASE DO NOT RETURN YOUR COMPLETED FORM TO THE OFFICE OF MANAGEMENT AND BUDGET. SEND IT TO THE ADDRESS PROVIDED BY THE SPONSORING AGENCY.

INSTRUCTIONS

Please type or print legibly. Items 1, 3, 5, 9, 10, 11e, 11f, 11g, 11i, 12 and 13 are self-explanatory; specific instructions for other items are as follows:

Item	*Entry*
2	Indicate whether request is prepared on cash or accrued expenditure basis. All requests for advances shall be prepared on a cash basis.
4	Enter the Federal grant number, or other identifying number assigned by the Federal sponsoring agency. If the advance or reimbursement is for more than one grant or other agreement, insert N/A; then, show the aggregate amounts. On a separate sheet, list each grant or agreement number and the Federal share of outlays made against the grant or agreement.
6	Enter the employer identification number assigned by the U.S. Internal Revenue Service, or the FICE (institution) code if requested by the Federal agency.
7	This space is reserved for an account number or other identifying number that may be assigned by the recipient.
8	Enter the month, day, and year for the beginning and ending of the period covered in this request. If the request is for an advance or for both an advance and reimbursement, show the period that the advance will cover. If the request is for reimbursement, show the period for which the reimbursement is requested.
Note:	The Federal sponsoring agencies have the option of requiring recipients to complete items 11 or 12, but not both. Item 12 should be used when only a minimum amount of information is needed to make an advance and outlay information contained in item 11 can be obtained in a timely manner from other reports.
11	The purpose of the vertical columns (a), (b), and (c) is to provide space for separate cost breakdowns when a project has been planned and budgeted by program, function, or activity. If additional columns are needed, use as many additional forms as needed and indicate page number in space provided in upper right; however, the summary totals of all programs, functions, or activities should be shown in the "total" column on the first page.
11a	Enter in "as of date," the month, day, and year of the ending of the accounting period to which this amount applies. Enter program outlays to date (net of refunds, rebates, and discounts), in the appropriate columns. For requests prepared on a cash basis, outlays are the sum of actual cash disbursements for goods and services, the amount of indirect expenses charged, the value of in-kind contributions applied, and the amount of cash advances and payments made to subcontractors and subrecipients. For requests prepared on an accrued expenditure basis, outlays are the sum of the actual cash disbursements, the amount of indirect expenses incurred, and the net increase (or decrease) in the amounts owed by the recipient for goods and other property received and for services performed by employees, contracts, subgrantees and other payees.
11b	Enter the cumulative cash income received to date, if requests are prepared on a cash basis. For requests prepared on an accrued expenditure basis, enter the cumulative income earned to date. Under either basis, enter only the amount applicable to program income that was required to be used for the project or program by the terms of the grant or other agreement.
11d	Only when making requests for advance payments, enter the total estimated amount of cash outlays that will be made during the period covered by the advance.
13	Complete the certification before submitting this request.

Joan M. Hayes, CPA

From: dr d b karron [karron@casi.net]
Sent: Monday, November 24, 2003 2:14 AM
To: 'Joan M. Hayes'
Cc: 'Bob Benedict'
Subject: RE:

Dear Joan;

We do not have 12 approved (by myself) invoices from ATG;
They rendered a number of bills we did not honor, they were more like reminders;
We only honored the invoice I sent you invoice and I choose to pay them 1K/month against that invoice.

ATG provided telephone and written support (e-mail) mostly to Lee Gurfein, who abundantly availed himself to their services. ATG and Axiom provided the same services, mainly guidance to Gurfein and Myself on specific matters of ATP rules and practices. Mostly practices. The main consulting vehicle was extended telephone and e-mail support. I have the telephone bills and e-mail to back up the delivery of services.

I found their services not worth the cost and terminated them with Gurfein's termination. I also engaged Axiom and Bob Benedict, who, as you know, later joined CASI directly. Axiom also invoiced 2400$, of which we only paid 400$ of which.

Should these vendors actively try to collect on their open balances, and ATP specifically agrees to pay, in writing, I will honor the balance of these invoices.

As you know we have had problems with vendors over-invoicing, and myself overpaying (yourself included).

When I told ATG I would only pay them 1K/month, they started sending 1K invoices, but I did not post these as we already had posted their invoice and each 1K/ invoice did not mean that we owed them an additional 1K.

Similarly, we get invoices from Homefront hardware, but these are not really invoices, we do not calculate the dates for CASI payables from the charge tickets, but from their monthly invoice statement.

Similarly, we do not calculate payable dates from the date on AMEX ticket, but from the American Express statement.

I trust that the matter of Ferrand is settled. She did not render invoices. Ferrand did scanning and misc program support as well as cleaning. When she did leave notes, they were frequently wrong and overstated. I had to figure that when she was here and which days she did program work and which days she did cleaning. Cleaning was paid by my personal check.
When she did scanning and filing, I posted a 100$ charge as a bill.
However her notes, which I used as reminders to post bills, were clearly not invoices.

The matter of ATG I believe should likewise be settled by my explanation.

If you have any further questions, please advise. I sent you the controlling paperwork that we honored.
We did not honor the papers you may have seen in paperport, as they were never posted as approved invoices.
Similarly, I did not approve Homefront invoices because they were not paid as individual items, but at the end of the month.

Sincerely,

Dr. K

I received your two letters of comment and one invoice from ATG.

I did not receive copies of the twelve invoices that were paid to ATG during the first contract year. I think you had copies of these invoices on PaperPort. Each invoice was for a monthly payment of $1,000.

- Do you have monthly bills from ATG?
- What specific services were rendered by ATG?

Dear Ms. Hayes;

Please explain your comments;

You never got the material I sent, (I will refax)
The material I sent was the wrong material, (Please explain)
Or the material I sent you was not precisely and exactly what you requested,
Only close. (Please specify)

Here is what I sent you:
I sent you a letter on Ferrand;
She did not render bills, we just entered her days as invoices.
Did you get this letter.
What is wrong with the letter ?
Quick Books does not have any facility to print out bills received,
Only invoices to send out.
I (or you) can generate a listing of payments to Ferrand.
Please detail what more you require.

I send you the invoice from ATG;
Did you get it ?
We did not pay it in full.
We only paid partial for the first year and stopped paying when I decided enough was enough.
Please detail what additional you require.

I am in CT returning to NYC right now;
If you can answer the questions we can resolve this request.

If we can not resolve this question, I can ask Bob to talk to Belinda to resolve the request directly.

Sincerely,

Dr. K

Subject: hone requests to Matt

Dear Joan;

Please e-mail documentation requests to me, and don't ask Matt to forward documentation or ask him business questions.

Even if the request you make to Matt is to be forward to me.

Matt does not always give me the correct details or context, or even the correct message.

Please do not hang up, cut off, on Matt.
There is no need to explain to Matt that you are doing CASI a favor by asking for this material and that you want it complied with immediately by Matt or Myself.

There is no need to make veiled or vaguely threatening comments about myself or CASI; this only upsets Matt more and distorts the nature substance or character of your request.

I received an hysterical instant message and e-mail message from him asking for me to get him material I don't have while on travel to fax to you that was clearly a misinterpretation of something you requested of him.

I will be back in NYC Sunday night we can talk on the phone if you don't want to make your request by e-mail.

If I understand your request for 12 ATG and 12 Ferrand invoices, you have them already as I know I printed them out multiple times for you and for OIG. If you wish to compare them with the postings in quick books, I believe you can run a report. Bob and Frank should have reposted them as they were entered in the original Quick Books file I kept for year 1. I have not looked at how they were posted in the revised year 1 pair of books as yet.

Please advise if you wish another copy of the original invoices and payments.

Based on our conversation, you are acknowledging compliance with some requirements and non-compliance or partial compliance with others. There are 5 such requirements that are stated in the Management Assertion Report which will be submitted with the report.

After we met, I had a thought:
Would you like to restate the assertions so as to clearly state the areas of compliance and non-compliance, in accordance with the audited findings? In this way, I could opine that your assertions are fairly stated, even though you are acknowledging certain non-compliance.

If you agree, I will e-mail the assertions for your review and sign-off, and you can e-mail your signed response back to me for quick turnaround.

Let me know your decision. Thank you.

FAST TRAC

ITAC

INDUSTRIAL & TECHNOLOGY ASSISTANCE CORPORATION

Growing NYC Businesses

Announcing Fall FastTrac®Beginning September 23rd, 2003

Business Skills Development for CEOs of High-Growth Technology & Manufacturing Firms

Business Leaders! Do you want to expand your business and raise capital? Sign up for ITAC's **FastTrac,** a 12-session program that develops the skills required by CEO's of high-tech and manufacturing firms to improve their business model and build relationships with lenders and investors. The program includes one-on-one coaching, peer learning, and prominent guest speakers from the Manufacturing sector and Silicon Alley to help entrepreneurs produce well-critiqued business plans and strategies for their business.

Attention Veterans! Through the **National Veterans Business Development Corporation**, we can now offer **FastTrac** to you at a greatly reduced cost. In addition, this non-profit organization also provides Veterans and Service-Disabled Veterans with the tools they need to start and expand successful businesses, including:

- Access to capital and services
- Access to markets
- Access to training and mentoring

(Please contact ITAC for more information regarding this program.)

Christopher Simmons of EurekaGGN raves, "FastTrac is highly relevant. I'd recommend this program to any

young company looking to raise capital."

FastTrac is a comprehensive business program presented for the last 5 years by ITAC and created to address the needs of companies seeking to develop or improve their business model, develop strategic partners, and position their company to attract capital.

FastTrac Course Description:

CourseOverview
As a participant, you will refine your business plan as you enhance your understanding of the following topics:

Marketing
- Get ahead in a competitive market by anticipating and adapting to change
- Develop the marketing mix to carve out your niche
- Devise tactics for building a sales force or distribution network
- Hone sales skills

Management
- Build a strong management team
- Leverage professional services
- Negotiate deals

Finance
- Plan your cash flow
- Understand what investors are really looking for
- Develop realistic budgets
- Make the most of traditional and alternative money sources

Law
- Negotiate and close a venture investment;
- Structure technology transfers
- Form corporate partnerships
- Protect your intellectual property
- Understand term sheets

12 Session Outline
Session #1: Introduction & the Entrepreneurial Mindset
Session #2: Investor Mindset
Session #3: Management Team
Session #4: Understanding Your Market, the Business Model and USP
Session #5: Market Research, Analysis & Application to Business Plan
Session #6: Sales and Marketing; Penetration Strategy
Session #7: Building and Reading Financial Statements
Session #8: Cash Flow and Profitability
Session #9: Deal Structures, Due Diligence & Exit Strategy
Session #10: IP, Technology Transfers and Corporate Partnerships
Session #11: Presentation & Negotiation Skills
Session #12: Wrap-Up, Graduation and Party

Why Should I Take This Course?

You've established your business, but want to take it to a new level. You are increasing your sales, refining the business model, hiring the management team, and raising private equity all at once. FastTrac will help you to plan your growth wisely, successfully and

profitably. While "growing pains" are natural, through preparation, planning and action you can overcome the common obstacles that can cripple your company just as it's taking off. Invest three hours per week to work with your peers, top-flite business owners, and Resources who will help you think ahead and gain on your competitors.

Benefit from:

- FastTrac's proven program software. Manuals, cases, the latest scholarship on entrepreneurship and business development.
- Peer learning and networking
- One-on-one coaching
- Knowledge shared by two respected professors
- Advice from prominent guest speakers from the "Silicon Alley" community
- Business plan development
- Business resources

Attendees and Instructors

FastTrac attendees are the CEOs and corporate officers of high-growth technology and manufacturing firms. FastTrac is designed for existing firms who are seeking to raise capital or expand their market share. The course is suitable for businesses in a variety of technology, new media and manufacturing sectors that have developed proprietary products.

The program is headed up by Dr. Dan Nathanson, former NYU Professor and CEO of Washington Square Capital Partners, an angel investment firm. Speakers are fromcompanies such as JPMorganCHASE, NYCIC, and Trylon Communications.

When: 12 Sessions, Tuesdays, beginning September 23rd to December9, 2003, 6:00pm to 9:30pm.

Where: JP Morgan CHASE Bank, 1411 Broadway, between 39th and 40th Streets, 5th floor Conference Area, NY, NY. Refreshments will be provided.

Call ITAC at 212-442-2990 or email Franklin Madison at

fmadison@itac.org for more information.

Thank you. I left a message for Belinda, but she has not responded yet.
She travels a lot, and she will probably respond when she is in the office.

I think I have a stomach bug, so I should be fine by tomorrow. I was waiting for your response, and I'm going back to bed now.

I'll send you an e-mail later today or first thing in the morning. In any event, we'll get this thing mailed this week!

Subject: NIST

The situation at NIST is deteriorating.
They are planning on booking a receivable for 250K and are about to give me 30 days to give them a check before it goes into collections.
Belinda wants to return with a team of auditors, partly because we (you) were not prepared for her first visit.

You must give her and NIST what they want in a timely fashion.
When did you promise delivery to Marilyn Goldstein ? To Hope Snowden ?

Failure to deliver this week means the receivable gets posted and I am going to declare bankrupt.

ok ?

Dear Ms. Joan Hayes;

Please disregard the previous two notices from my partner and attorney, Ms. Frederica Miller, ESQ. She is being unnecessarily hot headed and inflammatory. Please accept my sincere apologizes and I trust that we can get past all of the tensions of getting this task completed while the grant is suspended.

I will meet with you at a time and place of your choosing, to provide vital information you need to complete this audit report.

I expect this audit report to be submitted to NIST ATP as soon as possible for overnight delivery to NIST with a copy to myself. I stand ready, willing, and able to drive up to your office and do whatever is required to complete this project.

Sincerely,

Dr. Karron

done.
Dear Friends, Family and Colleagues;

During my visit at Montreal and McGill i am reachable via the office of my hostess,

Professor Jensen;

Please continue to e-mail me at karron@casi.net, and baring server problems, it never hurts to also send me CASI related important e-mail to casi@thorn.net.

Overnight and regular mail can be sent to me in care of Prof Jensen below;

I will get it same day as I am seeing Prof. Jensen daily. Please send me tracking information if you do send overnight packages so that I can tell when to pick ask Prof. Jensen to pick it up and bring it to lunch or dinner.

I expect to return to NYC Aug 28 through 29, depending on who drives down with me.

Dr. D B Karron

in the care of

Professor Olivia Jensen

Department of Earth and Planetary Sciences

McGill University

Room 238

3450 University street

Montreal, QC Canada

Dear Friends, Family and Colleagues;

During my visit at Montreal and McGill i am reachable via the office of my hostess,
Professor Jensen;

Please continue to e-mail me at karron@casi.net, and baring server problems, it never hurts to also send me CASI related important e-mail to casi@thorn.net.

Overnight and regular mail can be sent to me in care of Prof Jensen below;

I will get it same day as I am seeing Prof. Jensen daily. Please send me tracking information if you do send overnight packages so that I can tell when to pick ask Prof. Jensen to pick it up and bring it to lunch or dinner.

I expect to return to NYC Aug 28 through 29, depending on who drives down with me.

Dr. D B Karron
in the care of
Professor Olivia Jensen
Department of Earth and Planetary Sciences
McGill University
Room 238
3450 University street
Montreal, QC Canada
h3a2a7

Subject: CASI Audit Report : Delivery

Dear Joan;

Please deliver the audit report to my deligate and manager, Bob Benedict by overnight or fax as soon as you are ready.
Please CC a copy to me at CASI. I will have it forwarded up here.

Please tell Hope when you expect to have it done. She is expecting your call.
Hope has specifically told me she is waiting for your report and would like to know whn you will be done.

I don't believe I will be able to make as effective comment or understanding of your audit report that Bob can; I hired Bob to be the fiscal manager and he knows our books better than I do at this point.
I expect both of you to try your best to work together.

Therefore, I insist that you deliver the report to Bob, as the designated CASI management and finance person in my stead,
and I will stand behind his review and comments as my own.

I expect to be available by e-mail this thursday, and we can arrange a phone conference by friday. My connectivity here in Montreal is sporatic, andI had to buy expensive roaming air service mainly for late night afterhours connectivity.

Sincerely,

Dan

Bob,

Footnotes are usually prepared by the auditee and presented for audit with the financial statements. Any applicable changes that may result from the audit are subsequently made to both the financial statements and the footnotes. Footnotes provide disclosures applicable to the financial statements and are not a response to the audit.

However, you were not involved when the financial statements were prepared and presented for audit, and could not have been aware of the lack of same before our discussions.

I appreciate your help and cooperation during your period of involvement in the audit process.

Joan

MEMORANDUM FOR: Shamim Shaikh, Acting Chief
Grants and Agreements Management Division
National Institute of Standards and Technology

Kathleen M. McKevitt

FROM: for William F. Bedwell, Jr.
Regional Inspector General
for Audits

SUBJECT: NIST Cooperative Agreement Number 70NANB1H3050
Computer Aided Surgery, Inc., NY
Final Report No. ATL-16095-3-0001

This report on our audit of the subject NIST Advanced Technology Program cooperative agreement with Computer Aided Surgery, Inc. is to inform NIST officials of significant findings that require their immediate attention. Based on Computer Aided Surgery's own accounting records, the company should reimburse NIST $205,126. The corporation has not contributed any of its required cost-share, which currently totals $54,068, and has drawn down $205,126 in excess of the federal share of ATP project costs identified in its accounting records. The Financial Status Reports filed with NIST are inaccurate because they show that the company contributed the required matching funds and the reports overstate ATP project expenses. We will issue a separate comprehensive audit report including questioned costs and other non-compliance issues covering the period October 1, 2001, through June 27, 2003.

We are providing a copy of this report to Computer Aided Surgery. However, we have not requested the company prepare a written response to NIST addressing the report findings or recommendations. We will include these findings in the subsequent comprehensive audit report to allow for due process. Requests from the public for copies of this report must be referred to the Office of Inspector General, Office of Compliance and Administration Publication Unit, Room 7009C, Herbert C. Hoover Building, for response under the Freedom of Information Act.

Any information or inquiry regarding this final report should be directed to me at (404) 730-2780, or Kathleen McKevitt of this office at the same number. We appreciate the cooperation and courtesies extended by NIST officials during our audit.

Introduction

In September 2001, NIST awarded a $2,110,500 Advanced Technology Program cooperative agreement to Computer Aided Surgery, Inc., a for-profit company involved in innovative composite design and engineering. The agreement was for a 3-year period with $800,000 in federal funds for the first year, $600,000 for the second year, and $600,000 in the third year. The agreement required the company provide a matching share of $36,500 for the first year, $30,500 for the second year, and $43,500 for the third year.

The purpose of the agreement was to develop and demonstrate novel computer and engineering technology based on Digital Morse Theory to enhance the quality and usability of computerized anatomic models for precise and accurate cancer treatment therapies.

Purpose and Scope of Audit

We performed the audit of the NIST award at the company's office in New York City during June 2003. NIST requested that our office conduct the audit because the grants and program officials were concerned about Computer Aided Surgery's ability to account for federal funds being spent. The purpose of the audit was to determine the financial status of the award, the reasonableness and allowability of expenses charged against the award and review compliance with applicable laws and regulations. The audit covered the period from October 1, 2001, through June 27, 2003. We examined pertinent NIST and company records, and interviewed agency and company officials as deemed necessary.

We relied on computer-processed data supplied by the company as the basis for our audit findings and recommendations. Consequently, we tested the accuracy by tracing and comparing the data to original source documents and other supporting documents. Based on our tests, we concluded that the computerized data was sufficiently reliable for use in meeting our objectives.

We conducted the audit in accordance with generally accepted government auditing standards, and performed it under the authority of the Inspector General Act of 1978, as amended, and Department Organization Order 10-13, dated May 22, 1980, as amended.

Results of the Audit

During our audit, we found significant problems that we brought to the grants officers attention with a conference call on June 24, 2003 and are documenting with this report. Computer Aided Surgery has not contributed any of its required matching funds, which currently totals $54,068. In addition, the company drew down $205,126 in excess of the federal share of ATP project costs recorded in its accounting records. Finally, the Financial Status reports filed with NIST are inaccurate because they overstate expenses to justify the excess draw-downs and include a cost-share amount that was never contributed. NIST informed us that they suspended further award payments to Computer Aided Surgery as of June 27, 2003. We are working with the company to obtain additional documentation so that we can provide a comprehensive audit of the allowability and reasonableness of ATP project expenses for the period October 1, 2001 through June 27, 2003.

$54,068 of Required Matching Funds Not Contributed

Computer Aided Surgery has not contributed any matching funds to the project even though the NIST award agreement requires a cost share of 4.57 percent. The Chief Technical Officer of Computer Aided Surgery identified the State of New York as the source of the matching funds, but the funding was not received due to the state's budget problems after September 11, 2001. While the primary owner and Chief Technical Officer of Computer Aided Surgery intends to contribute his own funds to the ATP project, none of these required funds have been contributed to date.

The matching funds required for the project based on the ATP identified expenses in the company's accounting records are shown below:

Award Amendment	Period	Required Cost-Share	ATP Project Costs Per Books	Required Cost-Share
# 2	10/01/2001 - 09/30/2002	4.36%	$ 779,905	$ 34,004
#3	10/01/2002 - 06/27/2003	4.84%	414,537	20,064
Total			$1,194,442	$ 54,068

$205,126 in Excess Drawdowns

Our audit revealed that Computer Aided Surgery drew down $205,126 of federal funds over the 21-month period in excess of the federal share of ATP expenses identified in its own accounting records. A review of the company's financial records revealed that these excess draw-downs were not spent on ATP project expenses. The amount of drawdowns in excess of the federal share of ATP project expenses for the period October 1, 2002 through June 27, 2003 is shown below:

	10/01/01 – 09/30/02	10/01/02 – 06/27/03	Cumulative
ATP Project Expenses Per Books	$ 779,905	$ 414,537	1,194,442
Federal Share of Project	95.64%	95.16%	
Federal Share of ATP Expenses	$745,901	$394,473	1,140,374
Federal Funds Drawn-down	800,000	545,500	1,345,500
Excess Draw-downs of Federal Funds	$ 54,099	$ 151,027	$ 205,126

As shown above, the company drew down $1,345,500 in federal funds between October 1, 2001 and June 27, 2003. However, a review of the company's general ledger revealed only

$1,194,442 in ATP project costs during this same 21-month period and based on the project's federal cost-share, Computer Aided Surgery was only entitled to $1,140,374. The $205,126 excess funds went to pay expenses not related to the ATP project. It appears that Computer Aided Surgery's only source of revenue during the period of the award has been the NIST funds.

The *Advanced Technology Program Special Award Conditions* Section 9. c. states:

> "Advances ... shall be limited to the minimum amounts necessary to meet immediate disbursement needs. Advanced funds not disbursed in a timely manner must be promptly returned .... Advances shall be for periods not to exceed 30 days."

Inaccurate Financial Status Reports

Computer Aided Surgery filed inaccurate Financial Status Reports (SF-269's) for each of the four quarters during the period October 1, 2001 through September 30, 2002. The erroneous reports show the amount of federal funds drawn down rather than actual federal expenditures in the box designated "federal outlays for the quarter," thereby, overstating expenditures. Additionally, Computer Aided Surgery claimed that it had contributed the required cost-share funds, when in fact; no matching funds have been contributed. The Financial Status Reports have not been completed for the periods ending December 31, 2002 or March 31, 2003.

The *Advanced Technology Program General Terms and Conditions* Section 7.c. (1) states:

> "By signing this award the Recipient agrees to ensure that only actual costs incurred will be charged to the award and that all costs will be reasonable, allocable, and allowable in accordance with the applicable Federal Cost Principles."

Additionally section 7.c. (3)(a) states:

> "The Recipient shall submit a "Financial Status Report" (SF-269) on a calendar quarter basis for the periods ending March 31, June 30, September 30, and December 31, or any portion thereof, unless otherwise specified in a special award condition. Reports are due no later than 30 days following the end of each reporting period."

Recommendations

We are recommending that NIST:

1. Continue to suspend award payments to Computer Aided Surgery, Inc., until it meets with the following requirements:

   - Reimburse NIST $205,126 for funds drawn down in excess of the federal share of ATP project expenses.

   - File the Financial Status Reports (SF-269) for the quarters ending December 31, 2002, and March 31, 2003.

2. Designate the company as a "high risk" organization and, at a minimum place it on a reimbursement basis for future drawdowns, if the suspension of award payments is removed.

Funds to Be Put to Better Use

By implementing this recommendation, $205,126 in federal funds will be put to better use by returning the funds to NIST and ensuring that the funds are used only for the NIST project.

I'm sorry I missed you. I left right after our conversation and was out late last night. I'm leaving in a few minutes for another night out. Most of our family birthdays are in August and September, so the weekends get busy.

I'll be out of the office with clients most of Monday, but we can talk later on Monday or one of the following days. I would like to reschedule our conference call with Bob, so we can finish the audit. Once that is complete, we can focus on the other important tasks and issues.

Dear Joan Hayes;

I called the IRS to check on the status of the Tax Levi;
I spoke to a Mr. John Snow, Tax Enforcement Number 2973971 at 4:30 pm, today July 23, 2003.

I gave him the CASI LLC EIN number, and he confirmed that there was an outstanding balance, penalties and interest, and that the Levi was still in effect.

I then had the bright idea to ask him to look up the CASI INC EIN number and see if there was an overpayment of the exact same amount (less penalties and interest) in the CASI INC account.

He found the missing/misapplied payments and immediately suggested that he can move the money internally from the CASI INC, number to the CASI LLC, Inc number. He then did so while I was on the phone with him.

He confirmed to me that the penalties and interest were removed and that BOTH accounts were precisely and exactly zeroed out.

He said a official notification would be issued within the next three weeks and the matter was resolved.

I am quite pleased to have solved this problem without resorting to having to provide any more gigabytes of backup documentation.

Subject: tax levi cured

Dear Joan Hayes;

I called the IRS to check on the status of the Tax Levi;
I spoke to a Mr. John Snow, Tax Enforcement Number 2973971 at 4:30 pm, today July 23, 2003.

I gave him the CASI LLC EIN number, and he confirmed that there was an outstanding balance, penalties and interest, and that the Levi was still in effect.

I then had the bright idea to ask him to look up the CASI INC EIN number and see if there was an overpayment of the exact same amount (less penalties and interest) in the CASI INC account.

He found the missing/misapplied payments and immediately suggested that he can move the money internally from the CASI INC, number to the CASI LLC, Inc number. He then did so while I was on the phone with him.

He confirmed to me that the penalties and interest were removed and that BOTH accounts were precisely and exactly zeroed out.

He said a official notification would be issued within the next three weeks and the matter was resolved.

I am quite pleased to have solved this problem without resorting to having to provide any more gigabytes of backup documentation.

Subject: Second Try: IRS Notice of Intent to Levy for 19723

Dear Joan;

This looks deadly serious; attached is a notice of Levy 19,723.
We have 47 or so thousand sitting in the CASI LLC NIST ATP checking account that is liable to be seized if this is not settled and fast.
What is going on ? Loosing that money now will be certain to doom our company.

This note has not been CC'ed to anyone other than you, as per your previous instructions.

Please advise.

Urgent !!

We intend to levy on certain assets. Please respond NOW.

(To avoid additional penalty and interest, pay the amount you owe within ten days from the date of this notice.)

Our records indicate that you haven't paid the amount you owe. The law requires that you pay your tax at the time you file your return. This is your notice, as required by Internal Revenue Code Section 6331(d), of our intent to levy (take) any state tax refunds that you may be entitled to if we don't receive your payment in full. In addition, we will begin to search for other assets we may levy. We can also file a Notice of Federal Tax Lien, if we haven't already done so. **To prevent collection action, please pay the current balance now.** If you've already paid, can't pay, or have arranged for an installment agreement, it is important that you **call us immediately** at the telephone number shown below.

Account Summary

Form: 941	Tax Period: 03-31-2003
Current Balance:	$19,723.17
Includes:	
Penalty:	$96.08
Interest:	$56.38
Last Payment:	$0.00

For information on your penalty & interest computations, you may call 1-800-829-0115

See the enclosed Publication 594, The IRS Collection Process, and Notice 1219B, Notice of Potential Third Party Contact, for additional information.

Questions? Call us at **1-800-829-0115**

Please mail this part with your payment, payable to United States Treasury.

USE OUR AUTOMATED TELEPHONE SERVICE — IT'S EASY AND IT'S FAST

HERE'S A LIST OF THE SERVICES AVAILABLE...
AND INFORMATION YOU'LL BE ASKED FOR SO WE CAN HELP YOU

If you plan to call us (at the number shown on the front of the enclosed notice), and you have a touch-tone phone, you may find it convenient to use our automated interactive telephone service. Our automated service can help you quickly and easily if you are ready with just a few items of information.

IF YOU NEED...	YOU'LL BE ASKED...
To know when you can expect to receive your refund	Your social security number, the amount of the refund you're expecting, and your filing status, (single, married filing joint, etc.)
To know the current balance due on your account, whether payments have been credited to your account, or whether changes have been made to you account	Your social security number and personal identification number or PIN. If you have not set up a PIN, you'll be asked to do so using the information shown below
To set up a personal identification number to access your personal tax account information	Your social security number, the Caller ID number shown at the top of the enclosed notice and your date of birth (Use 8 digits, February 23, 1960 is entered as 02231960)
To request more time to pay or set up a payment plan More time to pay	Your social security number and the caller ID number shown at the top of the enclosed notice Whether you want a 30 or 60 day extension
To set up a payment plan	The amount you can pay each month
A transcript of your account or a copy of your return	Your social security number and the numbers in your street address
The address to file you return	Your zip code
The address to mail a payment	Your social security number and zip code

Notice **1212** (Rev. 5-2002)
Catalog Number 25924J Department of Treasury - IRS

- send Form 843 to the IRS Service Center where you filed your return for the year you relied on erroneous advice from the IRS.

The three documents you must attach to your Form 843 are:

- a copy of your original request for advice from IRS,
- a copy of the erroneous written advice from IRS, and
- a notice (if any) showing the penalty we charged that you now wish us to remove.

Interest: $56.38

09 Interest

IRC section 6601

We charge interest when your tax isn't paid on time. Interest is computed from the due date of your return (regardless of extensions) until paid in full.

Interest compounds daily except on late or underpaid estimated taxes for individuals or corporations. Interest is also charged on penalties for late filing, over or understating valuations, and substantially understating the tax you owe.

Corporate Interest - We charge additional interest of 2% if, according to our records, you didn't make your corporate tax payment within 30 days after the IRS notified you of the underpayment of tax. This interest begins on the 31st day after we notify you of the underpayment on tax amounts you owe over $100,000, minus your timely payments and credits.

Re: Cooperative Agreement 70NANB1H3050, Amendment No. 6

Subject: Request for lifting of award suspension

Dear Ms. Goldstein;

This letter is to inform you that CASI LLC has made cash deposits into the CASI NIST Project checking account (JPMorgan-Chase Bank Account XXXXXXXX3166) totaling $47,000.00. This funds in part the CASI contribution of $67,000.00, as required by cooperative agreement 70NANB1H3050, Amendment No. 6, through the end of the current fiscal year through September 30, 2003

Additionally, CASI is providing $20,100.00 as 30% of its $67,000.00 contribution as an "in-kind" contribution, based on invoice or fair market value assessment noted in the attached spreadsheet and supporting documents. The equipment valued in the attached was purchased with CASI funds prior to the start of this current award, but has been used 100% for our current NIST project.

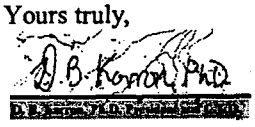
CASI has made, in good faith, previous match contributions totaling $16,600.00, however these were later re-classified as non-match by our accountant. The Project PI has taken a second mortgage on the project apartment to cover the new re-match payments made since the suspension.

Mr. Robert Benedict, our Administrator and Business Manager of CASI LLC has established management controls and procedures that will ensure the appropriate amount of Member Contribution will be made at the appropriate time for any future ATP fund draw to prevent this problem from happening during the remaining course of this year funding when resumed, and at any point in the future.

C. A. S. I.
Computer Aided Surgery, Inc.

Finally, with the CASI Member Contribution now met through the end of the second project year, as supported by the appended documents, CASI respectfully requests the lifting of the grant suspension amendment so that our research project may continue.

Yours truly,



Enc:

I just spoke with Avery regarding the benefit plan for CASI and its impact on grant funding. I would like to share the conclusions of this conversation with both of you. I would like to suggest a conference call (DBK, Bob, me) to save us all some time.

Do you agree? When are you available?

The new ledgers for CASI and for NIST should fit on a disc and do not require a CD. The old ledgers should no longer be used. The new ledgers can easily be e-mailed, as the files are now small.

I do not understand the confusion between checking accounts. You should not be changing checking accounts without providing advance notice to The Jackson Group and without coordinating any changes with them. You must also coordinate any online payments, as this distorts the cash balance. It may be better to pay all bills by check to ensure proper approval and proper handling within the ledger system.

The ledger, not the bank on-line system, should be used for cash balances. Using the bank system disregards any checks that have been written and are not yet cashed, and should not be used for proper cash management.

These communications are a strong indication that procedures are not in place and that CASI management is not supporting the procedures that are being implemented.

Dear Ken, Frank and Bob;

The CD I picked up Ken is not current; it shows books as of 6/23.
I need current checking accounts with good balances.

I will put cash in the burgundy account tomorrow;
I may close the account and cause more checks to bounce.
I need to know what is going on with all of the accounts.

Dear Joan, Ken, Frank and Bob;

I am borrowing money to cover the current overdrafts from my mom (in addition to the money I am borrowing on my apartment). As my mom is a partner, and has a stake in the business (she has already given me 20K for her share in the company, and since I have to go to her to get cash, she will be calling to try to understand how with the bookkeepers and management I am turning the company over to we are coming up so short.

Please be polite, explain to her (and eventually to me) why we can't keep the checking account registered straight, that there is no missing money, no one is stealing and that I am in the process of repaying the government for overpayments and co-payments because we did not get co-investors.

She has been calling me insessently since I made the mistake of telling her that checks were bouncing and I needed to borrow more money from her. I am going out to visit her today, and it is the most I could do to keep her from calling all of you Sunday morhing; I am not answering my phone now.

Penalty and Interest

About Your Notice - The penalty and interest charges on your account are explained below. If you want a more detailed explanation of your penalties and interest, please call the telephone number listed on the front of this notice. You may call your local IRS telephone number if the number shown on your notice is a long-distance call for you. All days mentioned in the paragraphs below are calendar days, unless specifically stated otherwise.

Penalty: $96.08

07 Paying Late

IRC section 6651 (a) (2)

We charged a penalty because you didn't pay your tax on time. Initially, the penalty is 1/2 % of the unpaid tax for each month or part of a month you didn't pay your tax.

If you think we should remove or reduce the penalty, see "Removal of Penalties - Reasonable Cause."

Removal of Penalties - Reasonable Cause

The law lets us remove or reduce the penalties explained in this notice if you have an acceptable reason. If you believe you have an acceptable reason, you may send us a signed statement explaining your reason. We'll review it and let you know if we accept your explanation as reasonable cause to remove or reduce your penalty. This procedure doesn't apply to interest and, in some cases, we may ask you to pay the tax in full before we reduce or remove the penalty for paying late.

Erroneous Written Advice from IRS

We'll also remove your penalty if:

- you wrote to IRS and asked for advice on a specific issue,
- you gave IRS complete and accurate information,
- IRS wrote back to you and gave you a specific course of action to take or explained what actions not to take,
- you followed our written advice in the manner we outlined, and
- you were penalized for the written advice we gave you.

To have the penalty removed because of erroneous written advice from IRS, you should:

- complete Form 843, Claim for Refund and Request for Abatement,
- request that IRS remove the penalty, and

It is not up to Belinda to "certify" the Jackson Group. The audit issue is the existence of a proper accounting system to support the financial requirements of the award. I don't see any problem with the Jackson Group, and I think it would be a severe detriment to the project to make any change that would impede the implementation of procedures. I'm sure Bob will monitor the process going forward. Frank will need your cooperation for a smooth process and Bob's response to his questions as they occur.

To: 'Joan M. Hayes'; 'Bob Benedict'
Subject: RE: new procedures

We need allowances for
1) I am on the road a lot and approvals can be given by e-mail if required; cc'ed to Bob I will give Bob countermand authority if he believes there is a misunderstanding.
2) Bob is traveling a lot; approvals can be given by Bob to Frank directly however I reserve the

right to countermand them if there is a misunderstanding.\
3) submission of invoices and receipts by e-mail is allowed; paper is to follow.
3.1) certain regular vendors can be managed by website/e-mail, specifically,
Oxford, Verizon, American Express, con Edison, Con Edison solutions, sprint, RCN, etc. etc.
We can discuss that in detail later, but at some point, it needs to be done.
Insurance billing is still payable even if the bill is not posted; we need to allow for that.
4) when I am on the road I will e-mail receipts to Frank for posting. Frank can print things out if needed.
4.1) bills and account payable should be e-mailed with copies of the bills attached. This is to prevent Bob or myself from approving things blindly.
Any payment decision should have full support appended both in paper for paper presentment or e-mail presentment.
NO GUESSING AT ANY TIME/POINT in the PROCESS.
5) Frank should be courteous and not upset vendors when they call regarding payment and reconciliation of balances.
We have an emergency problem with Webworqs cutting us off Friday. I promised her full payment by the end of next week.

6) We should stop using the burgundy CASI INC NIST account as we are running out of checks and I don't want to order more. I have to shut down the account
and it does not pay to keep the accounts alive; they cost just to keep open especially with low/zero balances.

Co-Payment:
I need a statement of the co-payment due through now, less in-kind.
I will borrow the cash next week and deposit it into CASI LLC which will forward the money to CASI NIST.
>From that money I want to pay off SGI, Silicon City.
I need a budget for the rest of the year that is for real. The budget Bob just sent is no good.

Dis-allowed.
The copay should be for total allowed costs to date;
Making up Disallowed is another matter. If I understand things from Bob, co-pay is more important than disallowed.
As such, the money I put in last year should be re-classified as co-pay and NOT refund disallowed. This is my second request.

Belinda Certification of CASI Business Procedures:
My impression is that she is not going to certify things; based on Frank's errors, the difficulty he is having recreating a balanced new first year ledger, and the controversy concerning the classification of some marginal costs. Finally, Fink is making far too many judgment calls he should not, and making far too many outright errors in clear calls as to which vendor is paid how from what. Bob has a stack of checks in error to fix as well as invoices from Webworqs that need to be rushed through. We need Frank to appear to be supported by Bob; We also have to be careful that Belinda does not disallow Ken and Frank's invoices based on their being excessive and that NIST is not going to pay for error correction time; blab blab.

More later. Just back from all day with my mom cleaning her house....

-----Original Message-----

Sent: Saturday, June 21, 2003 12:53 PM
To: Dr. D.B. Karron; Bob Benedict
Subject: new procedures

I would like to clarify our discussion, on Friday, related to the implementation of procedures.

Observation:
I have observed, over time, many bookkeepers who have an excellent knowledge of QuickBooks and perform proper bank statement reconciliations to support the cash transactions do not have the same level of knowledge related to balance sheet accounts. In addition, the outsourcing of payroll usually results in a cost-effective solution, so many bookkeepers do not develop a payroll practice. The unique manner in which QuickBooks handles payroll transactions can be confusing. The user-friendly functionality of QuickBooks simplifies income statement accounting while it does not enable an on-the-job learning of balance sheet accounts. Even with its limitations, QuickBooks is an affordable general ledger package which is widely used by small businesses, and I think it is reasonable to conclude that the benefits exceed the costs.

CASI Ledgers:
In my opinion, the Jackson Group has done an excellent job in preparing the project year one ledger for audit and in responding to the audit requests. I recommended the establishment of separate ledgers from the beginning of project year two, and I understand the reasons for the decision to establish separate ledgers starting with project year one. However, in my discussions with you prior to the development of these ledgers, I pointed out the need for management to be prepared to assist/train Frank with the proper recording of balance sheet and payroll items, as they relate to CASI. In the new CASI accounting environment, the balance sheet is very simple, so this should not be an extensive task. For the most part, the balance sheet accounts that are now needed result from the use of NIST funds to pay disallowed expenses, including CASI expenses, and this situation is not expected to continue going forward. However, the handling of these transfers between ledgers, and the use of appropriate balance sheet accounts in these entries, is very important.

The reconciliation of new ledger balances, which is currently underway, has become an extensive undertaking due to the condition of the old ledger. An extremely complicated old ledger, with multiple transactions that were not posted in an appropriate (according to the generally accepted rules of accounting) manner and an enormous number of changes to transactions, has resulted in the situation now at hand. In my opinion, this supports the need for the new ledgers which are now being created and for the need to maintain these ledgers in an appropriate manner going forward. The cost of this endeavor is primarily the result of the condition of the old ledger.

Implementation of Procedures:
I recommend that the new procedures continue to be implemented in the following order of priority:

1. The new procedures should continue to be implemented as the top priority. Frank should be provided with the documents required to fulfill his responsibilities, as described in the procedures, in a timely manner. Frank should be provided with written approval to pay bills (such as initials on the bills or the accounts payable report) in a timely manner. Proper balance sheet accounts should be established on the new ledgers and their use should be explained to Frank by management during the reconciliation period. A method of communication, that is reasonable and efficient to the interested parties, should be established, so Frank can receive timely responses to his questions and concerns. Management should closely monitor all aspects of the process.
2. Once the procedures are "up and running", the process should be continue to be monitored by management until it is stabilized over a period of time.
3. At that point, if management deems it necessary, it may be appropriate to discuss additional training/educational needs that may enhance Frank's tasks. This may also be an appropriate time to discuss any changes in the billing structure (such as job billing vs. hourly billing). However, at this point, the benefits to be acquired from a proper accounting system should be evident in the

billings due to the much reduced time the posting and reconciling of transactions will take.

In summary, the full implementation of the new procedures (# 1 above) is critical and should be completed as a top priority. Anything that could impede this project, including additional enhancements (# 3 above) which could impede the project if suggested at this time, should be considered after the new procedures have been fully implemented and the environment has been stabilized.

Please let me know if you have any comments or suggestions or would like to further discuss any of the items herein.

Thank you.

5) Frank should be courteous and not upset vendors when they call regarding payment and reconciliation of balances.
We have an emergency problem with Webworqs cutting us off Friday. I promised her full payment by the end of next week.

6) We should stop using the burgundy CASI INC NIST account as we are running out of checks and I don't want to order more. I have to shut down the account
and it does not pay to keep the accounts alive; they cost just to keep open especially with low/zero balances

Co-Payment:

I need a statement of the co-payment due through now, less in-kind.

I will borrow the cash next week and deposit it into CASI LLC which will forward the money to CASI NIST. From that money I want to pay off SGI, Silicon City.

I need a budget for the rest of the year that is for real. The budget Bob just sent is no good.

Dis-allowed.

The copay should be for total allowed costs to date;

Making up Disallowed is another matter. If I understand things from Bob, co-pay is more important than disallowed.

As such, the money I put in last year should be re-classified as co-pay and NOT refund disallowed. This is my second request.

Belinda Certification of CASI Business Procedures:

My impression is that she is not going to certify things; based on Frank's errors, the difficulty he is having recreating a balanced new first year ledger, and the controversy concerning the classification of some marginal costs. Finally, Fink is making far too many judgment calls he should not, and making far too many outright errors in clear calls as to which vendor is paid how from what. Bob has a stack of checks in error to fix as well as invoices from Webworqs that need to be rushed through. We need Frank to appear to be supported by Bob; We also have to be careful that Belinda does not disallow Ken and Frank's invoices based on their being excessive and that NIST is not going to pay for error correction time; blab blab.

More later. Just back from all day with my mom cleaning her house....

Subject: new procedures

I would like to clarify our discussion, on Friday, related to the implementation of procedures.

Observation:
I have observed, over time, many bookkeepers who have an excellent knowledge of QuickBooks and perform proper bank statement reconciliations to support the cash transactions do not have the same level of knowledge related to balance sheet accounts. In addition, the outsourcing of payroll usually results in a cost-effective solution, so many bookkeepers do not develop a payroll practice. The unique manner in which QuickBooks handles payroll transactions can be confusing. The user-friendly functionality of QuickBooks simplifies income statement accounting while it does not enable an on-the-job learning of balance sheet accounts. Even with its limitations, QuickBooks is an affordable general ledger package which is widely used by small businesses, and I think it is reasonable to conclude that the benefits exceed the costs.

CASI Ledgers:
In my opinion, the Jackson Group has done an excellent job in preparing the project year one ledger for audit and in responding to the audit requests. I recommended the establishment of separate ledgers from the beginning of project year two, and I understand the reasons for the decision to establish separate ledgers starting with project year one. However, in my discussions with you prior to the development of these ledgers, I pointed out the need for management to be prepared to assist/train Frank with the proper recording of balance sheet and payroll items, as they relate to CASI. In the new CASI accounting environment, the balance sheet is very simple, so this should not be an extensive task. For the most part, the balance sheet accounts that are now needed result from the use of NIST funds to pay disallowed expenses, including CASI expenses, and this situation is not expected to continue going forward. However, the handling of these transfers between ledgers, and the use of appropriate balance sheet accounts in these entries, is very important.

The reconciliation of new ledger balances, which is currently underway, has become an extensive undertaking due to the condition of the old ledger. An extremely complicated old ledger, with multiple transactions that were not posted in an appropriate (according to the generally accepted rules of accounting) manner and an enormous number of changes to transactions, has resulted in the situation now at hand. In my opinion, this supports the need for the new ledgers which are now being created and for the need to maintain these ledgers in an appropriate manner going forward. The cost of this endeavor is primarily the result of the condition of the old ledger.

Implementation of Procedures:
I recommend that the new procedures continue to be implemented in the following order of priority:

1. The new procedures should continue to be implemented as the top priority. Frank should be provided with the documents required to fulfill his responsibilities, as described in the procedures, in a timely manner. Frank should be provided with written approval to pay bills (such as initials on the bills or the accounts payable report) in a timely manner. Proper balance sheet accounts should be established on the new ledgers and their use should be explained to Frank by management during the reconciliation period. A method of communication, that is reasonable and efficient to the interested parties, should be established, so Frank can receive timely responses to his questions and concerns. Management should closely monitor all aspects of the process.
2. Once the procedures are "up and running", the process should be continue to be monitored by management until it is stabilized over a period of time.
3. At that point, if management deems it necessary, it may be appropriate to discuss additional training/educational needs that may enhance Frank's tasks. This may also be an appropriate time to discuss any changes in the billing structure (such as job billing vs. hourly billing). However, at this point, the benefits to be acquired from a proper accounting system should be evident in the billings due to the much reduced time the posting and reconciling of transactions will take.

In summary, the full implementation of the new procedures (# 1 above) is critical and should be completed as a top priority. Anything that could impede this project, including additional enhancements (# 3 above) which could impede the project if suggested at this time, should be considered after the new procedures have been fully implemented and the environment has been stabilized.

Please let me know if you have any comments or suggestions or would like to further discuss any of the items herein.

Thank you.

CAREFUL WHAT YOU EAT!

For those of you who watch what you eat... Here's the final word on nutrition and health. It's a relief to know the truth after all those conflicting medical studies.

1. The Japanese eat very little fat and suffer fewer heart attacks than the Americans.

2. The Mexicans eat a lot of fat and suffer fewer heart attacks than the Americans.

3. The Japanese drink very little red wine and suffer fewer heart attacks than the Americans.

4. The Italians drink excessive amounts of red wine and suffer fewer heart attacks than the Americans.

5. The Germans drink a lot of beers and eat lots of sausages and fats and suffer fewer heart attacks than the Americans.

CONCLUSION: Eat and drink what you like. Speaking English is apparently what kills you.

Subject: CASI Benefits Manual Details

Here are important parts of the emerging CASI Benefits Manual;

We should review this with Ira and/or Avery and get specific justification for approvals.

Medical Advice Desk

Q. What does HMO stand for?

A. This is actually a variation of the phrase, "HEY MOE." its roots go back to a concept pioneered by Moe of the Three stooges, who discovered that a patient could be made to forget about the pain in his foot if he was poked hard enough in the eyes.

~~~~~~~~~~~

Q. I just joined an HMO. How difficult will it be to choose the doctor I want?

A. Just slightly more difficult than choosing your parents. Your insurer will provide you with a book listing all the doctors in the plan. These doctors basically fall into two categories -- those who are no longer accepting new patients, and those who will see you but are no longer participating in the plan. But don't worry; the remaining doctor who is still in the plan and accepting new patients has an office just a half-day's drive away and has a diploma from a Third World Country.

~~~~~~~~~~~

Q. Do all diagnostic procedures require pre-certification?

A. No. Only those you need.

~~~~~~~~~~~

Q. Can I get coverage for my preexisting conditions?

A. Certainly, as long as they don't require any treatment.

~~~~~~~~~~~

Q. What happens if I want to try alternative forms of medicine?

A. You'll need to find alternative forms of payment.

~~~~~~~~~~~

Q. My pharmacy plan only covers generic drugs, but I need the name brand. I tried the Generic Medication, but it gave me a stomach ache. What should I do?

A. Poke yourself in the eye.

~~~~~~~~~~~

Q. What if I'm away from home and I get sick?

A. You really shouldn't do that.

~~~~~~~~~~~
~~~~~~~~~~~

Q. I think I need to see a specialist, but my doctor insists he can handle my problem. Can a general practitioner really perform a heart transplant right in his office?

A. Hard to say, but considering that all you're risking is the $15 co-payment, there's no harm in giving him a shot at it.

~~~~~~~~~~

Q. Will health care be different in the next century?

A. No. But if you call right now, you might get an appointment by then.

Subject: RE: new procedures

We need allowances for
1) I am on the road a lot and approvals can be given by e-mail if required; cc'ed to Bob I will give Bob countermand authority if he believes there is a misunderstanding.
2) Bob is traveling a lot; approvals can be given by Bob to Frank directly however I reserve the right to countermand them if there is a misunderstanding.\
3) submission of invoices and receipts by e-mail is allowed; paper is to follow.
3.1) certain regular vendors can be managed by website/e-mail, specifically,
Oxford, Verizon, American Express, con Edison, Con Edison solutions, sprint, RCN, etc. etc.
We can discuss that in detail later, but at some point, it needs to be done.
Insurance billing is still payable even if the bill is not posted; we need to allow for that.
4) when I am on the road I will e-mail receipts to Frank for posting. Frank can print things out if needed.
4.1) bills and account payable should be e-mailed with copies of the bills attached. This is to prevent Bob or myself from approving things blindly.
Any payment decision should have full support appended both in paper for paper presentment or e-mail presentment.
NO GUESSING AT ANY TIME/POINT in the PROCESS.
5) Frank should be courteous and not upset vendors when they call regarding payment and reconciliation of balances.
We have an emergency problem with Webworqs cutting us off Friday. I promised her full payment by the end of next week.

6) We should stop using the burgundy CASI INC NIST account as we are running out of checks and I don't want to order more. I have to shut down the account

Subject: Organization and Shareholders/Partners of CASI LLC

Dear Freddie and Joel;

We have the Dept of Commerce Inspector General's office here and we need, ASAP, details for her e-mailed to myself (karron@casi.net); Fax it out for the morning, I expect to have it back up later today.

This needs to be on letterhead, blue pen signed and followed up by surface mail to me.

1)Governing Body of CASI LLC

Who is the managing partner ?
Who is the senior partner ?

I expect that I fill the above rolls.

2) List of Partners and status as to Active or Passive and percentage of ownership.

1) D B Karron Active 95 % (not precisely accurate, I issued the certificates in error)
2) A B Karron Passive 2.5% (?)
3) M B Karron Passive 2.5 %
4) J Bernstein Passive 2.5 %
5) F Miller Passive 2.5 %
6) L Goldberg Passive 2.5 %
7) E Gurfein Passive 2.5 %

The above is my recollection from memory, and F Miller had noted when I did the initial certificates of participation for the partnership I got the total wrong and the certs needed to be re-issued.
Since we are not at that point, the certificates need to be re-issued such that there total is 100 %.

4) Statement of legal determination permitting CASI (the corporation) to continue to perform project objectives.

I saw a memo on this, but specifically we need a legal basis to operate as CASI INC all respects or limited respects until some point yet to be defined.

5) Operating agreement of CASI LLC

6) Articles of Organization of CASI LLC

Please prepare these documents and e-mail me adobe .pdf and or messenger/mail hard copy.

This is required for both our regular NIST audit and the special Inspector General representative, Belinda Reilly, who is staying with us until next Friday.

Please give me positive acknowledgement of this note by return mail and when the material will ready for delivery to the Inspector General's representative.

Cheers!

Subject: OIG Audit

The kick-off meeting will be at Dr. Karron's Office at 10AM on Wednesday morning.
I would think the meeting would last about 2 hours and I propose the following agenda.....

Also, I suggest we meet at 9AM to ensure we have a little time to get our ducks in order.

10:00-10:15	Introductions	Dr. Karron
10:15-10:45	Scope Review	Belinda Riley, OIG
10:45-11:30	Project Review	Dr. Karron
11:30-12:00	Q&A/Closing	Bob Benedict

>From this point on we will be on Belinda's dime. We'll do our best to provide what she's asked for in her scope letter and we'll do it in a timely manner.

I'm still not sure if she's going to do a random sample review or a 100% review of our data, but we should be ready to go in either direction.

Doc, you should have hard copies of the following ready for Belinda...

1) Copies of the Award and all amendments with attached Ts and Cs.

2) Hard copies of all correspondence/letters that have been sent to NIST and those received from NIST.

3) All reports you've sent to NIST, technical and financial.

4) Frank/Joan, we'll need to decide which ledger data format Belinda will use as her audit base and have it ready for her. Joan, have you sent Doc copies of all the signed time sheets you've received? If not, could you please do so? The rest of the supporting documentation in this area will depend on what, specifically, Belinda wants to see. Doc and I will have to go through PaperPort to find the back-up as requested since most of this I would expect is not current.

5) I'll bring the latest org chart and Procedures/Benefits documents.

6) Doc, you'll need to provide a complete listing of all CASI employees, since the beginning of the project.

7) A listing of all subcontractors with their respective assignements.

8) Joan, you'll provide Belinda with any audit work papers and I'll continue to try to get the audit work papers from Jill Feldman.

9) Doc, you'll need to have a list of the board members.

10)Matt, you'll need to have available our latest equipment inventory list.

Get to bed early Tuesday night, for all you late night folks, 'cause 9AM Wednesday will come early and we'll all have to be bright-eyed by 10AM.

Thanks and I'll see you all Wednesday.

Received your voice mail re time sheets.

I am quite sure that I filled out time sheets for every pay period. I believe they were given to Charles or Nicki. Because I believe that they were all completed, I would be willing to attest to working 30 plus hours per week for any period in question. I would not be willing to give the daily hours worked, because I don't remember the hours/days and any notes related to that were in the CASI computer that I returned to you. Should those originals turn up and be at odds with any new data re hours/days, it could only cause confusion/problems.

For how many periods are you lacking time sheets?

Subject: computer literacy

Dear Bob;

We need you to come up to speed with the CASI computer conventions; Joan has offered to give you Quick Books tutorials and you need to learn how to make reports and manage basic operations without increasing CASI costs by asking Matt and Frank to do everything for you; as I am protecting their time and costs, I end up doing it. Same with your computer / laptop issues.

Also, the templates you gave us to run for timesheets and expense reimbursements won't run with our security setting, as the macros in the spreadsheets are not digitally signed and all of our Office Macros must be digitally signed in order to run at CASI.

This is because of problems with our exposure to the internet, we have a very high level of security in effect regarding attachments and macros.

Dear Bob;

Please be careful to be in close touch with Joan; she has complained to me that you are unavailable and don't return her calls.

I am concerned because you are not carefully reading your e-mails and keeping in touch with the current pressing business.

I will try to keep my e-mails short and brief.

Joan, I was up all night with rebuilding our computer alcove for the winter and getting our servers back online.

I had a job interview today, and I have not had a chance to look up your papers.

I will send a letter with regard to Ferrand.

I will get you the ATG invoices and a letter.

RE: Margret D. Ferrand

Dear Ms. Hayes;

This letter is in response to your telephone call of Tuesday last regarding backup documentation on D. Ferrand payments made with NIST funds in Year 1 Specifically you had asked for 12 invoices for Ferrand. Ferrand did not bill monthly. She generally was paid weekly as both a program contractor and non program contractor.

Ms. Ferrand had worked for CASI for many years in multiple capacities. She started with me at in 1995 as my office and home cleaning contractor. She qualified as a contractor because I did not provide direct supervision, she came and went as she pleased, and had keys to my office/apartment. She purchased supplies as needed and I reimbursed her for her out of pocket costs. Her tasks included cleaning and cooking. As is CASI policy, I endeavor to promote from within my staff, I have asked her to do more than housekeeping.

She is bright and has a mathematical aptitude. I soon found out she knew how to reconcile checking accounts, and she did my reconciliations and served as junior bookkeeper and bookkeeper's assistant. Further, she had some facility with the computer and learned our paperless Paperport filing software and our filing conventions. She also scanned and filed papers for CASI.

With the start of the ATP-NIST program, she was paid approximately 100$ generally every week for from NIST program as well as funds from my personal account. She would clean on weekends and would come in during the week to scan and file papers. Considering the heavy useage of my apartment due to the number of program employees here, frequently round the clock I decided that some allocation of her cleaning costs could be made.

I can provide a list of her work products, specifically directories of scanned program invoices and research papers, by date performed and items scanned and filed should you wish more detailed support.

I can also provide copies of canceled personal checks in payment of her cleaning activities.

If you need further backup, we can research the bills entered on her behalf and I can provide a list of her days of office work and her days of cleaning work, program work performed as well as non program casi work performed.

Sincerely,

Dr. Karron

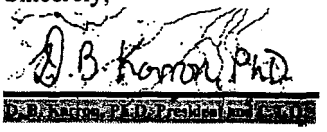
Dear Joan Hayes;

Please disregard the previous two notices from my partner and attorney, Ms. Frederica Miller, ESQ.
She is being unnecessarily hot headed and inflammatory.
Please accept my sincere apologizes.
I trust that we can get past all of the tensions of getting this task completed while the grant is suspended.

I will meet with you at a time and place of your choosing, to provide the vital information you need to complete this audit report.

I expect this audit report to be submitted to NIST ATP as soon as possible for overnight delivery to NIST with a copy to myself. I stand ready, willing, able to drive up to your office and do whatever is required to make this project completed.

Sincerely,



Dr. Karron

> The P&L that is needed is from the same report that was given to Belinda for audit purposes. It is a canned report, and it should be generated from the same database (ledger) that was presented to Belinda. You can run the P&L for the individual periods needed (10/1/02 to 12/31/02 and 1/1/03 to 3/31/03). Once the report is run, you can "drill-down" on each line item to see the transactional level detail that makes up each account. I suggest you use the collapsed version of the report for this purpose, as the expanded version has too much detail to be understandable for budget/reporting purposes. It is much easier to work from Quick Books (due

to the drill down feature) than to work from a paper report.

Frank provided a copy of the ledger on Thursday. Do you want me to send you a copy?

Subject: IMPORTANT! Request from joan

Doc,

Just got off the phone with Joan Hayes.

These are her requests.

1) She has scheduled a meeting April 23, 2003 Wed (Next wed) to include Doctor Karron, Bob Benedict and others at her office in NYC.

2) Needs the following items shipped to her westchester office on or before Saturday 4/19/2003. So make sure you specify saturday delivery if it's shipped out on friday.

a) CD with our quickbooks data on it. The books should include payment of 4/18 paychecks.

b) Voided Check from EACH New Bank Accounts. The checks should NOT have a DBA on them and should be from CASI LLC.

c) Interpay blue forms should be filled out and signed by each employee. Matt Rothman, Jim Cox, DB Karron and Bob Benedict. If we don't have interpay blue forms then we a faxed blank form or downloaded form is also aceptable.

d) South Carolina Payroll forms should be filled out and sent to JOAN in this packet. do NOT send the forms to south carolina.

3) Checks for new accounts should be handed to Ken Jackson at the April 23,2003 meeting.

Re: Retainer Agreement

Dear Dan:

Enclosed is my revised retainer agreement, as we discussed. Please sign and return the duplicate to me.

If you have any additions to the contract, please call me. Do not make any changes to the agreement.

If you are able to send me an advance on my bill, I would appreciate that. I look forward to working with you. Once again, congratulations on the award!

Sincerely,

Frederica L. Miller

Re: Retainer Agreement

Dear Dr. Karron:

This letter will confirm our understanding that you have formally retained FREDERICA L. MILLER, ESQ. to represent Computer Aided Surgery, Inc, (hereinafter CASI) in the performance of general legal work, including obtaining a contract with Elisha Gurfein, The City College of New York and other entities and individuals, at your request. My fee will be $200.00 per hour. Please note that this fee does not include outside services or costs that may arise from time-to-time in connection with legal representation. I agree to obtain your permission before incurring significant costs on behalf of CASI. Please note that failure to pay my fee on a timely basis will be grounds for me to withdraw as CASI's attorney.

It is understood that payment of my fee is not contingent upon CASI receiving federal or state funding. This retainer agreement supercedes an agreement between us dated October 16, 2001.

It is impossible to determine in advance the amount of time that will be required to perform these tasks. I will use my best judgment to determine the amount of time to spend on these matters. I will keep you fully informed of important events that take place. I will send you periodic bills that explain the legal work performed.

You acknowledge that you have read this Retainer and understand its terms. Please sign below and return a copy to me. A duplicate is being provided to you. If you have any questions, please do not hesitate to telephone me.

Very truly yours,

Frederica L Miller

Frederica L. Miller

THE FOREGOING RETAINER AGREEMENT BETWEEN FREDERICA L. MILLER, ESQ. AND CASI IS UNDERSTOOD AND AGREED TO:

**** THIS ENDS THE SUMMARY PORTION OF YOUR STATEMENT ****

To our Small Business Checking and Money Market Customers

We've made some changes to both Business Checking and Business Money Market Accounts as outlined below. These changes are effective 11/30/02.
-The Earnings Credit Rate (ECR) paid on Business Checking will now be based on $.15 per $100 of monthly average collected balances less a 10% federal reserve requirement.
-Interest rates on Business Money Market Accounts will now be earned based on the following two relationship balance tiers: under $200,000 and balances $200,000 and above. Rates for linked Money Market Accounts and BusinessPlus customers will be higher for both balance tiers. If you have any questions, please call 1-800-Chase38 or stop by your Chase branch.

Important Information

Your combined Business Banking balances in September totaled $37,709.52.

Analysis Fee Explanation

Your account was not charged an analysis fee based on your activity and balances during the period 09/01 - 09/30. Below is a summary of your activity in the following account(s):
131-0682996-65
131-0758735-65

Because your combined Business Banking balances exceeded $ 5,000.00 for the period 09/01 - 09/30, your Business Checking balances received an earnings credit which exceeded your charges.

Services Eligible to be Offset By Earnings Credit

Service	Volume	Price/Unit	Total	Service	Volume	Price/Unit	Total
Chase Chk Cashed	1	$ 3.00	3.00	Deposit Ticket	2	$ 0.20	0.40
Check Deposited	2	$ 0.20	0.40	Check Paid	56	$ 0.20	11.20
Total Itemized Service Charges							15.00
Monthly Maintenance Charge							10.00
Total Charges Offset By Earnings Credit							**25.00**

With combined Business Banking balances of $ 40,000.00 or more, you will avoid the monthly maintenance charge.

Analysis Fee Explanation

Your account was not charged an analysis fee based on your activity and balances during the period 12/01 - 12/31. Below is a summary of your activity in the following account(s):
131-0682996-65
131-0758735-65

Because your combined Business Banking balances exceeded $ 5,000.00 for the period 12/01 - 12/31, your Business Checking balances received an earnings credit which exceeded your charges.

**** THIS ENDS THE SUMMARY PORTION OF YOUR STATEMENT ****

Important Information

Your combined Business Banking balances in May totaled $56,570.92. With $ 100,000.00 or more in combined Business Banking balances, you will earn Premium Rates on linked Business Money Market Accounts.

Personal accounts are subject to the Deposit Account Agreement. Business accounts are subject to the Terms and Conditions for Business Accounts. Please note the rules regarding the time within which you must notify JPMorgan Chase Bank (the "Bank") of any error or discrepancies. Call us at the phone number printed on the front of this statement, or write to us at: P.O. Box 32Xx, New Castle Park, NY 11042.

WorldWide Consumer Bank customers, please write to us at: WWBPHELP, P.O. Box 29779, Houston, TX 77224-9779.

Accounts held at the Bank, including checking, savings, CDs and money market accounts, are FDIC insured. Call us for full details and limitations of FDIC coverage.

How to Balance Your Checkbook

Items Outstanding

(checks and withdrawals not yet shown on your statement)

Number or Date	Amount
TOTAL	

1. Update your checkbook

A. Record in your checkbook/register all automatic transactions listed in your statement that you have not previously entered, including:

- any interest earned
- automatic deposits
- service charges
- automatic payments

B. Enter in your checkbook register any other transactions listed in your statement that you did not record, including:

- deposits
- checks paid
- ATM withdrawals
- phone transfers and payments

2. Adjust your statement balance.

A. ENTER your checking account closing balance shown on the front of this statement.		
B. ADD any deposits not yet shown on your statement.	+	
C. TOTAL (A and B above).		
D. SUBTRACT total items outstanding (from chart at left)	−	
E. BALANCE (should equal your checkbook balance).		

If you have any questions about your accounts, call the customer service number on the front of your statement.

Securities

Securities (including mutual funds) are not bank deposits and are not FDIC insured nor are they obligations of or guaranteed by the Bank or Chase Investment Services Corp. (CISC) or their affiliates. Securities (including mutual funds) involve investment risks, including the possible loss of the principal amount invested.

The distributor of the JPMorgan Funds is J.P. Morgan Fund Distributors, Inc. which is not affiliated with JPMorgan Chase Bank. JPMorgan Chase Bank and its affiliates receive compensation from the JPMorgan Funds for providing services.

JPMorgan Select Shares of the Connecticut Daily Tax Free Income Fund, Inc. and JPMorgan Select Shares of the New Jersey Daily Municipal Income Fund, Inc., are not part of, or affiliated with the JPMorgan Funds. Reich & Tang Distributors, Inc. and New England Investment Companies L.P., which are unaffiliated with JPMorgan Chase Bank, are the funds' distributor and investment advisor, respectively.

Securities transactions may be through CISC, J.P. Morgan Fund Distributors, Inc. or Reich & Tang Distributors, Inc., each a member of NASD. CISC and Reich & Tang Distributors, Inc. are members of SIPC.

Overdraft Reserve

How we Determine the Average Daily Balance

To calculate your average daily balance, we add the beginning balance in your account each day and subtract any withdrawals or checks paid. Overdraft charges are not deducted. We then take the resulting daily balances for the statement period and divide the total by the number of days in the statement period.

Interest

Interest begins to accrue on the business day we receive credit for your deposit. Interest is calculated daily based on your collected balance. Interest is paid monthly.

Billing Errors

If you think your statement is wrong, or if you need more information about a transaction on your statement, write to us on a separate sheet at 300 White Clay Center Drive, Newark, DE 19711, Attn: Customer Service Department. We must hear from you no later than 60 days after we sent you the first statement on which the error or problem appeared. You can telephone, but doing so will not preserve your rights. In your letter, give us the following information: Name, account number, dollar amount of suspected error, description of the error and explain, if you can, why you believe there is an error. If you need more information describe the item you are unsure about. You do not have to pay any amount in question while we are investigating, but you are still obliged to pay the parts of your statement that are not in question. While we investigate your question, we cannot report you to any credit bureau or take any action to collect the amount you question.

Overdraft Reserve

How we Determine the Average Daily Balance

To calculate your average daily balance, we take the beginning balance of your account each day, add any new loans, subtract any payments or credits, unpaid finance charges, and any other charges. Then we add up the daily balances for the billing cycle (or statement period) and divide the total by the number of days in the billing cycle (or statement period).

Payments

Payments received by [illegible] before 5:00 p.m. on a business day will be credited to your account on the day we receive them. Payments received at other times will be credited on the next business day.

Billing Rights

If you think your statement is wrong, or if you need more information about a transaction on your statement, write to us on a separate sheet at 500 White Clay Center Drive, Newark, DE 19711, Attn: Consumer Loan Dept. (PCL). We must hear from you no later than 60 days after we sent you the first statement on which the error or problem appeared. You can telephone, but doing so will not preserve your rights. In your letter, give us the following information: Name, account number, dollar amount of suspected error, description of the error and explanation of why you believe it is an error. If you need more information, describe the item you are unsure about. You do not have to pay any amount in question while we are investigating, but you are still obliged to pay the parts of your statement that are not in question. While we investigate your question, we cannot report you as delinquent or take any action to collect the amount you question.

**** THIS ENDS THE SUMMARY PORTION OF YOUR STATEMENT ****

To our Small Business Checking and Money Market Customers

We've made some changes to both Business Checking and Business Money Market Accounts as outlined below. These changes are effective 11/30/02.
-The Earnings Credit Rate (ECR) paid on Business Checking will now be based on $.15 per $100 of monthly average collected balances less a 10% federal reserve requirement.
-Interest rates on Business Money Market Accounts will now be earned based on the following two relationship balance tiers: under $200,000 and balances $200,000 and above. Rates for linked Money Market Accounts and BusinessPlus customers will be higher for both balance tiers. If you have any questions, please call 1-800-Chase38 or stop by your Chase branch.

Important Information

Your combined Business Banking balances in September totaled $37,709.52.

Analysis Fee Explanation

Your account was not charged an analysis fee based on your activity and balances during the period 09/01 - 09/30. Below is a summary of your activity in the following account(s):
131-0682996-65
131-0758735-65

Because your combined Business Banking balances exceeded $ 5,000.00 for the period 09/01 - 09/30, your Business Checking balances received an earnings credit which exceeded your charges.

Services Eligible to be Offset By Earnings Credit

Service	Volume	Price/Unit	Total	Service	Volume	Price/Unit	Total
Chase Chk Cashed	1	$ 3.00	3.00	Deposit Ticket	2	$ 0.20	0.40

Analysis Fee Explanation

Your account was not charged an analysis fee based on your activity and balances during the period 08/01 - 08/31. Below is a summary of your activity in the following account(s):
131-0682996-65
131-0758735-65

Because your combined Business Banking balances exceeded $ 5,000.00 for the period 08/01 - 08/31, your Business Checking balances received an earnings credit which exceeded your charges.

Services Eligible to be Offset By Earnings Credit

Service	Volume	Price/Unit	Total	Service	Volume	Price/Unit	Total
Check Cash-Chase	2	$ 3.00	6.00	Deposit Ticket	5	$ 0.20	1.00
Check Deposited	5	$ 0.20	1.00	Check Paid	58	$ 0.20	11.60

Total Itemized Service Charges	19.60
Monthly Maintenance Charge	10.00
Total Charges Offset By Earnings Credit	**29.60**

With combined Business Banking balances of $ 40,000.00 or more, you will avoid the monthly maintenance charge.

**** THIS ENDS THE SUMMARY PORTION OF YOUR STATEMENT ****

To our Small Business Checking and Money Market Customers

We've made some changes to both Business Checking and Business Money Market Accounts as outlined below. These changes are effective 11/30/02.
-The Earnings Credit Rate (ECR) paid on Business Checking will now be based on $.15 per $100 of monthly average collected balances less a 10% federal reserve requirement.
-Interest rates on Business Money Market Accounts will now be earned based on the following two relationship balance tiers: under $200,000 and balances $200,000 and above. Rates for linked Money Market Accounts and BusinessPlus customers will be higher for both balance tiers. If you have any questions, please call 1-800-Chase38 or stop by your Chase branch.

Important Information

Your combined Business Banking balances in September totaled $37,709.52.

Analysis Fee Explanation

Your account was not charged an analysis fee based on your activity and balances during the period 09/01 - 09/30. Below is a summary of your activity in the following account(s):
131-0682996-65
131-0758735-65

Because your combined Business Banking balances exceeded $ 5,000.00 for the period 09/01 - 09/30, your Business Checking balances received an earnings credit which exceeded your charges.

Services Eligible to be Offset By Earnings Credit

Service	Volume	Price/Unit	Total	Service	Volume	Price/Unit	Total
Chase Chk Cashed	1	$ 3.00	3.00	Deposit Ticket	2	$ 0.20	0.40
Check Deposited	2	$ 0.20	0.40	Check Paid	56	$ 0.20	11.20

Total Itemized Service Charges	15.00
Monthly Maintenance Charge	10.00
Total Charges Offset By Earnings Credit	**25.00**

With combined Business Banking balances of $ 40,000.00 or more, you will avoid the monthly maintenance charge.

Analysis Fee Explanation

Your account was not charged an analysis fee based on your activity and balances during the period 08/01 - 08/31. Below is a summary of your activity in the following account(s):
131-0682996-65
131-0758735-65

Because your combined Business Banking balances exceeded $ 5,000.00 for the period 08/01 - 08/31, your Business Checking balances received an earnings credit which exceeded your charges.

Services Eligible to be Offset By Earnings Credit

Service	Volume	Price/Unit	Total	Service	Volume	Price/Unit	Total
Check Cash-Chase	2	$ 3.00	6.00	Deposit Ticket	5	$ 0.20	1.00
Check Deposited	5	$ 0.20	1.00	Check Paid	58	$ 0.20	11.60

Total Itemized Service Charges	19.60
Monthly Maintenance Charge	10.00
Total Charges Offset By Earnings Credit	**29.60**

With combined Business Banking balances of $ 40,000.00 or more, you will avoid the monthly maintenance charge.

**** THIS ENDS THE SUMMARY PORTION OF YOUR STATEMENT ****

To our Small Business Checking and Money Market Customers

We've made some changes to both Business Checking and Business Money Market Accounts as outlined below. These changes are effective 11/30/02.
-The Earnings Credit Rate (ECR) paid on Business Checking will now be based on $.15 per $100 of monthly average collected balances less a 10% federal reserve requirement.
-Interest rates on Business Money Market Accounts will now be earned based on the following two relationship balance tiers: under $200,000 and balances $200,000 and above. Rates for linked Money Market Accounts and BusinessPlus customers will be higher for both balance tiers. If you have any questions, please call 1-800-Chase38 or stop by your Chase branch.

Important Information

Your combined Business Banking balances in September totaled $37,709.52.

Analysis Fee Explanation

Your account was not charged an analysis fee based on your activity and balances during the period 09/01 - 09/30. Below is a summary of your activity in the following account(s):
131-0682996-65
131-0758735-65

Because your combined Business Banking balances exceeded $ 5,000.00 for the period 09/01 - 09/30, your Business Checking balances received an earnings credit which exceeded your charges.

Services Eligible to be Offset By Earnings Credit

Service	Volume	Price/Unit	Total	Service	Volume	Price/Unit	Total

Analysis Fee Explanation

Your account was not charged an analysis fee based on your activity and balances during the period 01/01 - 01/31. Below is a summary of your activity in the following account(s):
131-0682996-65
131-0758735-65

Because your combined Business Banking balances exceeded $ 5,000.00 for the period 01/01 - 01/31, your Business Checking balances received an earnings credit which exceeded your charges.

Analysis Fee Explanation

Your account was not charged an analysis fee based on your activity and balances during the period 04/01 - 04/30. Below is a summary of your activity in the following account(s):
131-0682996-65
131-0758735-65

Because your combined Business Banking balances exceeded $ 5,000.00 for the period 04/01 - 04/30, your Business Checking balances received an earnings credit which exceeded your charges.

Services Eligible to be Offset By Earnings Credit

Service	Volume	Price/Unit	Total	Service	Volume	Price/Unit	Total
Deposit Ticket	3	$ 0.20	0.60	Check Paid	45	$ 0.20	9.00
Check Deposited	3	$ 0.20	0.60				

Total Itemized Service Charges	10.20
Monthly Maintenance Charge	10.00
Total Charges Offset By Earnings Credit	**20.20**

With combined Business Banking balances of $ 40,000.00 or more, you will avoid the monthly maintenance charge.

Your account was not charged an analysis fee based on your activity and balances during the period 06/01 - 06/30. Below is a summary of your activity in the following account(s):
131-0682996-65
131-0758735-65

Because your combined Business Banking balances exceeded $ 5,000.00 for the period 06/01 - 06/30, your Business Checking balances received an earnings credit which exceeded your charges.

Services Eligible to be Offset By Earnings Credit

Service	Volume	Price/Unit	Total	Service	Volume	Price/Unit	Total
Check Deposited	2	$ 0.20	0.40	Check Paid	45	$ 0.20	9.00
Deposit Ticket	2	$ 0.20	0.40				

Total Itemized Service Charges	9.80
Monthly Maintenance Charge	10.00
Total Charges Offset By Earnings Credit	**19.80**

With combined Business Banking balances of $ 40,000.00 or more, you will avoid the monthly maintenance charge.

**** THIS ENDS THE SUMMARY PORTION OF YOUR STATEMENT ****

To our Small Business Checking and Money Market Customers

We've made some changes to both Business Checking and Business Money Market Accounts as outlined below. These changes are effective 11/30/02.
-The Earnings Credit Rate (ECR) paid on Business Checking will now be based on $.15 per $100 of monthly average collected balances less a 10% federal reserve requirement.
-Interest rates on Business Money Market Accounts will now be earned based on the following two relationship balance tiers: under $200,000 and balances $200,000 and above. Rates for linked Money Market Accounts and BusinessPlus customers will be higher for both balance tiers. If you have any questions, please call 1-800-Chase38 or stop by your Chase branch.

Important Information

Your combined Business Banking balances in September totaled $37,709.52.

Analysis Fee Explanation

Your account was not charged an analysis fee based on your activity and balances during the period 09/01 - 09/30. Below is a summary of your activity in the following account(s):
131-0682996-65
131-0758735-65

Because your combined Business Banking balances exceeded $ 5,000.00 for the period 09/01 - 09/30, your Business Checking balances received an earnings credit which exceeded your charges.

Services Eligible to be Offset By Earnings Credit

Service	Volume	Price/Unit	Total	Service	Volume	Price/Unit	Total
Chase Chk Cashed	1	$ 3.00	3.00	Deposit Ticket	2	$ 0.20	0.40
Check Deposited	2	$ 0.20	0.40	Check Paid	56	$ 0.20	11.20

Total Itemized Service Charges	15.00
Monthly Maintenance Charge	10.00
Total Charges Offset By Earnings Credit	**25.00**

With combined Business Banking balances of $ 40,000.00 or more, you will avoid the monthly maintenance charge.

12/04	2,538.12	12/12	2,538.12				

Analysis Fee Explanation

An Analysis Fee of $39.65 was charged to your account on 12/02 based on your activity and balances during the period 11/01 - 11/30. Below is a summary of your activity in the following account(s):
131-0682996-65
131-0758735-65

Because your combined Business Banking balances exceeded $5,000.00 for the period 11/01 - 11/30, your Business Checking balances received an earnings credit which reduced your analysis fee.

Services Eligible to be Offset By Earnings Credit

Service	Volume	Price/Unit	Total	Service	Volume	Price/Unit	Total
Check Deposited	2	$ 0.20	0.40	Chase Chk Cashed	4	$ 3.00	12.00
Deposit Ticket	2	$ 0.20	0.40	Check Paid	68	$ 0.20	13.60

Total Itemized Service Charges	26.40
Monthly Maintenance Charge	30.00
Total Charges Before Earnings Credit	56.40
Less Earnings Credit on $ 11,165.87 of combined checking average collected balances	16.75
Analysis Fee for November	**39.65**

With combined Business Banking balances of $15,000.00 or more, you will pay a single monthly maintenance charge regardless of the number of linked accounts you have.

Analysis Fee Explanation

An Analysis Fee of $3.56 was charged to your account on 01/02 based on your activity and balances during the period 12/01 - 12/31. Below is a summary of your activity in the following account(s):
131-0682996-65
131-0758735-65

Because your combined Business Banking balances exceeded $5,000.00 for the period 12/01 - 12/31, your Business Checking balances received an earnings credit which reduced your analysis fee.

Services Eligible to be Offset By Earnings Credit

Service	Volume	Price/Unit	Total	Service	Volume	Price/Unit	Total
Chase Chk Cashed	2	$ 3.00	6.00	Deposit Ticket	5	$ 0.20	1.00
Check Deposited	5	$ 0.20	1.00	Check Paid	60	$ 0.20	12.00

Total Itemized Service Charges	20.00
Monthly Maintenance Charge	10.00
Total Charges Before Earnings Credit	30.00
Less Earnings Credit on $ 17,625.70 of combined checking average collected balances	26.44
Analysis Fee for December	**3.56**

With combined Business Banking balances of $40,000.00 or more, you will avoid the monthly maintenance charge.

Analysis Fee Explanation

An Analysis Fee of $19.50 was charged to your account on 02/03 based on your activity and balances during the period 01/01 - 01/31. Below is a summary of your activity in the following account(s):
131-0682996-65
131-0758735-65

Because your combined Business Banking balances exceeded $5,000.00 for the period 01/01 - 01/31, your Business Checking balances received an earnings credit which reduced your analysis fee.

Services Eligible to be Offset By Earnings Credit

Service	Volume	Price/Unit	Total	Service	Volume	Price/Unit	Total
Bank Conf Form	1	$ 25.00	25.00	Check Deposited	1	$ 0.20	0.20
Deposit Ticket	1	$ 0.20	0.20	Check Paid	64	$ 0.20	12.80

Total Itemized Service Charges	38.20
Monthly Maintenance Charge	10.00
Total Charges Before Earnings Credit	48.20
Less Earnings Credit on $ 19,131.37 of combined checking average collected balances	28.70
Analysis Fee for January	**19.50**

With combined Business Banking balances of $40,000.00 or more, you will avoid the monthly maintenance charge.

Analysis Fee Explanation

An Analysis Fee of $21.68 was charged to your account on 03/03 based on your activity and balances during the period 02/01 - 02/28. Below is a summary of your activity in the following account(s):
131-0682996-65
131-0758735-65

Because your combined Business Banking balances exceeded $5,000.00 for the period 02/01 - 02/28, your Business Checking balances received an earnings credit which reduced your analysis fee.

Services Eligible to be Offset By Earnings Credit

Service	Volume	Price/Unit	Total	Service	Volume	Price/Unit	Total
Check Paid	53	$ 0.20	10.60				

Total Itemized Service Charges	10.60
Monthly Maintenance Charge	30.00
Total Charges Before Earnings Credit	40.60
Less Earnings Credit on $ 12,610.00 of combined checking average collected balances	18.92
Analysis Fee for February	**21.68**

With combined Business Banking balances of $15,000.00 or more, you will pay a single monthly maintenance charge regardless of the number of linked accounts you have.

Analysis Fee Explanation

An Analysis Fee of $31.09 was charged to your account on 05/01 based on your activity and balances during the period 04/01 - 04/30. Below is a summary of your activity in the following account(s):
131-0682996-65
131-0758735-65

Because your combined Business Banking balances exceeded $5,000.00 for the period 04/01 - 04/30, your Business Checking balances received an earnings credit which reduced your analysis fee.

Services Eligible to be Offset By Earnings Credit

Service	Volume	Price/Unit	Total	Service	Volume	Price/Unit	Total
Chase Chk Cashed	1	$ 3.00	3.00	Check Paid	62	$ 0.20	12.40

Total Itemized Service Charges	15.40
Monthly Maintenance Charge	30.00
Total Charges Before Earnings Credit	45.40
Less Earnings Credit on $ 9,542.97 of combined checking average collected balances	14.31
Analysis Fee for April	**31.09**

With combined Business Banking balances of $15,000.00 or more, you will pay a single monthly maintenance charge regardless of the number of linked accounts you have.

ANNOUNCING IMPROVED CHECK COVERAGE FOR SMALL BUSINESS CUSTOMERS!

We've improved Chase Check Coverage to better meet your business checking needs.

- Increased overdraft protection by linking up to nine protecting accounts. You specify the order of linked accounts, so needed funds are moved (up to available balances) according to your pre-set instructions.
- Overdraft protection now includes debit card transactions
- Immediate access to ATM-deposited checks up to your daily ATM withdrawal limit and available balances in your checking account
- Same day check writing against deposited funds
- Sole proprietors can link both business and personal accounts
- Pay only a $5.00 transaction fee each time funds are swept into your checking account to cover an overdraft

Enroll in Chase Check Coverage today. Just stop by a branch and speak to a Small Business Representative, call Small Business ServiceLine℠ at 1-800-CHASE38, or visit us online at: **chase.com/smallbusiness**

B. ADD any deposits not yet shown on your statement. + [ ]

C. TOTAL (A and B above). [ ]

D. SUBTRACT total items outstanding (from chart at left). − [ ]

E. BALANCE (should equal your checkbook balance). [ ]

If you have any questions about your accounts, call the customer service number on the front of your statement.

Attention Business Banking Checking Customers

Computer Aided Surgery Inc

Your next statement will reflect a change in the earnings credit rate. Effective August 1, you'll earn $.108 per $100 of monthly average collected balances. Your earnings credit offsets monthly maintenance, activity, and service fees, and all linked Business Banking Checking accounts contribute towards the monthly average collected balance.

ANNOUNCING IMPROVED CHECK COVERAGE FOR SMALL BUSINESS CUSTOMERS!

We've improved Chase Check Coverage to better meet your business checking needs.

- Increased overdraft protection by linking up to nine protecting accounts. You specify the order of linked accounts, so needed funds are moved (up to available balances) according to your pre-set instructions.
- Overdraft protection now includes debit card transactions
- Immediate access to ATM-deposited checks up to your daily ATM withdrawal limit and available balances in your checking account
- Same day check writing against deposited funds
- Sole proprietors can link both business and personal accounts
- Pay only a $5.00 transaction fee each time funds are swept into your checking account to cover an overdraft

Enroll in Chase Check Coverage today. Just stop by a branch and speak to a Small Business Representative, call Small Business ServiceLine℠ at 1-800-CHASE38, or visit us online at: **chase.com/smallbusiness**

MEMORANDUM

DATE: March 24, 2005

REF#: 2789-21 mar05

IN REFERENCE TO THE ABOVE MENTIONED WORK ORDER, WE WERE UNABLE TO COMPLETE YOUR REQUEST FOR THE FOLLOWING REASON(S):

☒ Problem with microfiche or microfilm (fogged, missing, etc.)

☐ Requested item is an electronic entry. Please contact the source provided below for more information.
Source Name _____ Phone Number_____.

☐ Requested item was not filmed at the sequence number given. A list of the transactions is attached to indicate location in the deposit.

☐ Unable to provide copies of your statement(s) due to system problems. Attached is a copy of the transactions on your account for the month(s) of _____ requested.

☐ No statement(s) cycled between dates requested.
Beginning date _____
Ending date _____

☐ Please contact Pawling for Heritage Chase sequences with a beginning digit of 7. The Ammo Report to be used is PAC$UN20$. Sequence numbers are attached.

☐ Please input a "ME03" in One Stop/System One to obtain more information about your item in question. The Micrographics Department is unable to provide any information on this item.

☐ Contact Hibernia Bank for statements that cut after account was sold on May 21,1999.

☐ For faster service input a "PH" request on System One or One Stop using the 1111_____-sequence number(s) provided. The 1111_____-sequence number will allow the case to be routed to the correct area (RSC department.) If any other sequence number is used, the "PH" request will again be routed to the Micrographics department, which will further delay your request. You must use a PH05 or PH08 function. Avoid using the PH01 function, this will route to Micrographics instead of the Retail System Control area.

E. BALANCE (should equal your checkbook balance).		

If you have any questions about your accounts, call the customer service number on the front of your statement.

Attention Business Banking Checking Customers

Computer Aided Surgery Informatics

Your next statement will reflect a change in the earnings credit rate. Effective August 1, you'll earn $.108 per $100 of monthly average collected balances. Your earnings credit offsets monthly maintenance, activity, and service fees, and all linked Business Banking Checking accounts contribute towards the monthly average collected balance.

Analysis Fee Explanation

Your account was not charged an analysis fee based on your activity and balances during the period 07/01 - 07/31. Below is a summary of your activity in the following account(s):
131-0771331-65
131-0771331-66

Because your combined Business Banking balances exceeded $5,000.00 for the period 07/01 - 07/31, your Business Checking balances received an earnings credit which exceeded your charges.

Services Eligible to be Offset By Earnings Credit

Service	*Volume*	*Price/Unit*	*Total*	*Service*	*Volume*	*Price/Unit*	*Total*
Deposit Ticket	1	$ 0.20	0.20	Check Paid	12	$ 0.20	2.40
Check Deposited	1	$ 0.20	0.20				

Total Itemized Service Charges	2.80
Monthly Maintenance Charge	10.00
Total Charges Offset By Earnings Credit	**12.80**

With combined Business Banking balances of $40,000.00 or more, you will avoid the monthly maintenance charge.

ANNOUNCING IMPROVED CHECK COVERAGE FOR SMALL BUSINESS CUSTOMERS!

We've improved Chase Check Coverage to better meet your business checking needs.

- Increased overdraft protection by linking up to nine protecting accounts. You specify the order of linked accounts, so needed funds are moved (up to available balances) according to your pre-set instructions.
- Overdraft protection now includes debit card transactions
- Immediate access to ATM-deposited checks up to your daily ATM withdrawal limit and available balances in your checking account
- Same day check writing against deposited funds
- Sole proprietors can link both business and personal accounts
- Pay only a $5.00 transaction fee each time funds are swept into your checking account to cover an overdraft

Enroll in Chase Check Coverage today. Just stop by a branch and speak to a Small Business Representative, call Small Business ServiceLine℠ at 1-800-CHASE38, or visit us online at: **chase.com/smallbusiness**

Analysis Fee Explanation

An Analysis Fee of $ 7.54 was charged to your account on 11/01 based on your activity and balances during the period 10/01 - 10/31. Below is a summary of your activity in the following account(s): 131-0682996-65

Because your combined Business Banking balances exceeded $ 5,000.00 for the period 10/01 - 10/31, your Business Checking balances received an earnings credit which reduced your analysis fee.

Services Eligible to be Offset By Earnings Credit

Service	*Volume*	*Price/Unit*	*Total*	*Service*	*Volume*	*Price/Unit*	*Total*
Check Deposited	2	$ 0.20	0.40	Check Paid	31	$ 0.20	6.20
Deposit Ticket	2	$ 0.20	0.40				

Total Itemized Service Charges	7.00
Monthly Maintenance Charge	15.00
Total Charges Before Earnings Credit	22.00
Less Earnings Credit on $ 9,640.80 of combined checking average collected balances	14.46
Analysis Fee for October	**7.54**

With combined Business Banking balances of $ 15,000.00 or more, you will pay a single monthly maintenance charge regardless of the number of linked accounts you have.

**** THIS ENDS THE SUMMARY PORTION OF YOUR STATEMENT ****

Apply for a Business Revolving Credit Line today.

With rates as low as they are today, here's the perfect opportunity to give your business a boost. Apply for a Business Revolving Credit Line today. It's a flexible, easily accessible line of credit with a fixed repayment period. Use it when you need to pay taxes, cover temporary cash-flow needs, finance receivables, purchase inventory or take advantage of seasonal opportunities.

Important Information

Your combined Business Banking balances in January totaled $31,384.38.

Your combined Business Banking balances in July totaled $34,329.38.

131-00131-B015-00131- -023-5-02-3CB - Y - Primary Account Number: 131-0682996-65

Business Checking

131-0682996-65

COMPUTER AIDED SURGERY INC

Summary

	Number	Amount
Opening Balance		184.57
Deposits and Credits	2	21,000.00
Withdrawals and Debits	1	25.00
Checks Paid	2	20,800.00
Ending Balance		**359.57**

Deposits and Credits

Date	Description	Amount
08/13	Deposit	20,000.00
08/16	Deposit	1,000.00
Total		**21,000.00**

Withdrawals and Debits

Date	Description	Amount
08/14	Insufficient Funds Service Fee	25.00
Total		**25.00**

Checks Paid

Check	Date Paid	Amount	Check	Date Paid	Amount	Check	Date Paid	Amount
3195	08/14	800.00	3196	08/13	20,000.00			
Total (2 checks)								**20,800.00**

** indicates gap in check sequence*

Daily Balances

Date	Balance	Date	Balance	Date	Balance
08/13	184.57	08/14	640.43 -	08/16	359.57

Analysis Fee Explanation

Your account was not charged an analysis fee based on your activity and balances during the period 07/01 - 07/31. Below is a summary of your activity in the following account(s):
131-0682996-65
131-0758735-65

Because your combined Business Banking balances exceeded $ 5,000.00 for the period 07/01 - 07/31, your Business Checking balances received an earnings credit which exceeded your charges.

Services Eligible to be Offset By Earnings Credit

Service	Volume	Price/Unit	Total	Service	Volume	Price/Unit	Total
Check Cash-Chase	1	$ 3.00	3.00	Check Paid	62	$ 0.20	12.40
Total Itemized Service Charges							15.40
Monthly Maintenance Charge							10.00
Total Charges Offset By Earnings Credit							**25.40**

With combined Business Banking balances of $ 40,000.00 or more, you will avoid the monthly maintenance charge.
